

ACKNOWLEDGEMENTS

Journal of Earth System Science wishes to place on record the valuable assistance received from the following scientists in reviewing manuscripts during 2017.

Abd Manan Samad, *Universiti Teknologi MARA Malaysia, Selangor, Malaysia*

Abdul Azeez K K, *CSIR-National Geophysical Research Institute, Hyderabad*

Abdul Matin, *University of Calcutta, Kolkata*

Abhijit Basu, *Indiana University, Bloomington, United States*

Abhilash S, *Cochin University of Science and Technology, Kochi*

Abhinabha Roy, *Presidency University, Kolkata*

Abhishek Saha, *CSIR-National Institute of Oceanography, Dona Paula*

Ajanta Goswami, *Indian Institute of Technology, Roorkee*

Ajia Ajai, *Space Applications Centre, Ahmedabad*

Akhtar Malik Muhammad, *China University of Geosciences, China*

Akshara Kaginalkar, *Centre for Development of Advanced Computing, Pune*

Ali M M, *Florida State University, Tallahassee, United States*

Amara Masrouhi, *King Abdulaziz University, Jeddah, Saudi Arabia*

Ambili K M, *Indian Institute of Space Science and Technology, Thiruvananthapuram*

Ambraseys N N, *Imperial College, London, United Kingdom*

Amey Pathak, *Indian Institute of Technology Bombay, Mumbai*

Amiya K Samal, *Banaras Hindu University, Varanasi*

Anais Boura, *University Pierre and Marie CURIE, Paris, France*

Anamitra Saha, *Indian Institute of Technology Bombay, Mumbai*

Anand Jaitly, *Banaras Hindu University, Varanasi*

Anand Kulkarni, *RMS Risk Management Solutions, India*

Anand Singh, *CSIR-National Geophysical Research Institute, Hyderabad*

Anant Parekh, *Indian Institute of Tropical Meteorology, Pune*

Anbalagan R, *Indian Institute of Technology, Roorkee*

Anil Bhardwaj, *Vikram Sarabhai Space Centre, Thiruvananthapuram*

Anirban Guha, *Tripura University, Agartala*

Aniruddha Sen Gupta, *Indian Institute of Technology, Kharagpur*

Anoop Valiya Veettil, *Clemson University, United States*

Anupendu Gupta, *Geological Survey of India, Kolkata*
Aparna S G, *CSIR-National Institute of Oceanography, Dona Paula*
Arijit Ray, *Presidency University, Kolkata*
Arindam Dey, *Indian Institute of Technology, Guwahati*
Arnab Bandyopadhyay, *North Eastern Regional Institute of Science and Technology, Nirjuli*
Arun Mondal, *University of South Carolina, Columbia, United States*
Arun Saraf, *Indian Institute of Technology, Roorkee*
Arun Shrestha, *International Centre for Integrated Mountain Development, Nepal*
Arunangshu Mukherjee, *Rajiv Gandhi National Ground Water Training and Research Institute, Faridabad*
Arup Guha Niyogi, *Jadavpur University, Kolkata*
Arvind Kumar Srivastava, *India Meteorological Department, Pune*
Arya A S, *Space Applications Centre, Ahmedabad*
Arya Paul, *Indian National Centre for Ocean Information Services, Hyderabad*
Arzhan Surazakov, *University of Idaho, Idaho, United States*
Ashok Dubey, *Wadia Institute of Himalayan Geology, Dehradun*
Ashraf Torkian, *Bu Ali Sina University Faculty of Science, Iran, Islamic Republic of*
Ashwini Kulkarni, *Indian Institute of Tropical Meteorology, Pune*
Audrey Douinot, *Universite de Toulouse, France*
Balaji Narasimhan, *Indian Institute of Technology Madras, Chennai*
Baldev Arora, *Wadia Institute of Himalayan Geology, Dehradun*
Banerjee D M, *University of Delhi, New Delhi*
Basudev Biswal, *Indian Institute of Technology, Hyderabad*
Beas Barik, *Indian Institute of Technology Bombay, Mumbai*
Bera M K, *Indian Institute of Technology, Kharagpur*
Bharat Shekar, *Indian Institute of Technology Bombay, Mumbai*
Bhaskar Preethi, *Indian Institute of Tropical Meteorology, Pune*
Bhattacharjee S, *Geological Survey of India, Hyderabad*
Bhusan S, *Ramgadh Minerals & Mining Limited, Hospet*
Bidroha Basu, *Indian Institute of Science, Bengaluru*
Bihter Erol, *Istanbul Technical University, Istanbul, Turkey*
Bimalendu Bhusan Bhattacharya, *S.N. Bose National Centre for Basic Sciences, Kolkata*
Binbin Zhou, *National Centers for Environmental Prediction/Environmental Modeling Center, Maryland, United States*
Brian Crookstone, *Utah State University, Salt Lake City, United States*
Caroline Grilo, *Universidade Federal do Espirito Santo, Vitória, Brazil*
Carsten Hoffmann, *Leibniz Centre for Agricultural Landscape Research (ZALF), Müncheberg, Germany*
Chadha R K, *CSIR-National Geophysical Research Institute, Hyderabad*

