Frechet ($D^*$)-algebra
On a class of smooth Frechet subalgebras of $C^*$-algebras 393

Free boundary
Porosity of free boundaries in the obstacle problem for quasilinear elliptic equations 373

Frobenius splitting
Harder–Narasimhan Filtrations which are not split by the Frobenius maps 361

Function fields
Divisibility of class numbers of imaginary quadratic function fields by a fixed odd number 1

Generalized modular function
A short note on sign changes 315

Geodesics
Hyperbolicity in median graphs 455

Global solution
Global existence of solutions for a viscous Cahn–Hilliard equation with gradient dependent potentials and sources 499

Gromov hyperbolic graph
Hyperbolicity in median graphs 455

Gromov hyperbolicity
Hyperbolicity in median graphs 455

Group norm
Multiple decomposability of probabilities on contractible locally compact groups 257

Group torsion
On the number of isomorphism classes of transversals 345

Hardy spaces
The multiplication operators on some analytic function spaces of the unit ball 33
The boundedness of multilinear Calderon–Zygmund operators on Hardy spaces 383

Hardy–Berndt sums
A new generalization of Hardy–Berndt sums 177

Hermitian forms
On the $u$-invariant of hermitian forms 303

Higher residue symbols
Density of primes in $l$-th power residues 19

Hirzebruch surface
On rationality of moduli spaces of vector bundles on real Hirzebruch surfaces 213

Homogeneous and inhomogeneous Strichartz estimates
Strichartz estimates for the Schrödinger propagator for the Laguerre operator 525

Hydrodynamic stability
Series solutions and a perturbation formula for the extended Rayleigh problem of hydrodynamic stability 293

Indefinite weight
Remark on an infinite semipositone problem with indefinite weight and falling zeros 145

Infinite graphs
Hyperbolicity in median graphs 455

Infinite semipositone problems
Remark on an infinite semipositone problem with indefinite weight and falling zeros 145

Initial boundary value problem
Global existence of solutions for a viscous Cahn–Hilliard equation with gradient dependent potentials and sources 499

Input–output formalism
Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427

Inverse of integers
A note on a kind of character sums over the short interval 321

Jorgensen’s inequality
Notes on discrete subgroups of Möbius transformations 245
Laguerre functions
   Strichartz estimates for the Schrödinger propagator for the Laguerre operator 525

Laguerre operator
   Strichartz estimates for the Schrödinger propagator for the Laguerre operator 525

Lebesgue partition
   Two remarks on normality preserving Borel automorphisms of \( \mathbb{R}^n \) 75
   \( L \)-functions
   On partial sums of a spectral analogue of the Möbius function 193

Linear system
   Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427

Logarithmic moment
   Multiple decomposability of probabilities on contractible locally compact groups 257

Maaß forms
   On partial sums of a spectral analogue of the Möbius function 193
Mapping class groups
   A note on stable Teichmüller quasi-geodesics 47

Mapping series
   Multiplier convergent series and uniform convergence of mapping series 67

Matrix
   On the number of generators of a projective module 469

Median graph
   Hyperbolicity in median graphs 455

Minimal surfaces
   One-parameter family of solitons from minimal surfaces 55

Moduli space
   On rationality of moduli spaces of vector bundles on real Hirzebruch surfaces 213

Molecular decomposition
   The boundedness of multilinear Calderon–Zygmund operators on Hardy spaces 383

Multi-analytic operator
   Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427

Multilinear Calderon–Zygmund operators
   The boundedness of multilinear Calderon–Zygmund operators on Hardy spaces 383

Multilinear operator
   Direct and reverse inclusions for strongly multiple summing operators 415

Multiple decomposable probability
   Multiple decomposability of probabilities on contractible locally compact groups 257

Multiple summing operator
   Direct and reverse inclusions for strongly multiple summing operators 415

Multiplication operators
   The multiplication operators on some analytic function spaces of the unit ball 33

Multiplier convergent series
   Multiplier convergent series and uniform convergence of mapping series 67

Multivariate operator theory
   Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427

Nehari manifold
   Sign changing solutions of the \( p(x) \)-Laplacian equation 515

Nodal curves
   Maps into projective spaces 331

Nodal solution
   Sign changing solutions of the \( p(x) \)-Laplacian equation 515

Nonlinear Schrödinger equation
   Blowing-up semilinear wave equation with exponential nonlinearity in two space dimensions 365

