

# Subject Index

## **Binary sources, individual**

X-ray measurements of black hole X-ray binary source GRS 1915 + 105 and the evolution of hard X-ray spectrum (*R. K. Manchanda*), 39.

## **Black hole candidates**

X-ray measurements of black hole X-ray binary source GRS 1915 + 105 and the evolution of hard X-ray spectrum (*R. K. Manchanda*), 39.

## **Black holes, accretion disks, X-rays, stars**

X-ray measurements of black hole X-ray binary source GRS 1915 + 105 and the evolution of hard X-ray spectrum (*R. K. Manchanda*), 39.

X-ray observation of XTE J2012 + 381 during the 1998 outburst (*S. Naik, P. C. Agrawal, B. Paul, A. R. Rao, S. Seetha & K. Kasturirangan*), 29.

## **Cosmology, Cosmic microwave background**

A measurement of the cosmic microwave background temperature at 1280 MHz (*A. Raghunathan & Ravi Subrahmanyam*), 1.

## **Diffuse ultraviolet background**

Nature of the Background ultraviolet radiation field at high redshifts (*A. Samantaray & P. Khare*), 19.

## **Galaxy, bulge**

Stellar sources in the ISOGAL inner galactic bulge field (*D. K. Ojha, A. Omont, S. Ganesh, G. Simon & M. Schultheis*), 77.

## **Galaxy, structure**

Scale length of the galactic thin disk, (*D. K. Ojha*) 53.

Stellar sources in the ISOGAL inner galactic bulge field (*D. K. Ojha, A. Omont, S. Ganesh, G. Simon & M. Schultheis*), 77.

## **GRS 1915+105**

X-ray measurements of black hole X-ray binary source GRS 1915 + 105 and the evolution of hard X-ray spectrum (*R. K. Manchanda*), 39.

## **Helioseismology**

Helioseismology and the solar interior dynamics (*S. Vauclair*), 323.

- Perspectives on the interior of the sun (*S. M. Chitre*), 331.
- Seismic tomography of the near solar surface (*L. Gizon, T. L. Duvall Jr & R. M. Larsen*), 339.
- Helioseismic search for magnetic field in the solar interior (*H. M. Antia, S. M. Chitre & M. J. Thompson*), 343.
- Helioseismic solar cycle changes and splitting coefficients (*S. C. Tripathy, Kiran Jain & A. Bhatnagar*), 349.
- Temporal variation of large scale flows in the solar interior (*Sarbani Basu & H.M.Antia*), 353.
- Observation of hysteresis between solar activity indicators and p-mode frequency shifts for solar cycle 22 (*S.C. Tripathy, Brajesh Kumar, Kiran Jain & A. Bhatnagar*), 357.

### **Infrared, stars**

- Stellar sources in the ISOGAL inner galactic bulge- field (*D. K. Ojha, A. Omont, S. Ganesh, G. Simon & M. Schultheis*), 77.

### **Interstellar dust, Anomalous extinction**

- Porous and fluffy grains in the regions of anomalous extinction (*D. B. Vaidya, B. G. Anandarao, J. N. Desai & R. Gupta*), 91.

### **MHD**

- Dynamical processes in flux tubes and their role in chromospheric heating (*S. S. Hasan*), 283.
- Models of flux tubes from constrained relaxation. (*A. Mangalam & V. Krishan*), 299.
- Magnetoconvection and the solar dynamo (*A. Nordlund, S. B. F. Dorch & R. F. Stein*), 307.
- Large-scale flow and transport of magnetic flux in the solar convection zone (*P. Ambroz*), 315.
- Non-radial oscillations in an axisymmetric MHD incompressible fluid, (*A. Satya Narayanan*), 361.
- Mechanism of cyclically polarity reversing solar magnetic cycle as a cosmic dynamo (*Hirokazu Yoshimura*), 365.
- The current status of kinematic solar dynamo models (*A. R. Choudhuri*), 373.
- Solar internal rotation and dynamo waves: A two-dimensional asymptotic solution in the convection zone (*Gaetano Belvedere, Kirill Kuzanyan & Dmitry Sokoloff*), 379.
- The role of magnetic buoyancy in a Babcock-Leighton type solar dynamo (*Dibyendu Nandy & Arnab Rai Choudhuri*), 381.
- Alpha-effect, current and kinetic helicities for magnetically driven turbulence, and solar dynamo (*G. Belvedere, V. V. Pipin & G. Rudiger*), 387.