Chaitali Misra, *Reliance Industries Limited, Mumbai*
Chaitanya Mehta, *Indian Institute of Technology Bombay, Mumbai*
Chakrabarty Dibyendu, *Physical Research Laboratory, Ahmedabad*
Chakravadhanula Manikyamba, *CSIR-National Geophysical Research Institute, Hyderabad*
Chakravarthi V, *University of Hyderabad, Hyderabad*
Chalapathi Rao N V, *Banaras Hindu University, Varanasi*
Champati Ray, *Indian Institute of Remote Sensing, Dehradun*
Chamyal L S, *M.S. University of Baroda, Vadodara*
Chandran Padikkal, *National Bureau of Soil Survey and Land Use Planning, Nagpur*
Chandrani Singh, *Indian Institute of Technology, Kharagpur*
Chandrasekhar E, *Indian Institute of Technology Bombay, Mumbai*
Chanra P C, *Central Ground Water Board, Patna*
Chetty T R K, *CSIR-National Geophysical Research Institute, Hyderabad*
Chidambaram S, *Annamalai University, Annamalai Nagar*
Chojnacki Matthew, *University of Tennessee, United States*
Chungrak Song, *Taiwan*
Cristina Fernández, *Centro de Investigacion Forestal-Lourizan, Spain*
Dakhlaoui H, *Universite de Tunis El Manar, France*
Daniel Unverricht, *Institut für Geowissenschaften, Kiel, Germany*

Journal of Earth System Science

Vol. 126 (2017)

CONTENTS

Number 1

Editorial.....	1
Shear heating by translational brittle reverse faulting along a single, sharp and straight fault plane <i>Soumyajit Mukherjee</i>	2
Optimisation of Hidden Markov Model using Baum–Welch algorithm for prediction of maximum and minimum temperature over Indian Himalaya <i>J C Joshi, Tankeshwar Kumar, Sunita Srivastava and Divya Sachdeva</i>	3
3-D GRACE gravity model for the 2011 Japan earthquake <i>Rambhatla G Sastry and Mahendra K Sonker</i>	4
Landforms along transverse faults parallel to axial zone of folded mountain front, north-eastern Kumaun Sub-Himalaya, India <i>Khayingshing Luirei, S S Bhakuni and Sanjay S Negi</i>	5
Geochemical characteristics and organic carbon sources within the upper reaches of the Xi River, southwest China during high flow <i>Junyu Zou</i>	6
A great volcanic eruption around AD 1300 recorded in lacustrine sediment from Dongdao Island, South China Sea <i>Zhongkang Yang, Nanye Long, Yuhong Wang, Xin Zhou, Yi Liu and Liguang Sun</i>	7
Predictive modelling of the spatial pattern of past and future forest cover changes in India <i>C Sudhakar Reddy, Sonali Singh, V K Dadhwal, C S Jha, N Rama Rao and P G Diwakar</i>	8
Geology of the Elephanta Island fault zone, western Indian rifted margin, and its significance for understanding the Panvel flexure <i>Hrishikesh Samant, Ashwin Pundalik, Joseph D'souza, Hetu Sheth, Keegan Carmo Lobo, Kyle D'souza and Vanit Patel</i>	9
Angle-domain common-image gathers from anisotropic Gaussian beam migration and its application to anisotropy-induced imaging errors analysis <i>Jianguang Han, Yun Wang, Changqing Yu and Peng Chen</i>	10
Monitoring of fire incidences in vegetation types and Protected Areas of India: Implications on carbon emissions <i>C Sudhakar Reddy, V V L Padma Alekhya, K R L Saranya, K Athira, C S Jha, P G Diwakar and V K Dadhwal</i>	11
Region-specific deterministic and probabilistic seismic hazard analysis of Kanpur city <i>Anbazhagan P, Ketan Bajaj, Nairwita Dutta, Sayed S R Moustafa and Nassir S N Al-Arifi</i>	12

Distribution and sources of carbon, nitrogen, phosphorus and biogenic silica in the sediments of Chilika lagoon <i>Sadaf Nazneen and N Janardhana Raju</i>	13
Geochemistry evidence for depositional settings and provenance of Jurassic argillaceous rocks of Jiyuan Basin, North China <i>Yao Meng, Deshun Zheng and Minglong Li</i>	14
Lithostratigraphic contact – a significant site for hydrogeological investigation in crystalline fractured-rock terrains <i>Tapas Acharya and Rajesh Prasad</i>	15
Effects of climate change on spring wheat phenophase and water requirement in Heihe River basin, China <i>Dongmei Han, Denghua Yan, Xinyi Xu and Yu Gao</i>	16

Number 2

Nature and composition of interbedded marine basaltic pumice in the ~52–50 Ma Vastan lignite sequence, western India: Implication for Early Eocene MORB volcanism offshore Arabian Sea <i>Sarajit Sensarma, Hukam Singh, R S Rana, Debajyoti Paul and Ashok Sahni</i>	17
Monthly reservoir inflow forecasting using a new hybrid SARIMA genetic programming approach <i>Hamid Moeeni, Hossein Bonakdari and Isa Ebtehaj</i>	18
Variable influence on the equatorial troposphere associated with SSW using ERA-Interim <i>Sourabh Bal, Semjon Schimanke, Thomas Spanghel and Ulrich Cubasch</i>	19
Mathematical expression of discharge capacity of compound open channels using MARS technique <i>Abbas Parsaie and Amir Hamzeh Haghiabi</i>	20
Identification of drought in Dhalai river watershed using MCDM and ANN models <i>Sainath Aher, Sambhaji Shinde, Shantamoy Guha and Mrinmoy Majumder</i>	21
Differential behaviour of a Lesser Himalayan watershed in extreme rainfall regimes <i>Pankaj Chauhan, Nilendu Singh, Devi Datt Chauniyal, Rajeev S Ahluwalia and Mohit Singhal</i>	22
The Numba ductile deformation zone (northwest Cameroon): A geometric analysis of folds based on the Fold Profiler method <i>T Njanko, C Njiki Chatué, M Kwékam, B E Bella Nké, A F Yakeu Sandjo and E M Fozing</i>	23
All-sky radiance simulation of Megha-Tropiques SAPHIR microwave sensor using multiple scattering radiative transfer model for data assimilation applications <i>A Madhulatha, John P George and E N Rajagopal</i>	24
Permian macro- and miofloral diversity, palynodating and palaeoclimate implications deduced from the coal-bearing sequences of Singrauli coalfield, Son–Mahanadi Basin, central India <i>Kamal Jeet Singh, Srikanta Murthy, Anju Saxena and Husain Shabbar</i>	25

