

## Journal of Genetics, Volume 92, 2013

## SUBJECT INDEX

- 1-N-naphthylphthalamic acid  
Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- 1000-grain weight  
QTL mapping and correlation analysis for 1000-grain weight and percentage of grains with chalkiness in rice (Research article) 281
- 18S rDNA  
Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- 2AL  
Chromosomal location of genomic SSR markers associated with yellow rust resistance in Turkish bread wheat (*Triticum aestivum* L.) (Research article) 233
- 5'-anchored PCR  
Discovery and characterization of a first set of polymorphic microsatellite markers in red crab (*Charybdis feriatius*) (Online resources) e113
- 5S rDNA  
Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- 7q36 deletion  
Holoprosencephaly: report of four cases and genotype-phenotype correlations (Research note) 97
- ab initio* identification  
An integrative bioinformatics pipeline for the genomewide identification of novel porcine microRNA genes (Research note) 587
- ABCC11*  
Strong association of the SNP rs17822931 with wet earwax and bromhidrosis in a Chinese family (Research note) 289
- abscisic acid  
Functional analysis of a *Lemna gibba rbcS* promoter regulated by abscisic acid and sugar (Research article) 63
- achiasmy  
Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ischnura elegans* (Research note) 115
- acorn weevil  
Isolation and characterization of microsatellite loci for acorn weevil *Curculio bimaculatus* Faust (Coleoptera: Curculionidae) (Online resources) e1
- AFLP  
Molecular markers unravel intraspecific and interspecific genetic variability in *Plantago ovata* and some of its wild allies (Research note) 293
- albinism  
Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305
- allotetraploid  
Isolation and characterization of microsatellite loci for *Phragmites australis* (Online resources) e89
- anticancer property  
Identification and characterization of novel UniGene-derived microsatellite markers in *Podophyllum hexandrum* (Berberidaceae) (Online resources) e4
- Arabidopsis*  
Two *P5CS* genes from common bean exhibiting different tolerance to salt stress in transgenic *Arabidopsis* (Research article) 461
- ARMS-PCR  
Rapid detection of *RBI* recurrent mutations in retinoblastoma by ARMS-PCR (Online resources) e36
- aroma  
A single recessive gene controls fragrance in cucumber (*Cucumis sativus* L.) (Research note) 147
- association  
Two novel SNPs in the coding region of bovine *VDR* gene and their associations with growth traits (Online resources) e53
- Astragalus mongholicus* complex  
Isolation and characterization of ten microsatellite loci from Korean *Astragalus mongholicus* (Fabaceae) (Online resources) e73
- autoimmune liver disease  
Tumour necrosis factor alpha (*TNF- $\alpha$* ) genetic polymorphisms and the risk of autoimmune liver disease: a meta-analysis (Review article) 617
- Aux/IAA  
Identification and expression analysis of primary auxin-responsive *Aux/IAA* gene family in cucumber (*Cucumis sativus*) (Research article) 513
- auxin  
Identification and expression analysis of primary auxin-responsive *Aux/IAA* gene family in cucumber (*Cucumis sativus*) (Research article) 513
- balancing selection  
Effective population size and evolutionary dynamics in outbred laboratory populations of *Drosophila* (Research article) 349
- Bayesian analysis  
Complete sequence of the mitochondrial genome of *Odontamblyopus rubicundus* (Perciformes: Gobiidae): genome characterization and phylogenetic analysis (Research article) 423
- bioinformatic analysis  
Identification and expression analysis of primary auxin-responsive *Aux/IAA* gene family in cucumber (*Cucumis sativus*) (Research article) 513

Subject index

- bioinformatics  
Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus* necrotic ringspot virus (Research article) 11
- biomarker  
Role of Notch signalling pathway in cancer and its association with DNA methylation (Review article) 667
- bisulphite sequencing  
Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- blast  
Inheritance of blast resistance and identification of SSR marker associated with it in rice cultivar RDN 98-2 (Research note) 317
- Bostrychus sinensis*  
The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247
- BRCA1  
Screening for genomic rearrangements at *BRCA1* locus in Iranian women with breast cancer using multiplex ligation-dependent probe amplification (Research note) 131
- breast cancer  
Screening for genomic rearrangements at *BRCA1* locus in Iranian women with breast cancer using multiplex ligation-dependent probe amplification (Research note) 131
- bromhidrosis  
Strong association of the SNP rs17822931 with wet earwax and bromhidrosis in a Chinese family (Research note) 289
- bronchial asthma  
Validation of *PPP1R12B* as a candidate gene for childhood asthma in Russians (Research note) 93
- bulk segregant analysis  
Inheritance of blast resistance and identification of SSR marker associated with it in rice cultivar RDN 98-2 (Research note) 317
- Ca<sup>2+</sup> signalling  
*Neurospora crassa ncs-1, mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- Ca<sup>2+</sup>-ATPase NCA-2  
*Neurospora crassa ncs-1, mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- Caesalpiniaaceae  
Identification of novel microsatellite markers for *Saraca asoca*, a medicinally important tree species in India (Online resources) e93
- Cajanus scarabaeoides*  
Novel genic microsatellite markers from *Cajanus scarabaeoides* and their comparative efficiency in revealing genetic diversity in pigeonpea (Online resources) e24
- cancer  
Role of Notch signalling pathway in cancer and its association with DNA methylation (Review article) 667
- captive populations  
Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- carotenoid biosynthesis  
Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- carotenoid pathway genes  
Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- Catostomidae  
Identification of novel polymorphic microsatellite loci in the endangered Chinese sucker (*Myxocyprinus asiaticus*) (Online resources) e96
- cattle  
Two novel SNPs in the coding region of bovine *VDR* gene and their associations with growth traits (Online resources) e53  
Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- Caucasian  
Genomewide association study identifies no major founder variant in Caucasian moyamoya disease (Research note) 605
- cDNA-SRAP  
Isolation, characterization and mapping of genes differentially expressed during fibre development between *Gossypium hirsutum* and *G. barbadense* by cDNA-SRAP (Research article) 175
- cell division  
Distribution pattern of histone H3 phosphorylation at serine 10 during mitosis and meiosis in *Brachiaria* species (Research article) 259
- centromeric DNA  
Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- chaos game representation  
Analysis of dinucleotide signatures in HIV-1 subtype B genomes (Research article) 403
- characterization  
Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- Charybdis feriatius*  
Discovery and characterization of a first set of polymorphic microsatellite markers in red crab (*Charybdis feriatius*) (Online resources) e113
- chromatin mapping  
Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasypyrum villosum* (L.) (Research note) 103
- chromosomal diversification  
Physical mapping of (GATA)<sub>n</sub> and (TTAGGG)<sub>n</sub> sequences in species of *Hypostomus* (Siluriformes, Loricariidae) (Research note) 127
- chromosomal location  
Genomewide analysis of the chitinase gene family in *Populus trichocarpa* (Research note) 121  
Chromosomal location of genomic SSR markers associated with yellow rust resistance in Turkish bread wheat (*Triticum aestivum* L.) (Research article) 233

