

Indexes to Volume 52

SUBJECT INDEX

Review

- A local view of the Kondo effect: Scanning tunneling spectroscopy
Wolf-Dieter Schneider 537–552

Rapid Communication

- Solar neutrino oscillation diagnostics at SuperKamiokande and Sudbury
Neutrino Observatory *Debasish Majumdar and Amitava Raychaudhuri* L529–L536

Relativity, Gravitation and Cosmology

- Particle production, back reaction and singularity avoidance
A Shaw, D Biswas, B Modak and S Biswas 1–17
- Gravitational energy in Brans–Dicke cosmological models
V B Johri and G P Singh 121–126
- Shower age in correlation with zenith angle *A Bhadra* 133–144
- Anisotropic fluid distributions on pseudo-spheroidal spacetimes
Ramesh Tikekar and V O Thomas 237–244
- On spacetimes dual to spherically symmetric solutions
Naresh Dadhich and L K Patel 359–367
- Rotating type II null fluids *P C Vaidya and L K Patel* 369–374
- Strong curvature naked singularities in generalized Vaidya space-times
K D Patil, R V Saraykar and S H Ghate 553–559

Statistical Physics

- Origin of mutual exclusiveness in Bohr's complementarity principle
D Sen, A N Basu and S Sengupta 351–358
- Suppression of Smale horseshoe structure via secondary perturbations in
pendulum systems *K I Thomas and G Ambika* 375–388
- Partial quantum recurrence in free and quasibound systems
A K Sikri and M L Narchal 453–457
- Statistical dynamics at critical bifurcations in Duffing–van der Pol oscillator
V Chinnathambi and S Rajasekar 561–577

Particle Physics

- On quark matter in a strong magnetic field *J D Anand and S Singh* 127–132
- Evaluation of S , T , U parameters, triple gauge boson vertices and some oblique corrections in extra $U(1)$ superstring inspired model
R S Sahu, N K Sharma, Sardar Singh, A K Nagawat and P Saxena 145–176
- Exact solutions of the field equations for Charap's chiral invariant model of the pion dynamics *Susanto Chakraborty and Pranab Krishna Chanda* 245–256
- Improved but low- x approximated relation between F_2^p scaling violation and gluon momentum distribution function *A Saikia* 257–267
- Beauty conserving strangeness-changing rare semileptonic decays of B_s meson *Harpreet Kaur* 389–393
- Two body nonleptonic decays of Λ_b involving proton *Harpreet Kaur* 395–400
- A combination of Yang's equations for $SU(2)$ gauge fields and Charap's equations for pion dynamics with exact solutions
Susanto Chakraborty and Pranab Krishna Chanda 579–591
- Pionic and electromagnetic decays of b -hadrons *Sonali Sinha* 593–608

Nuclear Physics

- A phenomenological study of a charge-symmetry-breaking component in ΛN interaction *M Z Rahman Khan, Nasra Neelofer and M A Suhail* 269–273
- Lifetimes of nuclear excited states with neutron gated recoil distance method
R Palit, P K Joshi, S Nagaraj, H V Panchal and H C Jain 401–408
- Complete and incomplete fusion studies in ${}^7\text{Li}$ and ${}^{16}\text{O}$ induced reactions on ${}^{51}\text{V}$ by measurement of excitation functions and recoil ranges
M Ismail and R P Sharma 609–621

Atomic and Molecular Physics

- A tentative multiphoton ionization of CS_2 molecule: Spectroscopy of $\tilde{A} \ ^2\Pi_u$ state of CS_2^+ ion *T V Venkitachalam* 177–185
- Stabilization of ionization due to two color laser fields
R Sharma and M Mohan 275–279
- Wei Hua's four-parameter potential: Comments and computation of molecular constants α_e and $\omega_e x_e$ *Sarvpreet Kaur and C G Mahajan* 409–420

- Single and multiple ionization of N_2 molecules by intense light fields of femtosecond duration *S Banerjee, G Ravindra Kumar and D Mathur* 421–434
- Some new four-parameter potentials and their use in the study of vibrational thermodynamical quantities of diatomic molecules
Sarvpreet Kaur and C G Mahajan 459–477
- Angular anisotropy and dichroism in molecular Auger spectroscopy following photoabsorption *M Chakraborty* 479–492
- Thick-target X-ray bremsstrahlung spectra produced in 6.5 keV and 7.5 keV e^- -Hf collisions *S K Goel, R Hippler, Rajesh Kumar Singh and R Shankar* 493–502

