

Subject Index

- Acoustic emission
 On using peak amplitude and rise time for AE source characterization 295
- Amplitude ratios
 Reflection of plane micropolar viscoelastic waves at a loosely bounded solid-solid interface 493
- Analysis of concrete fracture
 ATENA-A tool for engineering analysis of fracture in concrete 485
- Application to CVD reactor
 Computation of flow and thermal fields in a model CVD reactor 657
- Approximate algorithms
 Efficient algorithms for approximate time separation of events 129
- Assumption-commitment
 Distributed automata in an assumption-commitment framework 209
- Asynchronous systems
 Efficient algorithms for approximate time separation of events 129
- ATENA
 ATENA-A tool for engineering analysis of fractures in concrete 485
- Austenitic stainless steel
 Laser power coupling efficiency in conduction and keyhole welding of austenitic stainless steel 383
- Automata-theory
 Distributed automata in an assumption-commitment framework 209
- Axial symmetry
 Roughness effect on squeeze film pressure 577
- Axial compressive strength
 Application of size effect to compressive strength of concrete members 467
- Bonding parameter
 Reflection of plane micropolar visco-elastic waves at a loosely bounded solid-solid interface 493
- Bounding delay timing analysis
 Efficient algorithms for approximate time separation of events 129
- Brink depth
 Hydraulics of free fall in Δ -shaped channels 353
- Bursty traffic
 Modeling and control of broadband traffic using multiplicative multifractal cascades 699
- Cauchy's equation
 Towards simulation of elasto-plastic deformation: An investigation 251
- Cementation material
 Cohesive stresses and size effect in quasi-brittle materials 461
- Character recognition
 A knowledge-based approach for recognition of handwritten Pitman shorthand language strokes 685
- Character segmentation
 Automatic recognition of printed Oriya script 23
- Character recognition
 Document image analysis: A primer 3
- Classifiers combination
 Devnagari numerical recognition by combining decision of multiple connectionist classifiers 59
- Classification
 Two-tier architecture for unconstrained handwritten character recognition 585
- Cohesive stresses
 Cohesive stresses and size effect in quasi-brittle materials 449
- Combustion knock
 Knock characteristics of dual-fuel combustion in diesel engines using natural gas as primary fuel 375
- Con-currency theory
 Distributed automata in an assumption-commitment framework 209

- Composite material
 Crack formation and fracture energy of normal and high strength concrete 413
- Computational tree logic
 Min-Max event-triggered computation tree logic 163
- Concrete structures
 Embrittlement and decrease of apparent strength in large-sized concrete structures 425
- Conduction loss
 Laser power coupling efficiency in conduction and keyhole welding of austenitic stainless steel 383
- Conic section function neural network
 Dimensionality reduction in conic section function neural network 675
- Continuum approach
 Propagation of Rayleigh surface waves with small wavelengths in non-local visco-elastic solids 605
- Convex approximation
 Efficient algorithms for approximate time separation of events 129
- Corrosion
 Development of fuels and structural materials for fast breeder reactors 527
- Coupling efficiency
 Laser power coupling efficiency in conduction and keyhole welding of austenitic stainless steel 383
- Crack-tip opening displacement
 Experimental and finite element analysis of fracture criterion in general yielding fracture mechanics 631
- C-shaped specimen
 Application of size effect to compressive strength of concrete members 467
- Cylindrical specimen
 Application of size effect to compressive strength of concrete members 467
- Decomposition
 Distributed automata in an assumption-commitment framework 209
- Decoupling
 Comments on "Surface waves in fibre-reinforced anisotropic elastic media" by Sengupta and Nath [Sadhana26:363-370 (2001)] 405
- Decoupling
 Comments on the criticism of Saravajit Singh on the paper "Surface waves in fibre-reinforced anisotropic elastic media" 408
- Delayed convergence
 Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Dimensionality reduction
 Dimensionality reduction in conic section function neural network 675
- Dispersion
 Propagation of Rayleigh surface waves with small waves lengths in non-local visco-elastic solids 605
- Displacement potentials
 Comments on "Surface waves in fibre-reinforced anisotropic elastic media" by Sengupta and Nath [Sadhana 26: 363-370 (2001)] 405
- Displacement potentials
 Comments on the criticism of Saravajit Singh on the paper "Surface waves in fibre-reinforced anisotropic elastic media" 408
- Distributed system
 Product interval automata 181
- Document processing
 Document image analysis: A primer 3
- Document processing
 Neural network based system for script identification in Indian documents 83
- Double liquid layer
 Surface wave propagation in a double layer over liquid-saturated porous half-space 643
- Dried vegetables
 Rehydration ratio of fluid bed-dried vegetables 365
- Efficient parameters
 On using peak amplitude and rise time for AE source characterization 295
- Elasto-plastic deformation
 Towards simulation of elasto-plastic deformation: An investigation 251
- End depth
 Hydraulics of free overfall in Δ -shaped channels 353
- English text production
 A knowledge-based approach for recognition of handwritten Pitman shorthand language strokes 685