Subject index

- chromosome 13  
 Genome association study of human chromosome 13 and susceptibility to coronary artery disease in a Chinese population (Research note) 85
- chromosome 18  
 A study of a rare chromosomal disorder: mosaic 46,XX, del(18)(p11.2)/46,XX,i(18q) (Research note) 611
- circadian-regulated conidiation  
*Neurospora crassa ncs-1, mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- cis*-regulatory region  
 Functional analysis of a *Lemna gibba rbcS* promoter regulated by abscisic acid and sugar (Research article) 63
- cloning  
 Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- CMT3  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- coexpression network  
 Analysis of regulatory networks constructed based on gene coexpression in pituitary adenoma (Research article) 489
- Coleoptera  
 Isolation and characterization of microsatellite loci for acorn weevil *Curculio bimaeculatus* Faust (Coleoptera: Curculionidae) (Online resources) e1
- collaboration  
 Time for the zebrafish ENCODE (Perspectives) 695
- colonization  
 Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- colorectal cancer  
 A study of the frequency of methylation of gene promoter regions in colorectal cancer in the Taiwanese population (Research note) 109
- combining ability  
 QTL mapping for combining ability in different population-based NCH designs: a simulation study (Research article) 529
- common bean  
 Two *P5CS* genes from common bean exhibiting different tolerance to salt stress in transgenic *Arabidopsis* (Research article) 461
- comparative evolution  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- compound leaf  
 Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- conditional QTL  
 Conditional and unconditional QTL mapping of drought-tolerance-related traits of wheat seedling using two related RIL populations (Research article) 213
- congenital nephrotic syndrome  
 Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- conservation programme  
 Identification of novel polymorphic microsatellite loci in the endangered Chinese sucker (*Myxocyprinus asiaticus*) (Online resources) e96
- coronary artery disease  
 Genome association study of human chromosome 13 and susceptibility to coronary artery disease in a Chinese population (Research note) 85
- correlations  
 QTL mapping and correlation analysis for 1000-grain weight and percentage of grains with chalkiness in rice (Research article) 281
- cotton  
 Isolation, characterization and mapping of genes differentially expressed during fibre development between *Gossypium hirsutum* and *G. barbadense* by cDNA-SRAP (Research article) 175
- cross-species amplification  
 Development and characterization of twenty-nine novel polymorphic microsatellite loci in the mandarin fish *Siniperca chuatsi* (Online resources) e19  
 Development and characterization of microsatellite markers for *Dysoxylum binectariferum*, a medicinally important tree species in Western Ghats, India (Online resources) e85  
 Cross-species amplification of microsatellites in genera *Megalobrama* and *Parabramis* (Online resources) e106
- cucumber  
 A single recessive gene controls fragrance in cucumber (*Cucumis sativus* L.) (Research note) 147  
 Identification and expression analysis of primary auxin-responsive *Aux/IAA* gene family in cucumber (*Cucumis sativus*) (Research article) 513
- Cucumis sativus*  
 A single recessive gene controls fragrance in cucumber (*Cucumis sativus* L.) (Research note) 147
- Curculionidae  
 Isolation and characterization of microsatellite loci for acorn weevil *Curculio bimaeculatus* Faust (Coleoptera: Curculionidae) (Online resources) e1
- Currarino syndrome  
 Holoprosencephaly: report of four cases and genotype-phenotype correlations (Research note) 97
- cystic fibrosis  
 New frameshift CF mutation 3729delAinsTCT in a Tunisian cystic fibrosis patient (Research note) 81
- cytochrome b  
 The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247
- cytosine methylation  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- Darwinian-cum-Lamarckian evolution  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- Dasyphyrum villosum*  
 Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasyphyrum villosum* (L.) (Research note) 103
- de novo* mutations and epimutations (DNM/DNeM)  
 Search for missing schizophrenia genes will require a new developmental neurogenomic perspective (Review article) 335

## Subject index

- demethylation  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- Dendrobium*  
 Preliminary genetic linkage maps of Chinese herb *Dendrobium nobile* and *D. moniliforme* (Research article) 205
- diabetic vascular complications  
 Human genetics of diabetic vascular complications (Review article) 677
- differentiation  
 Search for missing schizophrenia genes will require a new developmental neurogenomic perspective (Review article) 335
- digenic  
 QTL mapping for combining ability in different population-based NCII designs: a simulation study (Research article) 529
- discordant results  
 Discordant results between biochemical and molecular transthyretin assays: lessons learned from a unique testing algorithm at the Mayo Clinic (Research note) 599
- disease  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- divergence  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- diversity  
 Novel genic microsatellite markers from *Cajanus scarabaeoides* and their comparative efficiency in revealing genetic diversity in pigeonpea (Online resources) e24  
 Gene duplication as a major force in evolution (Review article) 155
- diversity analysis  
 Genetic diversity studies and identification of SSR markers associated with *Fusarium* wilt (*Fusarium udum*) resistance in cultivated pigeonpea (*Cajanus cajan*) (Research article) 273
- DNA demethylases  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- DNA demethylation mechanisms  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- DNA elements  
 Time for the zebrafish ENCODE (Perspectives) 695
- DNA extraction  
 Suiformes conservation: a study case of strategies for DNA utilization (Online resources) e49
- DNA hypomethylation  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- DNA methyl transferases  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- DNA methylation  
 A study of the frequency of methylation of gene promoter regions in colorectal cancer in the Taiwanese population (Research note) 109
- DNA methylation mechanisms  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- DNA pools  
 Genome association study of human chromosome 13 and susceptibility to coronary artery disease in a Chinese population (Research note) 85
- DNA sequence  
 Molecular analysis of intragenic recombination at the tryptophan synthetase locus in *Neurospora crassa* (Research article) 523
- domino transplant  
 Discordant results between biochemical and molecular transthyretin assays: lessons learned from a unique testing algorithm at the Mayo Clinic (Research note) 599
- double pseudo-testcross  
 Preliminary genetic linkage maps of Chinese herb *Dendrobium nobile* and *D. moniliforme* (Research article) 205
- dough-mixing properties  
 Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69
- DRAP  
 Analysis of dinucleotide signatures in HIV-1 subtype B genomes (Research article) 403
- Drosophila nasuta* subgroup  
 Last mated male sperm precedence in doubly mated females is not ubiquitous: evidence from sperm competition in laboratory populations of *Drosophila nasuta nasuta* and *Drosophila nasuta albomicans* (Research note) 309
- Drosophila subobscura*  
 Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- drought tolerance  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- drought tolerance of wheat seedling  
 Conditional and unconditional QTL mapping of drought-tolerance-related traits of wheat seedling using two related RIL populations (Research article) 213
- uplicated genes  
 Gene duplication as a major force in evolution (Review article) 155
- duplication  
 Genomewide analysis of the chitinase gene family in *Populus trichocarpa* (Research note) 121
- Dysoxylum binectariferum*  
 Development and characterization of microsatellite markers for *Dysoxylum binectariferum*, a medicinally important tree species in Western Ghats, India (Online resources) e85
- early growth vigour  
 Genetics of early growth vigour in lentil (*Lens culinaris* Medik.) (Research note) 323

