

SUBJECT INDEX

- (2R)-2-Anilinomethylpiperidine
Towards chiral diamines as chiral catalytic precursors for the borane-mediated enantioselective reduction of prochiral ketones 1003
- (3S)-3-Anilinomethyl-1,2,3,4-tetrahydroisoquinoline
Towards chiral diamines as chiral catalytic precursors for the borane-mediated enantioselective reduction of prochiral ketones 1003
- (E)-2-Arylvinyl bromide
A new convenient access to highly functionalized (E)-2-arylvinyl bromides 1035
- (H₂O₂-HBr) System
H₂O₂-HBr: A metal-free and organic solvent-free reagent system for the synthesis of arylaldehydes from methylarenes 177
- (S)-Phenylalanine
Towards chiral diamines as chiral catalytic precursors for the borane-mediated enantioselective reduction of prochiral ketones 1003
- 1,10-Phenanthroline
Synthesis and luminescent properties of novel Cu (II), Zn (II) polymeric complexes based on 1,10-phenanthroline and biphenyl groups 407
- 1,3,5-Triazine-2,4,6-triyltrisulfamic acid(TTSA)
1,3,5-Triazine-2,4,6-triyltrisulfamic acid (TTSA): A new organic solid acid for the nitrosation of secondary amines and oxidation of urazoles in the presence of NaNO₂ under mild and heterogeneous conditions 441
- 1,3-Diaryltriazenes
Tris-(1,3-diaryltriazenide) complexes of rhodium—Synthesis, structure and, spectral and electrochemical properties 257
- 1,4-Diazepines
Synthesis, antimicrobial and antifungal activities of novel 1H-1,4-diazepines containing pyrazolopyrimidinone moiety 497
- 1-Oxopyridinium-2-thiopropionate
Supramolecular network formed through O–H...O and π - π stacking interactions: Hydrothermal syntheses and crystal structures of M(H₂O)₆[(optp)₂] (M = Mg, Ni, Zn, and optp = 1-oxopyridinium-2-thiopropionate) 413
- 2- and 4-Mercaptopyridine
A comparative electrochemical study of electrosorbed 2- and 4-mercaptopyridines and their application as corrosion inhibitors at C60 steel 693
- 2-(Naphthyl-1'-azo)-4-methylphenol
Iridium mediated phenolic O–H activation and cyclometalation of 2-(naphthyl-1'-azo)-4-methylphenol – Formation of organoiridium complexes 387
- 2,2,2-Trifluoroethyl acrylate
Surface functionalization of HF-treated silicon nano-wires 323
- 2,5-Diaminobenzenesulfonic acid
Voltammetric behaviour of levodopa and its quantification in pharmaceuticals using a β -cyclodextrine doped poly (2,5-diaminobenzenesulfonic acid) modified electrode 209
- 2-Amino pyridine
The synthesis of N–Zn, N–Cu complexes involving 2-amino pyridine and ethylenediamine ligands and application to the Henry reaction 435
- 2-Hydroxy Schiff bases
Intramolecular hydrogen bonding and tautomerism in Schiff bases: Part VI. Syntheses and structural investigation of salicylaldehyde and naphthaldehyde derivatives 989
- 2-Methyl benzimidazole
Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
- 3-Amino-5-phenyl-pyrazole
A comparative study of electrochemical reduction of isatin and its synthesized Schiff bases at HMDE 347
- 3D Network structure
Sheet-like of Mo^V–Sm^{III} assembly containing [Mo^V(CN)₈]³⁻ and Sm³⁺ ions as building blocks 421
- 4-Aminoacetophenone
Chemoselective reaction of cyanoacetic acid with benzal-4-acetylanilines and fungitoxicity of products 449
- 4-Bromomethylcoumarins
Synthesis of some new 4-aryloxymethylcoumarins and examination of their antibacterial and antifungal activities 485
- 4-Nitrobenzoate
Synthesis, properties and supramolecular structure of di(aqua)bis(ethylenediamine)nickel(II) bis(4-nitrobenzoate) 145
- ab initio*
A new scaling algorithm for predicting vibrational spectra of polyatomic molecules 811
- Acetonitrile
Application of the Kirkwood–Buff theory of solutions to acetonitrile+amide binary mixtures by using inversion procedure and regular solution theory 361
- Acidity/basicity
Quest for new materials: Inorganic chemistry plays a crucial role 235

- Activation energy
 Temperature dependence studies on the electro-oxidation of aliphatic alcohols with modified platinum electrodes 329
- Acylation
 A new convenient access to highly functionalized (*E*)-2-arylvinyl bromides 1035
- Adsorption
 Preparation and adsorption property of aminated cross-linking microbeads of GMA/EGDMA for bilirubin 1061
- Alcohol
 Temperature dependence studies on the electro-oxidation of aliphatic alcohols with modified platinum electrodes 329
- Algorithms
 An improved numerical approximation for the first derivative 935
- Alizarin red S
 Linear sweep voltammetric studies on the supramolecular complex of alizarin red S with Lysozyme and determination of lysozyme 217
- Allenylphosphonate
 Allenylphosphonates with a 1,3,2-dioxaphosphorinane ring: Synthesis, structures, stability and utility 23
- Amide
 Application of the Kirkwood–Buff theory of solutions to acetonitrile + amide binary mixtures by using inversion procedure and regular solution theory 361
- Amidoalkyl naphthol
 Cu-exchanged heteropoly acids as efficient and reusable catalysts for preparation of 1-amidoalkyl-2-naphthols 429
- Amination
 Preparation and adsorption property of aminated cross-linking microbeads of GMA/EGDMA for bilirubin 1061
- Amino phosphazenes
 Formation of novel spiro, spiroansa and dispiroansa derivatives of cyclotetraphosphazene from the reactions of polyfunctional amines with octachlorocyclotetraphosphazetraene 125
- Ammonium
 Synthesis, antimicrobial activity of lamotrigine and its ammonium derivatives 463
- Ammonium perchlorate
 Synthesis of chrysalis-like CuO nanocrystals and their catalytic activity in the thermal decomposition of ammonium perchlorate 1077
- Amperometry
 Electrochemical reduction of hydrogen peroxide on stainless steel 675
- Amphotericin B
 Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
- Ampicillin
 Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
- Anisotropy parameters
 Computing magnetic anisotropy constants of single molecule magnets 823
- Antibacterial activity
 A simple protocol for the michael addition of indoles with electron deficient olefins catalysed by TBAHS in aqueous media and their broad spectrum antibacterial activity 65
 Synthesis and antimicrobial activity of some novel thienopyrimidines and triazolothienopyrimidines 301
 Synthesis, antimicrobial activity of lamotrigine and its ammonium derivatives 463
- Antifungal activity
 Synthesis and antimicrobial activity of some novel thienopyrimidines and triazolothienopyrimidines 301
- Antimicrobial
 Synthesis of some new 4-aryloxymethylcoumarins and examination of their antibacterial and antifungal activities 485
 Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
 Structural studies and antimicrobial properties of norcembrane diterpenoid from an Indian soft coral *Sinularia ineleigans* Tixier–Durivault 1041
- Antitumor
 Synthesis and cellular cytotoxicities of new N-substituted indole-3-carbaldehyde and their indolylchalcones 455
- Aqueous-biphasic
 A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
- Aromaticity
 Bonding, aromaticity and reactivity patterns in some all-metal and non-metal clusters 849
- Arylaldehydes
 H₂O₂–HBr: A metal-free and organic solvent-free reagent system for the synthesis of arylaldehydes from methylarenes 177
- Ascorbic acid
 Voltammetric behaviour of levodopa and its quantification in pharmaceuticals using a β -cyclodextrine doped poly (2,5-diaminobenzenesulfonic acid) modified electrode 209
- Assam coal
 A X-ray diffraction analysis on graphene layers of Assam coal 103
- Asymmetric reduction
 Towards chiral diamines as chiral catalytic precursors for the borane-mediated enantioselective reduction of prochiral ketones 1003

