

Indexes to Volume 65

SUBJECT INDEX

Mathematical Physics

Exact periodic waves and their interactions for the (2+1)-dimensional KdV equation *Yan-ze Peng* 177–183

Quantum Mechanics

The generalized pseudospectral approach to the bound states of the Hulthén and the Yukawa potentials *Amlan K Roy* 1–15

Semi-classical limit of relativistic quantum mechanics *L Kocis* 147–152

Quantum states with continuous spectrum for a general time-dependent oscillator *Jeong-Ryeol Choi* 165–176

The incompatibility between local hidden variable theories and the fundamental conservation laws *C S Unnikrishnan* 359–379

Parity and the spin–statistics connection *J A Morgan* 513–516

Wigner distributions for finite dimensional quantum systems: An algebraic approach
S Chaturvedi, E Ercolessi, G Marmo, G Morandi, N Mukunda and R Simon 981–993

General Relativity and Gravitation

Stability of naked singularity arising in gravitational collapse of Type I matter fields *Sanjay B Sarwe and R V Saraykar* 17–33

Charged fluid distribution in higher dimensional spheroidal space-time
G P Singh and S Kotambkar 35–41

Relativistic compact objects in isotropic coordinates
M K Mak and T Harko 185–192

Particle Physics

Supersymmetric quantum mechanics for two-dimensional disk
Akira Suzuki, Ranabir Dutt and Rajat K Bhaduri 49–59

The next-to-leading order (NLO) gluon distribution from DGLAP equation and the logarithmic derivatives of the proton structure function $F_2(x, Q^2)$ at low x
D K Choudhury and P K Sahariah 193–213

Relativistic theory of inverse beta-decay of polarized neutron in strong magnetic field
S Shinkevich and A Studenikin 215–244

Chiral soliton model vs. pentaquark structure for $\Theta(1540)$
R Ramachandran 381–391

Numerical consistency check between two approaches to radiative corrections for neutrino masses and mixings
Mrinal Kumar Das, Mahadev Patgiri and N Nimai Singh 995–1013

- New uncertainties in QCD–QED rescaling factors using quadrature method
Mahadev Patgiri and N Nimai Singh 1015–1025
- Nuclear Physics**
- A package for gamma-ray spectrum analysis and routine neutron activation analysis
M E Medhat, A Abdel-Hafiez, Z Awaad and M A Ali 245–258
- Role of guard rings in improving the performance of silicon detectors
Vijay Mishra, V D Srivastava and S K Kataria 259–272
- A correspondence between IBA-1 and IBA-2 models and electromagnetic transitions in the decay of some erbium isotopes
Harun Reşit Yazar and İhsan Uluer 393–402
- Two-neutrino double β decay of ^{96}Zr to excited 2^+ state of ^{96}Mo
J Singh, R Chandra, P K Raina and P K Rath 517–522
- Optical model potential of 800 MeV/c K^+ meson for ^{12}C and ^{40}Ca by the method of inversion
I Ahmad, M A Abdulmomen and Ghada A Hamra 523–528
- Relativistic analysis of nuclear ground state densities at 135 to 200 MeV
M A Suhail, N Neelofar and Z A Khan 1027–1040
- Structure of high spin states of ^{76}Kr and ^{78}Kr nuclei
U R Jakhar, H L Yadav and A Ansari 1041–1051
- Application of pulse shape discrimination in Si detector for fission fragment angular distribution measurements
B K Nayak, E T Mirgule and R K Choudhury 1053–1059
- Experimental Techniques and Instrumentation**
- A high-performance, low-cost, leading edge discriminator
S K Gupta, Y Hayashi, A Jain, S Karthikeyan, S Kawakami, K C Ravindran and S C Tonwar 273–283
- Two-dimensional microwave band-gap structures of different dielectric materials
E D V Nagesh, G Santosh Babu, V Subramanian, V Sivasubramanian and V R K Murthy 1115–1120
- Atomic and Molecular Physics**
- Application of potential harmonic expansion method to BEC: Thermodynamic properties of trapped ^{23}Na atoms
Anasuya Kundu, Barnali Chakrabarti and Tapan Kumar Das 61–74
- Fine-structure energy levels, oscillator strengths and lifetimes of chlorine-like chromium
Man Mohan, Avnindra K Singh, Alok K S Jha and Narendra Singh 75–84
- Quasi-binary incident electron–centre of mass collision in $(e, 3e)$ process on He and He-like ions
R Choubisa and K K Sud 85–93
- Evidence for resonance electron transfer in photon excited X-ray satellite spectra of fluorine compounds
K Ram Narayana, B Seetharami Reddy, S S Raju, T Seshi Reddy, S Lakshmi Narayana, K Premachand, B M Rao, M V R Murti and L S Mombasawala 285–290