Subject index

- Eleotridae  
The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247
- endangered plant  
Identification and characterization of novel UniGene-derived microsatellite markers in *Podophyllum hexandrum* (Berberidaceae) (Online resources) e4
- endangered wildlife species  
Suiformes conservation: a study case of strategies for DNA utilization (Online resources) e49
- endemic species  
Isolation and characterization of ten microsatellite loci from Korean *Astragalus mongholicus* (Fabaceae) (Online resources) e73
- enriched genomic library  
Development of polymorphic microsatellite loci for the tomato leaf miner, *Tuta absoluta* (Lepidoptera: Gelechiidae) (Online resources) e110
- epialleles  
Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- epigenetic  
Human genetics of diabetic vascular complications (Review article) 677
- epigenetic modifications  
Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- epigenetic regulation  
Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- epigenetics  
Distribution pattern of histone H3 phosphorylation at serine 10 during mitosis and meiosis in *Brachiaria* species (Research article) 259  
Role of Notch signalling pathway in cancer and its association with DNA methylation (Review article) 667
- EST  
Identification of forty-five gene-derived polymorphic microsatellite loci for the sea cucumber, *Apostichopus japonicus* (Online resources) e31
- EST sequences  
Novel genic microsatellite markers from *Cajanus scarabaeoides* and their comparative efficiency in revealing genetic diversity in pigeonpea (Online resources) e24
- EST-SSR  
Isolation and characterization of twenty-nine novel EST-SSR markers in *Siniperca undulate* (Online resources) e116
- evolution  
Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus necrotic ringspot virus* (Research article) 11  
Gene duplication as a major force in evolution (Review article) 155
- excision repair  
Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- exon region  
Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- exon–intron structure  
Genomewide analysis of the chitinase gene family in *Populus trichocarpa* (Research note) 121
- experimental evolution  
Effective population size and evolutionary dynamics in outbred laboratory populations of *Drosophila* (Research article) 349
- expression analysis  
Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- faecal samples  
Suiformes conservation: a study case of strategies for DNA utilization (Online resources) e49
- fat mass and obesity-associated gene (*FTO*)  
Molecular characterization and expression analysis of fat mass and obesity-associated gene in rabbit (Research article) 481
- fecundity genes  
Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- female remating  
Last mated male sperm precedence in doubly mated females is not ubiquitous: evidence from sperm competition in laboratory populations of *Drosophila nasuta nasuta* and *Drosophila nasuta albomicans* (Research note) 309
- fertility  
A mother with variant Turner syndrome and two daughters with trisomy X: a case report (Research note) 313
- fibre development  
Isolation, characterization and mapping of genes differentially expressed during fibre development between *Gossypium hirsutum* and *G. barbadense* by cDNA-SRAP (Research article) 175
- FISH  
Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasypyrum villosum* (L.) (Research note) 103
- FISH mapping  
Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- flavin monooxygenase  
Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- fluorescence *in situ* hybridization  
Polymorphism of the simple sequence repeat (AAC)<sub>5</sub> in the nucleolar chromosomes of Old Portuguese wheat cultivars (Research note) 583
- founder variant  
Genomewide association study identifies no major founder variant in Caucasian moyamoya disease (Research note) 605
- founding event  
Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- FoxO1* gene  
Haplotypes of bovine *FoxO1* gene sequence variants and association with growth traits in Qinchuan cattle (Online resources) e8

## Subject index

- FOXP3* gene  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- fragrance  
 A single recessive gene controls fragrance in cucumber (*Cucumis sativus* L.) (Research note) 147
- FTA cards (Whatman)  
 Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- function gene  
 Discovery and characterization of a first set of polymorphic microsatellite markers in red crab (*Charybdis feriatus*) (Online resources) e113
- functional enrichment  
 Analysis of regulatory networks constructed based on gene coexpression in pituitary adenoma (Research article) 489
- Fusarium* wilt  
 Genetic diversity studies and identification of SSR markers associated with *Fusarium* wilt (*Fusarium udum*) resistance in cultivated pigeonpea (*Cajanus cajan*) (Research article) 273
- gene duplication  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- gene expression  
 Identification and expression analysis of primary auxin-responsive *Aux/IAA* gene family in cucumber (*Cucumis sativus*) (Research article) 513
- gene expression changes  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- gene flow  
 Estimation of *in situ* mating systems in wild sorghum (*Sorghum bicolor* (L.) Moench) in Ethiopia using SSR-based progeny array data: implications for the spread of crop genes into the wild (Research article) 3
- gene × gender interaction  
 Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene × gender interaction (Research article) 395
- generalized Procrustes analysis  
 Preservation of *Solanum pimpinellifolium* genomic fragments in recombinant genotypes improved the fruit quality of tomato (Research article) 195
- genetic differentiation  
 Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- genetic disease  
 Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- genetic diversity  
 Evaluation of genetic diversity of Portuguese *Pinus sylvestris* L. populations based on molecular data and inferences about the future use of this germplasm (Online resources) e41
- Isolation and characterization of twenty-one polymorphic microsatellite loci from *Schizothorax O'connori* and cross-species amplification (Online resources) e60
- Isolation and characterization of ten microsatellite loci from Korean *Astragalus mongholicus* (Fabaceae) (Online resources) e73
- Isolation and characterization of twelve new polymorphic microsatellite markers in the miuy croaker (*Miichthys miuy*) genome (Online resources) e77
- Isolation and characterization of twenty-nine novel EST-SSR markers in *Siniperca undulate* (Online resources) e116
- Molecular markers unravel intraspecific and introspecific genetic variability in *Plantago ovata* and some of its wild allies (Research note) 293
- Assessment of genetic diversity in Indian rice germplasm (*Oryza sativa* L.): use of random versus trait-linked microsatellite markers (Research article) 545
- genetic drift  
 Fast evolutionary genetic differentiation during experimental colonizations (Research article) 183
- Effective population size and evolutionary dynamics in outbred laboratory populations of *Drosophila* (Research article) 349
- genetic linkage  
 Preliminary genetic linkage maps of Chinese herb *Dendrobium nobile* and *D. moniliforme* (Research article) 205
- genetic linkage map  
 Construction of microsatellite-based linkage map and mapping of nectarilessness and hairiness genes in *Gossypium tomentosum* (Research article) 445
- genetic map  
 Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ischnura elegans* (Research note) 115
- genetic mapping  
 Isolation, characterization and mapping of genes differentially expressed during fibre development between *Gossypium hirsutum* and *G. barbadense* by cDNA-SRAP (Research article) 175
- genetic polymorphism  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- genetic recombination  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- genetic structure  
 Ten polymorphic microsatellite loci developed from *Triplophysa anterodorsalis* (Online resources) e103
- genetic testing  
 Discordant results between biochemical and molecular transthyretin assays: lessons learned from a unique testing algorithm at the Mayo Clinic (Research note) 599
- genetic variation  
 Discovery and characterization of a first set of polymorphic microsatellite markers in red crab (*Charybdis feriatus*) (Online resources) e113
- genetics  
 Genetics of early growth vigour in lentil (*Lens culinaris* Medik.) (Research note) 323
- Human genetics of diabetic vascular complications (Review article) 677

