

Journal of Astrophysics and Astronomy

Author Index to Volume 2

- ABHYANKAR, K. D. An analysis of the orbital periods of some eclipsing binaries suspected to be in the pre-main sequence contraction phase of evolution. *T. Panchatsaram and K. D. Abhyankar. 2, 29 (1981)*
- ABHYANKAR, K. D. A model of the Algol type close binary TT Hydrae. *A. G. Kulkarni and K. D. Abhyankar. 2, 119 (1981)*
- AHMED, F. Changes in sizes and shapes of spherical galaxies in head-on collisions. *F. Ahmed and S. M. Alladin. 2, 349 (1981)*
- ALLADIN, S. M. Changes in sizes and shapes of spherical galaxies in head-on collisions. *F. Ahmed and S. M. Alladin. 2, 349 (1981)*
- BAHNG, J. D. R. Photographic spectrophotometry of selected bright B and Be stars. *E. M. Hendry and J. D. R. Bahng. 2, 141 (1981)*
- BAPPU, M. K. V. Mass segregation in globular clusters. *K. K. Scaria and M. K. V. Bappu. 2, 215 (1981); corrigendum. 2, 439 (1981)*
- BETTWIESER, E. Interstellar masers: The influence of the geometrical shape on the radiation properties. *2, 187 (1981)*
- CHAKRABORTY, D. K. General relativistic analysis of structure and stability of charged fluid disks around compact objects. *A. R. Prasanna and D. K. Chakraborty. 2, 1 (1981)*
- CHAKRABORTY, D. K. Structure and stability of rotating fluid disks around massive objects. I. Newtonian formulation. *D. K. Chakraborty and A. R. Prasanna. 2, 421 (1981)*
- DWARAKANATH, K. S. The structure of the Cygnus Loop at 34.5 MHz. *Ch. V. Sastry, K. S. Dwarkanath and R. K. Shevgaonkar. 2, 339 (1981)*
- EDMUNDS, M. G. A doppler theory of quasars. *J. V. Narlikar and M. G. Edmunds. 2, 289 (1981)*
- GOKHALE, M. H. The two components in the distribution of sunspot groups with respect to their maximum areas. *M. H. Gokhale and K. R. Sivaraman. 2, 365 (1981)*
- GOSWAMI, J. N. Long term variations in solar flare activity. *J. N. Goswami, R. Jha and D. Lal. 2, 201 (1981)*
- GRIFFIN, R. F. A Spectroscopic orbit for 26 comae. *2, 115 (1981); corrigendum. 2, 2131 (1981)*
- GRIFFIN, R. F. A Spectroscopic orbit for HD 115968. *2, 309 (1981)*
- HASAN, S. S. Time-dependent interaction of granules with magnetic flux tubes. *P. Venkatakrishnan and S. S. Hasan. 2, 133 (1981)*
- HENDRY, E. M. Photographic spectrophotometry of selected B and Be stars. *E. M. Hendry and J. D. R. Bahng. 2, 141 (1981)*

- HODGE, P. W. Anomalous giants in Magellanic Cloud clusters. **2**, 161 (1981)
- JHA, R. Long term variations in solar flare activity. *J. N. Goswami, R. Jha and D. Lal* **2**, 201 (1981)
- KAPAHI, V. K. Extragalactic sources with one-sided radio structure. **2**, 43 (1981)
- KOCHHAR, R. K. On the relationship between pulsars and supernova remnants. **2**, 87 (1981)
- KRISHAN, V. Pulsating radio emission at decametre wavelengths from the sun. *Ch. V. Sastry, V. Krishan and K. R. Subramanian*. **2**, 59 (1981)
- KRISHAN, V. Plasma heating in a sheared magnetic field. **2**, 379 (1981)
- KULKARNI, A. G. A Model of the Algol type close binary TT Hydrae. *A. G. Kulkarni and K. D. Abhyankar*. **2**, 119 (1981)
- LAL, D. Long term variations in solar flare activity. *J. N. Goswami, R. Jha and D. Lal* **2**, 201 (1981)
- LOW, B. C. Equilibrium configuration of the magnetosphere of a star loaded with accreted magnetized mass. *Y. Uchida and B. C. Low*. **2**, 405 (1981)
- MALLIK, D. C. V. Current rate of nucleosynthesis and its implications. **2**, 171 (1981)
- MOHAN RAO, D. Photon escape probabilities in expanding atmospheres. *A. Peraiah, K. E. Rangarajan and D. Mohan Rao*. **2**, 81 (1981)
- NAGENDRA, K. N. Optical depth effects on the formation of spectral lines in rotating and expanding spherical atmospheres. *A. Peraiah, G. Raghunath and K. N. Nagendra*. **2**, 277 (1981)
- NARAYAN, R. A new look at pulsar statistics—birthrate and evidence for injection. *M. Vivekanand and R. Narayan*. **2**, 315 (1981)
- NARLIKAR, J. V. A doppler theory of quasars. *J. V. Narlikar and M. G. Edmunds*, **2**, 289 (1981)
- PANCHATSARAM, T. An analysis of the orbital periods of some eclipsing binaries suspected to be in the pre-main sequence contraction phase of evolution. *T. Panchatsaram and K. D. Abhyankar*. **2**, 29 (1981)
- PERAIAH, A. Photon escape probabilities in expanding atmospheres. *A. Peraiah, K. E. Rangarajan and D. Mohan Rao*. **2**, 81 (1981)
- PERAIAH, A. Effects of redistribution with dipole scattering on line source functions. *A. Peraiah and K. E. Rangarajan*. **2**, 245 (1981)
- PERAIAH, A. Optical depth effects on the formation of spectral lines in rotating and expanding spherical atmospheres. *A. Peraiah, G. Raghunath and K. N. Nagendra*. **2**, 277 (1981).
- PRASANNA, A. R. General relativistic analysis of structure and stability of charged fluid disks around compact objects. *A. R. Prasanna and D. K. Chakraborty*. **2**, 1 (1981)
- PRASANNA, A. R. Structure and stability of rotating fluid disks around massive objects. I. Newtonian formulation. *D. K. Chakraborty and A. R. Prasanna*. **2**, 421 (1981)
- RADHAKRISHNAN, V. The structure of integrated pulse profiles; corrigendum. *M. Vivekanand and V. Radhakrishnan*. **2**, 213 (1981)
- RAGHUNATH, G. Optical depth effects on the formation of spectral lines in rotating and expanding spherical atmospheres. *A. Peraiah, G. Raghunath and K. N. Nagendra*. **2**, 277 (1981)