- Laser frequency stabilization and large detuning by Doppler-free dichroic lock technique: Application to atom cooling
V B Tiwari, S R Mishra, H S Rawat, S Singh, S P Ram and S C Mehendale 403–411
- Lifetime measurement of excited atomic and ionic states of some noble gases using the high-frequency deflection technique
M B Das and S Karmakar 1061–1074
- Relation between spectroscopic constants with limited Dunham coefficients
Suresh Chandra 1133–1137
- Optics**
- The analytical investigation of the super-Gaussian pump source on the thermal, stress and thermo-optics properties of double-clad Yb:glass fiber lasers
H Nadgaran and P Elahi 95–105
- Pixel size and pitch measurements of liquid crystal spatial light modulator by optical diffraction
Ravinder Kumar Banyal and B Raghavendra Prasad 291–296
- Scattering of light by a periodic structure in the presence of randomness IV. Limit of detection by curve fitting
S Chatterjee and V C Vani 413–424
- Induced focusing and conversion of a Gaussian beam into an elliptic Gaussian beam
Manoj Mishra and Swapan Konar 425–436
- Acoustics**
- A comparative study of non-linearity parameter for binary liquid mixtures
J D Pandey, Ranjan Dey, Vinay Sanguri, Jyotsna Chhabra and Tanuja Nautiyal 535–540
- Fluid Dynamics**
- The constancy of the contact angle in viscous liquid motions with pinned contact lines
P N Shankar and R Kidambi 107–116
- Local shell-to-shell energy transfer via nonlocal interactions in fluid turbulence
Mahendra K Verma, Arvind Ayyer, Olivier Debliquy, Shishir Kumar and Amar V Chandra 297–310
- The shape of an axisymmetric bubble in uniform motion
P N Shankar 437–455
- Plasma Physics**
- The Bohm criterion for a dusty plasma sheath
B P Pandey and Anjan Dutta 117–124
- Excitation of surface plasma waves over corrugated slow-wave structure
Ashim P Jain and Jetendra Parashar 311–321
- Theoretical study of two-element array of equilateral triangular patch microstrip antenna on ferrite substrate
K K Verma and K R Soni 501–512
- Optical emission from laser-produced chromium and magnesium plasma under the effect of two sequential laser pulses
V N Rai, F Y Yueh and J P Singh 1075–1083

Condensed Matter Physics

- An effective pair potential for liquid semiconductor, Se: Structure and related dynamical properties *P P Nath, S Sarkar and R N Joarder* 125–135
- Performance of 20 Ci ^{137}Cs γ -ray Compton spectrometer for the study of momentum densities *B L Ahuja and M Sharma* 137–145
- Absorption spectrum of Mn^{2+} ions doped in diammonium hexaaqua-magnesium(II) sulfate *Ram Kripal and Ashutosh Kumar Shukla* 153–157
- On the bremsstrahlung background correction to the high-energy Compton spectroscopy *S Mathur and B L Ahuja* 159–164
- X-ray excited optical luminescence studies on the system BaXY ($X, Y = \text{F, Cl, Br, I}$) *K Govinda Rajan and A Jestin Lenus* 323–338
- Structure, single-particle and many-particle coefficients of Lennard–Jones liquid Al *G A Adebayo, O Akinlade, O A Malomo and L A Hussain* 339–347
- Electrical resistivity of NaPb compound-forming liquid alloy using *ab initio* pseudopotentials *Anil Thakur, N S Negi and P K Ahluwalia* 349–358
- Molecular dynamics study of two- and three-dimensional classical fluids using double Yukawa potential *Y Pathania and P K Ahluwalia* 457–468
- Material parameters for thermoelectric performance *M N Tripathi and C M Bhandari* 469–479
- Ultrasonic studies of aluminium-substituted Bi(Pb)-2223 superconductors *M B Solunke, P U Sharma, M P Pandya, V K Lakhani, K B Modi, P Venugopal Reddy and S S Shah* 481–490
- Negative chemical pressure effects induced by Y substitution for Ca on the ‘exotic’ magnetic behavior of the spin-chain compound, $\text{Ca}_3\text{Co}_2\text{O}_6$ *S Rayaprol and E V Sampathkumaran* 491–500
- Studies of linear correlation factor of dielectric polarization and excess dipolar free energies of amides in apolar solvents *M Malathi, R Sabesan and S Krishnan* 529–534
- Laser-induced down-conversion parameters of singly and doubly doped ZnS phosphors *H S Bhatti, Rajesh Sharma and N K Verma* 541–546
- Soft chemical routes to semiconductor nanostructures *Ujjal K Gautam, Kripasindhu Sardar, F L Deepak and C N R Rao* 549–564
- Simultaneous control of nanocrystal size and nanocrystal–nanocrystal separation in CdS nanocrystal assembly *Sameer Sapra and D D Sarma* 565–570
- Flow-driven voltage generation in carbon nanotubes *A K Sood, S Ghosh and Anindya Das* 571–579
- Synthesis, characterizations and applications of some nanomaterials (TiO_2 and SiC nanostructured films, organized CNT structures, ZnO structures and CNT–blood platelet clusters) *O N Srivastava, A Srivastava, D Dash, D P Singh, R M Yadav, P R Mishra and J Singh* 581–592