Subject index

- genetic SSR  
 Novel genetic microsatellite markers from *Cajanus scarabaeoides* and their comparative efficiency in revealing genetic diversity in pigeonpea (Online resources) e24
- genome  
 Genome association study of human chromosome 13 and susceptibility to coronary artery disease in a Chinese population (Research note) 85
- genome duplication  
 Gene duplication as a major force in evolution (Review article) 155
- genome signature  
 Analysis of dinucleotide signatures in HIV-1 subtype B genomes (Research article) 403
- genomewide association study  
 Validation of *PPP1R12B* as a candidate gene for childhood asthma in Russians (Research note) 93  
 Genomewide association study identifies no major founder variant in Caucasian moyamoya disease (Research note) 605
- genomics  
 Time for the zebrafish ENCODE (Perspectives) 695
- germplasm  
 Assessment of genetic diversity in Indian rice germplasm (*Oryza sativa* L.): use of random versus trait-linked microsatellite markers (Research article) 545
- gestation  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- goat  
 Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- Gobiidae  
 Complete sequence of the mitochondrial genome of *Odontoblyptus rubicundus* (Perciformes: Gobiidae): genome characterization and phylogenetic analysis (Research article) 423
- golden apple snail  
 Identification of twelve polymorphic microsatellite loci in the golden apple snail *Pomacea canaliculata* (Online resources) e99
- Gossypium tomentosum*  
 Construction of microsatellite-based linkage map and mapping of nectarilessness and hairiness genes in *Gossypium tomentosum* (Research article) 445
- grain yield  
 Mapping quantitative trait loci associated with yield and yield components under reproductive stage salinity stress in rice (*Oryza sativa* L.) (Research article) 433
- growth traits  
 Haplotypes of bovine *FoxO1* gene sequence variants and association with growth traits in Qinchuan cattle (Online resources) e8  
 Two novel SNPs in the coding region of bovine *VDR* gene and their associations with growth traits (Online resources) e53
- Haldane–Huxley rule  
 Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ischnura elegans* (Research note) 115
- haplotype  
 Validation of *PPP1R12B* as a candidate gene for childhood asthma in Russians (Research note) 93
- Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene × gender interaction (Research article) 395
- haplotype combination  
 Haplotypes of bovine *FoxO1* gene sequence variants and association with growth traits in Qinchuan cattle (Online resources) e8
- heritable induced defence  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- heterochiasmy  
 Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ischnura elegans* (Research note) 115
- high-molecular-weight glutenin subunits  
 Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69
- Himalayan plant  
 Identification and characterization of novel UniGene-derived microsatellite markers in *Podophyllum hexandrum* (Berberidaceae) (Online resources) e4
- histone phosphorylation  
 Distribution pattern of histone H3 phosphorylation at serine 10 during mitosis and meiosis in *Brachiaria* species (Research article) 259
- HIV-1  
 Analysis of dinucleotide signatures in HIV-1 subtype B genomes (Research article) 403
- HMW-GS  
 Quality of synthetic hexaploid wheat containing null alleles at *Glu-A1* and *Glu-B1* loci (Research article) 241
- holoprosencephaly  
 Holoprosencephaly: report of four cases and genotype–phenotype correlations (Research note) 97
- HOMA-IR  
 K121Q *ENPP1/PC-1* gene polymorphism is associated with insulin resistance in a north Indian population (Research Note) 571
- homology search  
 An integrative bioinformatics pipeline for the genomewide identification of novel porcine microRNA genes (Research note) 587
- horizontal PAGE system  
 Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- HS6ST3* gene  
 Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene × gender interaction (Research article) 395
- hybridization  
 To network or not to network, that is the question (Viewpoint) 703
- Hypostominae  
 Physical mapping of (GATA)<sub>n</sub> and (TTAGGG)<sub>n</sub> sequences in species of *Hypostomus* (Siluriformes, Loricariidae) (Research note) 127
- immunodetection  
 Distribution pattern of histone H3 phosphorylation at serine 10 during mitosis and meiosis in *Brachiaria* species (Research article) 259

## Subject index

- inbreeding  
 Estimation of *in situ* mating systems in wild sorghum (*Sorghum bicolor* (L.) Moench) in Ethiopia using SSR-based progeny array data: implications for the spread of crop genes into the wild (Research article) 3
- indole-acetic acid  
 Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- inheritance  
 Inheritance of blast resistance and identification of SSR marker associated with it in rice cultivar RDN 98-2 (Research note) 317
- insulin  
 K121Q *ENPP1/PC-1* gene polymorphism is associated with insulin resistance in a north Indian population (Research Note) 571
- integrated approach  
 An integrative bioinformatics pipeline for the genomewide identification of novel porcine microRNA genes (Research note) 587
- interactions of gene × environment  
 Human genetics of diabetic vascular complications (Review article) 677
- interstitial telomeric site  
 Physical mapping of (GATA)<sub>n</sub> and (TTAGGG)<sub>n</sub> sequences in species of *Hypostomus* (Siluriformes, Loricariidae) (Research note) 127
- intron region  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- Iran  
 Screening for genomic rearrangements at *BRCA1* locus in Iranian women with breast cancer using multiplex ligation-dependent probe amplification (Research note) 131
- isochromosome  
 A study of a rare chromosomal disorder: mosaic 46,XX, del(18)(p11.2)/46,XX,i(18q) (Research note) 611
- ISSR  
 Evaluation of genetic diversity of Portuguese *Pinus sylvestris* L. populations based on molecular data and inferences about the future use of this germplasm (Online resources) e41  
 Changes in genetic diversity parameters in unimproved and improved populations of teak (*Tectona grandis* L.f.) in Karnataka state, India (Research note) 141  
 Preliminary genetic linkage maps of Chinese herb *Dendrobium nobile* and *D. moniliforme* (Research article) 205
- kidney  
 Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- Kruskal–Wallis ANOVA  
 Genetic diversity studies and identification of SSR markers associated with *Fusarium* wilt (*Fusarium udum*) resistance in cultivated pigeonpea (*Cajanus cajan*) (Research article) 273
- leaf form evolution  
 Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- leaf hairiness  
 Construction of microsatellite-based linkage map and mapping of nectarilessness and hairiness genes in *Gossypium tomentosum* (Research article) 445
- leaf nectarilessness  
 Construction of microsatellite-based linkage map and mapping of nectarilessness and hairiness genes in *Gossypium tomentosum* (Research article) 445
- Lemna gibba*  
 Functional analysis of a *Lemna gibba rbcS* promoter regulated by abscisic acid and sugar (Research article) 63
- lentil  
 Genetics of early growth vigour in lentil (*Lens culinaris* Medik.) (Research note) 323
- likelihood ratio  
 An estimating function approach to linkage heterogeneity (Research article) 413
- linkage heterogeneity  
 An estimating function approach to linkage heterogeneity (Research article) 413
- long PCR  
 The partial mitochondrial sequence of the Old World stingless bee, *Tetragonula pagdeni* (Research note) 299
- lycopene  
 Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- MC1R  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135  
 Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305
- mechanosensitive channel MID-1  
*Neurospora crassa ncs-1*, *mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- medicinal plant  
 Development and characterization of microsatellite markers for *Dysoxylum binectariferum*, a medicinally important tree species in Western Ghats, India (Online resources) e85  
 Identification of novel microsatellite markers for *Saraca asoca*, a medicinally important tree species in India (Online resources) e93
- Megalobrama*  
 Cross-species amplification of microsatellites in genera *Megalobrama* and *Parabramis* (Online Resources) e106
- melanin  
 Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305
- melanoma  
 Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305