Groundwater circulation and hydrogeochemical evolution in Nomhon of Qaidam Basin, northwest China <i>Yong Xiao, Jingli Shao, Yali Cui, Ge Zhang and Qiulan Zhang</i>	26
Provenance, tectonic setting and source-area weathering of the lower Cambrian sediments of the Parahio valley in the Spiti basin, India <i>Shivani Pandey and Suraj K Parcha</i>	27
Enhancement and identification of dust events in the south-west region of Iran using satellite observations <i>F Taghavi, E Oulad and S A Ackerman</i>	28
Numerical modelling of groundwater flow to understand the impacts of pumping on arsenic migration in the aquifer of North Bengal Plain <i>P K Sikdar and Surajit Chakraborty</i>	29
Study of the global and regional climatic impacts of ENSO magnitude using SPEEDY AGCM <i>Muhammad Mubashar Dogar, Fred Kucharski and Syed Azharuddin</i>	30
Measurement of radon exhalation rate in various building materials and soil samples <i>Pankaj Bala, Vinod Kumar and Rohit Mehra</i>	31

Number 3

Novel transformation-based response prediction of shear building using interval neural network <i>S Chakraverty and Deepti Moyi Sahoo</i>	32
Hidden Markov Model for quantitative prediction of snowfall and analysis of hazardous snowfall events over Indian Himalaya <i>J C Joshi, K Tankeshwar and Sunita Srivastava</i>	33
Seasonal prediction of summer monsoon rainfall over cluster regions of India <i>S B Kakade and Ashwini Kulkarni</i>	34
<i>Rhizophalmoxylon nypoides</i> – a new palm root from the Deccan Intertrappean beds of Sagar, Madhya Pradesh, India <i>P K Kathal, Rashmi Srivastava, R C Mehrotra and P O Alexander</i>	35
Decomposition of wind speed fluctuations at different time scales <i>Qinmin Zheng, S Rehman, Md Mahbub Alam, L M Alhems and A Lashin</i>	36
Fault zone architecture within Miocene–Pliocene syn-rift sediments, Northwestern Red Sea, Egypt <i>Khairy S Zaky</i>	37
Spatio-temporal analysis of sub-hourly rainfall over Mumbai, India: Is statistical forecasting futile? <i>Jitendra Singh, Sheeba Sekharan, Subhankar Karmakar, Subimal Ghosh, P E Zope and T I Eldho</i>	38
Forecasting flood-prone areas using Shannon’s entropy model <i>Ali Haghizadeh, Safoura Siahkamari, Amir Hamzeh Haghiabi and Omid Rahmati</i>	39
A general polynomial solution to convection–dispersion equation using boundary layer theory <i>Jiao Wang, Ming’an Shao, Laiming Huang and Xiaoxu Jia</i>	40

Tectonic stress pattern in the Chinese Mainland from the inversion of focal mechanism data <i>Ju Wei, Sun Weifeng and Ma Xiaojing</i>	41
Bayesian inversion of synthetic AVO data to assess fluid and shale content in sand-shale media <i>Hafiz Mubbasher Anwer, Aamir Ali and Tiago M Alves</i>	42
Simulating climate change impact on soil erosion using RUSLE model – A case study in a watershed of mid-Himalayan landscape <i>Surya Gupta and Suresh Kumar</i>	43
Petrography and geochemistry of Jurassic sandstones from the Jhuran Formation of Jara dome, Kachchh basin, India: Implications for provenance and tectonic setting <i>V Periasamy and M Venkateshwarlu</i>	44
Geochemical characteristics of sandstones from Cretaceous Garudamangalam area of Ariyalur, Tamilnadu, India: Implications of provenance and tectonic setting <i>Babu K</i>	45