### **PAH**

- A new scheme of radiation transfer in HII regions including transient heating of grains (*S. K. Ghosh & R. P. Verma*), 61.

**Quasars, absorption lines**

Nature of the Background ultraviolet radiation field at high redshifts (*A. Samantaray & P. Khare*), 19.

**Radioactive transfer, HII regions**

A new scheme of radiation transfer in HII regions including transient heating of grains (*S. K. Ghosh & R. P. Verma*), 61.

**Solar active regions**

Active region magnetic fields (*R. F. Howard*), 119.

Vector magnetic fields, sub-surface stresses and evolution of magnetic helicity (*Richard Canfield & Alexei Pevtsov*), 213.

A rapidly evolving active region NOAA 8032 observed on April 15, 1997 (*Shibu K. Mathew & Ashok Ambastha*), 233.

Twist of magnetic fields in solar active regions (*Hongqi Zhang, Lirong Tian, Shudong Bao & Mei Zhang*), 245.

Emergence of twisted magnetic flux related sigmoidal brightening (*K. Sundara Raman, K. B. Ramesh, R. Selvendran, P. S. M. Aleem & K. M. Hiremath*), 263.

Infrared photometry of solar active regions (*M. Sobotka, M. Vazquez, M. Sanchez Cuberes, J. A. Bonet & A. Hanslmeier*), 289.

Call K imaging to understand UV irradiance variability (*R. Kariyappa*), 293.

**Solar corona**

Coronal structures as tracers of sub-surface processes (*Alexei A. Pevtsov & Richard C. Canfield*), 185.

Periodic variations in the coronal green line intensity and their connection with the white-light coronal structures (*Milan Minarovjech, Milan Rybansky & Vojtech Rusin*), 197.

Long-term cyclic variations of prominences, green and red coronae over solar cycles (*V. Rusin, M. Minarovjech & M. Rybansky*), 201.

Cyclical variation of the quiet corona and coronal holes (*Takashi Sakurai*), 389.

The EUV spectrum of sunspot plumes observed by SUMER on SOHO (*W. Curdt, B. N. Dwivedi & U. Feldman*), 397.

Exploring coronal structures with SOHO (*M. Karovaska, B. Wood, J. Chen, J. Cook & R. Howard*), 403.

Electron density and temperature measurements, and abundance anomalies in the solar atmosphere (*Anita Mohan, B. N. Dwivedi & Enrico Landi*), 407.

Microwave enhancement in coronal holes: Statistical properties (*N. Gopalswamy, K. Shibasaki & M. Salem*), 413.

The enhanced coronal green line intensity and the magnetic field gradients (*K. B. Ramesh, B. S. Nagabhushana & B. A. Vaghese*), 419.

Multibaseline observations of the occultation of crab nebula by the solar corona at decimeter wavelengths (*K. R. Subramanian*), 421.

**Solar diameter**

New high resolution observations of the solar diameter from space and ground with the microsatellite program PICARD (*Luc Dame*), 135.