- Atoms-in-molecules
Structure and stability of spiro-cyclic water clusters 839
- Au–Pd Bimetal
Surface functionalization of HF-treated silicon nano-wires 323
- Azetidín-2-One
Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
- BaCO₃
Electrodeposition of BaCO₃ coatings on stainless steel substrates: Oriented growth in the presence of complexing agents 685
- Band-selective pulse
Generation of Serine/Threonine check points in HN(C)N spectra 955
- Benzal-4-acetylanilines
Chemoselective reaction of cyanoacetic acid with benzal-4-acetylanilines and fungitoxicity of products 449
- Benzalcyanoacetic acid
Chemoselective reaction of cyanoacetic acid with benzal-4-acetylanilines and fungitoxicity of products 449
- Bianthryl
Excited state dynamics of 9,9'-bianthryl in room temperature ionic liquids as revealed by picosecond time-resolved fluorescence study 309
- Bilirubin
Preparation and adsorption property of aminated cross-linking microbeads of GMA/EGDMA for bilirubin 1061
- Binary liquid mixtures
Application of the Kirkwood–Buff theory of solutions to acetonitrile + amide binary mixtures by using inversion procedure and regular solution theory 361
- Binary mixture
*n*th-Nearest neighbour distribution functions of a binary fluid mixture 929
- Biomíneralization
Sucrose/bovine serum albumin mediated biomimetic crystallization of calcium carbonate 89
- Biphenyl
Synthesis and luminescent properties of novel Cu (II), Zn (II) polymeric complexes based on 1,10-phenanthroline and biphenyl groups 407
- Bovine serum albumin
Sucrose/bovine serum albumin mediated biomimetic crystallization of calcium carbonate 89
- Brønsted acid
One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent—A green chemistry approach 481
- C4 Green plants
Pressure effect on rate of production of glucose-equivalent in plant cells 535
- Caffeine
Spectrometric mixture analysis: An unexpected wrinkle 617
- Calcium carbonate
Sucrose/bovine serum albumin mediated biomimetic crystallization of calcium carbonate 89
- Carbon doping
Magnetism of carbon doped Mn₅Si₃ and Mn₅Ge₃ films 173
- Carbon paste electrode
Voltammetric sensor for D-penicillamine determination based on its electrocatalytic oxidation at the surface of ferrocenes modified carbon paste electrodes 1083
- Catalysis
Application of molybdenum(VI) dichloride dioxide (MoO₂Cl₂) in organic transformations 111
- Catalyst
Catalytic synthesis of nitrogen-doped multi-walled carbon nanotubes using layered double hydroxides as catalyst precursors 225
- Catalytic activity
Synthesis of chrysalis-like CuO nanocrystals and their catalytic activity in the thermal decomposition of ammonium perchlorate 1077
- Catalytic cycle
Oxidation of phosphine by sulfur or selenium involving a catalytic cycle in the interconversion of monomer and tetramer forms of copper–maleonitriledithiolate complexes 37
- CdSe
Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- CdS
Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- C–H activation
Iridium mediated phenolic O–H activation and cyclometalation of 2-(naphthyl-1'-azo)-4-methylphenol – Formation of organoiridium complexes 387
- C–H... π interactions
Dominant π ... π interaction in the self assemblies of 4-benzylidene imidazolin-5-one analogues 973
- Charge-discharge capacitance
Hydrogel membrane electrolyte for electrochemical capacitors 727
- Check points
Generation of Serine/Threonine check points in HN(C)N spectra 955
- Chemical mixture
Quantitative measurement of mixtures by terahertz time-domain spectroscopy 515

- Chemical reduction
Preparation of amine coated silver nanoparticles using triethylenetetramine 83
- Chemisorbed reaction films
Surface reactivity and layer analysis of chemisorbed reaction films in the surface-chemical environment of alkyl octadecenoates 353
- Chemosensor Cu^{2+}
Highly sensitive optical chemosensor for the detection of Cu^{2+} using a rhodamine B spirolatam 543
- α -Chloroketones
Conversion of α, α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloroketones through a three-step domino process 1011
- Circular dichroism (CD)
Collagen–curcumin interaction—A physico-chemical study 509
- Cluster models
Some properties of electrochemical nanostructures 575
- Cluster–continuum model
Comparison between implicit and hybrid solvation methods for the determination of pK_a of mono-protonated form of 13^2 -(demethoxycarbonyl) pheophytin a in methanol 881
- Clusters
Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- CO_2
Electronic absorption spectra and nonlinear optical properties of CO_2 molecular aggregates: A quantum chemical study 873
- Co-adsorption
Structure transitions between copper-sulphate and copper-chloride UPD phases on Au(111) 745
- Coal structure
A X-ray diffraction analysis on graphene layers of Assam coal 103
- Cobaloximes
Kinetics and Equilibria for the axial ligation of bromomethyl(aqua)cobaloxime with pyridines – Isolation, characterization and DNA binding 1053
- Collagen
Collagen–curcumin interaction—A physico-chemical study 509
- Colorimetric
Highly sensitive optical chemosensor for the detection of Cu^{2+} using a rhodamine B spirolatam 543
- Conceptual DFT
Bonding, aromaticity and reactivity patterns in some all-metal and non-metal clusters 849
- Confined quantum system
Graham's law of diffusion: Quantum analogy and non-ideality 607
- Conical intersections
Nonadiabatic quantum wave packet dynamics of the $\text{H} + \text{H}_2$ reaction including the coriolis coupling 789
- Core–shell Au/Ag nanoparticles
Core–shell Au/Ag nanoparticles embedded in silicate sol–gel network for sensor application towards hydrogen peroxide 735
- Coriolis coupling
Nonadiabatic quantum wave packet dynamics of the $\text{H} + \text{H}_2$ reaction including the coriolis coupling 789
- Correlation analysis
Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
- Corrosion inhibition
A comparative electrochemical study of electroadsorbed 2- and 4-mercaptopyridines and their application as corrosion inhibitors at C60 steel 693
- COSY
Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
- Coulomb explosion
Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Covalent interactions
Tailoring self-assembled monolayers at the electrochemical interface 665
- Cr(VI) complex
Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
- Critical point (CP)
Signatures of molecular recognition from the topography of electrostatic potential 815
- Cross over
Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- Cross-linking microbeads
Preparation and adsorption property of aminated cross-linking microbeads of GMA/EGDMA for bilirubin 1061
- Crystal field theory
Quest for new materials: Inorganic chemistry plays a crucial role 235
- Crystal structure
Simple inorganic complexes but intricate hydrogen bonding networks: Synthesis and crystal structures of $[\text{M}^{\text{II}}(\text{opda})_2(\text{NO}_3)_2]$ ($\text{M} = \text{Zn}$ and Cd ; opda = orthophenylenediamine) 137
Synthesis, properties and supramolecular structure of di(aqua)bis(ethylenediamine)nickel(II) bis(4-nitrobenzoate) 145
Tris-(1,3-diaryltriazene) complexes of rhodium—Synthesis, structure and, spectral and electrochemical properties 257

- Synthesis, antimicrobial activity of lamotrigine and its ammonium derivatives 463
- Intramolecular hydrogen bonding and tautomerism in Schiff bases Part VI. Syntheses and structural investigation of salicylaldehyde and naphthaldehyde derivatives 989
- Crystal structures of two thiacalix[4]arene derivatives anchoring four thiadiazole groups 1047
- Crystal violet
Guest–host interactions in the alkaline bleaching of triphenylmethane dyes catalysed by β -cyclodextrin 529
- Crystallography
Structural studies and antimicrobial properties of norcembrane diterpenoid from an Indian soft coral *Simularia ineleigans* Tixier–Durivault 1041
- Cu UPD
Structure transitions between copper-sulphate and copper-chloride UPD phases on Au(111) 745
- Cu-exchanged salts
Cu-exchanged heteropoly acids as efficient and reusable catalysts for preparation of 1-amidoalkyl-2-naphthols 429
- Curcumin
Collagen–curcumin interaction—A physico-chemical study 509
- Cyano bridges
Sheet-like of $\text{Mo}^{\text{V}}\text{--Sm}^{\text{III}}$ assembly containing $[\text{Mo}^{\text{V}}(\text{CN})_8]^{3-}$ and Sm^{3+} ions as building blocks 421
- Cyanoacetic acid
Chemoselective reaction of cyanoacetic acid with benzal-4-acetylanilines and fungitoxicity of products 449
- Cyclic voltammetry
Temperature dependence studies on the electro-oxidation of aliphatic alcohols with modified platinum electrodes 329
Electrochemical reduction of hydrogen peroxide on stainless steel 675
- Cycloaddition
Allenylphosphonates with a 1,3,2-dioxaphosphorinane ring: Synthesis, structures, stability and utility 23
- Cyclodextrin
Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
- β -Cyclodextrine
Voltammetric behaviour of levodopa and its quantification in pharmaceuticals using a β -cyclodextrine doped poly (2,5-diaminobenzenesulfonic acid) modified electrode 209
Guest–host interactions in the alkaline bleaching of triphenylmethane dyes catalysed by β -cyclodextrin 529
- Cyclotetraphosphazenes
Formation of novel spiro, spiroansa and dispiroansa derivatives of cyclotetraphosphazene from the reactions of polyfunctional amines with octachlorocyclo-tetraphosphazetetrane 125
- Cymene
Alkylation of toluene with isopropyl alcohol over SAPO-5 catalyst 199
- Deacetylation
A new convenient access to highly functionalized (*E*)-2-arylvinyl bromides 1035
- Decomposition
Synthesis of chrysalis-like CuO nanocrystals and their catalytic activity in the thermal decomposition of ammonium perchlorate 1077
- Deep UV
Azido-m-mecconine-‘high ortho’ Novolak resin-based negative photoresists for deep UV lithography 503
- Density matrix
Quantum entanglement and teleportation using statistical correlations 767
- Density of states
Some properties of electrochemical nanostructures 575
- Deoxygenation
Conversion of α, α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloro-ketones through a three-step domino process 1011
- Detailed balance
Growth and decay of large fluctuations far from equilibrium 905
- Determination
Linear sweep voltammetric studies on the supra-molecular complex of alizarin red S with lysozyme and determination of lysozyme 217
- DFT calculations
A new scaling algorithm for predicting vibrational spectra of polyatomic molecules 811
- Di(diindolylmethyl)carbazoles
Synthesis of new heteroaryldi(diindolyl)methanes: Colorimetric detection of DNA by di(diindolyl-methyl)carbazoles 183
- Di(diindolylmethyl)pyrroles
Synthesis of new heteroaryldi(diindolyl)methanes: Colorimetric detection of DNA by di(diindolyl-methyl)carbazoles 183
- Dielectric polarizable continuum model
Comparison between implicit and hybrid solvation methods for the determination of pK_a of mono-protonated form of 13²-(demethoxycarbonyl) pheophytin a in methanol 881
- Differential scanning calorimetry (DSC)
Collagen–curcumin interaction—A physico-chemical study 509
- Diffusion
A comparative molecular dynamics study of diffusion of *n*-decane and 3-methyl pentane in Y zeolite 921

