

SUBJECT INDEX

ε -Factor of a character		Beurling algebras	
On counting twists of a character appearing in its associated Weil representation	1	Multipliers of weighted semigroups and associated Beurling Banach algebras	417
φ -Analytic vector fields		Bloch type space	
Real hypersurfaces of a complex projective space	171	Composition operators between Bloch type spaces and Zygmund spaces in the unit ball	327
Admissible representation of $GL(2, F)$		Composition operator	
On counting twists of a character appearing in its associated Weil representation	1	Composition operators between Bloch type spaces and Zygmund spaces in the unit ball	327
Affine algebraic group		Convection	
Principal bundles whose restrictions to a curve are isomorphic	165	On the existence of hydrodynamic instability in single diffusive bottom heavy systems with permeable boundaries	495
Almost sure central limit theorem		Convex sets	
An almost sure central limit theorem for the weight function sequences of NA random variables	369	Bias expansion of spatial statistics and approximation of differenced lattice point counts	229
Almost sure local central limit theorem		Dicritical	
The almost sure local central limit theorem for the product of partial sums	217	Existence of dicritical divisors revisited	267
Area approximations		Difference equations	
Bias expansion of spatial statistics and approximation of differenced lattice point counts	229	Periodic and subharmonic solutions for second order p -Laplacian difference equations	457
Automorphism		Difference polynomial	
Test rank of an abelian product of a free Lie algebra and a free abelian Lie algebra	291	Uniqueness and zeros of q -shift difference polynomials	301
Automorphism group		Diophantine equations	
Semisimple metacyclic group algebras	379	On diophantine equations of the form $(x-a_1)(x-a_2) \dots (x-a_k) + r = y^n$	245
Banach g -frames		Dirichlet problem	
Fusion frames and G -frames in Banach spaces	155	A note on existence and stability of solutions for semilinear Dirichlet problems	201
Betti numbers			
Deficiently extremal Gorenstein algebras	259		

- Discrete variational theory
 Periodic and subharmonic solutions for second order p -Laplacian difference equations 457
- Domain decomposition
 Overlapping domain decomposition methods for elliptic quasi-variational inequalities related to impulse control problem with mixed boundary conditions 481
- Dual equation
 On the uniqueness of the solution of dual equation of a singular Sturm–Liouville problem 469
- Dual variational method
 A note on existence and stability of solutions for semilinear Dirichlet problems 201
- Enrique–Severi
 Principal bundles whose restrictions to a curve are isomorphic 165
- Erdős–Selfridge
 On diophantine equations of the form $(x-a_1)(x-a_2) \dots (x-a_k) + r = y^n$ 245
- Error analysis
 Overlapping domain decomposition methods for elliptic quasi-variational inequalities related to impulse control problem with mixed boundary conditions 481
- Existence of solutions
 A note on existence and stability of solutions for semilinear Dirichlet problems 201
- Extremal algebras
 Deficiently extremal Gorenstein algebras 259
- Extremally disconnected
 Reduced multiplication modules 121
- Finite group
 On the normal subgroup with coprime G -conjugacy class sizes 397
- Fixed point
 Fixed points of IA -endomorphisms of a free metabelian Lie algebra 405
- Frame
 Approximation of the inverse G -frame operator 143
- Free Lie algebras
 Test rank of an abelian product of a free Lie algebra and a free abelian Lie algebra 291
- Free metabelian Lie algebra
 Fixed points of IA -endomorphisms of a free metabelian Lie algebra 405
- Frobenius group
 On the normal subgroup with coprime G -conjugacy class sizes 397
- Function of analytic type
 On conformal minimal 2-spheres in complex Grassmann manifold $G(2, n)$ 181
- Fusion frames
 Fusion frames and G -frames in Banach spaces 155
- G -associated ideals
 Group graded associated ideals with flat base change of rings and short exact sequences 111
- Gaussian curvature
 On conformal minimal 2-spheres in complex Grassmann manifold $G(2, n)$ 181
- G -conjugacy class size
 On the normal subgroup with coprime G -conjugacy class sizes 397
- Generalized semicharacters
 Multipliers of weighted semigroups and associated Beurling Banach algebras 417
- Geometric quantization
 Quillen bundle and geometric pre-quantization of non-abelian vortices on a Riemann surface 27
- Geometrical convergence
 Overlapping domain decomposition methods for elliptic quasi-variational inequalities related to impulse control problem with mixed boundary conditions 481

