

Editorial

All the journals published by the Academy are moving into the continuous article publishing (CAP) process. The Journal of Chemical Sciences has already started the CAP process from 2018 onwards. Authors, Reviewers and Readers of this Journal would have noticed the significant improvements in the processing of submitted manuscripts and publication after acceptance during 2018. The major changes are the following:

- 1) Assignment of continuous page numbers for the published articles is discontinued. Instead, continuous Article ID numbers are assigned to the published articles.
- 2) An accepted article goes through copyediting, proof checking, etc. exactly as before. The article will be published ONLINE (<https://link.springer.com/journal/volumesAndIssues/12039>) with the Article ID number and DOI.
- 3) The Article ID number and DOI will remain same in the print issue.
- 4) The article published with Article ID in Vol. 131 shall be cited as follows.
Dhananjayan Kaleeswaran and Ramaswamy Murugavel 2018 Picric acid sensing and CO₂ capture by a sterically encumbered azo-linked fluorescent triphenylbenzene based covalent organic polymer *J. Chem. Sci.* **131** 1
