

# Indexes to Volume 54

## SUBJECT INDEX

### Rapid Communication

A simpler and elegant algorithm for computing fractal dimension in higher dimensional state space *S Ghorui, A K Das and N Venkatramani* L331–336

### Review Article

Pressure induced phase transition behaviour in  $f$ -electron based dialuminides *P Ch Sahu and N V Chandra Shekar* 685–708

### Quantum Mechanics

Quantum key distribution using three basis states *Subhash Kak* 709–713

### Cosmology

Particle production in higher derivative theory *G P Singh, A Beesham and R V Deshpande* 729–736

Bulk viscosity of strange quark matter in density dependent quark mass model *J D Anand, N Chandrika Devi, V K Gupta and S Singh* 737–749

### General Relativity and Gravitation

Static charged spheres with anisotropic pressure in general relativity *J Krishna Rao, M Annapurna and M M Trivedi* 215–225

Collapse of a charged radiating star with shear *S D Maharaj and M Govender* 715–727

### Statistical Physics

Nonlinear wave propagation through a ferromagnet with damping in  $(2+1)$  dimensions *S G Bindu and V C Kuriakose* 275–285

On some problems of the maximum entropy ansatz *K Bandyopadhyay, K Bhattacharyya and A K Bhattacharya* 365–375

Dynamics of two coupled chaotic multimode Nd:YAG lasers with intracavity frequency doubling crystal *Thomas Kuruvilla and V M Nandakumaran* 393–402

Bubbling and bistability in two parameter discrete systems	<i>G Ambika and N V Sujatha</i>	751–761
<b>Particle Physics</b>		
$\Lambda_b \rightarrow \Lambda_c + a_1$ decay in the heavy quark effective theory	<i>R Mohanta and A K Giri</i>	227–234
Renormalization of seesaw neutrino masses in the standard model with two-Higgs doublets	<i>N Nimai Singh and S Biramani Singh</i>	235–246
Coupled dilaton and electromagnetic field in cylindrically symmetric space-time	<i>A Banerjee, S Chatterjee and Tanwi Ghosh</i>	337–345
Recent results from LEP	<i>A Gurtu</i>	455–470
Baryogenesis	<i>U A Yajnik</i>	471–485
Recent advances in lattice gauge theories	<i>R V Gavai</i>	487–497
Higgs and SUSY searches at future colliders	<i>Rohini M Godbole</i>	499–518
Large hadron collider physics program: Compact muon solenoid experiment	<i>J B Singh</i>	519–532
Review of recent results in deep inelastic scattering	<i>D Indumathi</i>	533–541
Understanding fields using strings: A review	<i>Sunil Mukhi</i>	543–559
Quark gluon plasma	<i>C P Singh</i>	561–572
Electromagnetic signals of quark gluon plasma	<i>Bikash Sinha</i>	573–587
Recent results from CERN SPS experiments and the future heavy ion programme	<i>Y P Vijoyi</i>	589–602
Three flavour oscillation interpretation of neutrino data	<i>S Uma Sankar</i>	603–609
The solar neutrino problem	<i>Harrison B Prosper</i>	611–622
Electroweak couplings of the $\tau$ lepton	<i>John Swain</i>	623–627
An overview of progress in string theory	<i>Jnanadeva Maharana</i>	629–638
Supersymmetric unification in the light of neutrino mass	<i>Charanjit S Aulakh</i>	639–659
Recent developments in high energy physics	<i>S N Ganguli</i>	661–678
Effect of anomalous $tbW$ vertex on decay-lepton distributions in $e^+e^- \rightarrow t\bar{t}$ and CP-violating asymmetries	<i>Saurabh D Rindani</i>	791–812