- RANGARAJAN, K. E. Photon escape probabilities in expanding atmospheres. *A. Peraiah, K. E. Rangarajan and D. Mohan Rao.* **2**, 81 (1981)
- RANGARAJAN, K. E. Effects of redistribution with dipole scattering on line source functions. *A. Peraiah and K. E. Rangarajan.* **2**, 245 (1981)
- SASTRY, CH. V. Pulsating radio emission at decametre wavelengths from the sun. *Ch. V. Sastry, V. Krishan and K. R. Subramanian.* **2**, 59 (1981)
- SASTRY, CH. V. The structure of the Cygnus Loop at 34.5 MHz. *Ch. V. Sastry, K. S. Dwarakanath and R. K. Shevgaonkar.* **2**, 339 (1981)
- SCARIA, K. K. Mass segregation in globular clusters. *K. K. Scaria and M. K. V. Bappu.* **2**, 215 (1981); corrigendum. **2**, 439 (1981)
- SCHUEER, P. A. G. How high can a mountain be? **2**, 165 (1981)
- SHEVGAONKAR, R. K. The structure of the Cygnus Loop at 34.5 MHz. *Ch. V. Sastry, K. S. Dwarakanath and R. K. Shevgaonkar.* **2**, 339 (1981)
- SINHA, K. On the MgH oscillator strengths. **2**, 285 (1981)
- SIVARAMAN, K. R. The two components in the distribution of sunspot groups with respect to their maximum areas. *M. H. Gokhale and K. R. Sivaraman.* **2**, 365 (1981)
- SUBRAMANIAN, K. R. Pulsating radio emission at decametre wavelengths from the Sun. *Ch. V. Sastry, V. Krishan and K. R. Subramanian.* **2**, 59 (1981)
- TSUJI, T. Intrinsic properties of carbon stars. I. Effective temperature scale of N-type carbon stars. **2**, 95 (1981); corrigendum. **2**, 213 (1981)
- TSUJI, T. Intrinsic properties of carbon stars. II. Spectra, colours and HR diagram of cool carbon stars. **2**, 253 (1981)
- UCHIDA, Y. Equilibrium configuration of the magnetosphere of a star loaded with accreted magnetized mass. *7. Uchida and B. C. Low.* **2**, 405 (1981)
- VENKATAKRISHNAN, P. Time-dependent interaction of granules with magnetic flux tubes. *P. Venkatakrishnan and S. S. Hasan* **2**, 133 (1981)
- VISVANATHAN, N. Luminosity-H I velocity width relation for spirals. **2**, 67 (1981)
- VIVEKANAND, M. The structure of integrated pulse profiles; corrigendum *M. Vivekanand and V. Radhakrishnan.* **2**, 213 (1981)
- VIVEKANAND, M. A new look at pulsar statistics—birthrate and evidence for injection. *M. Vivekanand and R. Narayan.* **2**, 315 (1981)
- WIITA, P. J. Rotation and Luminosity variations in post-main sequence stars. **2**, 387 (1981)
