Academy Proceedings in Engineering Sciences

Volume 28, 2003

CONTENTS

Plane strain problem in microstretch elastic solids	<i>Rajneesh Kumar, Ranjit Singh and T K Chadha</i>	975–990
Changes in polymer foils used in food packaging tested by using DSC	<i>J Gajdoš Kljusurić</i>	991–998
Evolutionary robotics – A review	<i>Dilip Kumar Pratihari</i>	999–1009
Effect of deformation and dielectric filling on electromagnetic propagation through wave guides	<i>Ajay Chaudhari</i>	1011–1018
A third-order active-R filter with feedforward input signal	<i>G Shinde, P B Patil and P R Mirkute</i>	1019–1026
Time-variant power spectral analysis of heart rate time series by autoregressive moving average (ARMA) method	<i>V P S Naidu and M R S Reddy</i>	1027–1035
Recognition of Pitman shorthand text using tangent feature values at word level	<i>P Nagabhushan and S Murali</i>	1037–1046
Special Issue on Frontiers in Materials Science, Part 1		
Foreword	<i>R Chidambaram</i>	1–4
Summary	<i>Baldev Raj and K Bhanu Sankara Rao</i>	5–15
Freedom and fashion in materials science and engineering	<i>Robert W Cahn</i>	17–22
Structure and thermal stability of nanocrystalline materials	<i>B S Murty, M K Datta and S K Pabi</i>	23–45
Characterisation of interfaces in nanocrystalline palladium	<i>R Divakar and V S Raghunathan</i>	47–62
Melting behaviour of lead and bismuth nano-particles in quasicrystalline matrix – The role of interfaces	<i>Alok Singh and A P Tsai</i>	63–80
Nanostructured electronic and magnetic materials	<i>R V Ramanujan</i>	81–96

Thermally assisted deformation of structural superplastics and nanostructured materials: A personal perspective	<i>K A Padmanabhan</i>	97–113
Rafting in single crystal nickel-base superalloys – An overview	<i>M Kamaraj</i>	115–128
Dynamics of micromechanisms controlling the mechanical behaviour of industrial single crystal superalloys	<i>M Benyoucef, A Coujou, F Pettinari-Sturmel, S Raujol, B Boubker and N Clément</i>	129–146
Thermomechanical fatigue – Damage mechanisms and mechanism-based life prediction methods	<i>H-J Christ, A Jung, H J Maier and R Teteruk</i>	147–165
Ductile fracture behaviour of primary heat transport piping material of nuclear reactors	<i>S Tarafder, V R Ranganath, S Sivaprasad and P Johri</i>	167–186
Cyclic deformation behaviour of austenitic steels at ambient and elevated temperatures	<i>Th Nebel and D Eifler</i>	187–208
Mechanical behaviour of aluminium–lithium alloys	<i>N Eswara Prasad, A A Gokhale and P Rama Rao</i>	209–246
Physical metallurgy of nickel aluminides	<i>G K Dey</i>	247–262
Superconductivity in MgB ₂ : Phonon modes and influence of carbon doping	<i>A Bharathi, Y Hariharan, Jemima Balaselvi and C S Sundar</i>	263–272
Critical current densities in superconducting materials	<i>P Chaddah</i>	273–282
Nanocrystalline magnetic alloys and ceramics	<i>M Pal and D Chakravorty</i>	283–297
Micro powder-injection moulding of metals and ceramics	<i>Volker Piötter, Thomas Gietzelt and Lothar Merz</i>	299–306
Ceramic microfabrication by rapid prototyping process chains	<i>R Knitter and W Bauer</i>	307–318
Aluminium matrix composites: Challenges and opportunities	<i>M K Surappa</i>	319–334
Porous carbons	<i>Satish M Manocha</i>	335–348
High performance carbon–carbon composites	<i>Lalit M Manocha</i>	349–358
Solidification cracking in austenitic stainless steel welds	<i>V Shankar, T P S Gill, S L Mannan and S Sundaresan</i>	359–382
Influence of alloying on hydrogen-assisted cracking and diffusible hydrogen content in Cr–Mo steel welds	<i>S K Albert, V Ramasubbu, N Parvathavarthini and T P S Gill</i>	383–393