- Diffusion coefficient
 Electrochemical studies of redox probes in self-organized lyotropic liquid crystalline systems 629
- Diffusion controlled
 Generalized Warburg impedance on realistic self-affine fractals: Comparative study of statistically corrugated and isotropic roughness 579
- β -Diketones/ β -ketoesters
 Synthesis, antimicrobial and antifungal activities of novel 1H-1,4-diazepines containing pyrazolopyrimidinone moiety 497
- Dinuclear
 Synthesis and structural characterization of a novel peroxo bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
- Diperiodatoargentate(III)
 Mechanistic study of ruthenium (III) catalysed oxidation of L-lysine by Diperiodatoargentate (III) in aqueous alkaline medium 275
- Direct borohydride fuel cell
 Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- Discrete Fourier transform
 Partition function of nearest neighbour Ising models: Some new insights 595
- Diterpene
 Structural studies and antimicrobial properties of norcembrane diterpenoid from an Indian soft coral *Sinularia inelegans* Tixier–Durivault 1041
- DNA-binding
 Synthesis, DNA-binding and photocleavage studies of Ru(II) complexes of phenyl-(4,5,9,14-tetraaza-benzo[b]triphenylen-1,1-yl)-methanone 397
 Kinetics and Equilibria for the axial ligation of bromomethyl(aqua)cobaloxime with pyridines – Isolation, characterization and DNA binding 1053
- Donor–acceptor
 Dominant π ... π interaction in the self assemblies of 4-benzylidene imidazolin-5-one analogues 973
- D-penicillamine
 Voltammetric sensor for D-penicillamine determination based on its electrocatalytic oxidation at the surface of ferrocenes modified carbon paste electrodes 1083
- Dye sensitized solar cells
 Unsymmetrical extended π -conjugated zinc phthalocyanine for sensitization of nanocrystalline TiO₂ films 75
- Dyson orbital
 Electronic structure analysis and vertical ionization energies of thiophene and ethynylthiophenes 867
- Electrocatalysis
 Core–shell Au/Ag nanoparticles embedded in silicate sol–gel network for sensor application towards hydrogen peroxide 735
- Effective harmonic oscillator
 Effective harmonic oscillator description of anharmonic molecular vibrations 805
- Electro reduction and HMDE
 A comparative study of electrochemical reduction of isatin and its synthesized Schiff bases at HMDE 347
- Electrocatalysis
 Surface modification of RuO₂ electrodes by laser irradiation and ion implantation: Evidence of electrocatalytic effects 639
- Electrocatalyst
 Some properties of electrochemical nanostructures 575
- Electrocatalytic
 Voltammetric sensor for D-penicillamine determination based on its electrocatalytic oxidation at the surface of ferrocenes modified carbon paste electrodes 1083
- Electrochemical and time-resolved STM
 Structure transitions between copper-sulphate and copper-chloride UPD phases on Au(111) 745
- Electrochemical impedance spectroscopy
 Temperature dependence studies on the electro-oxidation of aliphatic alcohols with modified platinum electrodes 329
 Platinum-carbon black-titanium dioxide nanocomposite electrocatalysts for fuel cell applications 655
- Electrochemical properties
 Iridium mediated phenolic O–H activation and cyclometalation of 2 (naphthyl-1'-azo)-4-methylphenol – Formation of organoiridium complexes 387
- Electrochemical reduction of H₂O₂
 Electrochemical reduction of hydrogen peroxide on stainless steel 675
- Electrochemical sensors
 A Nafion[®]-based co-planar electrode amperometric sensor for methanol determination in the gas phase 703
- Electrochemically active surface area
 Platinum-carbon black-titanium dioxide nanocomposite electrocatalysts for fuel cell applications 655
- Electrochemistry
 Synthesis, spectroscopic and redox properties of the mononuclear Ni^{II}, Ni^{II}(BPh₂)₂ containing (B–C) bond and trinuclear Cu^{II}–Ni^{II}–Cu^{II} type-metal complexes of N,N'-(4-amino-1-benzyl piperidine)-glyoxime 43
 A comparative electrochemical study of electro-sorbed 2- and 4-mercaptopyridines and their application as corrosion inhibitors at C60 steel 693
- Electro-deposition
 Disposable amperometric immunosensor based on layer-by-layer electro-depositing of the nanogold particles, prussian blue-modified indium tin oxide for determination of α -fetoprotein 1069
- Electrodeposition
 Electrodeposition of BaCO₃ coatings on stainless steel substrates: Oriented growth in the presence of complexing agents 685

- π Electron density
Electronic structure analysis and vertical ionization energies of thiophene and ethynylthiophenes 867
- Electron microscopy (STEM, TEM and SEM)
Preparation of amine coated silver nanoparticles using triethylenetetramine 83
- Electron propagator
Electronic structure analysis and vertical ionization energies of thiophene and ethynylthiophenes 867
- Electrophilic substitution
Synthesis of some new 4-aryloxmethylcoumarins and examination of their antibacterial and antifungal activities 485
- Electrostatic interactions
Tailoring self-assembled monolayers at the electrochemical interface 665
- Entanglement
Quantum entanglement and teleportation using statistical correlations 767
- Environmentally benign procedure
 H_2O_2 -HBr: A metal-free and organic solvent-free reagent system for the synthesis of arylaldehydes from methylarenes 177
- ESSR and magnetic susceptibility measurements
Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetanilide 57
- Ethylenediamine
Synthesis, properties and supramolecular structure of di(aqua)bis(ethylenediamine)nickel(II) bis(4-nitrobenzoate) 145
Synthesis and structural characterization of a novel peroxo bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
The synthesis of N-Zn, N-Cu complexes involving 2-amino pyridine and ethylenediamine ligands and application to the Henry reaction 435
- Excited state relaxation dynamics
Excited state dynamics of 9,9'-bianthryl in room temperature ionic liquids as revealed by picosecond time-resolved fluorescence study 309
- Excited state
Quantum dynamics of vibrational excitations and vibrational charge transfer processes in H^+ + O_2 collisions at collision energy 23 eV 797
- Excitonic spectra
Electronic absorption spectra and nonlinear optical properties of CO_2 molecular aggregates: A quantum chemical study 873
- Extended π -conjugation
Unsymmetrical extended π -conjugated zinc phthalocyanine for sensitization of nanocrystalline TiO_2 films 75
- Extraction
Synthesis, characterization and extraction studies of $\text{N,N''-bis[1-biphenyl-2-hydroxyimino-2-(4-acetyl-anilino)-1-ethylidene]-diamines}$ and their homo- and heteronuclear copper(II) complexes 163
- Femtosecond two-photon photoemission
Test of theoretical models for ultrafast heterogeneous electron transfer with femtosecond two-photon photoemission data 561
- Ferrocenes
Voltammetric sensor for D-penicillamine determination based on its electrocatalytic oxidation at the surface of ferrocenes modified carbon paste electrodes 1083
- Ferromagnetic coupling
Sheet-like of $\text{Mo}^{\text{V}}-\text{Sm}^{\text{III}}$ assembly containing $[\text{Mo}^{\text{V}}(\text{CN})_8]^{3-}$ and Sm^{3+} ions as building blocks 421
- α -Fetoprotein (AFP)
Disposable amperometric immunosensor based on layer-by-layer electro-depositing of the nanogold particles, prussian blue-modified indium tin oxide for determination of α -fetoprotein 1069
- Fick's first law
Simulation for memory effect of Fick's first law 601
- Fluctuation-dissipation theorem
Growth and decay of large fluctuations far from equilibrium 905
- Fluorescent
Synthesis of some new 4-aryloxmethylcoumarins and examination of their antibacterial and antifungal activities 485
- Fluorine
Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- Fluoroester additive
Electrochemical cell studies on fluorinated natural graphite in propylene carbonate electrolyte with difluoromethyl acetate (MFA) additive for low temperature lithium battery application 339
- Fluorometric titrations
Synthesis of new heteroaryldi(diindolyl)methanes: Colorimetric detection of DNA by di(diindolylmethyl)carbazoles 183
- Foldability criteria
Statistical theory of neutral protein evolution by random site mutations 887
- Force constants
A new scaling algorithm for predicting vibrational spectra of polyatomic molecules 811
- Free radical equilibrium
Multifunctional switches based on *bis*-imidazole derivative 983
- FRET
Distance dependence of fluorescence resonance energy transfer 777

