

SUBJECT INDEX

Abel's summation formula		Conformal coordinates	
Analogues of Euler and Poisson summation formulae	213	The Weierstrass–Enneper representation using hodographic coordinates on a minimal surface	189
Absolute summability		Conjugate series	
A note on absolute summability factors	165	On the absolute N_{q_α} -summability of r th derived conjugate series	223
Necessary and sufficient conditions for inclusion relations for absolute summability	243	Controlled gates	
Algebras with involution		A remark on the unitary group of a tensor product of n finite-dimensional Hilbert spaces	3
Pfister involutions	365	Convex and nonconvex problems	
Almost increasing sequences		Nonlinear second-order multivalued boundary value problems	293
A note on absolute summability factors	165	Corner singularities	
Approximation theorem		Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains	395
Some approximation theorems	87	Curvilinear polygons	
Automorphic form		Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains	395
Reduction theory for a rational function field	153	de la Vallée-Poussin means	
Banach algebra		L^1 -convergence of complex double trigonometric series	355
Questions concerning matrix algebras and invariance of spectrum	71	Derived conjugate series	
Beurling algebra		On the absolute N_{q_α} -summability of r th derived conjugate series	223
Beurling algebra analogues of the classical theorems of Wiener and Lévy on absolutely convergent Fourier series	179	Divisor	
Brownian motion		The Jacobian of a nonorientable Klein surface	139
Probabilistic representations of solutions to the heat equation	321	Euler summation formula	
Cesàro matrix		Analogues of Euler and Poisson summation formulae	213
Necessary and sufficient conditions for inclusion relations for absolute summability	243	Euler–Maclaurin summation formula	
Cesàro means		Analogues of Euler and Poisson summation formulae	213
L^1 -convergence of complex double trigonometric series	355	Exponential energy decay	
Cohomological invariants		Uniform stability of damped nonlinear vibrations of an elastic string	443
Pfister involutions	365	External cone condition	
Commutative Banach algebra		Some approximation theorems	87
Beurling algebra analogues of the classical theorems of Wiener and Lévy on absolutely convergent Fourier series	179	Fixed point	
Complex double trigonometric series		Fixed point of multivalued mapping in uniform spaces	183
L^1 -convergence of complex double trigonometric series	355		

- Fourier series
 Beurling algebra analogues of the classical theorems of Wiener and Lévy on absolutely convergent Fourier series 179
 Analogues of Euler and Poisson summation formulae 213
 On the absolute N_{q_α} -summability of r th derived conjugate series 223
- Fractional Sobolev norms
 Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains 395
- Function algebra
 Equivalence of quotient Hilbert modules 281
- Function field
 Reduction theory for a rational function field 153
- Functional equation
 Some functional equations originating from number theory 91
- Gates
 A remark on the unitary group of a tensor product of n finite-dimensional Hilbert spaces 3
- Geometrical mesh
 Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains 395
- Good set
 When is $f(x_1, x_2, \dots, x_n) = u_1(x_1) + u_2(x_2) + \dots + u_n(x_n)$? 77
- Hartman condition
 Nonlinear second-order multivalued boundary value problems 293
- Heat equation
 Probabilistic representations of solutions to the heat equation 321
- Heterogeneous shear flows
 On Howard's conjecture in heterogeneous shear flow problem 451
- Higher-ramification groups
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- Hilbert modules
 Equivalence of quotient Hilbert modules 281
- Hodographic coordinates
 The Weierstrass–Enneper representation using hodographic coordinates on a minimal surface 189
- Hopf algebra
 The planar algebra associated to a Kac algebra 15
- Infinite dimensional stochastic differential equations
 Probabilistic representations of solutions to the heat equation 321
- inf-sup conditions
 Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains 395
- Inverse closed
 Questions concerning matrix algebras and invariance of spectrum 71
- Jacobian
 The Jacobian of a nonorientable Klein surface 139
- Jet and angle
 Equivalence of quotient Hilbert modules 281
- Kac algebra
 The planar algebra associated to a Kac algebra 15
- Kernel
 On the absolute N_{q_α} -summability of r th derived conjugate series 223
- Kernel function
 Equivalence of quotient Hilbert modules 281
- Kirchoff type wave equation
 Uniform stability of damped nonlinear vibrations of an elastic string 443
- L^1 -convergence of Fourier series
 L^1 -convergence of complex double trigonometric series 355
- Leray–Schauder alternative
 Nonlinear second-order multivalued boundary value problems 293
- Lévy's theorem
 Beurling algebra analogues of the classical theorems of Wiener and Lévy on absolutely convergent Fourier series 179