**Solar dynamo**

- Magnetoconvection and the solar dynamo (A. Nordlund, S. B. F. Dorch & R. F. Stein), 307.
- Mechanism of cyclically polarity reversing solar magnetic cycle as a cosmic dynamo (Hirokazu Yoshimura), 365.
- The current status of kinematic solar dynamo models (A. R. Choudhuri), 373.
- Solar internal rotation and dynamo waves: A two-dimensional asymptotic solution in the convection zone (Gaetano Belvedere, Kirill Kuzanyan & Dmitry Sokoloff), 379.
- The role of magnetic buoyancy in a Babcock-Leighton type solar dynamo (Dibyendu Nandy & Arnab Rai Choudhuri), 381.
- Alpha-effect, current and kinetic helicities for magnetically driven turbulence, and solar dynamo (G. Belvedere, V. V. Pipin & G. Rüdiger), 387.

**Solar filaments**

- Solar filaments as tracers of subsurface processes (D. M. Rust), 177.
- Large-scale motion of solar filaments (P. Ambroz & A. Schroll), 205.

**Solar magnetic fields, solar activity cycle**

- Active region magnetic fields (R. F. Howard), 119.
- The large-scale magnetic field and sunspot cycles (V. I. Makarov & A. G. Tlatov), 161.
- Cyclic evolution of sunspots: Gleaning new results from old data (S.K. Solanki, M. Fligge, P. Pulkkinen & P. Hoyng), 163.
- Polar magnetic field reversals of the sun in maunder minimum (V. I. Makarov & A. G. Tlatov), 193.
- The magnetic sun from different views: A comparison of the mean and background magnetic field observations made in different observations and in different spectral lines (M.L. Demidov), 209.
- Vector magnetic fields, sub-surface stresses and evolution of magnetic helicity (Richard Canfield & Alexei Pevtsov), 213.
- The hemispheric sign rule of current helicity during the rising phase of cycle 23, (S. D. Bao, G. X. Ai & H. Q. Zhang), 303.
- Heliospheric magnetic fields, energetic particles, and the solar cycle (Peter Kiraly), 431.

**Solar wind**

- Solar wind variation with the cycle (I. S. Veselovsky, A. V. Dmitriev, A. V. Suvorova & M. V. Tarsina), 423.
- Remote sensing of the heliospheric solar wind using radio astronomy methods and numerical simulations (S. Ananthakrishnan), 439.
- Tomography of the solar wind using interplanetary scintillation (Divya Oberoi & A Pramesh Rao), 445.

**Stars, AGB and Post-AGB**

- Stellar sources in the ISOGAL inner galactic bulge field (D. K. Ojha, A. Omont, S. Ganesh, G. Simon & M. Schultheis), 77.

**Stars, circumstellar matter**

Stellar sources in the ISOGAL inner galactic bulge field (*D. K. Ojha, A. Omont, S. Ganesh, G. Simon & M. Schultheis*), 77.

**Sun, Cycle variations**

Cyclic evolution of sunspots: Gleaning new results from old data (*S. K. Solanki, M. Fligge, P. Pulkkinen & P. Hoyng*), 163.

22-year periodicity in the solar differential rotation (*J. Javaraiah*), 167.

Periodic variations in the coronal green line intensity and their connection with the white-light coronal structures (*Milan Minarovjech, Milan Rybansky & Vojtech Rusin*), 197.

Long-term cyclic variations of prominences, green and red coronae over solar cycles (*V. Rusin, M. Minarovjech & M. Rybansky*), 201.

Cyclical variability of prominences, CMEs and flares (*J. L. Ballester*), 221.

Helioseismic solar cycle changes and splitting coefficients (*S. C. Tripathy, Kiran Jain & A. Bhatnagar*), 349.

Cyclical variation of the quiet corona and coronal holes (*Takashi Sakurai*), 389.

Solar wind variation with the cycle (*I.S. Veselovsky, A. V. Dmitriev, A. V. Suvorova & M. V. Tarsina*), 423.

**Sun, Flux tubes**

Properties of flux tubes and the relation with solar irradiance variability (*M. Fligge & S. K. Solanki*), 275.

Dynamical processes in flux tubes and their role in chromospheric heating (*S. S. Hasan*), 283.