- Fuel cell
 Temperature dependence studies on the electro-oxidation of aliphatic alcohols with modified platinum electrodes 329
- Fully quantum mechanical model
 Test of theoretical models for ultrafast heterogeneous electron transfer with femtosecond two-photon photo-emission data 561
- Fungitoxicity
 Chemoselective reaction of cyanoacetic acid with benzal-4-acetylanilines and fungitoxicity of products 449
- Gel polymer electrolyte
 Hydrogel membrane electrolyte for electrochemical capacitors 727
- Genetic algorithm
 On optimal designing of low frequency polychromatic fields for facile photo-dissociation of model diatomic molecules 757
- Gerischer model
 Test of theoretical models for ultrafast heterogeneous electron transfer with femtosecond two-photon photo-emission data 561
- Gewald reaction
 Synthesis and antimicrobial activity of some novel thienopyrimidines and triazolothienopyrimidines 301
- Glycidyl methacrylate
 Preparation and adsorption property of aminated cross-linking microbeads of GMA/EGDMA for bilirubin 1061
- Graham's law
 Graham's law of diffusion: Quantum analogy and non-ideality 607
- Graphene
 Distance dependence of fluorescence resonance energy transfer 777
- Graphene layers
 A X-ray diffraction analysis on graphene layers of Assam coal 103
- Green chemistry
 One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent—A green chemistry approach 481
- Ground state
 Quantum dynamics of vibrational excitations and vibrational charge transfer processes in $H^+ + O_2$ collisions at collision energy 23 eV 797
- Guest–host interactions
 Guest–host interactions in the alkaline bleaching of triphenylmethane dyes catalysed by β -cyclodextrin 529
- Half-peak potential
 Electrochemical studies of redox probes in self-organized lyotropic liquid crystalline systems 629
- H-bonding
 Synthesis and structural characterization of a novel peroxy bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
- HDAC
 Biological activities of substituted trichostatic acid derivatives 471
- Henry reaction
 The synthesis of N–Zn, N–Cu complexes involving 2-amino pyridine and ethylenediamine ligands and application to the Henry reaction 435
- Heterogeneous electron transfer
 Test of theoretical models for ultrafast heterogeneous electron transfer with femtosecond two-photon photo-emission data 561
 Theory of coherent molecule to surface electron injection: An analytical model 589
- Heteronuclear correlation techniques
 Intramolecular hydrogen bonding and tautomerism in Schiff bases: Part VI. Syntheses and structural investigation of salicylaldehyde and naphthaldehyde derivatives 989
- Heteropoly acid
 Cu-exchanged heteropoly acids as efficient and reusable catalysts for preparation of 1-amidoalkyl-2-naphthols 429
- Heteropolyoxotungstate
 A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
- Heteropoly-tungstovanadophosphate
 Studies on electron transfer reactions of Keggin-type mixed addenda heteropolytungstovanadophosphates with NADH 155
- Hexagonal phase
 Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- HN(C)N
 Generation of Serine/Threonine check points in HN(C)N spectra 955
- HN(C)N-ST
 Generation of Serine/Threonine check points in HN(C)N spectra 955
- Horner–Wadsworth–Emmons reaction
 Allenylphosphonates with a 1,3,2-dioxaphosphorinane ring: Synthesis, structures, stability and utility 23
- Host–guest interactions
 Tailoring self-assembled monolayers at the electrochemical interface 665
- HPLC
 Isolation and characterization of higher metallofullerenes $Ca@C_{92}$ and $Ca@C_{94}$ 297

- Hydrocarbon
A comparative molecular dynamics study of diffusion of *n*-decane and 3-methyl pentane in Y zeolite 921
- Hydrogel
Hydrogel membrane electrolyte for electrochemical capacitors 727
- Hydrogen bonding
Supramolecular network formed through O–H...O and π – π stacking interactions: Hydrothermal syntheses and crystal structures of $M(\text{H}_2\text{O})_6(\text{optp})_2$ ($M = \text{Mg}, \text{Ni}, \text{Zn}$, and $\text{optp} = 1\text{-oxypyridinium-2-thiopropionate}$) 413
Structure and stability of spiro-cyclic water clusters 839
- Hydrogen bonding and tautomerism
Intramolecular hydrogen bonding and tautomerism in Schiff bases: Part VI. Syntheses and structural investigation of salicylaldimine and naphthaldimine derivatives 989
- Hydrogen bonding interactions
Synthesis, properties and supramolecular structure of di(aqua)bis(ethylenediamine)nickel(II) bis(4-nitrobenzoate) 145
- Hydrogen evolution reaction
Some properties of electrochemical nanostructures 575
- Hydrogen oxidation
Imaging hydrogen oxidation activity of catalyst-coated perfluoro sulfonic acid-polymer electrolyte membranes using Scanning Electrochemical Microscopy 719
- Hydrogen peroxide
A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
Core-shell Au/Ag nanoparticles embedded in silicate sol-gel network for sensor application towards hydrogen peroxide 735
- Hydroquinone
A study of catalytic behavior of aromatic additives on the photo-Fenton degradation of phenol red 1027
- Hydrothermal synthesis
Supramolecular network formed through O–H...O and π – π stacking interactions: Hydrothermal syntheses and crystal structures of $M(\text{H}_2\text{O})_6(\text{optp})_2$ ($M = \text{Mg}, \text{Ni}, \text{Zn}$, and $\text{optp} = 1\text{-oxypyridinium-2-thiopropionate}$) 413
- Imaging
Imaging hydrogen oxidation activity of catalyst-coated perfluoro sulfonic acid-polymer electrolyte membranes using scanning electrochemical microscopy 719
- Imidazole
Multifunctional switches based on *bis*-imidazole derivative 983
- Imidazolin-5-one
Dominant π ... π interaction in the self assemblies of 4-benzylidene imidazolin-5-one analogues 973
- Inclusion complex
Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
- Indium tin oxide (ITO)
Disposable amperometric immunosensor based on layer-by-layer electro-depositing of the nanogold particles, prussian blue-modified indium tin oxide for determination of α -fetoprotein 1069
- Indole
A simple protocol for the michael addition of indoles with electron deficient olefins catalysed by TBAHS in aqueous media and their broad spectrum antibacterial activity 65
- Indolylchalcones
Synthesis and cellular cytotoxicities of new N-substituted indole-3-carbaldehyde and their indolylchalcones 455
- Inelastic vibrational excitation
Quantum dynamics of vibrational excitations and vibrational charge transfer processes in $\text{H}^+ + \text{O}_2$ collisions at collision energy 23 eV 797
- Inhibitor
Biological activities of substituted trichostatic acid derivatives 471
- Interaction
Linear sweep voltammetric studies on the supramolecular complex of alizarin red S with lysozyme and determination of lysozyme 217
- Intermolecular interactions
Application of the Kirkwood–Buff theory of solutions to acetonitrile + amide binary mixtures by using inversion procedure and regular solution theory 361
- Intricate hydrogen bonding networks
Simple inorganic complexes but intricate hydrogen bonding networks: Synthesis and crystal structures of of $[\text{M}^{\text{II}}(\text{opda})_2(\text{NO}_3)_2]$ ($M = \text{Zn}$ and Cd ; $\text{opda} = \text{ortho-phenylenediamine}$) 137
- Ion implantation
Magnetism of carbon doped Mn_5Si_3 and Mn_5Ge_3 films 173
- Ionic conductivity
Evaluation of collective transport properties of ionic melts from molecular dynamics simulations 913
- Ionic liquid
The role of specific interactions on dynamical processes in a room temperature ionic liquid 7
Excited state dynamics of 9,9'-bianthryl in room temperature ionic liquids as revealed by picosecond time-resolved fluorescence study 309