- Equilateral triangle shaped channels
 Hydraulics of free overfall in Δ -shaped channels 353
- Extra Deep drawn steel sheets
 Experimental and finite element analysis of fracture criterion in general yielding fracture mechanics 631
- Fast breeder reactor
 Development of fuels and structural materials for fast breeder reactors 527
- Feature analysis
 Document image analysis : A primer 3
- Feature extraction
 Two-tier architecture for unconstrained handwritten character recognition 585
- Fibre-reinforced
 The reflection of quasi-P and quasi SV waves at a free and rigid boundaries of a fibre-reinforced medium 613
- Fibre-reinforced media
 Comments on "Surface waves in fibre-reinforced anisotropic elastic media" by Sengupta and Nath [sadhana 26: 363-370 (2001)] 405
- Fibre-reinforced medium
 Comments on the criticism of Sarvajit Singh on the paper "Surface waves in fibre-reinforced anisotropic elastic media" 408
- Fictitious crack model
 Size effect in the strength of concrete structures 449
- Fielded-inconsistent/consistent function sub-spaces
 Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Flexural compressive strength
 Application of size effect to compressive strength of concrete members 467
- Fluid flow
 Computataion of flow and thermal fields in a model CVD reactor 657
- Fluid-bed drying
 Rehydration ratio of fluid bed-dried vegetables 365
- Fluidisation
 Rehydration ratio of fluid bed-dried vegetables 365
- Fluvial hydraulics
 Incipient motion of gravel and coal beds 559
- Fractal goemtry
 Embrittlement and decrease of apparent strength in large-sized concrete structures 425
- Fracture Criteriion
 Experimental and finite element analysis of fracture criterion in general yielding fracture mechanics 631
- Fracture mechanics
 Cohesive stresses and size effect in quasi-brittle materials 461
- Fracture process
 Crack formation and fracture energy of normal and high strength concrete 413
- Fracture process zone(FPZ)
 Size effect in the strength of concrete structures 449
- Free overfall
 Hydraulics of free overfall in Δ -shaped channels 353
- Frequency equation
 Propagation of Rayleigh surface waves with small wave lengths in non-local visco-elastic solids 605
- Gas flow
 Melt flow characteristics in gas-assisted laser cutting 569
- General yielding fracture mechanics
 Experimental and finite element analysis of fracture criterion in general yielding fracture mechanics 631
- Generalized biharmonic equation
 A generalized biharmonic equation and its applications to hydrodynamic instability 309
- Granular material
 Incipient motion of gravel and coal beds 559
- Graphics recognition
 Document image analysis: A primer 3
- Gurumukhi script
 A post-processor for Gurumukhi OCR 99
- Handwritten numeral recognition
 Two-tier architecture for unconstrained handwritten character recognition 585
- Hankel transform
 Roughness effect on squeeze film pressure 577
- Hardware implementation
 Dimensionality reduction in conic section function neural network 675