- Meliaceae  
 Development and characterization of microsatellite markers for *Dysoxylum binectariferum*, a medicinally important tree species in Western Ghats, India (Online resources) e85
- meta-analysis  
 Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene × gender interaction (Research article) 395  
 Tumour necrosis factor alpha (*TNF-α*) genetic polymorphisms and the risk of autoimmune liver disease: a meta-analysis (Review article) 617
- metabolic syndrome  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- methylation  
 Role of Notch signalling pathway in cancer and its association with DNA methylation (Review article) 667
- microRNA  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf* lamina mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- microsatellite  
 Isolation and characterization of microsatellite loci for acorn weevil *Curculio bimaculatus* Faust (Coleoptera: Curculionidae) (Online resources) e1  
 Development and characterization of twenty-nine novel polymorphic microsatellite loci in the mandarin fish *Siniperca chuatsi* (Online resources) e19  
 Isolation and characterization of twenty-one polymorphic microsatellite loci from *Schizothorax o'connori* and cross-species amplification (Online resources) e60  
 Isolation and characterization of ten microsatellite loci from Korean *Astragalus mongholicus* (Fabaceae) (Online resources) e73  
 Polymorphic microsatellite markers in *Taxus chinensis* var. *mairei* (Taxaceae) (Online resources) e81  
 Development and characterization of microsatellite markers for *Dysoxylum binectariferum*, a medicinally important tree species in Western Ghats, India (Online resources) e85  
 Isolation and characterization of microsatellite loci for *Phragmites australis* (Online resources) e89  
 Identification of twelve polymorphic microsatellite loci in the golden apple snail *Pomacea canaliculata* (Online resources) e99  
 Ten polymorphic microsatellite loci developed from *Triplophysa anterodorsalis* (Online resources) e103  
 Cross-species amplification of microsatellites in genera *Megalobrama* and *Parabramis* (Online resources) e106  
 Development of polymorphic microsatellite loci for the tomato leaf miner, *Tuta absoluta* (Lepidoptera: Gelechiidae) (Online resources) e110  
 Isolation and characterization of twenty-nine novel EST-SSR markers in *Siniperca undulate* (Online resources) e116  
 Construction of microsatellite-based linkage map and mapping of nectarilessness and hairiness genes in *Gossypium tomentosum* (Research article) 445
- microsatellite loci  
 Development of twenty microsatellite loci from the Tibetan ground tit (*Parus humilis*) (Online resources) e68
- microsatellite marker  
 Identification of forty-five gene-derived polymorphic microsatellite loci for the sea cucumber, *Apostichopus japonicas* (Online resources) e31  
 Chromosomal location of genomic SSR markers associated with yellow rust resistance in Turkish bread wheat (*Triticum aestivum* L.) (Research article) 233
- microsatellite markers  
 Identification and characterization of novel UniGene-derived microsatellite markers in *Podophyllum hexandrum* (Berberidaceae) (Online resources) e4  
 Discovery and characterization of a first set of polymorphic microsatellite markers in red crab (*Charybdis feriatus*) (Online resources) e113  
 Assessment of genetic diversity in Indian rice germplasm (*Oryza sativa* L.): use of random versus trait-linked microsatellite markers (Research article) 545
- microsatellites  
 Eleven novel polymorphic microsatellite loci in the ornate spiny lobster *Panulirus ornatus* (Decapoda: Palinuridae) (Online resources) e65  
 Isolation and characterization of twelve new polymorphic microsatellite markers in the miiuy croaker (*Miichthys miiuy*) genome (Online resources) e77  
 Identification of novel microsatellite markers for *Saraca asoca*, a medicinally important tree species in India (Online resources) e93
- miiuy croaker  
 Isolation and characterization of twelve new polymorphic microsatellite markers in the miiuy croaker (*Miichthys miiuy*) genome (Online resources) e77
- miRNAs  
 Analysis of regulatory networks constructed based on gene coexpression in pituitary adenoma (Research article) 489
- mitochondrial DNA  
 Human genetics of diabetic vascular complications (Review article) 677
- mitochondrial DNA gene order  
 The partial mitochondrial sequence of the Old World stingless bee, *Tetragonula pagdeni* (Research note) 299
- mitochondrial genome  
 The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247  
 Complete sequence of the mitochondrial genome of *Odontamblyopus rubicundus* (Perciformes: Gobiidae): genome characterization and phylogenetic analysis (Research article) 423
- MLPA  
 Screening for genomic rearrangements at *BRCA1* locus in Iranian women with breast cancer using multiplex ligation-dependent probe amplification (Research note) 131
- molecular diversity  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- molecular genetics  
 Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus necrotic ringspot virus* (Research article) 11

## Subject index

- molecular mapping  
Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69
- molecular marker  
Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasyphyrum villosum* (L.) (Research note) 103
- molecular markers  
Preservation of *Solanum pimpinellifolium* genomic fragments in recombinant genotypes improved the fruit quality of tomato (Research article) 195
- monosomy  
A study of a rare chromosomal disorder: mosaic 46,XX,del(18)(p11.2)/46,XX,i(18q) (Research note) 611
- mosaicism  
A mother with variant Turner syndrome and two daughters with trisomy X: a case report (Research note) 313  
A study of a rare chromosomal disorder: mosaic 46,XX,del(18)(p11.2)/46,XX,i(18q) (Research note) 611
- moyamoya disease  
Genomewide association study identifies no major founder variant in Caucasian moyamoya disease (Research note) 605
- mRNA expression patterns  
Molecular characterization and expression analysis of fat mass and obesity-associated gene in rabbit (Research article) 481
- multiple alleles  
QTL mapping for combining ability in different population-based NCII designs: a simulation study (Research article) 529
- mutagenic hot spots  
Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- mutation  
New frameshift CF mutation 3729delAinsTCT in a Tunisian cystic fibrosis patient (Research note) 81  
Gene duplication as a major force in evolution (Review article) 155  
Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163  
Molecular analysis of intragenic recombination at the tryptophan synthetase locus in *Neurospora crassa* (Research article) 523
- mutational hotspots  
Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- Mycteria leucocephala*  
Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- NCII design  
QTL mapping for combining ability in different population-based NCII designs: a simulation study (Research article) 529
- nephrin  
Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- nephrotic syndrome  
Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- neurodevelopment  
Search for missing schizophrenia genes will require a new developmental neurogenomic perspective (Review article) 335
- neuronal calcium sensor-1  
*Neurospora crassa ncs-1, mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- nonalcoholic fatty liver disease  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- Notch signalling pathway  
Role of Notch signalling pathway in cancer and its association with DNA methylation (Review article) 667
- NPHS1*  
Novel and known nephrin gene (*NPHS1*) mutations in two Greek cases with congenital nephrotic syndrome including a complex genotype (Research note) 577
- null allele  
Quality of synthetic hexaploid wheat containing null alleles at *Glu-A1* and *Glu-B1* loci (Research article) 241
- obesity  
Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene × gender interaction (Research article) 395  
K121Q *ENPPI/PC-1* gene polymorphism is associated with insulin resistance in a north Indian population (Research Note) 571
- OCA  
Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305
- Odonata  
Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ichnura elegans* (Research note) 115
- Odontamblyopus rubicundus*  
Complete sequence of the mitochondrial genome of *Odontamblyopus rubicundus* (Perciformes: Gobiidae): genome characterization and phylogenetic analysis (Research article) 423
- olfaction  
A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- Oryctolagus cuniculus*  
Molecular characterization and expression analysis of fat mass and obesity-associated gene in rabbit (Research article) 481
- OsFMO<sub>(t)</sub>* gene  
Cloning, characterization and expression of *OsFMO<sub>(t)</sub>* in rice encoding a flavin monooxygenase (Research article) 471
- outcrossing  
Estimation of *in situ* mating systems in wild sorghum (*Sorghum bicolor* (L.) Moench) in Ethiopia using SSR-based progeny array data: implications for the spread of crop genes into the wild (Research article) 3

