

Foreword

This issue is intended to outline the diverse nature of activity pursued by a major cross-section of contemporary Indian inorganic chemists. The articles included here cover synthetic, structural, spectroscopic, kinetic, catalytic, theoretical, organometallic and biological aspects of inorganic chemistry. This issue is brought out to honour Professor Animesh Chakravorty on the occasion of his sixtieth birth anniversary. Professor Chakravorty has made pioneering contributions in the area of inorganic chemistry in the country.

We thank Prof. V Krishnan, Editor and the editorial staff of the journal for their kind cooperation.