- Cu-exchanged heteropoly acids as efficient and reusable catalysts for preparation of 1-amidoalkyl-2-naphthols 429
- Ionic melts
Evaluation of collective transport properties of ionic melts from molecular dynamics simulations 913
- Ionization energy
Electronic structure analysis and vertical ionization energies of thiophene and ethynylthiophenes 867
- Iridium
Iridium mediated phenolic O–H activation and cyclo-metalation of 2-(naphthyl-1'azo)-4-methylphenol–
Formation of organoiridium complexes 387
- IR
Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetanilide 57
- Isatin
A comparative study of electrochemical reduction of isatin and its synthesized Schiff bases at HMDE 347
- Ising model
Partition function of nearest neighbour Ising models: Some new insights 595
- Isopropylation
Alkylation of toluene with isopropyl alcohol over SAPO-5 catalyst 199
- Isotope effects
Excited state intramolecular charge transfer reaction in 4-(1-azetidiny)benzonitrile: Solvent isotope effects 95
- Jahn–Teller distortions
Quest for new materials: Inorganic chemistry plays a crucial role 235
- Jarzynski theorem
Work distribution for a particle moving in an optical trap and non-Markovian bath 897
- Kinetic energy
Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Kinetics and equilibria
Kinetics and Equilibria for the axial ligation of bromomethyl(aqua)cobaloxime with pyridines – Isolation, characterization and DNA binding 1053
- Kinetics
Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
- Kinetics of oxidation
Mechanistic study of ruthenium (III) catalysed oxidation of L-lysine by diperiodatoargentate (III) in aqueous alkaline medium 275
- Kirkwood–Buff integrals
Application of the Kirkwood–Buff theory of solutions to acetonitrile + amide binary mixtures by using inversion procedure and regular solution theory 361
- Lamotrigine
Synthesis, antimicrobial activity of lamotrigine and its ammonium derivatives 463
- Laser irradiation and ion irradiation
Surface modification of RuO₂ electrodes by laser irradiation and ion implantation: Evidence of electro-catalytic effects 639
- Layer-by-layer
Disposable amperometric immunosensor based on layer-by-layer electro-depositing of the nanogold particles, prussian blue-modified indium tin oxide for determination of α -fetoprotein 1069
- Layered double hydroxides
Catalytic synthesis of nitrogen-doped multi-walled carbon nanotubes using layered double hydroxides as catalyst precursors 225
- LD-TOF-MS
Isolation and characterization of higher metallofullerenes Ca@C₉₂ and Ca@C₉₄ 297
- LE and CT emission decays
Excited state intramolecular charge transfer reaction in 4-(1-azetidiny)benzonitrile: Solvent isotope effects 95
- Levitation effect
A comparative molecular dynamics study of diffusion of *n*-decane and 3- methyl pentane in Y zeolite 921
- Levodopa
Voltammetric behaviour of levodopa and its quantification in pharmaceuticals using a β -cyclodextrine doped poly (2,5-diaminobenzenesulfonic acid) modified electrode 209
- Levulinic acid
Conversion of α,α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloro-ketones through a three-step domino process 1011
- Linear sweep voltammetry
Linear sweep voltammetric studies on the supra-molecular complex of alizarin red S with lysozyme and determination of lysozyme 217
- Lithium battery
Electrochemical cell studies on fluorinated natural graphite in propylene carbonate electrolyte with difluoromethyl acetate (MFA) additive for low temperature lithium battery application 339
- Lithography
Azido-m-meconine-‘high ortho’ Novolak resin-based negative photoresists for deep UV lithography 503
- L-lysine-Ru(III) catalysis
Mechanistic study of ruthenium (III) catalysed oxidation of L-lysine by diperiodatoargentate (III) in aqueous alkaline medium 275

- Loperamide
 Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
- Low temperature
 Electrochemical cell studies on fluorinated natural graphite in propylene carbonate electrolyte with difluoromethyl acetate (MFA) additive for low temperature lithium battery application 339
- Luminescence
 Synthesis and luminescent properties of novel Cu (II), Zn (II) polymeric complexes based on 1,10-phenanthroline and biphenyl groups 407
- Lyotropic liquid crystal
 Electrochemical studies of redox probes in self-organized lyotropic liquid crystalline systems 629
- Lysozyme
 Linear sweep voltammetric studies on the supra-molecular complex of alizarin red S with lysozyme and determination of lysozyme 217
- Magnesium
 Supramolecular network formed through O–H...O and π – π stacking interactions: Hydrothermal syntheses and crystal structures of $M(H_2O)_6](optp)_2$ (M = Mg, Ni, Zn, and optp = 1-oxypyridinium-2-thiopropionate) 413
- Magnetic films
 Magnetism of carbon doped Mn_5Si_3 and Mn_5Ge_3 films 173
- Malachite green
 Guest–host interactions in the alkaline bleaching of triphenylmethane dyes catalysed by β -cyclodextrin 529
- m*-aminophenol
 Quantitative measurement of mixtures by terahertz time–domain spectroscopy 515
- Mass spectroscopy
 Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Materials for technology
 Quest for new materials: Inorganic chemistry plays a crucial role 235
- Mechanism
 Sucrose/bovine serum albumin mediated biomimetic crystallization of calcium carbonate 89
 Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
- Membrane electrode assembly
 Platinum-carbon black-titanium dioxide nanocomposite electrocatalysts for fuel cell applications 655
- Memory effects
 Simulation for memory effect of Fick's first law 601
- Mercurous chloride
 Surface functionalization of HF-treated silicon nano-wires 323
- Mesoporous materials
 X-Ray photoelectron spectroscopic investigation of phenosafranin adsorbed onto micro and mesoporous materials 711
- Mesoporous TiO_2
 The study of the relationship between pore structure and photocatalysis of mesoporous TiO_2 317
- Metal clusters
 Bonding, aromaticity and reactivity patterns in some all-metal and non-metal clusters 849
- Metal complexes
 Simple inorganic complexes but intricate hydrogen bonding networks: Synthesis and crystal structures of $[M^{II}(opda)_2(NO_3)_2]$ (M = Zn and Cd; opda = orthophenylenediamine) 137
 Synthesis, characterization and extraction studies of *N,N'*-bis[1-biphenyl-2-hydroxyimino-2-(4-acetylanilino)-1-ethylidene]-diamines and their homo- and heteronuclear copper(II) complexes 163
- Metallofullerenes
 Isolation and characterization of higher metallofullerenes $Ca@C_{92}$ and $Ca@C_{94}$ 297
- Metal–metal bonding
 Quest for new materials: Inorganic chemistry plays a crucial role 235
- Methanol
 A Nafion[®]-based co-planar electrode amperometric sensor for methanol determination in the gas phase 703
- Methyl iodide
 Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Methylarenes
 H_2O_2 –HBr: A metal-free and organic solvent-free reagent system for the synthesis of arylaldehydes from methylarenes 177
- Michael addition
 A simple protocol for the michael addition of indoles with electron deficient olefins catalysed by TBAHS in aqueous media and their broad spectrum antibacterial activity 65
- Microwave irradiation
 Synthesis and cellular cytotoxicities of new N-substituted indole-3-carbaldehyde and their indolylchalcones 455
 One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent—A green chemistry approach 481
- Mixed valence
 Quest for new materials: Inorganic chemistry plays a crucial role 235

- Mn compounds
Magnetism of carbon doped Mn_5Si_3 and Mn_5Ge_3 films 173
- m*-nitroaniline
Quantitative measurement of mixtures by terahertz time-domain spectroscopy 515
- Modified electrode
Core-shell Au/Ag nanoparticles embedded in silicate sol-gel network for sensor application towards hydrogen peroxide 735
- Modified electrodes
Voltammetric behaviour of levodopa and its quantification in pharmaceuticals using a β -cyclodextrine doped poly (2,5-diaminobenzenesulfonic acid) modified electrode 209
- Molecular dynamics
Evaluation of collective transport properties of ionic melts from molecular dynamics simulations 913
- Molecular electrostatic potential (MESP)
Signatures of molecular recognition from the topography of electrostatic potential 815
- Molecular recognition
Tailoring self-assembled monolayers at the electrochemical interface 665
Signatures of molecular recognition from the topography of electrostatic potential 815
- Monomer \leftrightarrow tetramer interconversion
Oxidation of phosphine by sulfur or selenium involving a catalytic cycle in the interconversion of monomer and tetramer forms of copper-maleonitriledithiolate complexes 37
- Monte Carlo simulation
Simulation for memory effect of Fick's first law 601
- MoO_2Cl_2
Application of molybdenum(VI) dichloride dioxide (MoO_2Cl_2) in organic transformations 111
- Multiply charged ions
Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Mutations
Statistical theory of neutral protein evolution by random site mutations 887
- N and C labeled protein
Generation of Serine/Threonine check points in HN(C)N spectra 955
- N,N coordination
Tris-(1,3-diaryltriazene) complexes of rhodium-Synthesis, structure and, spectral and electrochemical properties 257
- Nafion[®]
A Nafion[®]-based co-planar electrode amperometric sensor for methanol determination in the gas phase 703
- Imaging hydrogen oxidation activity of catalyst-coated perfluoro sulfonic acid- polymer electrolyte membranes using scanning electrochemical microscopy 719
- Nafion[®]-117 membrane
Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- Nalidixic acid
Synthesis and biological activity of some heterocyclic compounds containing benzimidazole and beta-lactam moiety 1017
- N-alkylation
Synthesis and cellular cytotoxicities of new N-substituted indole-3-carbaldehyde and their indolylchalcones 455
- Nanogold particles (nano-Au)
Disposable amperometric immunosensor based on layer-by-layer electro-depositing of the nanogold particles, prussian blue-modified indium tin oxide for determination of α -fetoprotein 1069
- Nanoparticle
Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- Nanostructures
Synthesis of chrysalis-like CuO nanocrystals and their catalytic activity in the thermal decomposition of ammonium perchlorate 1077
- Nanotube
Distance dependence of fluorescence resonance energy transfer 777
- Nanowires
Some properties of electrochemical nanostructures 575
- Natural graphite
Electrochemical cell studies on fluorinated natural graphite in propylene carbonate electrolyte with difluoromethyl acetate (MFA) additive for low temperature lithium battery application 339
- NBO analysis
Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- N-doped carbon nanotube
Catalytic synthesis of nitrogen-doped multi-walled carbon nanotubes using layered double hydroxides as catalyst precursors 225
- Nearest neighbour distribution
*n*th-Nearest neighbour distribution functions of a binary fluid mixture 929
- Neutral evolution
Statistical theory of neutral protein evolution by random site mutations 887
- Nickel
Supramolecular network formed through O-H...O and π - π stacking interactions: Hydrothermal syntheses and crystal structures of $M(H_2O)_6[optp]_2$ ($M = Mg$,