- Heat transfer
 Computation of flow and thermal fields in a model CVD reactor 657
- High strength concrete
 Crack formation and fracture energy of normal and high strength concrete 413
- High strength concrete(HSC)
 Size effect in the strength of concrete structures 449
- Holder exponment
 Modelling and control of broad band traffic using multiplative multifractal cascades 699
- Human computer interaction
 Indian accent text-to-speech system for web browsing 113
- Hydraulics
 Hydraulics of fee overfall in Δ -shaped channels 353
- Hydrodynamic instability
 A generalized biharmonic equation and its applications to hydrodynamic instability 309
- Incipient motion
 Incipient motion of gravel and coal bed 559
- Indian accent
 Indian accent text-to-speech ssystem for web browsing 113
- Indian script
 Automatic recognition of printed Oriya script 23
- Isotropic elastic medium
 Shear waves in a fluid saturated elastic plate 595
- Kalan filter
 Modeling and control of broadman traffic using multiplactive multifractuall cascades 699
- Kannada script
 A font and size dependent OCR system for printed Kannada documents using suppourt vector machines 35
- Keyhole welding
 Laser power coupling efficiency in conduction and key hole welding of austentic stainless steel 383
- Knowledge base
 A knowlege-based approach for recognition of handwritten Pitman shorthand language strokes 685
- Laser cutting
 Melt flow characteristics in gas-assisted laser cutting 569
- Laser welding
 Laser power coupling efficiency in conduction and key hole welding of autensite stainless steel 383
- Layout analysis
 Document image analysis: A primer 3
- Learning vector quantization
 Two-tier architecture for unconstrained handwritten character recognitiion 585
- Logic
 Product interval automata 181
- Long range dependence
 Modeling and control of broadband traffic using multifractal cascades 699
- Liquid-saturated porous half-space
 Surface wave propagation in a double layer over liquid-saturated porous half-space 643
- Material behaviour
 Towards simulation of elasto-plastic deformation: An investigation 251
- Mechanical properties
 Development of fuels and structural materials for fast breeder reactors 527
- Melt film thickness
 Melt flow characteristics in gas-assisted laser cutting 569
- Meta-pi-network
 Devnagari numerical recognition by combining decision multiple connectists classifiers 59
- Micropolar viscoelastic solid
 Reflection of plane micropolar viscoelastic waves at a loosely bounded solid-solid interface 493
- Micropolar viscoplastic waves
 Reflection of plane micropolar viscoelastic waves at a loosely bounded solid-solid interface 493
- Mixed oxide
 Development of fuels and structural materials for fast breeder reactors 527
- Modified Navier-Stokes equation
 Towards simulation of elasto-plastic deformation: An investigation 251
- Multifractal
 Modelling and control of broadband traffic using multiplative multifractal cascades 699

- Multi-script multi-lingual document
Neural network based system for script identification in Indian documents 83
- Non local solids
Propagation of Rayleigh surface waves with small wave lengths in non local visco-elastic solids 605
- Nonlinear simulation
ATENA-A tool for engineering analysis of fracture in concrete 485
- Numerical recognition
Devnagari numerical recognition by combining decision of multi connectionist classifiers 59
- Numerical solution
Computation of flow and thermal fields in a model CVD reactor 657
- OCR
Document image analysis: A Primer 3
- OCR
A font and size-dependent OCR system for printed Kannada documents using vector machines 35
- OCR
A post-processor for Gurumukhi OCR 99
- One-dimensional flow
Hydraulics of free overfall in Δ -shaped channels 353
- Open channel flow
Hydraulics of free overfall in Δ -shaped channels 353
- Operating speed
Knock characteristics of dual-fuel combustion in diesel engines using natural gas as primary fuel 375
- Optical character recognition(OCR)
Automatic recognition of printed Oriya script 23
- Optical character recognition
Neural network based system for script identification in Indian documents 83
- Oriya text
Automatic recognition of printed Oriya script 23
- Pattern recognition
A font and size dependent OCR system for printed Kannada documents using support vector machines 35
- Peak amplitude
On using peak amplitude and rise time for AE source characterization 295
- Phase velocity
Shear waves in a fluid saturated elastic plate 595
- Pitman shorthand language
A knowledge-based approach for recognition of handwritten Pitman shorthand language strokes 685
- Plutonium carbide
Development of fuels and structural materials for fast breeder reactors 527
- Porous medium
Shear waves in a fluid saturated elastic plate 595
- Post-processing
A post-processor for Gurumukhi OCR 99
- Pressure and heat release diagrams
Knock characteristics of dual-fuel combustion in diesel engines using natural gas as primary fuel 375
- Primitives
A knowledge-based approach for recognition of handwritten Pitman shorthand language strokes 685
- Printed bilingual documents
Script identification in printed bilingual documents 73
- Propagation of waves
Propagation of Rayleigh surface waves with small wavelengths in non-local visco-elastic solids 605
- Quasi-P
The reflection of quasi-P and quasi-SV waves at a free and rigid boundaries of a fibre-reinforced medium 613
- Quasi-SH
The reflection of quasi-P and quasi-SV waves at a free and rigid boundaries of a fibre-reinforced medium 613
- Quasi-SV
The reflection of quasi-P and quasi-SV waves at a free and rigid boundaries of a fibre-reinforced medium 613
- Reconstruction software
An experimental method for ripple minimization in transmission data for industrial X-ray computed tomography imaging system 393