Number 4

Size distribution and roundness of clasts within pseudotachylytes of the Gangavalli Shear Zone, Salem, Tamil Nadu: An insight into its origin and tectonic significance <i>Bhuban Mohan Behera, V Thirukumaran, Aishwaraya Soni, Prasanta Kumar Mishra and Tapas Kumar Biswal</i>	46
A comparison of outer electron radiation belt dropouts during solar wind stream interface and magnetic cloud driven storms <i>O Ogunjobi, V Sivakumar and Z Mtumela</i>	47
Joint pattern of seasonal hydrological droughts and floods alternation in China's Huai River Basin using the multivariate L-moments <i>ShaoFei Wu, Xiang Zhang and DunXian She</i>	48
Metal contamination of agricultural soils in the copper mining areas of Singhbhum shear zone in India <i>Soma Giri, Abhay Kumar Singh and Mukesh Kumar Mahato</i>	49
Provenance of coastal dune sands along Red Sea, Egypt <i>Samir M Zaid</i>	50
Effect of solar flare on the equatorial electrojet in eastern Brazil region <i>R G Rastogi, P Janardhan, H Chandra, N B Trivedi and Vidal Erick</i>	51
Occurrence of wagnerite in Mg–Al granulites of Sonapahar, Meghalaya <i>S B Dwivedi and K Theunuo</i>	52
Downward continuation and tilt derivative of magnetic data for delineation of concealed coal fire in East Basuria Colliery, Jharia coal field, India <i>S K Pal, Jitendra Vaish, Sahadev Kumar, Piyush Priyam, Abhay Kumar Bharti and Rajwardhan Kumar</i>	53
Deep learning for predicting the monsoon over the homogeneous regions of India <i>Moumita Saha, Pabitra Mitra and Ravi S Nanjundiah</i>	54

Reconstruction of specific mass balance for glaciers in Western Himalaya using seasonal sensitivity characteristic(s) <i>Vinay Kumar Gaddam, Anil V Kulkarni and Anil Kumar Gupta</i>	55
Implication of surface modified NZVI particle retention in the porous media: Assessment with the help of 1-D transport model <i>Trishikhi Raychoudhury and Vikranth Kumar Surasani</i>	56
The sensitivity to the microphysical schemes on the skill of forecasting the track and intensity of tropical cyclones using WRF-ARW model <i>Devanil Choudhury and Someshwar Das</i>	57
Remote sensing monitoring the spatio-temporal changes of aridification in the Mongolian Plateau based on the general Ts-NDVI space, 1981–2012 <i>Xiaoming Cao, Yiming Feng and Juanle Wang</i>	58
Flash-flood potential assessment and mapping by integrating the weights-of-evidence and frequency ratio statistical methods in GIS environment – case study: Bâsca Chiojdului River catchment (Romania) <i>Romulus Costache and Liliana Zaharia</i>	59
Key pluvial parameters in assessing rainfall erosivity in the south-west development region, Romania <i>Monica Dumitraşcu, Carmen-Sofia Dragotă, Ines Grigorescu, Costin Dumitraşcu and Alina Vlăduţ</i>	60
Phenomena and characteristics of barrier river reaches in the middle and lower Yangtze River, China <i>Xingying You and Jinwu Tang</i>	61
Number 5	
Meteorological features associated with unprecedented precipitation over India during 1st week of March 2015 <i>Naresh Kumar, M Mohapatra and A K Jaswal</i>	62
First discovery of fossil winged seeds of <i>Pinus</i> L. (family Pinaceae) from the Indian Cenozoic and its palaeobiogeographic significance <i>Mahasini Ali Khan and Subir Bera</i>	63
Geochemistry and geochronology of the mafic dikes in the Taipusi area, northern margin of North China Craton: Implications for Silurian tectonic evolution of the Central Asian Orogen <i>Jing-Hua Wu, Huan Li, Xiao-Shuang Xi, Hua Kong, Qian-Hong Wu, Neng-Li Peng, Xi-Ming Wu, Jing-Ya Cao and Jillian Aira S Gabo-Ratio</i>	64
Pre-processing data using wavelet transform and PCA based on support vector regression and gene expression programming for river flow simulation <i>Abazar Solgi, Amir Pourhaghi, Ramin Bahmani and Heidar Zarei</i>	65
Percolation pond as a method of managed aquifer recharge in a coastal saline aquifer: A case study on the criteria for site selection and its impacts <i>Raicy Mani Christy and Elango Lakshmanan</i>	66
Environmental isotope investigation for the identification of source of springs observed in the hillock on the left flank of Gollaleru Earthen Dam, Andhra Pradesh, India <i>J Noble and M D Arzoo Ansari</i>	67

Magnetotelluric impedance tensor analysis for identification of transverse tectonic feature in the Wagad uplift, Kachchh, northwest India <i>G Pavan Kumar, Virender Kumar, Mehul Nagar, Dilip Singh, E Mahendar, Pruthul Patel and P Mahesh</i>	68
Assessment of large aperture scintillometry for large-area surface energy fluxes over an irrigated cropland in north India <i>Abhishek Danodia, V K Sehgal, N R Patel, R Dhakar, J Mukherjee, S K Saha and A Senthil Kumar</i>	69
Ocean sea-ice modelling in the Southern Ocean around Indian Antarctic stations <i>Anurag Kumar, Suneet Dwivedi and D Ram Rajak</i>	70
E–W strike slip shearing of Kinwat granitoid at South East Deccan Volcanic Province, Kinwat, Maharashtra, India <i>R D Kaplay, T Vijay Kumar, Soumyajit Mukherjee, P R Wesanekar, M Babar and Sumeet Chavan</i>	71
Stable carbon and oxygen isotope study on benthic foraminifera: Implication for microhabitat preferences and interspecies correlation <i>Ajoy K Bhaumik, Shiv Kumar, Shilpi Ray, G K Vishwakarma, Anil K Gupta, Pushpendra Kumar and Kalachand Sain</i>	72
Occurrence of submarine canyons, sediment waves and mass movements along the northern continental slope of the South China Sea <i>Hongjun Chen, Wenhuan Zhan, Liqing Li and Ming-ming Wen</i>	73
Estimation of earthquake source parameters in the Kachchh seismic zone, Gujarat, India, using three component S-wave spectra <i>Durgada Nagamani and Prantik Mandal</i>	74
Comparison of two intelligent models to estimate the instantaneous global solar radiation in semi-arid climate conditions: Application in Iran <i>Mostafa Zamani Mohiabadi and Mohsen Mirzaei</i>	75
Variability of the date of monsoon onset over Kerala (India) of the period 1870–2014 and its relation to sea surface temperature <i>P N Preenu, P V Joseph and P K Dineshkumar</i>	76