- Ni, Zn, and optp = 1-oxypyridinium-2-thiopropionate) 413
- Nicotinamide adenine dinucleotide (NADH)
 Studies on electron transfer reactions of Keggin-type mixed addenda heteropolytungstovanadophosphates with NADH 155
- NICS(0)
 Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- Nitrosation
 1,3,5-Triazine-2,4,6-triyltrisulfamic acid (TTSA): A new organic solid acid for the nitrosation of secondary amines and oxidation of urazoles in the presence of NaNO₂ under mild and heterogeneous conditions 441
- Nitroso-oxime tautomerisation
 Conversion of α, α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloro-ketones through a three-step domino process 1011
- NMR
 Azido-m-meconine-'high ortho' Novolak resin-based negative photoresists for deep UV lithography 503
 Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
 Generation of Serine/Threonine check points in HN(C)N spectra 955
- NOCl addition to alkenes
 Conversion of α, α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloro-ketones through a three-step domino process 1011
- NOE
 Synthesis of some new 4-aryloxymethylcoumarins and examination of their antibacterial and antifungal activities 485
- Nonadiabatic reaction dynamics
 Nonadiabatic quantum wave packet dynamics of the H + H₂ reaction including the coriolis coupling 789
- Nonideality
 Graham's law of diffusion: Quantum analogy and non-ideality 607
- Nonlinear dissipative systems
 Growth and decay of large fluctuations far from equilibrium 905
- Nonlinear optical properties
 Electronic absorption spectra and nonlinear optical properties of CO₂ molecular aggregates: A quantum chemical study 873
- Non-Markovian bath
 Work distribution for a particle moving in an optical trap and non-Markovian bath 897
- Numerical differentiation
 An improved numerical approximation for the first derivative 935
- N-Zn, N-Cu complexes
 The synthesis of N-Zn, N-Cu complexes involving 2-amino pyridine and ethylenediamine ligands and application to the Henry reaction 435
- Octahedral
 Synthesis, properties and supramolecular structure of di(aqua)*bis*(ethylenediamine)nickel(II) *bis*(4-nitrobenzoate) 145
- One-pot
 One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent—A green chemistry approach 481
- Optical properties
 Preparation of amine coated silver nanoparticles using triethylenetetramine 83
- Optical trap
 Work distribution for a particle moving in an optical trap and non-Markovian bath 897
- Orbital disconnections
 Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- Organic electrolyte
 Electrochemical cell studies on fluorinated natural graphite in propylene carbonate electrolyte with difluoromethyl acetate (MFA) additive for low temperature lithium battery application 339
- Organic transformations
 Application of molybdenum(VI) dichloride dioxide (MoO₂Cl₂) in organic transformations 111
- Oriented crystallization
 Electrodeposition of BaCO₃ coatings on stainless steel substrates: Oriented growth in the presence of complexing agents 685
- Orthophenylenediamine
 Simple inorganic complexes but intricate hydrogen bonding networks: Synthesis and crystal structures of [M^{II}(opda)₂(NO₃)₂](M = Zn and Cd; opda = orthophenylenediamine) 137
- Outer sphere electron transfer reactions
 Studies on electron transfer reactions of Keggin-type mixed addenda heteropolytungstovanadophosphates with NADH 155
- Oxidation
 Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
 A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
- Oxidation/reduction
 Quest for new materials: Inorganic chemistry plays a crucial role 235
- Oximes
 Synthesis, characterization and extraction studies of N,N''-*bis*[1-biphenyl-2-hydroxyimino-2-(4-acetyl-anilino)-1-ethylidene]-diamines and their homo- and heteronuclear copper(II) complexes 163

- Oxygen reduction reaction
 Platinum-carbon black-titanium dioxide nanocomposite electrocatalysts for fuel cell applications 655
- Partition function
 Partition function of nearest neighbour Ising models: Some new insights 595
- P NMR spectroscopy
 Formation of novel spiro, spiroansa and dispiroansa derivatives of cyclotetraphosphazene from the reactions of polyfunctional amines with octachlorocyclotetraphosphazetetrane 125
- p*-cymene
 Alkylation of toluene with isopropyl alcohol over SAPO-5 catalyst 199
- Pericyclic reaction
 Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- Peroxo bridge
 Synthesis and structural characterization of a novel peroxo bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
- Phenol-red
 A study of catalytic behavior of aromatic additives on the photo-Fenton degradation of phenol red 1027
- Phenosafranin
 X-Ray photoelectron spectroscopic investigation of phenosafranin adsorbed onto micro and mesoporous materials 711
- Phosphine oxidation reduction
 Oxidation of phosphine by sulfur or selenium involving a catalytic cycle in the interconversion of monomer and tetramer forms of copper-maleonitriledithiolate complexes 37
- Phosphonyl-cyclobutane
 Allenylphosphonates with a 1,3,2-dioxaphosphorinane ring: Synthesis, structures, stability and utility 23
- Photocatalytic performance
 The study of the relationship between pore structure and photocatalysis of mesoporous TiO₂ 317
- Photochromism
 Multifunctional switches based on *bis*-imidazole derivative 983
- Photocleavage
 Synthesis, DNA-binding and photocleavage studies of Ru(II) complexes of phenyl-(4,5,9,14-tetraaza-benzo[b]triphenyl-1,1-yl)-methanone 397
- Photodissociation
 On optimal designing of low frequency polychromatic fields for facile photo-dissociation of model diatomic molecules 757
- Photo-Fenton
 A study of catalytic behavior of aromatic additives on the photo-Fenton degradation of phenol red 1027
- Photoinduced ultrafast dynamics
 Theory of coherent molecule to surface electron injection: An analytical model 589
- Photoisomerization
 The role of specific interactions on dynamical processes in a room temperature ionic liquid 7
- Photoresists
 Azido-*m*-meconine-‘high ortho’ Novolak resin-based negative photoresists for deep UV lithography 503
- Phthalocyanine
 Unsymmetrical extended π -conjugated zinc phthalocyanine for sensitization of nanocrystalline TiO₂ films 75
- Piezochromism
 Multifunctional switches based on *bis*-imidazole derivative 983
- pK_a
 Comparison between implicit and hybrid solvation methods for the determination of pK_a of mono-protonated form of 13²-(demethoxycarbonyl) pheophytin a in methanol 881
- Platinum
 Imaging hydrogen oxidation activity of catalyst-coated perfluoro sulfonic acid- polymer electrolyte membranes using scanning electrochemical microscopy 719
- Poly (vinyl alcohol) hydrogel
 Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- Polymer electrolyte fuel cell
 Platinum-carbon black-titanium dioxide nanocomposite electrocatalysts for fuel cell applications 655
- Polymer electrolytes
 A Nafion[®]-based co-planar electrode amperometric sensor for methanol determination in the gas phase 703
- Polymeric complexes
 Synthesis and luminescent properties of novel Cu (II), Zn (II) polymeric complexes based on 1,10-phenanthroline and biphenyl groups 407
- Polystyrene-anchored complexes
 Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetyl 57
- Polystyrene-anchored ligands
 Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetyl 57
- Pore structure
 The study of the relationship between pore structure and photocatalysis of mesoporous TiO₂ 317