Subject index

- P2/P8 microsatellite DNA markers  
 Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- P5CS gene  
 Two P5CS genes from common bean exhibiting different tolerance to salt stress in transgenic *Arabidopsis* (Research article) 461
- painted storks  
 Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- Panulirus ornatus*  
 Eleven novel polymorphic microsatellite loci in the ornate spiny lobster *Panulirus ornatus* (Decapoda: Palinuridae) (Online resources) e65
- Parabramis*  
 Cross-species amplification of microsatellites in genera *Megalobrama* and *Parabramis* (Online resources) e106
- parent diversity  
 Changes in genetic diversity parameters in unimproved and improved populations of teak (*Tectona grandis* L.f.) in Karnataka state, India (Research note) 141
- parentage analysis  
 Identification of novel polymorphic microsatellite loci in the endangered Chinese sucker (*Myxocyprinus asiaticus*) (Online resources) e96
- partitioned Bayesian analysis  
 The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247
- percentage of grains with chalkiness  
 QTL mapping and correlation analysis for 1000-grain weight and percentage of grains with chalkiness in rice (Research article) 281
- photo-excitation  
 A comparative study of the molecular evolution of signalling pathway members across olfactory, gustatory and photosensory modalities (Research note) 327
- Phragmites australis*  
 Isolation and characterization of microsatellite loci for *Phragmites australis* (Online resources) e89
- phylogenetic analysis  
 The first complete mitochondrial genome from *Bostrychus* genus (*Bostrychus sinensis*) and partitioned Bayesian analysis of Eleotridae fish phylogeny (Research article) 247  
 Complete sequence of the mitochondrial genome of *Odontamblyopus rubicundus* (Perciformes: Gobiidae): genome characterization and phylogenetic analysis (Research article) 423
- phylogenetic networks  
 To network or not to network, that is the question (Viewpoint) 703
- phylogenetic relationships  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- phylogeny  
 Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus* necrotic ringspot virus (Research article) 11
- Genomewide analysis of the chitinase gene family in *Populus trichocarpa* (Research note) 121
- pigeonpea  
 Genetic diversity studies and identification of SSR markers associated with *Fusarium* wilt (*Fusarium udum*) resistance in cultivated pigeonpea (*Cajanus cajan*) (Research article) 273
- Pinus sylvestris* L.  
 Evaluation of genetic diversity of Portuguese *Pinus sylvestris* L. populations based on molecular data and inferences about the future use of this germplasm (Online resources) e41
- plant development  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- plant genetic resources  
 Preservation of *Solanum pimpinellifolium* genomic fragments in recombinant genotypes improved the fruit quality of tomato (Research article) 195
- Plantago ovate*  
 Molecular markers unravel intraspecific and interspecific genetic variability in *Plantago ovata* and some of its wild allies (Research note) 293
- Podophyllum hexandrum*  
 Identification and characterization of novel UniGene-derived microsatellite markers in *Podophyllum hexandrum* (Berberidaceae) (Online resources) e4
- polymorphic loci  
 Identification of novel polymorphic microsatellite loci in the endangered Chinese sucker (*Myxocyprinus asiaticus*) (Online resources) e96
- polymorphism  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163  
 K121Q *ENPP1/PC-1* gene polymorphism is associated with insulin resistance in a north Indian population (Research Note) 571  
 Tumour necrosis factor alpha (*TNF-α*) genetic polymorphisms and the risk of autoimmune liver disease: a meta-analysis (Review article) 617
- polymorphisms  
 Two novel SNPs in the coding region of bovine *VDR* gene and their associations with growth traits (Online resources) e53
- polyploidy  
 Gene duplication as a major force in evolution (Review article) 155  
 To network or not to network, that is the question (Viewpoint) 703
- Pomacea canaliculata*  
 Identification of twelve polymorphic microsatellite loci in the golden apple snail *Pomacea canaliculata* (Online resources) e99
- population genetics  
 Eleven novel polymorphic microsatellite loci in the ornate spiny lobster *Panulirus ornatus* (Decapoda: Palinuridae) (Online resources) e65  
 Development of twenty microsatellite loci from the Tibetan ground tit (*Parus humilis*) e68  
 Identification of twelve polymorphic microsatellite loci in the golden apple snail *Pomacea canaliculata* (Online resources) e99

## Subject index

- population structure  
 Identification of novel polymorphic microsatellite loci in the endangered Chinese sucker (*Myxocyprinus asiaticus*) (Online resources) e96
- power  
 An estimating function approach to linkage heterogeneity (Research article) 413
- PPP1R12B* gene  
 Validation of *PPP1R12B* as a candidate gene for childhood asthma in Russians (Research note) 93
- primary metabolism  
 Molecular analysis of intragenic recombination at the tryptophan synthetase locus in *Neurospora crassa* (Research article) 523
- principal component analysis  
 Assessment of genetic diversity in Indian rice germplasm (*Oryza sativa* L.): use of random versus trait-linked microsatellite markers (Research article) 545
- progeny diversity  
 Changes in genetic diversity parameters in unimproved and improved populations of teak (*Tectona grandis* L.f.) in Karnataka state, India (Research note) 141
- proline  
 Two *P5CS* genes from common bean exhibiting different tolerance to salt stress in transgenic *Arabidopsis* (Research article) 461
- promoter region  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- Prunus* necrotic ringspot virus  
 Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus* necrotic ringspot virus (Research article) 11
- Pusa Rohini  
 Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- Qinchuan cattle  
 Haplotypes of bovine *FoxO1* gene sequence variants and association with growth traits in Qinchuan cattle (Online resources) e8
- QTL analysis  
 QTL mapping for combining ability in different population-based NCII designs: a simulation study (Research article) 529
- quality parameters  
 Quality of synthetic hexaploid wheat containing null alleles at *Glu-A1* and *Glu-B1* loci (Research article) 241
- quantitative trait loci  
 QTL mapping and correlation analysis for 1000-grain weight and percentage of grains with chalkiness in rice (Research article) 281  
 Mapping quantitative trait loci associated with yield and yield components under reproductive stage salinity stress in rice (*Oryza sativa* L.) (Research article) 433
- rabbit  
 Molecular characterization and expression analysis of fat mass and obesity-associated gene in rabbit (Research article) 481
- RAPD  
 Preliminary genetic linkage maps of Chinese herb *Dendrobium nobile* and *D. moniliforme* (Research article) 205  
 Evaluation of genetic diversity of Portuguese *Pinus sylvestris* L. populations based on molecular data and inferences about the future use of this germplasm (Online resources) e41
- RBI* gene  
 Rapid detection of *RBI* recurrent mutations in retinoblastoma by ARMS-PCR (Online resources) e36
- RBCS* promoter  
 Functional analysis of a *Lemna gibba rbcS* promoter regulated by abscisic acid and sugar (Research article) 63
- RdDM  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- rearrangement  
 Screening for genomic rearrangements at *BRCA1* locus in Iranian women with breast cancer using multiplex ligation-dependent probe amplification (Research note) 131
- recombination  
 Male-biased recombination in odonates: insights from a linkage map of the damselfly *Ischnura elegans* (Research note) 115  
 Molecular analysis of intragenic recombination at the tryptophan synthetase locus in *Neurospora crassa* (Research article) 523
- recombination fraction  
 An estimating function approach to linkage heterogeneity (Research article) 413
- recurrent mutation  
 Rapid detection of *RBI* recurrent mutations in retinoblastoma by ARMS-PCR (Online resources) e36
- regulation  
 Time for the zebrafish ENCODE (Perspectives) 695
- repetitive DNA  
 Physical mapping of (GATA)<sub>n</sub> and (TTAGGG)<sub>n</sub> sequences in species of *Hypostomus* (Siluriformes, Loricariidae) (Research note) 127
- reproductive stage  
 Mapping quantitative trait loci associated with yield and yield components under reproductive stage salinity stress in rice (*Oryza sativa* L.) (Research article) 433
- resistance gene  
 Genetic analysis and location of gene for resistance to stripe rust in wheat international differential host Strubes Dickkopf (Research article) 267
- reticulate evolution  
 To network or not to network, that is the question (Viewpoint) 703
- retinoblastoma  
 Rapid detection of *RBI* recurrent mutations in retinoblastoma by ARMS-PCR (Online resources) e36
- ribosomal DNA  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- rice  
 QTL mapping and correlation analysis for 1000-grain weight and percentage of grains with chalkiness in rice (Research article) 281