Models of flux tubes from constrained relaxation (*A. Mangalam & V. Krishan*), 299.

**Sun, Polarization**

Stokes polarimetry at the Kodaikanal tower tunnel telescope (*K. Sankarasubramanian, G. Srinivasulu, A.V. Ananth & P. Venkatakrishnan*), 241.

An operator perturbation method of polarized line transfer for diagnosis of solar weak magnetic fields (*K. N. Nagendra, H. Frisch, M. Faurobert-Scholl & F. Paletou*), 255.

Tessellation of SOHO magnetograms (*R. Srikant & Jagdev Singh*), 265.

Parametric study of molecular line polarization in the solar atmosphere (*K. E. Rangarajan & D. Mohan Rao*), 269.

**Sun, Synoptic observations**

Active region magnetic fields (*R. F. Howard*), 119.

New initiatives for synoptic observations (*C. U. Keller*), 127.

Introduction to solar space telescope (*G. Ai, S. Jin, S. Wang, B. Ye & S. Yang*), 141.

Results from Kodaikanal synoptic observations (*K. R. Sivaraman*), 149.

**Sun, CMEs**

Cyclical variability of prominences, CMEs and flares, (*J. L. Ballester*), 221.

**Sun, Flares**

- Cyclical variability of prominences, CMEs and flares (*J. L. Ballester*), 221.  
Analysis of 9th November 1990 flare (*Anita Joshi & Wahab Uddin*), 229.  
The photospheric flow near the flare locations of active regions (*Debi Prasad Choudhary*), 249.  
Solar energetic particle events at the rise phase of the 23rd solar activity cycle registered aboard the spacecraft "INTERBALL-2" (*Vladislav Timofeev & Sergey Starodubtsev*), 251.  
Relationship of non-potentially and flaring: Intercomparison for an M-class flare (*A. Ambastha & S. K. Mathew*), 271.  
Ulysses observations of nonlinear wave-wave interactions in the source regions of type III solar radio bursts (*G. Thejappa & R. J. MacDowall*), 447.

**Sun, Heliosphere**

- Heliospheric magnetic fields, energetic particles, and the solar cycle (*Peter Kiraly*), 431.

**Sun interior**

- Large-scale flow and transport of magnetic flux in the solar convection zone (*P. Ambroz*), 315.  
Helioseismology and the solar interior dynamics (*S. Vauclair*), 323.  
Perspectives on the interior of the sun (*S. M. Chitre*), 331.  
Temporal variation of large scale flows in the solar interior (*Sarbani Basu & H. M. Antia*), 353.

**Sun, Prominences**

- Long-term cyclic variations of prominences, green and red coronae over solar cycles (*V. Rusin, M. Minarovjech & M. Rybansky*), 201.  
Cyclical variability of prominences, CMEs and flares (*J. L. Ballester*), 221.

**Sun, Radio radiation**

- Low frequency radio emission from the 'quiet' sun (*R. Ramesh*), 237.  
On the possibility of radio emission from quasi-parallel and quasi-perpendicular propagation of shocks (*A. Shanmugaraju & S. Umopathy*), 259.  
Ulysses observations of nonlinear wave-wave interactions in the source regions of type III solar radio bursts (*G. Thejappa & R. J. MacDowall*), 447.

**Sunspot**

- Sunspot groups as tracers of sub-surface processes (*M. H. Gokhale*), 155.  
The large-scale magnetic field and sunspot cycles (*V. I. Makarov & A. G. Tlatov*), 161.  
Cyclic evolution of sunspots: Gleaning new results from old data (*S. K. Solanki, M. Fligge, P. Pulkkinen & P. Hoyng*), 163.  
Is a sunspot in static or dynamic equilibrium? (*P. Venkatakrishnan*), 171.

**VSG**

A new scheme of radiation transfer in HII regions including transient heating of grains (*S. K. Ghosh & R. K. Verma*), 61.
