

Indexes to Volume 51

SUBJECT INDEX

Review

- Charges in gauge theories
Robin Horan, Martin Lavelle and David McMullan 317–356

Quantum Mechanics

- Gravitationally induced particle creation in a q -scalar field
G Vinod and K Babu Joseph 357–364
- Correct bound states of the non-linear oscillator through non-variational method: Failure of the variational method
Biswanath Rath 365–368
- The Ithaca interpretation of quantum mechanics
N David Mermin 547–548
- Measurement problem in quantum mechanics: Characteristics of an apparatus
Deepak Kumar 567–576
- Hindered decay of an unstable system: A quantum zeno effect
Saverio Pascazio and Larry S Schulman 577–584
- de Broglie–Bohm formulation of quantum mechanics, quantum chaos and breaking of time-reversal invariance
F H M Faisal and U Schwengelbeck 585–596
- Maximally causal quantum mechanics
S M Roy 597–602
- Tunneling time based on the quantum diffusion process approach in multi-channel and optical potential cases
Ichiro Ohba, Kentaro Imafuku and Yoshiya Yamanaka 603–614
- The structure of the quantum mechanical state space and induced superselection rules
Joachim Kupsch 615–624
- Energy basis via decoherence
Anu Venugopalan 625–632
- Quantum correlations in optics
R Ghosh 633–643
- Hierarchies of non-classical states in quantum optics
N Mukunda 643–650
- Wave-particle duality: The mystery keeps unfolding
Partha Ghose 651–661

Relativity and Gravitation

- String cosmology in inhomogeneous cylindrically symmetric spacetime
Subenoy Chakraborty and Anusua Roy 369–376
- Spherically symmetric static solutions of the Einstein–Maxwell equations
J Krishna Rao and M M Trivedi 663–671

Collapsing void in flat space Robertson–Walker universe	<i>D R Mandal and S Banerji</i>	673–687
Physical nature of the event horizon	<i>Jagannath Thakur</i>	693–698
Einstein equations and the joining of discontinuous metrics	<i>Jagannath Thakur</i>	699–710
Cosmology		
Motion of test particle around global monopoles in Brans–Dicke theory	<i>Subenoy Chakraborty and Md. Farook Rahaman</i>	689–692
Statistical Physics		
Existence of multiple attractors and the nature of bifurcations in a discontinuous logistic map	<i>P R Krishnan Nair and V M Nandakumaran</i>	377–386
Particle Physics		
Higgs and SUSY searches at LHC	<i>D P Roy</i>	7–26
The inflationary universe—from theory to observations	<i>Varun Sahni</i>	27–37
Heavy-ion collisions	<i>Sourendu Gupta</i>	39–43
Symmetries of the standard model without and with a right-handed neutrino	<i>Ernest Ma</i>	45–50
Neutrino masses and mixing in the light of experimental data	<i>S M Bilenky, C Giunti and Walter Grimus</i>	51–64
Tevatron: Recent results and prospects at the upgrade	<i>Naba K Mondal</i>	65–76
Recent results from large electron positron collider	<i>S Banerjee</i>	77–86
Particle dark matter physics: An update	<i>Manuel Drees</i>	87–106
Recent results from HERA	<i>Jörg Gayler</i>	107–122
An introduction to explicit R -parity violation	<i>Herbi Dreiner</i>	123–133
Astrophysical constraints on superlight gravitinos	<i>J A Grifols</i>	135–143
Charmonium production at high-energy colliders	<i>Michael Kramer</i>	145–156
Theoretical understanding of direct photon production	<i>Michel Fontannaz</i>	157–167
Particle mass limits in minimal and nonminimal supersymmetric models	<i>P N Pandita</i>	169–180
Observable signals of gauge-mediated supersymmetry breaking	<i>Biswarup Mukhopadhyaya</i>	181–190
Topological defects and cosmology	<i>Robert H Brandenberger</i>	191–204
Low x physics and structure functions	<i>Rahul Basu</i>	205–216

