

SUBJECT INDEX

$\delta$ Spherical transform	
On the Schwartz space isomorphism theorem for rank one symmetric space	333
$\sigma$ -Product	
Quotient probabilistic normed spaces and completeness results	61
Abelian groups	
A variant of Davenport's constant	147
Additive mapping	
On the stability of Jensen's functional equation on groups	31
Analytic functions	
On Eneström–Kakeya theorem and related analytic functions	359
A-net	
On the problem of isometry of a hypersurface preserving mean curvature	49
Arithmetical functions	
Derivations and generating degrees in the ring of arithmetical functions	167
Asymptotic fixed point	
Strong convergence of modified Ishikawa iterations for nonlinear mappings	97
Asymptotically invariance property	
Ergodic theory of amenable semigroup actions	177
Auxiliary functions	
Fractional extensions of some boundary value problems in oil strata	267
Baire property	
Borel hierarchies in infinite products of Polish spaces	205
Banach algebras	
Derivations and generating degrees in the ring of arithmetical functions	177
Banach spaces	
On the stability of Jensen's functional equation on groups	31
Banach spaces of continuous functions	
Khinchin's inequality, Dunford–Pettis and compact operators on the space $C([0, 1], X)$	13
Bergman spaces	
Weighted composition operators on weighted Bergman spaces of bounded symmetric domains	185
Bergman-type space	
Weighted composition operators from Bergman-type spaces into Bloch spaces	371
Bifurcations	
A polycycle and limit cycles in a non-differentiable predator-prey model	219
Bloch space	
Weighted composition operators from Bergman-type spaces into Bloch spaces	371
Bonnet associate	
On the problem of isometry of a hypersurface preserving mean curvature	49
Bonnet curve	
On the problem of isometry of a hypersurface preserving mean curvature	49
Bonnet hypersurface	
On the problem of isometry of a hypersurface preserving mean curvature	49
Borel sets of additive classes	
Borel hierarchies in infinite products of Polish spaces	205
Boundary of a good set	
Some further remarks on good sets	197
Bounded symmetric domain	
Weighted composition operators on weighted Bergman spaces of bounded symmetric domains	185
Boundedness	
Weighted composition operators on weighted Bergman spaces of bounded symmetric domains	185
Breaking wave	
Dynamics and bifurcations of travelling wave solutions of $R(m, n)$ equations	555
$C^*$ algebra	
Extreme points of the convex set of joint probability distributions with fixed marginals	505

- $C_0$  semigroup  
 A generalization of d'Alembert formula 411
- Caputo differintegral operator  
 Fractional extensions of some boundary value problems in oil strata 267
- Carleson measure  
 Weighted composition operators on weighted Bergman spaces of bounded symmetric domains 185
- Central limit theorem  
 Central limit theorems for a class of irreducible multicolor urn models 517
- Centre-of-mass  
 A sharp upper bound for the first eigenvalue of the Laplacian of compact hypersurfaces in rank-1 symmetric spaces 307
- CLUR points  
 On the compactly locally uniformly rotund points of Orlicz spaces 471
- Cohen–Macaulay modules  
 Reducing system of parameters and the Cohen–Macaulay property 159
- Cohomology algebra  
 On the cohomology of orbit space of free  $\mathbb{Z}_p$ -actions on lens spaces 287
- Cohomotopy set  
 Classification of framed links in 3-manifolds 301
- Compact interpolation  
 Compact solutions to the equation  $Tx = y$  in a weakly closed  $\mathcal{T}(\mathcal{N})$ -module 495
- Compactness  
 Weighted composition operators on weighted Bergman spaces of bounded symmetric domains 185
- Completely positive map  
 Extreme points of the convex set of joint probability distributions with fixed marginals 505
- Complex Lie groups  
 Uniqueness of solutions to Schrödinger equations on complex semi-simple Lie groups 325
- Complex variables  
 Equivariant embeddings of Hermitian symmetric spaces 317
- Condition numbers  
 Nonconforming h-p spectral element methods for elliptic problems 109
- Convolution  
 Fractional extensions of some boundary value problems in oil strata 267
- Convolution semigroup  
 Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Coregularity  
 Bounds for regularity and coregularity of graded modules 429
- Covariant bistochastic maps  
 Extreme points of the convex set of joint probability distributions with fixed marginals 505
- Curvature  
 Equi-Gaussian curvature folding 293
- d'Alembert formula  
 A generalization of d'Alembert formula 411
- Davenport's constant  
 A variant of Davenport's constant 147
- Degree of a map  
 Classification of framed links in 3-manifolds 301
- Density of states  
 Continuity of integrated density of states – independent randomness 401
- Derivations  
 Derivations and generating degrees in the ring of arithmetical functions 167
- Differential game  
 Infinite dimensional differential games with hybrid controls 233
- Direct product of groups  
 On the stability of Jensen's functional equation on groups 31
- Dynamic equation  
 Some nonlinear dynamic inequalities on time scales 545
- Dynamic inequality  
 Some nonlinear dynamic inequalities on time scales 545
- Eigenvalue  
 A sharp upper bound for the first eigenvalue of the Laplacian of compact hypersurfaces in rank-1 symmetric spaces 307