**Nuclear Physics**

- Neutrino mass and oscillation: An introductory review *D P Roy* 3–20
- Transmission of neutrinos through matter *L Wolfenstein* 21–25
- Solar neutrino problem in light of super-Kamiokande data *S Uma Sankar* 27–33
- Neutrino oscillations: Recent results and future directions  
*Amitava Raychaudhuri* 35–46
- Parametric resonance in neutrino oscillations in matter *E Kh Akhmedov* 47–63
- Neutrino anomalies without oscillations *Sandip Pakvasa* 65–77
- Determination of cosmological parameters: An introduction for non-specialists  
*Palash B Pal* 79–91
- Cosmic microwave background anisotropy constraints on relict neutrinos  
*Subhendra Mohanty* 93–100
- Models of neutrino masses and baryogenesis *Utpal Sarkar* 101–118
- Neutrino spectrum from theory and experiments *Anjan S Joshipura* 119–132
- Neutrino masses from SUSY: Different contributions and their implications  
*Sudhir K Vempati* 133–146
- Neutrino mass patterns,  $R$ -parity violating supersymmetry and associated phenomenology  
*Biswarup Mukhopadhyaya* 147–154
- Constraints on three flavor neutrino mixing *Mohan Narayan* 155–172
- Supernova constraints on neutrino mass and mixing *Srubabati Goswami* 173–184
- Variables for probing neutrino oscillation at super-Kamiokande and the Sudbury Neutrino Observatory  
*Debasish Majumdar* 185–201
- Introduction to a field-theoretical treatment of neutrino oscillations  
*P Stockinger* 203–214
- Skyrme–Hartree–Fock approach to the change of level occupancy of low mass halo nuclei  
*Rupayan Bhattacharya* 247–253
- Parity of the band head at 3710 keV in  $^{99}\text{Rh}$  using clover detector as Compton polarimeter  
*R Palit, H C Jain, P K Joshi, S Nagaraj, B V T Rao, S N Chintalapudi and S S Ghugre* 347–354
- Incomplete fusion reactions in  $^{16}\text{O}+^{165}\text{Ho}$   
*Anil Sharma, B Bindu Kumar, S Mukherjee, S Chakrabarty, B S Tomar, A Goswami, G K Gubbi, S B Manohar, A K Sinha and S K Datta* 355–363

Structure information from fusion barriers *S V S Sastry and S Santra* 813–826

### Atomic and Molecular Physics

Transition probabilities for two-photon H( $1s-2s$ ) and He( $1^1s-2^1s$ ) transitions: A partial-closure approach *Monika Bassi and K L Baluja* 377–384

Tunneling through a time-dependent barrier – a numerical study *Pranab Sarkar* 385–392

### Plasma Physics

Coherent structures in presence of dust charge fluctuations *M Kakati and K S Goswami* 771–776

### Lasers and Optics

Estimation of light transport parameters in biological media using coherent backscattering *S Anantha Ramakrishna and K Divakara Rao* 255–267

A comparison of the intensity contours of fringes due to multiple reflection and spatial hole burning in semiclassical theory of laser *Rita Moni Borah and G D Baruah* 269–274

Pump induced normal mode splittings in phase conjugation in a Kerr nonlinear waveguide *S Dutta Gupta* 403–411

Effect of polarization on population transfer in H<sub>2</sub> by stimulated Raman transition with partially overlapping laser pulses *Swaralipi Ghosh, Sanjay Sen, S S Bhattacharyya and Samir Saha* 827–843

### Condensed Matter Physics

Correlation between deformation bleaching and mechanoluminescence in coloured alkali halide crystals *B P Chandra, M Ramrakhiani, P Sahu and A M Rastogi* 287–303

Phonon frequency shift and effect of correlation on the electron–phonon interaction in heavy fermion systems *B Ojha, P Nayak and S N Behera* 305–315

Role of vanadium in Bi-2223 ceramics *D R Mishra, S V Sharma and R G Sharma* 317–330

Random matrix model for disordered conductors *Zafar Ahmed and Sudhir R Jain* 413–422

Bilayer exchange coupling and Neel temperature of YBa<sub>2</sub>Cu<sub>3</sub>O<sub>6.2</sub> *Govind, A Pratap, Ajay and R S Tripathi* 423–429

- Optical properties of 1T and 2H phases of TaS<sub>2</sub> and TaSe<sub>2</sub>  
*Sangeeta Sharma, S Auluck and M A Khan* 431–440
- Impact of electron irradiation on particle track etching response in polyallyl diglycol carbonate (PADC)  
*R Mishra, S P Tripathy, A Kulshrestha, A Srivastava, S Ghosh, K K Dwivedi, D T Khathing, M Müller and D Fink* 777–784
- Possible lattice formation of new materials within a piezoelectric semiconductor plasma  
*M Salimullah, S Ghosh and M R Amin* 785–789
- Computer simulation of proton channelling in silicon  
*N K Deepak, K Rajasekharan and K Neelakandan* 845–856
- Supercooling across first-order phase transitions in vortex matter  
*P Chaddah and S B Roy* 879–888
- Multifractal behaviour of *n*-simplex lattice  
*Sanjay Kumar, D Giri and Sujata Krishna* 857–862
- On Mossbauer dynamics in Nb<sub>3</sub>Sn  
*Ashok Razdan* 863–870
- Growth morphology of zinc tris(thiourea) sulphate crystals  
*Sunil Verma, M K Singh, V K Wadhawan and C H Suresh* 871–878
- Instrumentation**
- Unstable plasma characteristics in mirror field electron cyclotron resonance microwave ion source  
*S K Angra, Parshant Kumar, R R Dongaonkar and R P Bajpai* 763–769
- Brief Reports**
- On Hamiltonian formulation of cosmologies  
*K D Krori and S Dutta* 441–445
- Absorption characteristics of bacteriorhodopsin molecules  
*H K T Kumar and K Appaji Gowda* 447–542