Recent trends in repair and refurbishing of steam turbine components <i>A K Bhaduri, S K Albert, S K Ray and P Rodriguez</i>	395–408
Optimisation of post-weld heat treatment – A simple, practical method <i>P Rodriguez, S K Ray and A K Bhaduri</i>	409–430
Hydrogen embrittlement in power plant steels <i>R K Dayal and N Parvathavarthini</i>	431–451
Effect of hydrogen on mechanical properties of β -titanium alloys <i>H-J Christ, A Senemmar, M Decker and K Prißner</i>	453–465
Interplay of microbiological corrosion and alloy microstructure in stress corrosion cracking of weldments of advanced stainless steels <i>R K Singh Raman</i>	467–473
Electroless alloy/composite coatings: A review <i>R C Agarwala and Vijaya Agarwala</i>	475–493
Laser processing of materials <i>J Dutta Majumdar and I Manna</i>	495–562
Biomaterials and tissue engineering in reconstructive surgery <i>D F Williams</i>	563–574
Developments in mechanical heart valve prosthesis <i>Kalyani Nair, C V Muraleedharan and G S Bhuvaneshwar</i>	575–587
Fatigue behaviour of fine-grained alumina hip-joint heads under normal walking conditions <i>D Basu</i>	589–600
Corrosion of bio implants <i>U Kamachi Mudali, T M Sridhar and Baldev Raj</i>	601–637
Biomaterials and magnetism <i>D Bahadur and J Giri</i>	639–656
Biomimetics <i>P Ramachandra Rao</i>	657–676
Toughening and creep in multiphase intermetallics through microstructural control <i>A K Gogia, R G Baligidad and D Banerjee</i>	677–693
High temperature fatigue behaviour of intermetallics <i>K Bhanu Sankara Rao</i>	695–708
Recent advances in creep-resistant steels for power plant applications <i>P J Ennis and A Czyska-Filemonowicz</i>	709–730
Future developments and applications of nitrogen-bearing steels and stainless steels <i>J Foct</i>	731–737
Study of engineering surfaces using laser-scattering techniques <i>C Babu Rao and Baldev Raj</i>	739–761

Convergent beam electron diffraction – A novel technique for materials characterisation at sub-microscopic levels	<i>M Vijayalakshmi, S Saroja and R Mythili</i>	763–782
Bulk metallic glasses: A new class of engineering materials	<i>Joysurya Basu and S Ranganathan</i>	783–798
<i>In-situ</i> studies on phase transformations under electron irradiation in a high voltage electron microscope	<i>S Banerjee</i>	799–814
Computational materials science: The emergence of predictive capabilities of material behaviour	<i>Vijay Kumar</i>	815–831
A holistic approach to thermomechanical processing of alloys	<i>S Venugopal and Baldev Raj</i>	833–857
Teaching materials science and engineering	<i>Bernhard Ilschner</i>	859–864
Special Issue on Precision Machining		
Foreword	<i>V C Venkatesh</i>	865–866
Twentieth Century evolution of machining in the United States – An interpretative review	<i>M Eugene Merchant</i>	867–874
The size effect in metal cutting	<i>Milton C Shaw</i>	875–896
Controlled wear of vitrified abrasive materials for precision grinding applications	<i>M J Jackson, B Mills and M P Hitchiner</i>	897–914
Ductile streaks in precision grinding of hard and brittle materials	<i>V C Venkatesh, S Izman, S Sharif, T T Mon and M Konneh</i>	915–924
Machining and metrology systems for free-form laser printer mirrors	<i>D W Davis, M Walter, M Takahashi and T Masaki</i>	925–932
A comparative machining study of diamond-coated tools made by plasma torch, microwave, and hot filament techniques	<i>C E Bauer, A Inspektor and E J Oles</i>	933–944
Micro-machining of optical glasses – A review of diamond-cutting glasses	<i>F Z Fang, X D Liu and L C Lee</i>	945–955
Nano finish grinding of brittle materials using electrolytic in-process dressing (ELID) technique	<i>M Rahman, A Senthil Kumar, H S Lim and K Fatima</i>	957–974
Subject index		1047–1055
Author index		1057–1060