- g*-Frame
 - Approximation of the inverse *g*-frame operator 143
- g*-Frame operator
 - Approximation of the inverse *g*-frame operator 143
- g*-Frames
 - Fusion frames and *g*-frames in Banach spaces 155
- g*-Functions
 - On *g*-functions for Laguerre function expansions of Hermite type 45
- Graded module
 - Group graded associated ideals with flat base change of rings and short exact sequences 111
- Graded ring
 - Group graded associated ideals with flat base change of rings and short exact sequences 111
- Group action
 - Nonsmoothable involutions on spin 4-manifolds 37
- Hamilton Jacobi equation
 - Value functions for certain class of Hamilton Jacobi equations 349
- Hydrodynamic instability
 - On the existence of hydrodynamic instability in single diffusive bottom heavy systems with permeable boundaries 495
- Hypersurface
 - On hypersurfaces with two distinct principal curvatures in space forms 435
- Immigration
 - Analysis of a malaria model with mosquito-dependent transmission coefficient for humans 93
- Impulse control
 - Overlapping domain decomposition methods for elliptic quasi-variational inequalities related to impulse control problem with mixed boundary conditions 481
- Increasing domain
 - Bias expansion of spatial statistics and approximation of differenced lattice point counts 229
- Infill sampling
 - Bias expansion of spatial statistics and approximation of differenced lattice point counts 229
- Infinite product
 - On the uniqueness of the solution of dual equation of a singular Sturm–Liouville problem 469
- Invariant subspaces
 - A classification of cubic symmetric graphs of order $16p^2$ 249
- Inverse problem
 - On the uniqueness of the solution of dual equation of a singular Sturm–Liouville problem 469
- Involution
 - Nonsmoothable involutions on spin 4-manifolds 37
- Irreducibility
 - Irreducible multivariate polynomials obtained from polynomials in fewer variables, II 133
- Irreducible
 - On counting twists of a character appearing in its associated Weil representation 1
- Isotropic measure
 - On the L_p affine isoperimetric inequalities 447
- Jacobian equation
 - Existence of solution of the pullback equation involving volume forms 339
- Jacobi-type vector fields
 - Real hypersurfaces of a complex projective space 171
- Kähler angle
 - On conformal minimal 2-spheres in complex Grassmann manifold $G(2, n)$ 181

- L_p -Petty projection inequality
 On the L_p affine isoperimetric inequalities 447
- Lacunary Fourier series
 Lacunary Fourier series and a qualitative uncertainty principle for compact Lie groups 77
- Laguerre function expansions
 On g -functions for Laguerre function expansions of Hermite type 45
- Lattice data
 Bias expansion of spatial statistics and approximation of differenced lattice point counts 229
- Lie algebra
 Fixed points of IA -endomorphisms of a free metabelian Lie algebra 405
- Line bundle
 Projective normality of Weyl group quotients 19
- Linearized stability
 On critical exponent for the existence and stability properties of positive weak solutions for some nonlinear elliptic systems involving the (p, q) -Laplacian and indefinite weight function 83
- Locally linear
 Nonsmoothable involutions on spin 4-manifolds 37
- Mean curvature
 Real hypersurfaces of a complex projective space 171
 On hypersurfaces with two distinct principal curvatures in space forms 435
- Meromorphic function
 Uniqueness and zeros of q -shift difference polynomials 301
- Minimal prime submodule
 Reduced multiplication modules 121
- Minimal resolutions
 Deficiently extremal Gorenstein algebras 259
- Minimizing paths
 Value functions for certain class of Hamilton Jacobi equations 349
- Multiplication module
 Reduced multiplication modules 121
- Multipliers on a semigroup
 Multipliers of weighted semigroups and associated Beurling Banach algebras 417
- NA random variables
 An almost sure central limit theorem for the weight function sequences of NA random variables 369
- Noetherian ring
 Group graded associated ideals with flat base change of rings and short exact sequences 111
- Nonarchimedean absolute value
 Irreducible multivariate polynomials obtained from polynomials in fewer variables, II 133
- Nonarchimedean local field
 On counting twists of a character appearing in its associated Weil representation 1
- Nonlinear elliptic system
 On critical exponent for the existence and stability properties of positive weak solutions for some nonlinear elliptic systems involving the (p, q) -Laplacian and indefinite weight function 83
- Nonsmoothable
 Nonsmoothable involutions on spin 4-manifolds 37
- Normal projective variety
 Principal bundles whose restrictions to a curve are isomorphic 165
- Normal subgroup
 On the normal subgroup with coprime G -conjugacy class sizes 397
- Normal varieties
 Existence of dicritical divisors revisited 267
- Number of characters appearing in its restriction
 On counting twists of a character appearing in its associated Weil representation 1