Subject index

- Inheritance of blast resistance and identification of SSR marker associated with it in rice cultivar RDN 98-2 (Research note) 317  
 Mapping quantitative trait loci associated with yield and yield components under reproductive stage salinity stress in rice (*Oryza sativa* L.) (Research article) 433
- ripening  
 Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- river buffalo  
 Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- rs17822931  
 Strong association of the SNP rs17822931 with wet earwax and bromhidrosis in a Chinese family (Research note) 289
- rye  
 Identification of 40k  $\gamma$ -secalin genes (Research note) 151
- salinity tolerance  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369  
 Mapping quantitative trait loci associated with yield and yield components under reproductive stage salinity stress in rice (*Oryza sativa* L.) (Research article) 433
- salt resistance  
 Two *P5CS* genes from common bean exhibiting different tolerance to salt stress in transgenic *Arabidopsis* (Research article) 461
- Saraca asoca*  
 Identification of novel microsatellite markers for *Saraca asoca*, a medicinally important tree species in India (Online resources) e93
- SCAP*  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- schizophrenia  
 Search for missing schizophrenia genes will require a new developmental neurogenomic perspective (Review article) 335
- Schizothoracinae  
 Isolation and characterization of twenty-one polymorphic microsatellite loci from *Schizothorax o'connori* and cross-species amplification (Online resources) e60
- Schizothorax o'connori*  
 Isolation and characterization of twenty-one polymorphic microsatellite loci from *Schizothorax o'connori* and cross-species amplification (Online resources) e60
- sea cucumber  
 Identification of forty-five gene-derived polymorphic microsatellite loci for the sea cucumber, *Apostichopus japonicas* (Online resources) e31
- second cycle hybrids  
 Preservation of *Solanum pimpinellifolium* genomic fragments in recombinant genotypes improved the fruit quality of tomato (Research article) 195
- seed storage protein  
 Identification of 40k  $\gamma$ -secalin genes (Research note) 151
- seedling length  
 Genetics of early growth vigour in lentil (*Lens culinaris* Medik.) (Research note) 323
- senile systemic amyloidosis  
 Discordant results between biochemical and molecular transthyretin assays: lessons learned from a unique testing algorithm at the Mayo Clinic (Research note) 599
- sequence  
 Molecular adaptation within the coat protein-encoding gene of Tunisian almond isolates of *Prunus necrotic ringspot virus* (Research article) 11
- sequence analysis  
 Molecular characterization and expression analysis of fat mass and obesity-associated gene in rabbit (Research article) 481
- sequence variants  
 Haplotypes of bovine *FoxO1* gene sequence variants and association with growth traits in Qinchuan cattle (Online resources) e8
- sessile leaf  
 Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- sheep  
 Comparative FISH mapping of *BMPR1B*, *BMP15* and *GDF9* fecundity genes on cattle, river buffalo, sheep and goat chromosomes (Research note) 595
- SHH* gene mutation  
 Holoprosencephaly: report of four cases and genotype-phenotype correlations (Research note) 97
- simple leaf  
 Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- simple sequence repeat  
 Genetic analysis and location of gene for resistance to stripe rust in wheat international differential host Strubes Dickkopf (Research article) 267
- simple sequence repeats  
 Polymorphism of the simple sequence repeat (AAC)<sub>5</sub> in the nucleolar chromosomes of Old Portuguese wheat cultivars (Research note) 583
- single-nucleotide polymorphisms  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135
- Siniperca chuatsi*  
 Development and characterization of twenty-nine novel polymorphic microsatellite loci in the mandarin fish *Siniperca chuatsi* e19
- Siniperca undulata*  
 Isolation and characterization of twenty-nine novel EST-SSR markers in *Siniperca undulata* (Online resources)-jg13 100
- sister chromatid cohesion  
 Distribution pattern of histone H3 phosphorylation at serine 10 during mitosis and meiosis in *Brachiaria* species (Research article) 259
- skin cancer  
 Analysis of *MC1R* variants in Indian oculocutaneous albinism patients: highlighting the risk of skin cancer among albinos (Research note) 305