Experimental Techniques and Instrumentation

- Helium implanted $CuHf$ as studied by TDPAC and positron lifetime measurements *R Govindaraj, G Venugopal Rao, K P Gopinathan and B Viswanathan* 219–233
- Thermal lens measurement technique in end-pumped solid state lasers: Application to diode-pumped microchip lasers
Rakesh Kapoor, P K Mukhopadhyay, Jogy George and S K Sharma 623–629

Lasers, Optics and Acoustics

- Theory of combined AM and high-harmonic FM mode locked laser
Anand V Ramamurthy and K P J Reddy 19–24
- Ultrasonic velocity of binary systems at elevated pressures
J D Pandey, Ranjan Dey and D K Dwivedi 187–193
- Lasing without population inversion in molecules
Krishna Rai Dastidar, Lipika Adhya and Ratan Kumar Das 281–291
- Investigations of nonlinear absorption and aggregation in aqueous solutions of rhodamine B using thermal lens technique
C V Bindhu, S S Harilal, V P N Nampoori and C P G Vallabhan 435–442

Fluid Dynamics

- Noise reduction in chaotic time series data *A Bhowal and T K Roy* 25–37

Plasma Physics

- Modified Kadomtsev–Petviashvili equation in cold collisionless plasma
S G Bindu and V C Kuriakose 39–47

- An x-ray biplanar photodiode and the x-ray emission from magnetically confined laser production plasma *V N Rai, M Shukla and H C Pant* 49–65
- Stability analysis of a model equilibrium for a gravito-electrostatic sheath in a colloidal plasma under external gravity effect
Kavita Rani Rajkhowa, C B Dwivedi and S Bujarbarua 293–302
- Condensed Matter Physics**
- Orientational distribution function in nematic liquid crystals by x-rays: Fourier method *R Somashekar, H Somashekarappa, A P Divya and D Revannasiddaiah* 67–74
- Thermal effect and equation of state in solids
Piyush Kuchhal and Narsingh Dass 75–79
- Bondlength distortion of atomic substitutions in semiconductors
D Sasireka, E Palaniyandi and K Iyakutti 81–100
- Plasmons and their damping in a doped semiconductor superlattice
P Tripathi and A C Sharma 101–109
- Magnetic structure of $(\text{Fe}_{0.97}\text{Cr}_{0.03})_2\text{P}$ *Sudhish Kumar, S K Paranjpe, Bipin K Srivastava, Anjali Krishnamurthy and V C Sahni* 111–120
- Wavevector and frequency dependent dielectric function, dynamic structure factor and the instability of plasma waves in two component hot rare quantum and classical plasmas *S P Tewari, Hira Joshi, Kakoli Bera and Jyoti Sood* 195–217
- Pressure induced phase transformations and band structure of different high pressure phases in tellurium *A K Bandyopadhyay and D B Singh* 303–319
- An equation of state and non-linear parameter from sound velocity measurements for liquid alkali metals
Piyush Kuchhal, Ravindra Kumar and Narsingh Dass 321–332
- Electronic structure and activation energy of hydrogen in NEG alloy using nonlinear response theory *N Singh, D K Avasthi and A Tripathi* 333–340
- Harmonic generation in superconducting Bi(Pb)SrCaCuO thick films
S K Shrivastava, Neeraj Khare and A K Gupta 341–350
- Observation of relaxation modes in room temperature ferroelectric liquid crystal mixtures *K K Raina, Arvind K Gathania and Buta Singh* 443–451

<i>Subject Index</i>	661
Debye–Waller factors and Debye temperatures of alkali halide mixed crystals <i>P Geeta Krishna, K G Subhadra, T Kumara Swamy and D B Sirdeshmukh</i>	503–509
Theoretical study of structural energy, phonon spectra, and elastic constants of Rh and Ir <i>N Singh</i>	511–523
Structural properties of undercooled liquid sodium and caesium <i>O Akinlade, B R Ijaduola, U E Vincent and G A Adebayo</i>	631–645
Photoinduced changes in photorefractive PVA films doped with Cr ³⁺ and VO ²⁺ : EPR and PAS investigations <i>Mithlesh Kumar, A R Dhobale, R M Kadam and M D Sastry</i>	647–655
Brief Report	
Photoacoustic cell with black absorber as a detector for spectrophotometric studies <i>A R Dhobale and M D Sastry</i>	525–528
Erratum	235