Number 6

Editorial.....	77
The role of boundary layer momentum advection in the mean location of the ITCZ <i>Vishal Dixit and J Srinivasan</i>	78
Satellite-based technique for nowcasting of thunderstorms over Indian region <i>Suman Goyal, Ashish Kumar, M Mohapatra, L S Rathore, S K Dube, Rahul Saxena and R K Giri</i>	79
Spatial hydrological drought characteristics in Karkheh River basin, southwest Iran using copulas <i>Esmael Dodangeh, Kaka Shahedi, Jenq-Tzong Shiau and Maryam Mir Akbari</i>	80

Probable existence of a Gondwana transcontinental rift system in western India: Implications in hydrocarbon exploration in Kutch and Saurashtra offshore: A GIS-based approach <i>S Mazumder, Blecý Tep, K K S Pangtey, K K Das and D S Mitra</i>	81
Hydrodynamic control of microphytoplankton bloom in a coastal sea <i>K Narasimha Murty, Nittala S Sarma, Sudarsana Rao Pandi, Gundala Chiranjeevulu, Rayaprolu Kiran and R Muralikrishna</i>	82
Seismic profile analysis of the Kangra and Dehradun re-entrant of NW Himalayan Foreland thrust belt, India: A new approach to delineate subsurface geometry <i>Joyjit Dey, R Jayangonda Perumal, Subham Sarkar and Anamitra Bhowmik</i>	83
Structural mapping based on potential field and remote sensing data, South Rewa Gondwana Basin, India <i>Swarnapriya Chowdari, Bijendra Singh, B Nageswara Rao, Niraj Kumar, A P Singh and D V Chandrasekhar</i>	84
Geomorphic and lithologic characteristics of Wadi Feiran basin, southern Sinai, Egypt, using remote sensing and field investigations <i>Ayman A Ahmed, Mohamed Abdelkareem, Asran M Asran and Tawfig M Mahran</i>	85
Run-off analyses using isotopes and hydrochemistry in Yushugou River basin, eastern Tianshan Mountains <i>Xiaoyan Wang, Zhongqin Li and Chanwen Jiang</i>	86
Indian summer monsoon forcing on the deglacial polar cold reversals <i>Virupaxa K Banakar, Sweta Baidya, Alexander M Piotrowski and D Shankar</i>	87
Near InfraRed Imaging Spectrograph (NIRIS) for ground-based mesospheric OH(6-2) and O ₂ (0-1) intensity and temperature measurements <i>Ravindra P Singh and Duggirala Pallamraju</i>	88
Determining shallow aquifer vulnerability by the DRASTIC model and hydrochemistry in granitic terrain, southern India <i>N C Mondal, S Adike, V S Singh, S Ahmed and K V Jayakumar</i>	89
Continental rift-setting and evolution of Neoproterozoic Sindreth Basin in NW-India <i>Stefan Schöbel, Kamal K Sharma, Thorsten Hörbrand, Theresa Böhm, Ines Donhauser and Helga de Wall</i>	90
Vertical electrical sounding to delineate the potential aquifer zones for drinking water in Niamey city, Niger, Africa <i>Joy Choudhury, K Lohith Kumar, E Nagaiah, S Sonkamble, Shakeel Ahmed and V Kumar</i>	91

Number 7

Interaction of coeval felsic and mafic magmas from the Kanker granite, Pithora region, Bastar Craton, Central India <i>R Elangovan, Kumar Krishna, Neeraj Vishwakarma, K R Hari and M Ram Mohan</i> ...	92
Overexploitation and cumulative drought trend effect on Ras El Ain karstic spring discharge (Khabour Sub-basin, Syria) <i>Boulos Abou Zakhem and Bassam Kattaa</i>	93