- Eigenvalue intervals  
 Positive solutions and eigenvalue intervals for nonlinear systems 85
- Elliptic equation  
 Solutions for a class of iterated singular equations 259
- Embedding problem  
 Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Eneström–Takeya theorem  
 On Eneström–Takeya theorem and related analytic functions 359
- Erfos' theorem  
 Fractional extensions of some boundary value problems in oil strata 267
- Euler equation  
 Solutions for a class of iterated singular equations 259
- Exponential accuracy  
 Nonconforming h-p spectral element methods for elliptic problems 109
- Extreme points of a convex set  
 Extreme points of the convex set of joint probability distributions with fixed marginals 505
- Fixed point theorem in cones  
 Positive solutions and eigenvalue intervals for nonlinear systems 85
- Folding  
 Equi-Gaussian curvature folding 293
- Fractional heat equation  
 Fractional extensions of some boundary value problems in oil strata 267
- Frame  
 Frames and bases in tensor products of Hilbert spaces and Hilbert  $C^*$ -modules 1
- Frame operator  
 Frames and bases in tensor products of Hilbert spaces and Hilbert  $C^*$ -modules 1
- Framed cobordism  
 Classification of framed links in 3-manifolds 301
- Framed link  
 Classification of framed links in 3-manifolds 301
- Framing  
 Classification of framed links in 3-manifolds 301
- Frechet space  
 Semigroups on Frechet spaces and equations with infinite delays 71
- Free action  
 On the cohomology of orbit space of free  $\mathbb{Z}_p$ -actions on lens spaces 287
- Full component  
 Some further remarks on good sets 197
- Full set  
 Some further remarks on good sets 197
- Functional differential equation  
 Semigroups on Frechet spaces and equations with infinite delays 71
- Gandy–Harrington topology  
 Borel hierarchies in infinite products of Polish spaces 205
- Gaussian  
 Equi-Gaussian curvature folding 293
- Generalized projection  
 Strong convergence of modified Ishikawa iterations for nonlinear mappings 97
- Generalized quadrangle  
 Structure of a code related to  $\text{Sp}(4, q)$ ,  $q$  even 457
- Generating degrees  
 Derivations and generating degrees in the ring of arithmetical functions 167
- Geodesic  
 Some further remarks on good sets 197
- Geometrical mesh  
 Nonconforming h-p spectral element methods for elliptic problems 109
- Good set  
 Some further remarks on good sets 197
- Graded local cohomology modules  
 Bounds for regularity and coregularity of graded modules 429
- Heisenberg group  
 Uniqueness of solutions to Schrödinger equations on complex semi-simple Lie groups 325
- Helgason Fourier transform  
 On the Schwartz space isomorphism theorem for rank one symmetric space 333
- Hilbert  $C^*$ -modules  
 Frames and bases in tensor products of Hilbert spaces and Hilbert  $C^*$ -modules 1

