CONTENTS

Behaviour of organised disturbances in fully developed turbulent channel flow	423	<i>P K Sen and Srinivas V Veeravali</i>
Effect of fluid viscosity on wave propagation in a cylindrical bore in micropolar elastic medium	439	<i>Sunita Jeswal, Sushil K Tomar and Rajneesh Kumar</i>
Gas dynamic analysis of the performance of diffuser augment wind tunnel	453	<i>M T S Badawy and M E Aly</i>
Aerodynamic heating of ballistic missile including the effects of gravity	463	<i>S N Maitra</i>
Analysis of acoustic resonator with shape deformation using finite element method	475	<i>G M Kalmse, Ajay Chaudhari and P B Patil</i>
Bi-alphabetic pulse compression radar signal design	481	<i>I A Pasha, P S Moharir and N Sudarshan Rao</i>
A survey of checkpointing algorithms for parallel and distributed computers	489	<i>S Kalaiselvi and V Rajaraman</i>
High speed preprocessing system	511	<i>M Sankar Kishore</i>