The role of mid-level vortex in the intensification and weakening of tropical cyclones <i>Govindan Kutty and Kanishk Gohil</i>	94
Short-temporal variation of soil organic carbon in different land use systems in the Ramsar site 2027 'Presa Manuel Ávila Camacho' Puebla <i>L C López-Teloxa, A Cruz-Montalvo, J V Tamaríz-Flores, R Pérez-Avilés, E Torres and R Castelán-Vega</i>	95
Mechanism of post-seismic floods after the Wenchuan earthquake in the upper Minjiang River, China <i>Ding Hairong, Li Yong, Shao Chongjian, Lawrence Svirchev, Xu Qiang, Yan Zhaokun, Yan Liang, Ni Shijun and Shi Zeming</i>	96
Static elastic deformation in an orthotropic half-space with rigid boundary model due to non-uniform long strike slip fault <i>Yogita Godara, Ravinder Kumar Sahrawat and Mahabir Singh</i>	97
Analyses of fold profiles by changing weight parameters of NURB curves <i>Manash Pratim Gogoi, Soumyajit Mukherjee and Tapos K Goswami</i>	98
Estimating gross primary productivity of a tropical forest ecosystem over north-east India using LAI and meteorological variables <i>Pramit Kumar Deb Burman, Dipankar Sarma, Mathew Williams, Anandakumar Karipot and Supriyo Chakraborty</i>	99
Characteristics of global strong earthquakes and their implications for the present-day stress pattern <i>Ju Wei, Sun Weifeng and Luo Jinhui</i>	100
Frequency characteristics of geomagnetic induction anomalies in Saurashtra region <i>P V Vijaya Kumar, P B V Subba Rao, C K Rao, A K Singh and P Rama Rao</i>	101
Study on the groundwater sustainable problem by numerical simulation in a multi-layered coastal aquifer system of Zhanjiang, China <i>Pengpeng Zhou, Ming Li and Yaodong Lu</i>	102
Petrography and geochemistry of the Middle Miocene Gebel El Rusas sandstones, Eastern Desert, Egypt: Implications for provenance and tectonic setting <i>Samir M Zaid</i>	103
The role of E–W basement faults in the Mesozoic geodynamic evolution of the Gafsa and Chotts basins, south-central Tunisia <i>Dorra Tanfous Amri, Ferid Dhahri, Mohamed Soussi, Hakim Gabtni and Mourad Bédir</i>	104
A Monte Carlo adapted finite element method for dislocation simulation of faults with uncertain geometry <i>P Zakian, N Khaji and M Soltani</i>	105
Evidence of topographic disequilibrium in the Subarnarekha River Basin, India: A digital elevation model based analysis <i>Shantamoy Guha and Priyank Pravin Patel</i>	106

Number 8

Formation of atoll garnets in the UHP eclogites of the Tso Morari Complex, Ladakh, Himalaya <i>Mallika K Jonnalagadda, Nitin R Karmalkar, Raymond A Duraiswami, Shivani Harshe, Sarah Gain and William L Griffin</i>	107
--	-----

Isotope fingerprinting of precipitation associated with western disturbances and Indian summer monsoons across the Himalayas <i>Ghulam Jeelani and R D Deshpande</i>	108
GIS-based bivariate statistical techniques for groundwater potential analysis (an example of Iran) <i>Ali Haghizadeh, Davoud Davoudi Moghaddam and Hamid Reza Pourghasemi</i>	109
Mineral shock signatures in rocks from Dhala (Mohar) impact structure, Shivpuri district, Madhya Pradesh, India <i>Madhuparna Roy, Pradeep Pandey, Shailendra Kumar and P S Parihar</i>	110
Orographic control of the Bay of Bengal cold pool rainfall <i>P V Arushi, Arindam Chakraborty and Ravi S Nanjundiah</i>	111
Qualitative stability assessment of cut slopes along the National Highway-05 around Jhakri area, Himachal Pradesh, India <i>Jagadish Kundu, Kripamoy Sarkar, Ashutosh Tripathy and T N Singh</i>	112
Trend analysis of evapotranspiration over India: Observed from long-term satellite measurements <i>Sheshakumar Goroshi, Rohit Pradhan, Raghavendra P Singh, K K Singh and Jai Singh Parihar</i>	113
Vertical structure of orographic precipitating clouds observed over south Asia during summer monsoon season <i>Shailendra Kumar and G S Bhat</i>	114
Chronology of desert margin in western India using improved luminescence dating protocols <i>Naveen Chauhan and P Morthekai</i>	115
Mapping debris flow susceptibility using analytical network process in Kodaikkanal Hills, Tamil Nadu (India) <i>Evangelin Ramani Sujatha and Venkataramana Sridhar</i>	116
Timing and implications for the late Mesozoic geodynamic settings of eastern North China Craton: Evidences from K–Ar dating age and sedimentary–structural characteristics records of Lingshan Island, Shandong Province <i>Jie Li, Aiwen Jin and Guiting Hou</i>	117
Application of environmental isotopes and hydrochemistry in the identification of source of seepage and likely connection with lake water in Lesser Himalaya, Uttarakhand, India <i>Shive Prakash Rai, Dharmaveer Singh, Ashwani Kumar Rai and Bhishm Kumar</i>	118
Spatial and decadal variations in satellite-based terrestrial evapotranspiration and drought over Inner Mongolia Autonomous Region of China during 1982–2009 <i>Zhaolu Zhang, Hui Kang, Yunjun Yao, Ayad M Fadhil, Yuhu Zhang and Kun Jia</i>	119
Trends and variability of meteorological drought over the districts of India using standardized precipitation index <i>P Guhathakurta, Preetha Menon, P M Inkane, Usha Krishnan and S T Sable</i>	120
N–S crustal shear system in the Bundelkhand massif: A unique crustal evolution signature in the northern Indian peninsula <i>S P Singh and A R Bhattacharya</i>	121

Appraisal of long term groundwater quality of peninsular India using water quality index and fractal dimension <i>Kishan Singh Rawat, Sudhir Kumar Singh, T German Amali Jacintha, Jasna Nemčić-Jurec and Vinod Kumar Tripathi</i>	122

Journal of Earth System Science

Formerly Proceedings (Earth and Planetary Sciences)

Instructions to Authors

MANUSCRIPT SUBMISSION

A manuscript must present results of original, unpublished work. Critical reviews of important topics or fields are also considered. The manuscripts should be concise and well-written.