- Potential energy surface
 Quantum dynamics of vibrational excitations and vibrational charge transfer processes in $H^+ + O_2$ collisions at collision energy 23 eV 797
- Pressure effect
 Pressure effect on rate of production of glucose-equivalent in plant cells 535
- Protein design
 Statistical theory of neutral protein evolution by random site mutations 887
- Pseudeopericyclic reaction
 Fluorine effect on pericyclic and pseudopericyclic processes: Evidences and *ab initio* theory 859
- p*-toluenesulfonic acid
 Synthesis, antimicrobial and antifungal activities of novel 1H-1,4-diazepines containing pyrazolopyrimidinone moiety 497
- Pyrazolo pyrimidinones
 Synthesis, antimicrobial and antifungal activities of novel 1H-1,4-diazepines containing pyrazolopyrimidinone moiety 497
- Pyridine
 A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
- Pyrolysis
 Catalytic synthesis of nitrogen-doped multi-walled carbon nanotubes using layered double hydroxides as catalyst precursors 225
- Quantitative analysis
 Quantitative measurement of mixtures by terahertz time-domain spectroscopy 515
- Quantum correlation
 Quantum entanglement and teleportation using statistical correlations 767
- Quantum information
 Quantum entanglement and teleportation using statistical correlations 767
- Quantum phase space
 On optimal designing of low frequency polychromatic fields for facile photo-dissociation of model diatomic molecules 757
- Quantum thermodynamics
 Graham's law of diffusion: Quantum analogy and non-ideality 607
- Quinaldine
 One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent—A green chemistry approach 481
- Raman spectroscopy
 Structural and spectroscopic investigation of lanthanum-substituted strontium-oxybritholites 283
- Rate of equivalent production
 Pressure effect on rate of production of glucose-equivalent in plant cells 535
- Reactivity
 Surface functionalization of HF-treated silicon nanowires 323
- Realistic self-affine fractals
 Generalized Warburg impedance on realistic self-affine fractals: Comparative study of statistically corrugated and isotropic roughness 579
- Recurrence relation
 Partition function of nearest neighbour Ising models: Some new insights 595
- Redox reactions
 Electrochemical studies of redox probes in self-organized lyotropic liquid crystalline systems 629
- Reflectance
 Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetanilide 57
- Relaxation time
 Simulation for memory effect of Fick's first law 601
- Resonance assignment
 Generation of Serine/Threonine check points in HN(C)N spectra 955
- Resorcinol and catechol
 A study of catalytic behavior of aromatic additives on the photo-Fenton degradation of phenol red 1027
- Rhodamine B spirolatam
 Highly sensitive optical chemosensor for the detection of Cu^{2+} using a rhodamine B spirolatam 543
- Rhodium
 Tris-(1,3-diaryltriazene) complexes of rhodium—Synthesis, structure and, spectral and electrochemical properties 257
- Rietveld refinement
 Structural and spectroscopic investigation of lanthanum-substituted strontium-oxybritholites 283
- ROESY
 Solution structure of loperamide and β -cyclodextrin inclusion complexes using NMR spectroscopy 521
- Role of inorganic chemistry
 Quest for new materials: Inorganic chemistry plays a crucial role 235
- Rosaniline
 Guest-host interactions in the alkaline bleaching of triphenylmethane dyes catalysed by β -cyclodextrin 529
- Rotating disc electrode
 Electrochemical reduction of hydrogen peroxide on stainless steel 675

- Rotational diffusion
The role of specific interactions on dynamical processes in a room temperature ionic liquid 7
- Rough electrode
Generalized Warburg impedance on realistic self-affine fractals: Comparative study of statistically corrugated and isotropic roughness 579
- Ruthenium(II) complex
Synthesis, DNA-binding and photocleavage studies of Ru(II) complexes of phenyl-(4,5,9,14-tetraaza-benzo[b]triphenyl-1,1-yl)-methanone 397
- Sandwich complexes
Bonding, aromaticity and reactivity patterns in some all-metal and non-metal clusters 849
- SAPO-5
Alkylation of toluene with isopropyl alcohol over SAPO-5 catalyst 199
- Scaling algorithms
A new scaling algorithm for predicting vibrational spectra of polyatomic molecules 811
- Schiff bases
Synthesis, characterization and extraction studies of *N,N'*-bis[1-biphenyl-2-hydroxyimino-2-(4-acetyl-anilino)-1-ethylidene]-diamines and their homo- and heteronuclear copper(II) complexes 163
A comparative study of electrochemical reduction of isatin and its synthesized Schiff bases at HMDE 347
- SECM
Imaging hydrogen oxidation activity of catalyst-coated perfluoro sulfonic acid-polymer electrolyte membranes using scanning electrochemical microscopy 719
- Second sound
Simulation for memory effect of Fick's first law 601
- Secondary amines
1,3,5-Triazine-2,4,6-triyltrisulfamic acid (TTSA): A new organic solid acid for the nitrosation of secondary amines and oxidation of urazoles in the presence of NaNO₂ under mild and heterogeneous conditions 441
- Selenium
Oxidation of phosphine by sulfur or selenium involving a catalytic cycle in the interconversion of monomer and tetramer forms of copper-maleonitriledithiolate complexes 37
- Self assemblies
Dominant $\pi \dots \pi$ interaction in the self assemblies of 4-benzylidene imidazolin-5-one analogues 973
- Self-assembled monolayers
Tailoring self-assembled monolayers at the electrochemical interface 665
A comparative electrochemical study of electrosorbed 2- and 4-mercaptopyridines and their application as corrosion inhibitors at C60 steel 693
- Self-consistent field
Effective harmonic oscillator description of anharmonic molecular vibrations 805
- SEM
Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- Sensor
Core-shell Au/Ag nanoparticles embedded in silicate sol-gel network for sensor application towards hydrogen peroxide 735
- Separation
A comparative molecular dynamics study of diffusion of *n*-decane and 3-methyl pentane in Y zeolite 921
- Si MAS NMR spectroscopy
Structural and spectroscopic investigation of lanthanum-substituted strontium-oxybritholites 283
- Silicon nanowires
Surface functionalization of HF-treated silicon nanowires 323
- Single molecule magnets
Computing magnetic anisotropy constants of single molecule magnets 823
- Single-ion anisotropy
Computing magnetic anisotropy constants of single molecule magnets 823
- Sinularia
Structural studies and antimicrobial properties of norcembrane diterpenoid from an Indian soft coral *Sinularia ineleigans* Tixier-Durivault 1041
- Sodium borohydride
Poly(vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- Solvatochromism
Multifunctional switches based on *bis*-imidazole derivative 983
- Solvent fractionated films
Surface reactivity and layer analysis of chemisorbed reaction films in the surface-chemical environment of alkyl octadecenoates 353
- Solvent relaxation dynamics
Excited state dynamics of 9,9'-bianthryl in room temperature ionic liquids as revealed by picosecond time-resolved fluorescence study 309
- Solvent-free
One-pot synthesis of quinaldine derivatives by using microwave irradiation without any solvent-A green chemistry approach 481
- Specific interactions
The role of specific interactions on dynamical processes in a room temperature ionic liquid 7
- Spectral and electrochemical properties
Tris-(1,3-diaryltriazene) complexes of rhodium-Synthesis, structure and, spectral and electrochemical properties 257

- Spectroelectrochemistry
 Synthesis, spectroscopic and redox properties of the mononuclear Ni^{II} , $\text{Ni}^{\text{II}}(\text{BPh}_2)_2$ containing (B–C) bond and trinuclear $\text{Cu}^{\text{II}}\text{--Ni}^{\text{II}}\text{--Cu}^{\text{II}}$ type-metal complexes of $\text{N,N}'$ -(4-amino-1-benzyl piperidine)-glyoxime 43
- Spectrometric mixture analysis
 Spectrometric mixture analysis: An unexpected wrinkle 617
- Spectrophotometrically
 A study of catalytic behavior of aromatic additives on the photo-Fenton degradation of phenol red 1027
- Spectroscopy
 Synthesis, spectroscopic and redox properties of the mononuclear Ni^{II} , $\text{Ni}^{\text{II}}(\text{BPh}_2)_2$ containing (B–C) bond and trinuclear $\text{Cu}^{\text{II}}\text{--Ni}^{\text{II}}\text{--Cu}^{\text{II}}$ type-metal complexes of $\text{N,N}'$ -(4-amino-1-benzyl piperidine)-glyoxime 43
- Spiro-cyclic
 Structure and stability of spiro-cyclic water clusters 839
- Spiro-phosphazene
 Formation of novel spiro, spiroansa and dispiroansa derivatives of cyclotetraphosphazene from the reactions of polyfunctional amines with octachlorocyclo-tetraphosphazetetrane 125
- π – π Stacks
 Sheet-like of $\text{Mo}^{\text{V}}\text{--Sm}^{\text{III}}$ assembly containing $[\text{Mo}^{\text{V}}(\text{CN})_8]^{3-}$ and Sm^{3+} ions as building blocks 421
- π ... π Stacking
 Dominant π ... π interaction in the self assemblies of 4-benzylidene imidazolin-5-one analogues 973
- Stainless steel electrode
 Electrochemical reduction of hydrogen peroxide on stainless steel 675
- Statistical mechanics
 Graham's law of diffusion: Quantum analogy and non-ideality 607
- Stereochemistry
 Structural studies and antimicrobial properties of norcembrane diterpenoid from an Indian soft coral *Sinularia inelegans* Tixier–Durivault 1041
- Strontium-oxybritholite
 Structural and spectroscopic investigation of lanthanum-substituted strontium-oxybritholites 283
- Structure
 Iridium mediated phenolic O–H activation and cyclometalation of 2-(naphthyl-1'-azo)-4-methylphenol–Formation of organoiridium complexes 387
- Succinimidato
 Synthesis and structural characterization of a novel peroxo bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
- Succinimide
 Synthesis and structural characterization of a novel peroxo bridged dinuclear cobalt(III) complex of succinimide showing three varieties of hydrogen bonding interactions 267
- Sucrose
 Sucrose/bovine serum albumin mediated biomimetic crystallization of calcium carbonate 89
- Sulfides
 Kinetics and correlation analysis of reactivity in the oxidation of organic sulfides by butyltriphenylphosphonium dichromate 189
 A water soluble heteropolyoxotungstate as a selective, efficient and environment friendly oxidation catalyst 377
- Sulfur
 Oxidation of phosphine by sulfur or selenium involving a catalytic cycle in the interconversion of monomer and tetramer forms of copper–maleonitriledithiolate complexes 37
- Supercapacitor
 Hydrogel membrane electrolyte for electrochemical capacitors 727
- Surface chemical reaction
 Surface reactivity and layer analysis of chemisorbed reaction films in the surface-chemical environment of alkyl octadecenoates 353
- Surface modification
 Surface modification of RuO_2 electrodes by laser irradiation and ion implantation: Evidence of electro-catalytic effects 639
- Surface reactivity
 Surface reactivity and layer analysis of chemisorbed reaction films in the surface-chemical environment of alkyl octadecenoates 353
- Surface tension
 Collagen–curcumin interaction–A physico-chemical study 509
- Synthesis
 Synthesis, spectroscopic and redox properties of the mononuclear Ni^{II} , $\text{Ni}^{\text{II}}(\text{BPh}_2)_2$ containing (B–C) bond and trinuclear $\text{Cu}^{\text{II}}\text{--Ni}^{\text{II}}\text{--Cu}^{\text{II}}$ type-metal complexes of $\text{N,N}'$ -(4-amino-1-benzyl piperidine)-glyoxime 43
- TDFGH
 On optimal designing of low frequency polychromatic fields for facile photo-dissociation of model diatomic molecules 757
- Teleportation
 Quantum entanglement and teleportation using statistical correlations 767
- TEM
 Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- Tetrabutylammonium bromide
 Cu-exchanged heteropoly acids as efficient and reusable catalysts for preparation of 1-amidoalkyl-2-naphthols 429