- Hölder continuous  
 Continuity of integrated density of states – independent randomness 401
- Homotopy classification of maps  
 Classification of framed links in 3-manifolds 301
- Hybrid controls  
 Infinite dimensional differential games with hybrid controls 233
- Hypersurface  
 A sharp upper bound for the first eigenvalue of the Laplacian of compact hypersurfaces in rank-1 symmetric spaces 307
- Infinite delay  
 Semigroups on Frechet spaces and equations with infinite delays 71
- Infinite divisibility  
 Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Isometry  
 On the problem of isometry of a hypersurface preserving mean curvature 49
- Iterated equation  
 Solutions for a class of iterated singular equations 259
- Jensen equation  
 On the stability of Jensen's functional equation on groups 31
- Jensen function  
 On the stability of Jensen's functional equation on groups 31
- $L_p$ -norm inequalities  
 On an inequality concerning the polar derivative of a polynomial 349
- Laplace transform  
 Fractional extensions of some boundary value problems in oil strata 267
- Laplacian  
 A sharp upper bound for the first eigenvalue of the Laplacian of compact hypersurfaces in rank-1 symmetric spaces 307
- Law of iterated logarithm  
 Law of iterated logarithm for NA sequences with non-identical distributions 213
- Least-squares solution  
 Nonconforming h-p spectral element methods for elliptic problems 109
- Lens space  
 On the cohomology of orbit space of free  $\mathbb{Z}_p$ -actions on lens spaces 287
- Levy–Solovay model  
 Borel hierarchies in infinite products of Polish spaces 205
- Limit cycles  
 A polycycle and limit cycles in a non-differentiable predator-prey model 219
- Limit  $q$ -Bernstein operator  
 Positive linear operators generated by analytic functions 485
- Linear positive operator  
 Approximation of functions of two variables by certain linear positive operators 387
- Locally compact semigroup  
 Derivations and generating degrees in the ring of arithmetical functions 177
- LUR points  
 On the compactly locally uniformly rotund points of Orlicz spaces 471
- Markov chains  
 Central limit theorems for a class of irreducible multicolor urn models 517
- Martingale  
 Central limit theorems for a class of irreducible multicolor urn models 517
- Mean curvature  
 On the problem of isometry of a hypersurface preserving mean curvature 49
- Mean ergodic theorem  
 Derivations and generating degrees in the ring of arithmetical functions 177
- Metabelian group  
 On the stability of Jensen's functional equation on groups 31
- Metric geometry (symmetric spaces)  
 Equivariant embeddings of Hermitian symmetric spaces 317
- Metric group  
 On the stability of Jensen's functional equation on groups 31
- Modulus of continuity  
 Approximation of functions of two variables by certain linear positive operators 387

- NA sequences  
 Law of iterated logarithm for NA sequences with non-identical distributions 213
- Nonexpansive mapping  
 Strong convergence of modified Ishikawa iterations for nonlinear mappings 97
- Non-identical distribution  
 Law of iterated logarithm for NA sequences with non-identical distributions 213
- Nonlinear  
 Some nonlinear dynamic inequalities on time scales 545
- Nonlinear system  
 Positive solutions and eigenvalue intervals for nonlinear systems 85
- Normal bundle  
 Classification of framed links in 3-manifolds 301
- Normal Euler class  
 Classification of framed links in 3-manifolds 301
- One-parameter subgroup  
 Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Operator ideals  
 Khinchin's inequality, Dunford–Pettis and compact operators on the space  $C([0, 1], X)$  13
- Order of approximation  
 Approximation of functions of two variables by certain linear positive operators 387
- Orlicz spaces  
 On the compactly locally uniformly rotund points of Orlicz spaces 471
- Periodic cusp wave  
 Dynamics and bifurcations of travelling wave solutions of  $R(m, n)$  equations 555
- Periodic wave  
 Dynamics and bifurcations of travelling wave solutions of  $R(m, n)$  equations 555
- $p$ -Laplacian  
 Positive solutions and eigenvalue intervals for nonlinear systems 85
- Poisson distribution  
 Positive linear operators generated by analytic functions 485
- Polar derivative  
 On an inequality concerning the polar derivative of a polynomial 349
- Polygon  
 Equi-Gaussian curvature folding 293
- Polynomial weighted spaces  
 Approximation of functions of two variables by certain linear positive operators 387
- Polynomials  
 On Eneström–Kakeya theorem and related analytic functions 359
- Pontryagin–Thom construction  
 Classification of framed links in 3-manifolds 301
- Positive operator  
 Positive linear operators generated by analytic functions 485
- Positive solutions  
 Positive solutions and eigenvalue intervals for nonlinear systems 85
- Preconditioners  
 Nonconforming  $h$ - $p$  spectral element methods for elliptic problems 109
- Predator-prey model  
 A polycycle and limit cycles in a non-differentiable predator-prey model 219
- Preserving  
 On the problem of isometry of a hypersurface preserving mean curvature 49
- Probabilistic norm  
 Quotient probabilistic normed spaces and completeness results 61
- Probabilistic normed space  
 Quotient probabilistic normed spaces and completeness results 61
- Pseudoadditive mapping  
 On the stability of Jensen's functional equation on groups 31
- Pseudocharacter  
 On the stability of Jensen's functional equation on groups 31
- Pseudo-Jensen function  
 On the stability of Jensen's functional equation on groups 31
- $p$ -Summing operators  
 Khinchin's inequality, Dunford–Pettis and compact operators on the space  $C([0, 1], X)$  13

- $q$ -Integers
  - Positive linear operators generated by analytic functions 485
- Quasiadditive map
  - On the stability of Jensen's functional equation on groups 31
- Quasicharacter
  - On the stability of Jensen's functional equation on groups 31
- Quasi-Jensen function
  - On the stability of Jensen's functional equation on groups 31
- Quotient probabilistic normed space
  - Quotient probabilistic normed spaces and completeness results 61
  
