

Pramana – journal of physics

CONTENTS – VOLUME 55

(July–December 2000)

Numbers 1 & 2

Special Issue: Proceedings of the Sixth Workshop on High Energy Physics Phenomenology (WHEPP-6)

Preface	1
Results from atmospheric neutrinos <i>J G Learned</i>	3
Phenomenology of neutrino oscillations <i>G Rajasekaran</i>	19
Status of electroweak phase transition and baryogenesis <i>J M Cline</i>	33
The case for the cosmological constant <i>Varun Sahni</i>	43
Formation of disoriented chiral condensates in relativistic heavy-ion collisions <i>Ajit M Srivastava</i>	53
Latest results from HERA <i>Beate Heinemann</i>	63
What's new at small x ? <i>Raju Venugopalan</i>	73
Quantum chromodynamics studies at LEP2 <i>Sunanda Banerjee</i>	85
Higher order corrections in perturbative quantum chromodynamics <i>W L van Neerven</i>	101
Two problems in thermal field theory <i>François Gelis</i>	113
Quark-gluon plasma: Status of heavy ion physics <i>R V Gavai</i>	125
Supersymmetric unification at the millennium <i>Charanjit S Aulakh</i>	137
Perspectives of SM Higgs measurements at the LHC <i>Michael Dittmar</i>	151
Non-minimal and non-universal supersymmetry <i>S F King</i>	161
Large compact dimensions and high energy experiments <i>Sreerup Raychaudhuri</i>	171

The status of supersymmetry phenomenology	<i>Amitava Datta</i>	183
Experimental status of B physics	<i>H Yamamoto</i>	195
CP violation: the past, the present and the future	<i>A I Sanda</i>	207
New physics with beauty	<i>Rahul Sinha</i>	219
How neutrinos get mass and what other things may happen besides oscillations?	<i>Ernest Ma</i>	229
Constraints on m_s and ϵ'/ϵ from lattice quantum chromodynamics	<i>Apoorva Patel</i>	235
Light front quantum chromodynamics: Towards phenomenology	<i>A Harindranath</i>	241
Analysis of two recent tests of T -invariance	<i>P K Kabir</i>	247
Infra-red fixed points in supersymmetry	<i>B Ananthanarayan</i>	253
Measuring the chargino parameters	<i>J Kalinowski</i>	259
New physics effects from B meson decays	<i>Anirban Kundu</i>	265
Some aspects of R -parity violating supersymmetry	<i>Sourov Roy</i>	271
Neutrino masses and mixing in supersymmetric theories	<i>Sudhir K Vempati</i>	277
B_c meson properties and its leptonic radiative decays	<i>Chao-Hsi Chang (Zhao-Xi Zhang)</i>	283
High scale parity invariance as a solution to the SUSY CP problem and an explanation of small ϵ'/ϵ^*	<i>R N Mohapatra</i>	289
Ultra high energy cosmic rays above 10^{11} GeV: Hints to new physics beyond Standard Model	<i>Pijushpani Bhattacharjee</i>	297
Beyond the Standard Model: Working group report	<i>Gautam Bhattacharyya and Amitava Raychaudhuri</i>	307
Neutrino and astroparticle physics: Working group report	<i>S Mohanty and U A Yajnik</i>	315
Quantum chromodynamics: Working group report	<i>Sourendu Gupta and D Indumathi</i>	327
B and collider physics: Working group report	<i>Debajyoti Choudhury and Rahul Sinha</i>	335

Discussion on a possible neutrino detector located in India	
..... <i>M V N Murthy and Urjit A Yajnik</i>	347
List of participants	357