Nonlinear wave equation
   Blowing-up semilinear wave equation with exponential nonlinearity in two space dimensions 365
Non-Lipschitz coefficients
A class of degenerate stochastic differential equations with non-Lipschitz coefficients 443
Normality preserving Borel automorphism
Two remarks on normality preserving Borel automorphisms of $\mathbb{R}^n$ 75
Normalized right transversal
On the number of isomorphism classes of transversals 345
Obstacle problem
Porosity of free boundaries in the obstacle problem for quasilinear elliptic equations 373
Outgoing Cuntz scattering system
Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427
$p(x)$-Laplacian
Sign changing solutions of the $p(x)$-Laplacian equation 515
$p$-Adic series
Bell numbers, determinants and series 151
$p$-Centroid body
Determination of star bodies from $p$-centroid bodies 577
$p$-Cosine transformation
Determination of star bodies from $p$-centroid bodies 577
Perturbations of self-adjoint operators
Third order trace formula 547
Picard bundle
Maps into projective spaces 331
Porosity
Porosity of free boundaries in the obstacle problem for quasilinear elliptic equations 373
Primary
Conjugacy class sizes and solvability of finite groups 239
Primitive roots
Distribution of residues and primitive roots 203
Process convergence
Process convergence of self-normalized sums of i.i.d. random variables coming from domain of attraction of stable distributions 85
Products of sums
Asymptotic distribution of products of sums of independent random variables 283
Projective module
On the number of generators of a projective module 469
$p$-Summing
Direct and reverse inclusions for strongly multiple summing operators 415
Quadratic extensions
Divisibility of class numbers of imaginary quadratic function fields by a fixed odd number 1
Quadratic residues
Distribution of residues and primitive roots 203
Quasigeodesics
A note on stable Teichmüller quasigeodesics 47
Quasilinear elliptic equations
Porosity of free boundaries in the obstacle problem for quasilinear elliptic equations 373
Quaternion-free
A note on 2-nilpotence of finite groups 235
Quaternionic hyperbolic space
Notes on discrete subgroups of Möbius transformations 245
Rationality
On rationality of moduli spaces of vector bundles on real Hirzebruch surfaces 213
Real variety
On rationality of moduli spaces of vector bundles on real Hirzebruch surfaces 213
Relatively hyperbolic space
A note on stable Teichmüller quasigeodesics 47
Repeated summands
  Multiplicity of summands in the random partitions of an integer 101
Riemann zeta function
  On partial sums of a spectral analogue of the Möbius function 193
Right loop
  On the number of isomorphism classes of transversals 345
Row contraction
  Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427
Self-adjoint and normal operator
  On commuting operator exponentials, II 27
Self-normalized sums
  Process convergence of self-normalized sums of i.i.d. random variables coming from domain of attraction of stable distributions 85
Shear instability
  Series solutions and a perturbation formula for the extended Rayleigh problem of hydrodynamic stability 293
Short interval
  A note on a kind of character sums over the short interval 321
Slices of Young diagrams
  Multiplicity of summands in the random partitions of an integer 101
Smooth subalgebra of a C*-algebra
  On a class of smooth Frechet subalgebras of C*-algebras 393
Solvable groups
  Conjugacy class sizes and solvability of finite groups 239
Spectral invariance
  On a class of smooth Frechet subalgebras of C*-algebras 393
Spectral shift function
  Third order trace formula 547
Spherical integral transformation
  Determination of star bodies from p-centroid bodies 577
Stability
  Blowing-up semilinear wave equation with exponential nonlinearity in two space dimensions 365
Stable distributions
  Process convergence of self-normalized sums of i.i.d. random variables coming from domain of attraction of stable distributions 85
Star body
  Determination of star bodies from p-centroid bodies 577
Strong Harder–Narasimhan Filtrations
  Harder–Narasimhan Filtrations which are not split by the Frobenius maps 361
Strongly multiple summing operator
  Direct and reverse inclusions for strongly multiple summing operators 415
Sub-supersolution method
  Remark on an infinite semipositone problem with indefinite weight and falling zeros 145
Symmetric product
  A general vanishing theorem 479
Teichmüller space
  A note on stable Teichmüller quasi-geodesics 47
The general Randic index
  The smallest Randic index for trees 167
The number of subgroups of possible order
  Finite groups with the set of the number of subgroups of possible order containing exactly two elements 491
Torsionfree sheaves
  Maps into projective spaces 331
Trace formula
  Third order trace formula 547
Transfer function
  Outgoing Cuntz scattering system for a coisometric lifting and transfer function 427
Tree
  The smallest Randic index for trees 167
Subject Index

$u$-Invariant
  On the $u$-invariant of hermitian forms 303

Unbounded normal operator
  A note on the Fuglede–Putnam theorem 253

Unimodular row
  On the number of generators of a projective module 469

Vanishing theorems
  A general vanishing theorem 479

Vector bundle
  A general vanishing theorem 479

Viscous Cahn–Hilliard equation
  Global existence of solutions for a viscous Cahn–Hilliard equation with gradient dependent potentials and sources 499

Weakly completely continuous
  Completely continuous and weakly completely continuous abstract Segal algebras 539

Witt groups
  On the $u$-invariant of hermitian forms 303

Yakubovich conjecture
  Multiplicity of summands in the random partitions of an integer 101