- Parabolic subgroup
 Principal bundles whose restrictions to a curve are isomorphic 165
- Partial sum
 The almost sure local central limit theorem for the product of partial sums 217
- Periodic and subharmonic solutions
 Periodic and subharmonic solutions for second order p -Laplacian difference equations 457
- Permeable
 On the existence of hydrodynamic instability in single diffusive bottom heavy systems with permeable boundaries 495
- Perturbation
 Fusion frames and G -frames in Banach spaces 155
- p -Isoperimetric inequality
 On the L_p affine isoperimetric inequalities 447
- p -Laplacian
 Periodic and subharmonic solutions for second order p -Laplacian difference equations 457
- Polarizations
 Projective normality of Weyl group quotients 19
- Primitive central idempotents
 Semisimple metacyclic group algebras 379
- Principal bundles
 Principal bundles whose restrictions to a curve are isomorphic 165
- Principal curvature
 On hypersurfaces with two distinct principal curvatures in space forms 435
- Product
 The almost sure local central limit theorem for the product of partial sums 217
- Projection method
 Approximation of the inverse g -frame operator 143
- Pullback equation
 Existence of solution of the pullback equation involving volume forms 339
- q -Shift
 Uniqueness and zeros of q -shift difference polynomials 301
- Quasi-variational inequalities
 Overlapping domain decomposition methods for elliptic quasi-variational inequalities related to impulse control problem with mixed boundary conditions 481
- Quillen's determinant bundle
 Quillen bundle and geometric pre-quantization of non-abelian vortices on a Riemann surface 27
- Real hyperbolic spaces
 Spherical means in annular regions in the n -dimensional real hyperbolic spaces 311
- Real hypersurfaces
 Real hypersurfaces of a complex projective space 171
- Reduced module
 Reduced multiplication modules 121
- Reductive
 Principal bundles whose restrictions to a curve are isomorphic 165
- Regular coverings
 A classification of cubic symmetric graphs of order $16p^2$ 249
- Reservoir class of humans
 Analysis of a malaria model with mosquito-dependent transmission coefficient for humans 93
- Ricci curvature
 Real hypersurfaces of a complex projective space 171
- Semisimple group algebra
 Semisimple metacyclic group algebras 379
- Shape operator
 Real hypersurfaces of a complex projective space 171
- Singularity
 On the uniqueness of the solution of dual equation of a singular Sturm–Liouville problem 469

- Space forms
 On hypersurfaces with two distinct principal curvatures in space forms 435
- Spatial covariance
 Bias expansion of spatial statistics and approximation of differenced lattice point counts 229
- Spatial processes
 Bias expansion of spatial statistics and approximation of differenced lattice point counts 229
- Special pencils
 Existence of dicritical divisors revisited 267
- Specific heat
 On the existence of hydrodynamic instability in single diffusive bottom heavy systems with permeable boundaries 495
- Spherical harmonics
 Spherical means in annular regions in the n -dimensional real hyperbolic spaces 311
- Spherical means
 Spherical means in annular regions in the n -dimensional real hyperbolic spaces 311
- Stability of solutions
 A note on existence and stability of solutions for semilinear Dirichlet problems 201
- Stanley–Reisner rings
 Deficiently extremal Gorenstein algebras 259
- Structure group
 Principal bundles whose restrictions to a curve are isomorphic 165
- Sturm–Liouville problem
 On the uniqueness of the solution of dual equation of a singular Sturm–Liouville problem 469
- Sub-super solution
 On critical exponent for the existence and stability properties of positive weak solutions for some nonlinear elliptic systems involving the (p, q) -Laplacian and indefinite weight function 83
- Symmetric graphs
 A classification of cubic symmetric graphs of order $16p^2$ 249
- Symplectic quotient
 Quillen bundle and geometric pre-quantization of non-abelian vortices on a Riemann surface 27
- Test elements
 Test rank of an abelian product of a free Lie algebra and a free abelian Lie algebra 291
- Test rank
 Test rank of an abelian product of a free Lie algebra and a free abelian Lie algebra 291
- Test sets
 Test rank of an abelian product of a free Lie algebra and a free abelian Lie algebra 291
- Transmission coefficient for humans
 Analysis of a malaria model with mosquito-dependent transmission coefficient for humans 93
- Uncertainty principles
 Lacunary Fourier series and a qualitative uncertainty principle for compact Lie groups 77
- Unipotent radical
 Principal bundles whose restrictions to a curve are isomorphic 165
- Unique uniform norm property
 Multipliers of weighted semigroups and associated Beurling Banach algebras 417
- Uniqueness
 Uniqueness and zeros of q -shift difference polynomials 301
- Value function
 Value functions for certain class of Hamilton Jacobi equations 349
- Vector bundle
 Principal bundles whose restrictions to a curve are isomorphic 165

- Vector-valued Calderon–Zygmund operators
 - On g -functions for Laguerre function expansions of Hermite type 45
- Very ample invertible sheaf
 - Principal bundles whose restrictions to a curve are isomorphic 165
- Viscosity solution
 - Value functions for certain class of Hamilton Jacobi equations 349
- Volume forms
 - Existence of solution of the pullback equation involving volume forms 339
- Weyl's character formula
 - Lacunary Fourier series and a qualitative uncertainty principle for compact Lie groups 77
- Weighted semigroup
 - Multipliers of weighted semigroups and associated Beurling Banach algebras 417
- Weil representation
 - On counting twists of a character appearing in its associated Weil representation 1
- Zariski topology
 - Reduced multiplication modules 121
- Zero order
 - Uniqueness and zeros of q -shift difference polynomials 301
- Zygmund space
 - Composition operators between Bloch type spaces and Zygmund spaces in the unit ball 327
- Wedderburn decomposition
 - Semisimple metacyclic group algebras 379
- Weight function sequence
 - An almost sure central limit theorem for the weight function sequences of NA random variables 369