Number 3

Research Articles

Rotating cylindrically symmetric Kaluza-Klein fluid model	
..... <i>Ramesh Tikekar and L K Patel</i>	361
Non-static local string in Brans–Dicke theory	<i>A A Sen</i>
	369
Exotic decay in Ba isotopes via ^{12}C emission	
..... <i>K P Santhosh and Antony Joseph</i>	375
Variable operator technique and the min-max theorem	<i>Sambhu Nath Datta</i>
	383
Comparison between Weber's electrodynamics and classical electrodynamics ..	
..... <i>A K T Assis and H Torres Silva</i>	393
Third harmonic generation of CO_2 laser radiation in AgGaSe_2 crystal	
..... <i>Gopal C Bhar, Pathik Kumbhakar, D V Satyanarayana, N S N Banerjee,</i> <i>U Nundy and C G Chao</i>	405
Generation of ultraviolet radiation with wide angular tolerance in cesium lithium borate crystal	<i>Gopal C Bhar, Pathik Kumbhakar and Anil K Chaudhary</i>
	413
Dynamics of self-focusing and self-phase modulation of elliptic Gaussian laser beam in a Kerr-medium	
..... <i>Tarsem Singh, Nareshpal Singh Saini and Shyam Sunder Kaul</i>	423
Non-linearity parameter B/A of binary liquid mixtures at elevated pressures ...	
..... <i>J D Pandey, J Chhabra, R Dey, V Sanguri and R Verma</i>	433
Crystal and molecular structure of N-(<i>p</i> -nitrobenzylidene)-3-chloro-4-fluoro-aniline	
..... <i>K V Arjuna Gowda, M K Kokila, Puttaraja,</i> <i>M V Kulkarni and N C Shivaprakash</i>	441
Electron impact single ionization of copper	
..... <i>L K Jha, O P Roy and B N Roy</i>	447
Annealing effect on transport properties of $\text{Nd}_{0.67}\text{Sr}_{0.33}\text{MnO}_3$ thin films	
..... <i>M Pattabiraman, P Murugaraj, G Rangarajan, V Prasad,</i> <i>S V Subramanyam, V S Sastry, Sang-Mo Koo and K V Rao</i>	455

Rapid Communication

High spin states in ^{63}Cu	<i>B Mukherjee, S Muralithar, R P Singh, R Kumar, K Rani, S C Pancholi and R K Bhowmik</i>	L471
--	--	------

Number 4

Special Issue: Proceedings of the Fourth International Conference on Gravitation and Cosmology (ICGC-2000)

Foreword		479
Black holes under external influence	<i>Ji ři Bičák</i>	481
Black hole critical phenomena without black holes	<i>Steven L Liebling</i>	497
Quantum aspects of black hole entropy	<i>Parthasarathi Majumdar</i>	511
Gravitational collapse: The story so far	<i>Pankaj S Joshi</i>	529
Searching for gravitational waves from rotating neutron stars	<i>S V Dhurandhar</i>	545
Living with lambda	<i>Varun Sahni</i>	559
Cosmological magnetic fields	<i>Roy Maartens</i>	575
Workshop I – Black holes and compact objects: Classical aspects	<i>B S Ramachandra and C V Vishveshwara</i>	585
Workshop II – Black holes and compact objects: Quantum aspects	<i>Parthasarathi Majumdar</i>	591
Workshop III – Cosmology: Observations versus theories	<i>T R Seshadri</i>	599
Workshop IV – Cosmology-theoretical models/alternative scenarios: A report ..	<i>Asit Banerjee and Reza Tavakol</i>	603
Singularity free non-rotating cosmological solutions for perfect fluids with $p = k\rho$	<i>A K Raychaudhuri</i>	609
Density contrast indicators in cosmological dust models	<i>Filipe C Mena and Reza Tavakol</i>	617
On spherically symmetric singularity-free models in relativistic cosmology	<i>Ramesh Tikekar</i>	623
The lighter side of gravity (How Swami Gurutvananda received enlightenment?)	<i>Jayant V Narlikar</i>	629
List of participants		637

Numbers 5 & 6

Special Issue: Proceedings of the Fourteenth National Symposium on Plasma Science and Technology

Foreword	643
A. Space and Astrophysical Plasmas	
Invited Talks	
Space and astrophysical plasmas: Pervasive problems	<i>Chanchal Uberoi</i> 645
High energy universe – Satellite missions	<i>Vinod Krishan</i> 655
Sun–Earth connection: Boundary layer waves and auroras	665
.....	<i>G S Lakhina, B T Tsurutani, J K Arballo and C Galvan</i>
Contributed Papers	
Matched filtering-parameter estimation method and analysis of whistlers recorded at Varanasi	<i>R P Singh, R P Patel, Ashok K Singh, D Hamar and J Lichtenberger</i> 685
Dromion solutions for an electron acoustic wave and its application to space observations	<i>S S Ghosh, A Sen and G S Lakhina</i> 693
Ionospheric plasma by VHF waves	699
.....	<i>R P Patel, Abhay Kumar Singh and R P Singh</i>
B. Tokamak Plasmas	
Contributed Papers	
Observation of floating potential asymmetry in the edge plasma of the SINP tokamak	<i>Krishnendu Bhattacharyya and N R Ray</i> 707
Measurement of temperature fluctuations and anomalous transport in the SINP tokamak	<i>R Kumar and S K Saha</i> 713
Runaway electrons in the SINP tokamak	719
.....	<i>Ramesh Narayanan, A N Sekar Iyengar and R Pal</i>
Mirnov coil data analysis for tokamak ADITYA	727
.....	<i>D Raju, R Jha, P K Kaw, S K Mattoo, Y C Saxena and Aditya Team</i>
Electron temperature (T_e) measurement by Thomson scattering system	733
.....	<i>R Rajesh, B Ramesh Kumar, S K Varshney, Manoj Kumar, Chhaya Chavda, Aruna Thakkar, N C Patel, Ajai Kumar and Aditya Team</i>