- Negative differential resistance in a one-dimensional molecular wire with odd number of atoms *S Lakshmi and Swapan K Pati* 593–599
- Self-organized structures in soft confined thin films *Ashutosh Sharma* 601–614
- Synthesis and analysis of ZnO and CdSe nanoparticles
Shriwas S Ashtaputre, Aparna Deshpande, Sonali Marathe, M E Wankhede, Jayashree Chimanpure, Renu Pasricha, J Urban, S K Haram, S W Gosavi and S K Kulkarni 615–620
- Performing chemical reactions in virtual capillary of surface tension-confined microfluidic devices
Angshuman Nag, Biswa Ranjan Panda and Arun Chattopadhyay 621–630
- Nanoparticles-chemistry, new synthetic approaches, gas phase clustering and novel applications
A Sreekumaran Nair, Chandramouli Subramaniam, M J Rosemary, Renjis T Tom, V R Rajeev Kumar, D M David Jeba Singh, Jobin Cyriac, Prashant Jain, K A Kalesh, Shreya Bhattacharya and T Pradeep 631–640
- Synthesis, structure and photocatalytic activity of nano TiO₂ and nano Ti_{1-x}M_xO_{2-δ} (M = Cu, Fe, Pt, Pd, V, W, Ce, Zr)
M S Hegde, K Nagaveni and Sounak Roy 641–645
- Influence of CuO catalyst in the nanoscale range on SnO₂ surface for H₂S gas sensing applications
Vinay Gupta, S Mozumdar, Arijit Chowdhuri and K Sreenivas 647–652
- Permeability of R6G across Cx43 hemichannels through a novel combination of patch clamp and surface enhanced Raman spectroscopy
C Madhavan Nair, C Sabna, K V G K Murty and S V Ramanan 653–661
- Processing, properties and some novel applications of magnetic nanoparticles
D Bahadur, J Giri, Bibhuti B Nayak, T Sriharsha, P Pradhan, N K Prasad, K C Barick and R D Ambashta 663–679
- Synthesis and characterization of water-soluble carbon nanotubes from mustard soot
Prashant Dubey, Devarajan Muthukumaran, Subhashis Dash, Rupa Mukhopadhyay and Sabyasachi Sarkar 681–697
- Construction of an optical tweezer for nanometer scale rheology
A Raghu and Sharath Ananthamurthy 699–705
- Nanostructured CdS/CdSSe glass composite for photonic application
S D Naik, S K Apte, R S Sonawane, U P Mulik and B B Kale 707–712
- Nanostructured copper particles-incorporated Nafion-modified electrode for oxygen reduction
T Selvaraju and R Ramaraj 713–722
- Investigations on the liquid crystalline phases of cation-induced condensed DNA
C K S Pillai, Neethu Sundaresan, M Radhakrishnan Pillai, T Thomas and T J Thomas 723–729
- Immobilization of redox mediators on functionalized carbon nanotube: A material for chemical sensor fabrication and amperometric determination of hydrogen peroxide
D R Shobha Jeykumari, S Senthil Kumar and S Sriman Narayanan 731–738