- $R(m, n)$  equations
  - Dynamics and bifurcations of travelling wave solutions of  $R(m, n)$  equations 555
- Radial type solutions
  - Solutions for a class of iterated singular equations 259
- Rank-1 symmetric space
  - A sharp upper bound for the first eigenvalue of the Laplacian of compact hypersurfaces in rank-1 symmetric spaces 307
- Regularity
  - Bounds for regularity and coregularity of graded modules 429
- Related component
  - Some further remarks on good sets 197
- Relatively asymptotically nonexpansive mapping
  - Strong convergence of modified Ishikawa iterations for nonlinear mappings 97
- Root multiplicity
  - Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
  
- Schatten  $p$ -class operator
  - Weighted composition operators on weighted Bergman spaces of bounded symmetric domains 185
- Schrödinger equation
  - Uniqueness of solutions to Schrödinger equations on complex semi-simple Lie groups 325
  
- Semigroup
  - On the stability of Jensen's functional equation on groups 31
  - Semigroups on Frechet spaces and equations with infinite delays 71
- Socle layers
  - Structure of a code related to  $\text{Sp}(4, q)$ ,  $q$  even 457
- Solenoid
  - Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Solitary cusp wave
  - Dynamics and bifurcations of travelling wave solutions of  $R(m, n)$  equations 555
- Solitary wave
  - Dynamics and bifurcations of travelling wave solutions of  $R(m, n)$  equations 555
- Spectral sequence
  - On the cohomology of orbit space of free  $\mathbb{Z}_p$ -actions on lens spaces 287
- Sphere
  - Equi-Gaussian curvature folding 293
- Stability
  - A polycycle and limit cycles in a non-differentiable predator-prey model 219
- Stability estimate
  - Nonconforming h-p spectral element methods for elliptic problems 109
- Stability of functional equation
  - On the stability of Jensen's functional equation on groups 31
- Steinberg module
  - Structure of a code related to  $\text{Sp}(4, q)$ ,  $q$  even 457
- Stinespring's theorem
  - Extreme points of the convex set of joint probability distributions with fixed marginals 505
- Strategy
  - Infinite dimensional differential games with hybrid controls 233
- Strichartz estimates
  - Uniqueness of solutions to Schrödinger equations on complex semi-simple Lie groups 325
- Symplectic group
  - Structure of a code related to  $\text{Sp}(4, q)$ ,  $q$  even 457

- Systems of parameters  
 Reducing system of parameters and the Cohen–Macaulay property 159
- Szasz–Mirakyan operator  
 Positive linear operators generated by analytic functions 485
- Temperature field  
 Fractional extensions of some boundary value problems in oil strata 267
- Tensor product  
 Frames and bases in tensor products of Hilbert spaces and Hilbert  $C^*$ -modules 1
- Tensor products  
 Khinchin’s inequality, Dunford–Pettis and compact operators on the space  $C([0, 1], X)$  13
- Time scales  
 Some nonlinear dynamic inequalities on time scales 545
- Topologically left invariant mean  
 Derivations and generating degrees in the ring of arithmetical functions 177
- Topologically right invariant mean  
 Ergodic theory of amenable semigroup actions 177
- Torus  
 Equi-Gaussian curvature folding 293
- Totally positive sequence  
 Positive linear operators generated by analytic functions 485
- Triangle functions  
 Quotient probabilistic normed spaces and completeness results 61
- Uniqueness  
 Uniqueness of solutions to Schrödinger equations on complex semi-simple Lie groups 325
- Uniqueness of embedding  
 Explicit representation of roots on  $p$ -adic solenoids and non-uniqueness of embeddability into rational one-parameter subgroups 443
- Urn models  
 Central limit theorems for a class of irreducible multicolor urn models 517
- Value  
 Infinite dimensional differential games with hybrid controls 233
- Viscosity solution  
 Infinite dimensional differential games with hybrid controls 233
- Weakly almost periodic  
 Ergodic theory of amenable semigroup actions 177
- Weakly closed  $\mathcal{T}(\mathcal{N})$ -modules  
 Compact solutions to the equation  $Tx = y$  in a weakly closed  $\mathcal{T}(\mathcal{N})$ -module 495
- Wegner estimate  
 Continuity of integrated density of states – independent randomness 401
- Weighted composition operator  
 Weighted composition operators from Bergman-type spaces into Bloch spaces 371
- Wreath product of groups  
 On the stability of Jensen’s functional equation on groups 31
- Wright function  
 Fractional extensions of some boundary value problems in oil strata 267
- Zeros  
 On Eneström–Kakeya theorem and related analytic functions 359
- Zero-sum problems  
 A variant of Davenport’s constant 147
- Zygmund’s inequality  
 On an inequality concerning the polar derivative of a polynomial 349