Resolved photon processes	<i>R M Godbole</i>	217–228
Astrophysical constraints on particle properties	<i>Subhendra Mohanty</i>	229–237
Quantum SUSY signatures in low and high energy processes	<i>Joan Sola</i>	239–248
Physics at the linear collider	<i>Fawzi Boudjema</i>	249–271
Astroparticle physics: Working group report	<i>Subhendra Mohanty and Varun Sahni</i>	273–286
B Physics and collider physics: Working group report	<i>A Datta, B Mukhopadhyaya and S Raychaudhuri</i>	287–295
Quantum chromodynamics: Working group report	<i>K Sridhar</i>	297–304
Beyond the standard model: Working group report	<i>Debajyoti Choudhury and Saurabh D Rindani</i>	305–311
CP-violating dipole form factors of the topquark and tau lepton in scalar leptoquark models	<i>P Poullose and Saurabh D Rindani</i>	387–404
Non-linear effects on Nielsen–Olesen instability	<i>Vishnu M Bannur</i>	405–412
Aspects of Planckian scattering beyond the eikonal	<i>Saurya Das and Parthasarathi Majumdar</i>	413–420
Mass and decay constant of the $(q\bar{q})$ -pion in a relativistic-potential model of the independent quarks	<i>S N Jena, M R Behera and S Panda</i>	711–725
Nuclear Physics		
ΛN Space-exchange effects in the s -shell hypernuclei and ${}^9_{\Lambda}\text{Be}$	<i>Mohammad Shoeb</i>	421–432
Investigation of two- and three-nucleon transfer reactions in ${}^{12}\text{C} + {}^{56}\text{Fe}$	<i>Hari S Patel, B Srinivasan, B J Roy and M G Betigeri</i>	433–444
$T=0$ versus $T=1$ pairing in $O(36)$ limit of IBM-4 for heavy $N=Z$ nuclei	<i>V K B Kota</i>	727–731
Vertex function and coupling constant for the virtual decay of ${}^7\text{Li}$	<i>V K Sharma</i>	733–742
Near-barrier fusion reactions induced by alpha on ${}^{197}\text{Au}$, ${}^{193}\text{Ir}$, ${}^{191}\text{Ir}$, ${}^{185}\text{Re}$, ${}^{181}\text{Ta}$, ${}^{121}\text{Sb}$ and ${}^{69}\text{Ga}$ nuclei	<i>M Ismail</i>	743–750
Atomic and Molecular Physics		
On the Wigner–Witmer correlation rules for a homonuclear diatomic molecule with the like atoms in identical atomic states	<i>V P Bellary, T K Balasubramanian and B J Shetty</i>	445–452
Total electron scattering cross-sections for carbon monoxide at low electron energies	<i>P Rawat, K P Subramanian and Vijay Kumar</i>	453–462

- Calculation of triple differential cross-sections of *K*-shell ionization of medium-heavy atoms by electrons for symmetric geometry
J N Das and S Dhar 751–756

Plasma Physics

- Amplification of extra-ordinary mode wave in the presence of kinetic Alfvén wave turbulence *B N Saikia, B J Saikia, K S Goswami and Bujarbarua* 481–488
- Possibility of weakly charged non-linear solitary dust clouds near the continuum threshold of dust population in a quasi-neutral dusty plasma
S K Baishya, Joyanti Chutia, M K Kalita, G C Das and C B Dwivedi 757–771

Fluid Dynamics

- On a class of three-dimensional corner eddies *P N Shankar* 489–503

Lasers, Optics and Spectroscopy

- Design considerations and scaling laws for high power convective cooled CW CO₂ lasers *A K Nath and V S Golubev* 463–480

Condensed Matter Physics

- Magnetic anomalies in Gd₂PdSi₃ *R Mallik, E V Sampathkumaran, P L Paulose, H Sugawara and H Sato* 505–510
- Dielectric properties of electrolytic solutions
V V Navarakhele, R S Agarwal and M L Kurtadikar 511–518
- 3-d model for strain ordering in steel: I Static effects
S K Ghoshal and S Dattagupta 519–538
- 3-d model for strain ordering in steel: II Relaxational effects
S K Ghoshal and S Dattagupta 539–546