Submission of a manuscript implies that the same manuscript or a part of the manuscript has not been published elsewhere, nor is being submitted elsewhere, nor will be submitted for publication elsewhere while JESS Editorial decision is pending. Details of any related manuscripts (already published or submitted) should be supplied. The responsibility for this will rest with the corresponding author. The Indian Academy of Sciences views plagiarism seriously.

The jurisdiction for all disputes concerning submitted articles, published material, subscription and sale will be at courts/tribunals situated in Bangalore City only.

SUBMISSION OF FRESH MANUSCRIPT

Manuscript Submission

Authors are required to submit ORIGINAL RESEARCH manuscripts online to <http://www.editorialmanager.com/jess/>

For reviews, please contact the editor and mark a copy of your mail to the journal office (jess@ias.ernet.in).

Editorial Manager is a user-friendly online submission and review management system. Authors can submit manuscripts and track the processing of their paper. Electronic files in LATEX are preferred. However, MS-WORD files are also acceptable.

Please refer <http://www.ias.ac.in/jess/> for information on the following.

- [Academy's Policy on Plagiarism](#)
- [Manuscript Submission Form](#)
- [Authorship Confirmation and Copyright Transfer](#)
- [Index terms](#)

Manuscripts in a language other than English cannot be considered for publication in *Journal of Earth System Science*.

Permissions

Authors should submit written permission from appropriate sources for material to be included that has been published elsewhere.

Authors have to provide the manuscript and figures as electronic files. The manuscript (including tables and figure captions) should be provided as a single PDF file. For figures, see figure section on pages iii and iv.

The manuscript should be arranged in the following order.

Instructions to Authors

(1) Title page including authors' names and affiliations, (2) Abstract, (3) Text (including appendices), (4) Acknowledgements, (5) Reference list, (6) Tables, (7) Figure captions, and (8) Figures.

- If LaTeX is used to process the manuscript, use the default Computer Modern font (12 pt). If your article contains math, use the AMSmath package if necessary. If figures are included in the file, keep the figures to the end of the file. Use BibTeX, if necessary, to format the references; then cut and paste the references from the bbl file into the LaTeX file. At this stage, JESS does not accept separate BibTeX files and does not provide a bst file for processing the bibliography. Prepare a PDF file for submission.
- If MS Word is used to typeset the manuscript, use 12 pt Times New Roman. Export as a PDF file using Adobe Distiller. (Authors may also use OpenOffice to typeset their manuscript; OpenOffice allows a document to be exported directly as a PDF file.)
- Use British English as the language.
- Indent or space between all paragraphs. Use one-and-half spacing for the manuscript.
- Use the metric system throughout; use of appropriate SI units is encouraged. If using other, more commonly used units, give the SI equivalent in parentheses.
- Do not use italic font for units of measure or chemical elements.
- Do not use any special typeface for emphasis.
- Avoid text footnotes; they should be incorporated into the text or eliminated completely.
- Do not create math equations or tables as pictures.
- Format the manuscript in a single column.

Title page

The title of the paper must be short and contain words useful for indexing. Include in the title page the names (with initials) of authors and the name and address of the institution, where the work was done. Also required is an abbreviated running title of not more than 50 characters (including spaces).

Font sizes

Set the title at 16 pt and the authors' names and affiliations at 12 pt. Set all the text at 12 pt. Use 14 pt bold roman font for section headings, 14 pt italics for sub-section headings, and 12 pt italics for sub-subsection headings. Use 12 pt italic font for table captions and 12 pt roman font for figure captions. Use 12 pt for the rest of the table.

Abstract

The purpose of the abstract is to summarise the objectives of the investigation and the important conclusions. Set the abstract as a single paragraph of not more than 200 words. Do not include references in the abstract.

Index terms

Choose up to three index terms from the list provided on the web site. Ensure that the chosen index terms are the most appropriate for the manuscript because they will be used for classification and indexing. Of the three terms, choose one as the primary index term: this term should be the best descriptor for the manuscript.

In addition, authors may choose up to six keywords; these keywords are for information and may be used later to modify the list of index terms.

The text

The paper must be divided into sections starting, preferably, with ‘Introduction’ and ending with ‘Discussion’ or ‘Conclusions’. The main sections should be numbered 1, 2, etc., sub-sections 1.1, 1.2, etc., and sub-sub-sections (if necessary) 1.1a, 1.1b, etc.

Mathematical material

Equations must be clearly written, each on its own line, well away from the text. All equations must be numbered consecutively in arabic numerals with the equation number in parentheses near the right hand margin; number displayed equations consecutively within the article, not within the section. Use italic for variables, bold for vectors and matrices, script for transforms, and sans serif for tensors. Use superscripts and subscripts in superior or inferior position; do not use raised and lowered fonts. Extend fraction bars under the entire length of the numerator. Use the “degree” symbol instead of superscript lowercase “o.” Use “exp” rather than “e” if the argument of an exponential is complicated or lengthy. Avoid awkward fractional composition by using negative powers. Use solidus fractions (*l/r*) in text. Use the following to avoid ambiguity: parentheses, brackets, and braces, in this order { [()] }. Add one extra line space above and below all displayed equations.

Appendices

All appendices should be numbered consecutively in arabic numerals.

References

References should be cited in the text by author and year. If there are more than two authors, reference should be to the first author followed by “et al.” in the text; italicize “et al.”. References at the end of the paper should be listed alphabetically by authors’ names, followed by initials, year of publication, title of the paper, name of the journal (abbreviated according to the World List of Scientific Periodicals, Butterworths, London), volume number, and starting and ending page numbers. References to books should include: name(s) of author(s), initials, year of publication, title of the book, edition if not the first, initials and name(s) of editor(s) if any, preceded by ed(s), place of publication, publisher, and chapter or pages referred to. References to thesis must include the year, the title of the thesis, the degree for which submitted, and the University.