- Interaction effects in magnetic oxide nanoparticle systems
Raksha Sharma, C Pratima, Subhalakshmi Lamba and S Annapoorni 739–743
- Effect of rare-earth elements on nanophase evolution, crystallization behaviour and mechanical properties in Al–Ni–R (R = La/Mischmetal) amorphous alloys
K L Sahoo, Amitava Mitra and Sukomal Ghosh 745–751
- Effect of chain length on the adhesion behaviour of n-alkanethiol self-assembled monolayers on Au(111): An atomic force microscopy study
S Subramanian and S Sampath 753–761
- Hydration and translocation of an excess proton in water clusters: An *ab initio* molecular dynamics study
Arindam Bankura and Amalendu Chandra 763–768
- A single molecule switch based on two Pd nanocrystals linked by a conjugated dithiol
Ved Varun Agrawal, Reji Thomas, G U Kulkarni and C N R Rao 769–775
- Optically-driven red blood cell rotor in linearly polarized laser tweezers
Manas Khan, Samarendra K Mohanty and A K Sood 777–786
- Synthesis and characterization of silica–titania core–shell particles
Suchita Kalele, Ravi Dey, Neha Hebalkar, J Urban, S W Gosavi and S K Kulkarni 787–791
- Synthesis and characterization of nanophased silver tungstate
Thresiamma George, Sunny Joseph and Suresh Mathew 793–799
- Characterization of chemically synthesized CdS nanoparticles
Rajeev R Prabhu and M Abdul Khadar 801–807
- Growth of zinc oxide nanostructures
K Sreenivas, Sanjeev Kumar, Jaya Choudhary and Vinay Gupta 809–814
- Fluorescent silver nanoparticles via exploding wire technique
Alqudami Abdullah and S Annapoorni 815–819
- Nanoparticulate platinum films on gold using dendrimer-based wet chemical method
S Raghu, Sheela Berchmans, K L N Phani and V Yegnaraman 821–830
- On amorphization and nanocomposite formation in Al–Ni–Ti system by mechanical alloying
N Das, G K Dey, B S Murty and S K Pabi 831–840
- Ferromagnetic resonance investigation of nanocrystalline FeCuNbSiB
G A Basheed and S N Kaul 841–846
- Structural and magnetic phase formation in nanophase brass–iron electron compounds
A K Mishra and C Bansal 847–854
- Iron oxide nanoparticles stabilized inside highly ordered mesoporous silica
A Bhaumik, S Samanta and N K Mal 855–862
- A micro-convection model for thermal conductivity of nanofluids
Hrishikesh E Patel, T Sundararajan, T Pradeep, A Dasgupta, N Dasgupta and Sarit K Das 863–869

- Thin films of metal-organic compounds and metal nanoparticle-embedded polymers for nonlinear optical applications
S Philip Anthony, Shatabdi Porel, D Narayana Rao and T P Radhakrishnan 871–879
- Recent study of nanomaterials prepared by inert gas condensation using ultra high vacuum chamber
S Ramasamy, D J Smith, P Thangadurai, K Ravichandran, T Prakash, K Padmaprasad and V Sabarinathan 881–891
- Magnetic properties of nanostructured spinel ferrites and nanocomposite Nd₂Fe₁₄B/ α -Fe permanent magnets
A Narayanasamy 893–900
- Understanding the influence of nanoenvironment on luminescence of rare-earth ions
Pushpal Ghosh and Amitava Patra 901–907
- Interfacial properties of hybrid nanomaterials
Binil Itty Ipe, K Yoosaf and K George Thomas 909–915
- Synthesis, characterization and applications of nanostructural/nanodimensional metal oxides
B Nagappa, G T Chandrappa and Jacques Livage 917–923
- Arjunolic acid: A promising new building block for nanochemistry
Braja G Bag, Gopal C Maity and Subhash R Pramanik 925–929
- Metal nanoparticle-doped coloured films on glass and polycarbonate substrates
S K Medda, M Mitra, S De, S Pal and G De 931–936
- Nanoparticles of complex metal oxides synthesized using the reverse-micellar and polymeric precursor routes
Ashok K Ganguli, Tokeer Ahmad, Padam R Arya and Pika Jha 937–947
- Structural, electrical and gas-sensing properties of In₂O₃ : Ag composite nanoparticle layers
B R Mehta and V N Singh 949–958
- Electroless Ni–P–ferrite composite coatings for microwave applications
Ramesh Chandra Agarwala 959–965
- Covalent immobilization of myosin for *in-vitro* motility of actin
Ellis Bagga, Sunita Kumari, Rajesh Kumar, Rakesh Kumar, R P Bajpai and Lalit M Bharadwaj 967–972
- Preparation of nanoparticle size LiBiO₂ by combustion method and its electrochemical studies for lithium secondary cells
R Sathiyamoorthi, A Subramania, R Gangadharan and T Vasudevan 973–980
- Structural properties of low-density liquid alkali metals
A Akande, G A Adebayo and O Akinlade 1085–1096
- Investigation of W/O microemulsion droplets by contrast variation light scattering
Anuj Shukla and Reinhard H H Neubert 1097–1108
- Mössbauer study of some biological iron complexes
Sikander Ali, Alimuddin and V R Reddy 1121–1126
- Structural and dielectric properties of phosphorous-doped PLZT ceramics
Puja Goel, Subhash Sharma, Kanhaiya Lal Yadav and Ajit Ram James 1127–1132

Geophysics

A generation mechanism for discrete very low frequency emissions observed at Varanasi *A K Singh, S B Singh and R P Singh* 1109–1114

Cosmology

Collineations of the curvature tensor in general relativity *Rishi Kumar Tiwari* 43–48