- Reflection
The reflection of quasi-P and quasi-SV waves at free and rigid boundaries of a fibre-reinforced medium 613
- Reflection coefficients
The reflection of quasi-P and quasi-SV waves at a free and rigid boundaries of a fibre-reinforced medium 613
- Rise time
On using peak amplitude and rise time for AE source characterization 295
- Roughness parameter
Roughness effect on squeeze film pressure 577
- Script identification
Script identification in printed bilingual documents 73
- Script identification
Neural network based system for script identification in Indian documents 83
- Sediment threshold
Incipient motion of gravel and coal beds 559
- Sediment transport
Incipient motion of gravel and coal beds 559
- Sedimentary bed
Incipient motion of gravel and coal beds 559
- Self-organizing map
Two-tier architecture for unconstrained handwritten character recognition 585
- Sensitivity analysis
Dimensionality reduction in conic section function neural network 675
- Shear locking
Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Shear stress
Melt flow characteristics in gas-assisted laser cutting 569
- Shear waves
Shear waves in a fluid saturated elastic plate 595
- Shew detection
Automation recognition of printed Oriya script 23
- Shrinkage cracking
Crack formation and fracture energy of normal and high strength concrete 413
- Signal averaging
An experimental method for ripple minimization in transmission data for industrial X-ray computed tomography imaging system 393
- Size effect
Size effect in the strength of concrete structures 449
- Size effect
Cohesive stresses and size effect in quasi-brittle materials 461
- Size effect
Application of size effect to compressive strength of concrete members 467
- Size-effects
Embrittlement and decrease of apparent strength in large sized concrete structures 425
- Solidification cracking
Laser power coupling efficiency in conduction and key hole welding of austenitic stainless steel 383
- Source characterization
On using peak amplitude and rise time for AE source characterization 295
- Specimen size
Application of size effect to compressive strength of concrete members 467
- Speech recognition
Indian accent text-to-speech system for web browsing 113
- Speech synthesis
Indian accent text-to-speech system for web browsing 113
- Spurious shear oscillations
Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Squeeze film
Roughness effect on squeeze film pressure 577
- Steady flow
Hydraulics of free overfall in Δ -shaped channels 353
- Strain localisation
Towards simulation of elasto-plastic deformation: An investigation 251
- Strain projection
Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Style category
Devnagiri numerical recognition by combining decision of multiple connectionist classifiers 59

- Substitution error
Two-tier architecture for unconstrained handwritten character recognition 585
- Support vector machines
A font and size independent OCR system for printed Kannada documents using support vector machines 35
- Surface waves
Surface wave propagation in a double layer over liquid-saturated porous half-space 643
- Surface wave
Comments on "Surface waves in fibre-reinforced anisotropic elastic media" by Sengupta and Nath [Sadhana 26: 363–370 (2001)] 405
- Tamil script
Script identification in printed bilingual documents 73
- Temporal query language
Min-Max event-triggered computation tree logic 163
- Tension instability
Towards simulation of elasto-plastic deformation: A investigation 251
- Text to speech
Indian accent text-to-speech system for web browsing 113
- Three point bend (TPB) beam
Size effect in the strength of concrete structures 449
- Time separation of events
Efficient algorithms for approximate time separation of events 129
- Times automata
Product interval automata 181
- Timing analysis and verification
Efficient algorithms for approximate time separation of events 129
- Timing verification
Min-Max event-triggered computation tree logic 163
- Tomography imaging
An experimental method for ripple minimization in transmission data for industrial X-ray computed tomography imaging system 393
- Transversely isotropic media
Comments on "Surface waves in fibre-reinforced anisotropic elastic media" by Sengupta and Nath [Sadhana 26: 363–370 (2001)] 405
- Variational correctness
Analysis of delayed convergence in the three-noded Timoshenko beam element using the function space approach 507
- Verification
Distributed automata in an assumption-commitment framework 209
- Void swelling
Development of fuels and structural materials for fast breeder reactors 527
- Wavelets
Modelling and control of broad band traffic using multiplicative multifractal cascades 699
- Web-reader
Indian accent text-to-speech system for web browsing 113
- X ray imaging
An experimental method for ripple minimization in transmission data for industrial X-ray computed tomography imaging system 393