Plasma position control in SST1 tokamak	
..... <i>I Bandyopadhyay and S P Deshpande</i>	741
Internal magnetic field measurement in tokamak plasmas using a Zeeman polarimeter	
..... <i>M Jagadeeshwari and J Govindarajan</i>	751
C. Laser Plasmas	
Invited Talks	
Lie optics, geometrical phase and nonlinear dynamics of self-focusing and soliton evolution in a plasma	
..... <i>D Subbarao, R Uma, H Singh, Kamal Goyal, Sanjeev Goyal and Ravinder Kumar</i>	757
Contributed Papers	
Density oscillations in laser produced plasma decelerated by external magnetic field	
..... <i>V N Rai, M Shukla and H C Pant</i>	773
Multiple charge states of titanium ions in laser produced plasma	
..... <i>M Shukla, S Bandyopadhyay, V N Rai, A V Kilpio and H C Pant</i>	781
Volume effect of laser produced plasma on X-ray emissions	
..... <i>V K Senecha, Y B S R Prasad, M P Kamath, A S Joshi, G S Solanki, A P Kulkarni, S Gupta, R Pareek and H C Pant</i>	789
Scaling of x-ray emission and ion velocity in laser produced Cu plasmas	
..... <i>Y B S R Prasad, V K Senecha, H C Pant, M P Kamath, G S Solanki, P K Tripathi, A P Kulkarni, S Gupta, R Pareek, A S Joshi, N Sreedhar, Sameer Nigam and C P Navathe</i>	797
Effect of rippled laser beam on excitation of ion acoustic wave	
..... <i>Nareshpal Singh Saini and Tarsem Singh Gill</i>	803
Lie-optic matrix algorithm for computer simulation of paraxial self-focusing in a plasma ...	
..... <i>D Subbarao, R Uma, Kamal Goyal, Sanjeev Goyal and Karuna Batra</i>	813
Plasma dynamics from laser ablated solid lithium	
..... <i>Debarati Bhattacharya</i>	823
Optical guiding of laser beam in nonuniform plasma	
..... <i>Tarsem Singh Gill</i>	835
D. Colloidal Plasmas	
Invited Talks	
Basic physics of colloidal plasmas	
..... <i>C B Dwivedi</i>	843
Dynamo transformation of the collisional R-T in a weakly ionized plasma	
..... <i>C B Dwivedi</i>	849

Effect of nonthermal ion distribution and dust temperature on nonlinear dust acoustic solitary waves	<i>Tarsem Singh Gill and Harvinder Kaur</i>	855
Electrostatic sheath at the boundary of a collisional dusty plasma	<i>S K Baishya, G C Das and Joyanti Chutia</i>	861
E. Plasma Processes		
Invited Talk		
Arc root dynamics in high power plasma torches – Evidence of chaotic behavior	<i>A K Das</i>	873
Contributed Papers		
A self-consistent kinetic modeling of a 1-D, bounded, plasma in equilibrium ...	<i>Monojoy Goswami and H Ramachandran</i>	887
Sheath and plasma parameters in a magnetized plasma system	<i>Bornali Singha, A Sarma and J Chutia</i>	899
CAMAC based continuous/transient digitizer for long duration discharge	<i>Amit Kumar Srivastava, Rachana Rajpal and H D Pujara</i>	911
A simple and efficient levitation technique for noncontact coating of inertial confinement fusion targets	<i>K K Mishra, R K Khardekar, Rashmi Chouhan and R K Gupta</i>	919
Plasma sprayed alumina coatings for radiation detector development	<i>Mary Alex, V Balagi, K R Prasad, K P Sreekumar and P V Ananthapadmanabhan</i>	927
Microwave plasma deposition of diamond like carbon coatings	<i>D S Patil, K Ramachandran, N Venkatramani, M Pandey and R d' Cunha</i>	933
Operation of a capacitor bank for plasma metal forming	<i>P Sarkar, S Chaturvedi, Raj Kumar, Rajesh Kumar, D Lathi, A Shyam and J Sonara</i>	941
Minimum dissipative relaxed states in toroidal plasmas	<i>R Bhattacharyya, M S Janaki and B Dasgupta</i>	947
Subject Index		953
Author Index		961