- Tetrabutylammonium hydrogen sulfate
A simple protocol for the michael addition of indoles with electron deficient olefins catalysed by TBAHS in aqueous media and their broad spectrum antibacterial activity 65
- Tetradentate
Synthesis, magnetic and spectral studies on polystyrene-anchored coordination complexes of bi-, tri-, tetra- and hexavalent metal ions with unsymmetrical dibasic tetradentate ONNO donor Schiff base derived from 3-formylsalicylic acid, ethylenediamine and 2-benzoylacetanilide 57
- Theobromine
Spectrometric mixture analysis: An unexpected wrinkle 617
- Thermochromism
Multifunctional switches based on *bis*-imidazole derivative 983
- Thiacalixarene
Crystal structures of two thiacalix[4]arene derivatives anchoring four thiadiazole groups 1047
- Thiadiazole
Crystal structures of two thiacalix[4]arene derivatives anchoring four thiadiazole groups 1047
- Thienopyrimidine
Synthesis and antimicrobial activity of some novel thienopyrimidines and triazolothienopyrimidines 301
- Thiophenic conjugated polymers
Electronic structure analysis and vertical ionization energies of thiophene and ethynylthiophenes 867
- THz-TDS
Quantitative measurement of mixtures by terahertz time-domain spectroscopy 515
- TICT reaction
Excited state intramolecular charge transfer reaction in 4-(1-azetidiny)benzotrile: Solvent isotope effects 95
- Tight-binding model
Distance dependence of fluorescence resonance energy transfer 777
- Time dependent Hellmann-Feynmann theorem
On optimal designing of low frequency polychromatic fields for facile photo-dissociation of model diatomic molecules 757
- Time-of-flight
Coulomb explosion of methyl iodide clusters using giga watt laser pulses in the visible region: Effect of wavelength, polarisation and doping 965
- Time-resolved fluorescence
Excited state dynamics of 9,9'-bianthryl in room temperature ionic liquids as revealed by picosecond time-resolved fluorescence study 309
- Toeplitz matrix
Partition function of nearest neighbour Ising models: Some new insights 595
- Toluene
Alkylation of toluene with isopropyl alcohol over SAPO-5 catalyst 199
- Topography
Signatures of molecular recognition from the topography of electrostatic potential 815
- Transoximation
Conversion of α, α' -dichlorodiazene dioxides using levulinic acid under solvent-free conditions to α -chloro ketones through a three-step domino process 1011
- Triazolothienopyrimidine
Synthesis and antimicrobial activity of some novel thienopyrimidines and triazolothienopyrimidines 301
- Trichostatic acid
Biological activities of substituted trichostatic acid derivatives 471
- Triindolylmethane
Synthesis of new heteroaryldi(diindolyl)methanes: Colorimetric detection of DNA by di(diindolylmethyl)carbazoles 183
- Tris complexes
Tris-(1,3-diaryltriazene) complexes of rhodium-Synthesis, structure and, spectral and electrochemical properties 257
- Two-dimensional phase transitions
Structure transitions between copper-sulphate and copper-chloride UPD phases on Au(111) 745
- Ultrafast dynamics
Test of theoretical models for ultrafast heterogeneous electron transfer with femtosecond two-photon photo-emission data 561
- Ultraviolet absorption
Spectrometric mixture analysis: An unexpected wrinkle 617
- Unsymmetrical zinc phthalocyanine and redox electrolyte
Unsymmetrical extended π -conjugated zinc phthalocyanine for sensitization of nanocrystalline TiO₂ films 75
- Urazoles
1,3,5-Triazine-2,4,6-triyltrisulfamic acid (TTSA): A new organic solid acid for the nitrosation of secondary amines and oxidation of urazoles in the presence of NaNO₂ under mild and heterogeneous conditions 441
- Utilization efficiency
Poly (vinyl alcohol) hydrogel membrane as electrolyte for direct borohydride fuel cells 647
- UV-Vis titrations
Synthesis of new heteroaryldi(diindolyl)methanes: Colorimetric detection of DNA by di(diindolylmethyl)carbazoles 183

- UV-Vis-NIR absorption
Isolation and characterization of higher metallofullerenes $\text{Ca}@C_{92}$ and $\text{Ca}@C_{94}$ 297
- Vibrational charge transfer
Quantum dynamics of vibrational excitations and vibrational charge transfer processes in $\text{H}^+ + \text{O}_2$ collisions at collision energy 23 eV 797
- Vibrational spectra
A new scaling algorithm for predicting vibrational spectra of polyatomic molecules 811
- Vibrational states
Effective harmonic oscillator description of anharmonic molecular vibrations 805
- Vibrational wavepackets
Theory of coherent molecule to surface electron injection: An analytical model 589
- Vic*-dioxime
Synthesis, spectroscopic and redox properties of the mononuclear Ni^{II} , $\text{Ni}^{\text{II}}(\text{BPh}_2)_2$ containing (B–C) bond and trinuclear $\text{Cu}^{\text{II}}\text{--Ni}^{\text{II}}\text{--Cu}^{\text{II}}$ type-metal complexes of $\text{N,N}'\text{-(4-amino-1-benzyl piperidine)-glyoxime}$ 43
- Viscosity
Collagen–curcumin interaction—A physico-chemical study 509
Evaluation of collective transport properties of ionic melts from molecular dynamics simulations 913
- Voltammetry
Hydrogel membrane electrolyte for electrochemical capacitors 727
- Warburg impedance
Generalized Warburg impedance on realistic self-affine fractals: Comparative study of statistically corrugated and isotropic roughness 579
- Water
A simple protocol for the Michael addition of indoles with electron deficient olefins catalysed by TBAHS in aqueous media and their broad spectrum antibacterial activity 65
 $\text{H}_2\text{O}_2\text{--HBr}$: A metal-free and organic solvent-free reagent system for the synthesis of arylaldehydes from methylarenes 177
- Water clusters
Structure and stability of spiro-cyclic water clusters 839
- Weak interaction
Crystal structures of two thiacalix[4]arene derivatives anchoring four thiadiazole groups 1047
- Work function
Some properties of electrochemical nanostructures 575
- X-ray
Formation of novel spiro, spiroansa and dispiroansa derivatives of cyclotetraphosphazene from the reactions of polyfunctional amines with octachlorocyclotetraphosphazetetrane 125
Synthesis of some new 4-aryloxymethylcoumarins and examination of their antibacterial and antifungal activities 485
- X-ray crystal structure
Allenylphosphonates with a 1,3,2-dioxaphosphorinane ring: Synthesis, structures, stability and utility 23
- X-ray crystallography
The synthesis of N–Zn, N–Cu complexes involving 2-amino pyridine and ethylenediamine ligands and application to the Henry reaction 435
- X-ray photoelectron spectroscopy
X-Ray photoelectron spectroscopic investigation of phenosafranine adsorbed onto micro and mesoporous materials 711
- XRD
Synthesis and characterization of CdS and CdSe nanoparticles prepared from novel intramolecularly stabilized single-source precursors 293
- Zeolite
A comparative molecular dynamics study of diffusion of *n*-decane and 3-methyl pentane in Y zeolite 921
- Zinc
Supramolecular network formed through O–H...O and $\pi\text{--}\pi$ stacking interactions: Hydrothermal syntheses and crystal structures of $\text{M}(\text{H}_2\text{O})_6(\text{optp})_2$ (M = Mg, Ni, Zn, and optp = 1-oxopyridinium-2-thiopropionate) 413
