

Journal of Genetics Online Resources

With this issue, *J. Genet.* introduces a new category of papers, 'Online Resources', under which we will consider for publication brief reports of the development and/or routine use of molecular markers for assessing genetic variability within and among species, as well as reports outlining useful pedagogical approaches/methods in genetics teaching, or development/modification of software that could be useful in genetics research or teaching. Papers in this category will have less than 2500 words text, less than 25 references and no abstract. There will be no upper limit on the number of display items. Papers accepted under this category will only appear online, with a listing of titles of papers appearing online during the preceding four months in each print issue.
