ERRATA

"Formula for primes, twinprimes, number of primes and number of twinprimes" by A Venugopalan, Proc. Indian Acad. Sci. (Math. Sci.) 92 pp. 49–52 September 1983

Read: $Q$ at stage (1) for $Q_i$

$K = n$ at stage (3) for $K = n - \sum_{i=1}^{n} 1/p_i$

Read: $KQ$ for $[K]Q \prod_{i=1}^{n} (1 - (1/p_i))$ wherever it occurs.

Read: $\sum_{a=1}^{(p_2-1)}$ at stage (13) for $\sum_{b=1}^{(p_2-1)}$

Read: summation limits as: $\sum_{b=0}^{n}$ wherever it appears as $\sum_{b=1}^{n}$

$1/2\pi$ for every $1/4\pi$ appearing on p. 52

Remark 4, Remark 5 for Remark 5, Remark 6 on p. 52.
