Algebra for fermions with a new exclusion principle

by A K MISHRA and G RAJASEKARAN

The five lines following eq. (70) in §5.2 should be replaced by the following:

This is identical to our (65) if we consider the $n \rightarrow \infty$ limit of our algebra. However, our algebra requires (66) in addition. The algebra defined by (65) and (66) has been studied by Cuntz (1977). (We thank Prof. V. Srinivasan for informing us of Cuntz's paper).