- Linear stability
 On Howard's conjecture in heterogeneous shear flow problem 451
- Linear stability
 Bounds on the phase velocity in the linear instability of viscous shear flow problem in the β -plane 207
- Linked component
 When is $f(x_1, x_2, \dots, x_n) = u_1(x_1) + u_2(x_2) + \dots + u_n(x_n)$? 77
- Lipschitz space
 Triebel–Lizorkin space estimates for multilinear operators of sublinear operators 379
- Littlewood–Paley operator
 Triebel–Lizorkin space estimates for multilinear operators of sublinear operators 379
- Local Artin conductor
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- Local fields
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- Local Langlands correspondence for $GL(n)$
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- Longitudinal and transversal curvature
 Equivalence of quotient Hilbert modules 281
- Lower and upper solutions
 Positive solutions of singular boundary value problem of negative exponent Emden–Fowler equation 195
- Lyapunov functional
 Uniform stability of damped nonlinear vibrations of an elastic string 443
- Marcinkiewicz operator
 Triebel–Lizorkin space estimates for multilinear operators of sublinear operators 379
- Matrix algebra
 Questions concerning matrix algebras and invariance of spectrum 71
- Matrix order unit ideal
 Order units in a C^* -algebra 65
- Matrix order unit property
 Order units in a C^* -algebra 65
- Maximal monotone operator
 Nonlinear second-order multivalued boundary value problems 293
- Metabelian local class field theory
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- M -ideals
 Very smooth points of spaces of operators 53
- Minimal surface
 The Weierstrass–Enneper representation using hodographic coordinates on a minimal surface 189
- Minimally supported frequency wavelet
 Wavelet subspaces invariant under groups of translation operators 171
- Mixed Neumann and Dirichlet boundary conditions
 Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains 395
- Multilinear operators
 Triebel–Lizorkin space estimates for multilinear operators of sublinear operators 379
- Multiplicative function
 Some functional equations originating from number theory 91
- Multiresolution analysis
 Wavelet subspaces invariant under groups of translation operators 171
- Multiresolution analysis wavelet
 Wavelet subspaces invariant under groups of translation operators 171
- Multivalued mappings
 Fixed point of multivalued mapping in uniform spaces 183
- Nevanlinna summability
 On the absolute $N_{q\alpha}$ -summability of r th derived conjugate series 223
- Non-abelian local class field theory
 On the local Artin conductor $f_{\text{Artin}}(\chi)$ of a character χ of $\text{Gal}(E/K)$ – II: Main results for the metabelian case 99
- Nonorientable surface
 The Jacobian of a nonorientable Klein surface 139
- n -Qubit quantum computer
 A remark on the unitary group of a tensor product of n finite-dimensional Hilbert spaces 3

- Orbitally complete
 Fixed point of multivalued mapping in uniform spaces 183
- Pfister forms
 Pfister involutions 365
- Piezoelectricity
 Vibrations of thin piezoelectric shallow shells: Two-dimensional approximation 333
- Planar algebra
 The planar algebra associated to a Kac algebra 15
- Poisson's summation formula
 Analogues of Euler and Poisson summation formulae 213
- Positive solution
 Positive solutions of singular boundary value problem of negative exponent Emden-Fowler equation 195
- Pseudomonotone operator
 Nonlinear second-order multivalued boundary value problems 293
- Qubits
 A remark on the unitary group of a tensor product of n finite-dimensional Hilbert spaces 3
- Quotient module
 Equivalence of quotient Hilbert modules 281
- Saddle point equilibrium
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Sequentially good measure
 When is $f(x_1, x_2, \dots, x_n) = u_1(x_1) + u_2(x_2) + \dots + u_n(x_n)$? 77
- Sequentially good set
 When is $f(x_1, x_2, \dots, x_n) = u_1(x_1) + u_2(x_2) + \dots + u_n(x_n)$? 77
- Shallow shells
 Vibrations of thin piezoelectric shallow shells: Two-dimensional approximation 333
- Simplicial measure
 When is $f(x_1, x_2, \dots, x_n) = u_1(x_1) + u_2(x_2) + \dots + u_n(x_n)$? 77
- Singular boundary value problem
 Positive solutions of singular boundary value problem of negative exponent Emden-Fowler equation 195
- Spaces of operators
 Very smooth points of spaces of operators 53
- Stability
 Some functional equations originating from number theory 91
- Stability estimates
 Stability estimates for h-p spectral element methods for general elliptic problems on curvilinear domains 395
- Standard invariant
 The planar algebra associated to a Kac algebra 15
- Stochastic game
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Stopping time
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Stratified transversality
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Strong Whitney stratification
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Subanalytic bundle
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Subanalytic set
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Subfactor
 The planar algebra associated to a Kac algebra 15
- Symmetric *-algebra
 Questions concerning matrix algebras and invariance of spectrum 71
- Tauberian condition of Hardy-Karamata kind
 L^1 -convergence of complex double trigonometric series 355
- Translation invariance
 Wavelet subspaces invariant under groups of translation operators 171
- Translation operators
 Probabilistic representations of solutions to the heat equation 321
- Triebel-Lizorkin space
 Triebel-Lizorkin space estimates for multilinear operators of sublinear operators 379

- Tubular neighbourhood
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Uniform space
 Fixed point of multivalued mapping in uniform spaces 183
- Uniform stability
 Uniform stability of damped nonlinear vibrations of an elastic string 443
- Value
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Variational inequalities
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Vector p -Laplacian
 Nonlinear second-order multivalued boundary value problems 293
- Verdier stratification
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
- Very smooth points
 Very smooth points of spaces of operators 53
- Vibrations
 Vibrations of thin piezoelectric shallow shells: Two-dimensional approximation 333
- Viscosity solution
 A probabilistic approach to second order variational inequalities with bilateral constraints 431
- Viscous shear flows
 Bounds on the phase velocity in the linear instability of viscous shear flow problem in the β -plane 207
- Wavelet
 Wavelet subspaces invariant under groups of translation operators 171
- Wavelet set
 Wavelet subspaces invariant under groups of translation operators 171
- Weierstrass–Enneper representation
 The Weierstrass–Enneper representation using hodographic coordinates on a minimal surface 189
- Weighted mean matrix
 Necessary and sufficient conditions for inclusion relations for absolute summability 243
- Wiener's theorem
 Beurling algebra analogues of the classical theorems of Wiener and Lévy on absolutely convergent Fourier series 179
- Zero-locus of subanalytic bundle
 Subanalytic bundles and tubular neighbourhoods of zero-loci 251