## Subject index

- skin pigmentation  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135
- SLC24A5  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135
- SLC45A2  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135
- soft sweep  
 Effective population size and evolutionary dynamics in outbred laboratory populations of *Drosophila* (Research article) 349
- sperm competition  
 Last mated male sperm precedence in doubly mated females is not ubiquitous: evidence from sperm competition in laboratory populations of *Drosophila nasuta nasuta* and *Drosophila nasuta albomicans* (Research note) 309
- sperm precedence  
 Last mated male sperm precedence in doubly mated females is not ubiquitous: evidence from sperm competition in laboratory populations of *Drosophila nasuta nasuta* and *Drosophila nasuta albomicans* (Research note) 309
- split graphs  
 To network or not to network, that is the question (Viewpoint) 703
- spontaneous mutagenesis  
 Cytosine hypomethylation at CHG and CHH sites in the pleiotropic mutants of Mendelian inheritance in *Catharanthus roseus* (Research article) 499
- SRAP  
 Preservation of *Solanum pimpinellifolium* genomic fragments in recombinant genotypes improved the fruit quality of tomato (Research article) 195
- SREBF-1  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- SREBF-2  
*SCAP* gene polymorphisms decrease the risk of nonalcoholic fatty liver disease in females with metabolic syndrome (Research note) 565
- SSR  
 Molecular markers unravel intraspecific and interspecific genetic variability in *Plantago ovata* and some of its wild allies (Research note) 293  
 Development and characterization of twenty-nine novel polymorphic microsatellite loci in the mandarin fish *Siniperca chuatsi* (Online resources) e19
- SSR marker  
 Polymorphic microsatellite markers in *Taxus chinensis* var. *mairei* (Taxaceae) (Online resources) e81
- SSR markers  
 Genetic diversity studies and identification of SSR markers associated with *Fusarium* wilt (*Fusarium udum*) resistance in cultivated pigeonpea (*Cajanus cajan*) (Research article) 273
- stingless bees  
 The partial mitochondrial sequence of the Old World stingless bee, *Tetragonula pagdeni* (Research note) 299
- stipule architecture  
 Auxin transport inhibitor induced low complexity petiolated leaves and sessile leaf-like stipules and architectures of heritable leaf and stipule mutants in *Pisum sativum* suggest that its simple lobed stipules and compound leaf represent ancestral forms in angiosperms (Research article) 25
- structure  
 Identification of 40k  $\gamma$ -secalin genes (Research note) 151
- sugar  
 Functional analysis of a *Lemna gibba rbcS* promoter regulated by abscisic acid and sugar (Research article) 63
- suggestive association  
 Genomewide association study identifies no major founder variant in Caucasian moyamoya disease (Research note) 605
- Sus scrofa*  
 An integrative bioinformatics pipeline for the genomewide identification of novel porcine microRNA genes (Research note) 587
- Taiwanese population  
 A study of the frequency of methylation of gene promoter regions in colorectal cancer in the Taiwanese population (Research note) 109
- Taxus chinensis* var. *mairei* (Taxaceae)  
 Polymorphic microsatellite markers in *Taxus chinensis* var. *mairei* (Taxaceae) (Online resources) e81
- terpenoid indole alkaloids  
 Pleiotropic phenotypes of the salt-tolerant and cytosine hypomethylated *leafless inflorescence*, *evergreen dwarf* and *irregular leaf lamina* mutants of *Catharanthus roseus* possessing Mendelian inheritance (Research article) 369
- test  
 An estimating function approach to linkage heterogeneity (Research article) 413
- Tetragonula*  
 The partial mitochondrial sequence of the Old World stingless bee, *Tetragonula pagdeni* (Research note) 299
- Tetragonula pagdeni*  
 The partial mitochondrial sequence of the Old World stingless bee, *Tetragonula pagdeni* (Research note) 299
- three steps silver staining  
 Molecular sex identification of painted storks (*Mycteria leucocephala*): using FTA cards, horizontal PAGE and quick silver staining (Online resources) e15
- Tibetan ground tit  
 Development of twenty microsatellite loci from the Tibetan ground tit (*Parus humilis*) (Online resources) e68
- tomato  
 Expression profile of genes coding for carotenoid biosynthetic pathway during ripening and their association with accumulation of lycopene in tomato fruits (Research article) 363
- transcription factor  
 Analysis of regulatory networks constructed based on gene coexpression in pituitary adenoma (Research article) 489
- transcriptome  
 Development and characterization of twenty-nine novel polymorphic microsatellite loci in the mandarin fish *Siniperca chuatsi* (Online resources) e19  
 Identification of forty-five gene-derived polymorphic microsatellite loci for the sea cucumber, *Apostichopus japonicas* (Online resources) e31

Subject index

- transgenerational inheritance  
 Roles, and establishment, maintenance and erasing of the epigenetic cytosine methylation marks in plants (Review article) 629
- transthyretin  
 Discordant results between biochemical and molecular transthyretin assays: lessons learned from a unique testing algorithm at the Mayo Clinic (Research note) 599
- tree improvement  
 Changes in genetic diversity parameters in unimproved and improved populations of teak (*Tectona grandis* L.f.) in Karnataka state, India (Research note) 141
- Treg cells  
 Genetic polymorphism in *FOXP3* gene: imbalance in regulatory T-cell role and development of human diseases (Review article) 163
- Triplophysa anterodorsalis*  
 Ten polymorphic microsatellite loci developed from *Triplophysa anterodorsalis* (Online resources) e103
- triglycerides  
 Association of *HS6ST3* gene polymorphisms with obesity and triglycerides: gene  $\times$  gender interaction (Research article) 395
- trisomy  
 A study of a rare chromosomal disorder: mosaicism 46,XX,del(18)(p11.2)/46,XX,i(18q) (Research note) 611
- trisomy X  
 A mother with variant Turner syndrome and two daughters with trisomy X: a case report (Research note) 313
- Triticum aestivum* L.  
 Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69  
 Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasyphyrum villosum* (L.) (Research note) 103
- Triticum* sp.  
 Polymorphism of the simple sequence repeat (AAC)<sub>5</sub> in the nucleolar chromosomes of Old Portuguese wheat cultivars (Research note) 583
- trp-3  
 Molecular analysis of intragenic recombination at the tryptophan synthetase locus in *Neurospora crassa* (Research article) 523
- tumour necrosis factor alpha  
 Tumour necrosis factor alpha (*TNF- $\alpha$* ) genetic polymorphisms and the risk of autoimmune liver disease: a meta-analysis (Review article) 617
- Tunisian cystic fibrosis patient  
 New frameshift CF mutation 3729delAinsTCT in a Tunisian cystic fibrosis patient (Research note) 81
- Turner syndrome  
 A mother with variant Turner syndrome and two daughters with trisomy X: a case report (Research note) 313
- Tuta absoluta*  
 Development of polymorphic microsatellite loci for the tomato leaf miner, *Tuta absoluta* (Lepidoptera: Gelechiidae) (Online resources) e110
- TYRP1*  
 Polymorphisms of four pigmentation genes (*SLC45A2*, *SLC24A5*, *MC1R* and *TYRP1*) among eleven endogamous populations of India (Research note) 135
- ultraviolet survival  
*Neurospora crassa ncs-1*, *mid-1* and *nca-2* double-mutant phenotypes suggest diverse interaction among three Ca<sup>2+</sup>-regulating gene products (Research note) 559
- unconditional QTL  
 Conditional and unconditional QTL mapping of drought-tolerance-related traits of wheat seedling using two related RIL populations (Research article) 213
- VDR* gene  
 Two novel SNPs in the coding region of bovine *VDR* gene and their associations with growth traits (Online resources) e53
- waxy proteins  
 Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69
- wet earwax  
 Strong association of the SNP rs17822931 with wet earwax and bromhidrosis in a Chinese family (Research note) 289
- WGA  
 Suiformes conservation: a study case of strategies for DNA utilization (Online resources) e49
- wheat  
 Genetic dissection reveals effects of interaction between high-molecular-weight glutenin subunits and waxy alleles on dough-mixing properties in common wheat (Research article) 69  
 Characterization of a genome-specific Gypsy-like retrotransposon sequence and development of a molecular marker specific for *Dasyphyrum villosum* (L.) (Research note) 103  
 Chromosomal location of genomic SSR markers associated with yellow rust resistance in Turkish bread wheat (*Triticum aestivum* L.) (Research article) 233
- wheat stripe rust  
 Genetic analysis and location of gene for resistance to stripe rust in wheat international differential host Strubes Dickkopf (Research article) 267
- wild allies  
 Molecular markers unravel intraspecific and interspecific genetic variability in *Plantago ovata* and some of its wild allies (Research note) 293
- wild sorghum  
 Estimation of *in situ* mating systems in wild sorghum (*Sorghum bicolor* (L.) Moench) in Ethiopia using SSR-based progeny array data: implications for the spread of crop genes into the wild (Research article) 3
- yellow rust  
 Chromosomal location of genomic SSR markers associated with yellow rust resistance in Turkish bread wheat (*Triticum aestivum* L.) (Research article) 233
- YrSD*  
 Genetic analysis and location of gene for resistance to stripe rust in wheat international differential host Strubes Dickkopf (Research article) 267
- zebrafish  
 Time for the zebrafish ENCODE (Perspectives) 695