Tables

All tables must be numbered consecutively in arabic numerals in the order of appearance in the text. Include all tables in the PDF file containing the manuscript text. The tables should be self-contained and have a descriptive title. All columns must have headings arranged to clarify their relation to the data. Footnotes should be indicated by superscript, lowercase letters. Each table must be cited in text. Avoid tables created with the tab key, pictures, and embedded objects.

Format the tables according to the journal style. The caption is on top, followed by a thick line. The column headings are followed by a thin line and the table ends with another thick line.

Figures

All figures including photographs should be numbered consecutively in arabic numerals in the order of appearance in the text. The figure captions must be typed on a separate sheet. Do not include in the figure any information that could easily be included in the caption.

The journal publishes colour figures free of cost if the reviewers and the editors are convinced that colour is essential for a figure.

Authors are requested to avoid plotting national borders on maps unless these borders are essential. If national borders are unavoidable, then they must conform to the regulations of the Government of India.

Instructions to Authors

Authors are encouraged to prepare all figures to final size. Decide if the figure is to be a one-column figure (maximum width 8.5 cm, including all labels and legends) or a two-column figure (maximum width 17.5 cm, including all labels and legends). An obvious advantage of doing this is that it helps reduce the work to be done when revising the manuscript or communicating the final version to the publishing office of the journal. A more subtle advantage, however, is that the reviewers (and the editor) see exactly what the reader will see in the printed journal, making it possible for them to spot potential difficulties that a reader may face in interpreting the figures. Preparing figures initially to the expected final size also avoids the need for the publisher to enlarge or reduce the figure to fit the journal requirements, thereby maintaining the original quality. Given the quality of modern laser printers and the relative ease, compared to even a few years ago, of obtaining laser printouts of figures, providing the publisher with camera-ready figures or electronic copies ensures better figures in print.

Combine multipart figures or plates, adding letter labels as needed for captions, or provide separate captions for each part. The number of figure files should equal the number of figure captions.

For most graphics with lines and text only, use vector graphics EPS (Encapsulated PostScript). EPS is preferred because it is scalable and one can zoom in without seeing large pixels in most cases. Most vector-based illustration software allows you to save an illustration as an EPS file.

For images or photographs, use TIFF or high-resolution JPEG. JPEG is the best format for photos with a large file size because of the automatic compression used, which dramatically reduces file size while still providing good detail.

For false-colour imagery, shading, or texture, use TIFF. TIFF provides the highest resolution to ensure patterns and shading are maintained, yet it offers lossless compression and thus smaller file size.

Use Helvetica as the font for legends and labels. Ensure that no label or legend is smaller than 8 pt. All lines must be at least 0.5 pt (no hairline rules).

SUBMISSION OF REVISED MANUSCRIPT

Authors have to provide the manuscript and figures as electronic files. The manuscript (including tables and figure captions) should be provided as a single PDF file. For figures, see figure section above.

Along with the revised manuscript, authors should provide an annotated version that highlights the changes made to the earlier version of the manuscript. This can be done easily with the “track changes” or “record changes” option available in modern word processors.

The instructions for submission of the revised manuscript are as for a fresh submission. The only additional instructions given here are for framing the point-by-point reply to the reviewers’ comments. Reply to each reviewer’s comments separately and include the reviewer’s comments in the reply. The reply should be framed as follows.

Comment 1: [Text of comment 1 from reviewer 1.]

Reply 1: [Text of your reply.]

Comment 2: [Text of comment 2 from reviewer 1.]

Reply 2: [Text of your reply.]

This helps the reviewer and the editor because they do not have to look at another sheet for the comments. Avoid statements like ‘corrected’ or ‘necessary corrections have been made’. Instead, state clearly, but briefly, what has been done in response to the comments. Give a brief description of the changes made in response to the comment, and give the reviewers and editor a pointer to the changes in the revised manuscript.

AFTER ACCEPTANCE

Authors have to provide the final (accepted) version manuscript and figures as electronic files. The following formats for text and figures are acceptable.

- If LaTeX is used to process the manuscript, the files needed by the publishing office are the LaTeX file (including references cut and pasted from the bbl file output by BibTeX) and the figure files to be included when compiling the LaTeX file. Keep the figures to the end of the file. Do not use non-standard style files for formatting the manuscript.

Instructions to Authors

- If MS Word is used to typeset the manuscript, use 12 pt Times New Roman. Export as a PDF file using Adobe Distiller. (Authors may also use OpenOffice to typeset their manuscript; OpenOffice allows a document to be exported directly as a PDF file.)
- Authors have to submit the final, accepted version in MS Word or LaTeX formats and the PDF print-ready version for comparison.
- PostScript (PS) or Encapsulated PostScript (EPS) are the required formats for vector graphics. The publishing office can also handle Adobe Illustrator and Corel Draw formats, but these will be used to create EPS output. If you are submitting Adobe Illustrator or Corel Draw files, please indicate the version of the software used to create the figures.
- TIFF is the preferred format for raster graphics (images or photographs). For images with a large file size, JPEG is acceptable owing to compression.

Authors will be sent the proofs by email and have to send their corrections within 48 hours.
