

Indexes to Volume 55

SUBJECT INDEX

Rapid Communication

- High spin states in ^{63}Cu
B Mukherjee, S Muralithar, R P Singh, R Kumar, K Rani, L471–L478
S C Pancholi and R K Bhowmik

Particle Physics

- Results from atmospheric neutrinos *J G Learned* 3–18
- Phenomenology of neutrino oscillations *G Rajasekaran* 19–32
- Status of electroweak phase transition and baryogenesis *J M Cline* 33–42
- The case for the cosmological constant *Varun Sahni* 43–52
- Formation of disoriented chiral condensates in relativistic heavy-ion collisions *Ajit M Srivastava* 53–62
- Latest results from HERA *Beate Heinemann* 63–72
- What's new at small x ? *Raju Venugopalan* 73–84
- Quantum chromodynamics studies at LEP2 *Sunanda Banerjee* 85–100
- Higher order corrections in perturbative quantum chromodynamics
W L van Neerven 101–112
- Two problems in thermal field theory *François Gelis* 113–124
- Quark-gluon plasma: Status of heavy ion physics *R V Gavai* 125–136
- Supersymmetric unification at the millennium *Charanjit S Aulakh* 137–150
- Perspectives of SM Higgs measurements at the LHC *Michael Dittmar* 151–160
- Non-minimal and non-universal supersymmetry *S F King* 161–170
- Large compact dimensions and high energy experiments
Sreerup Raychaudhuri 171–182
- The status of supersymmetry phenomenology *Amitava Datta* 183–194
- Experimental status of B physics *H Yamamoto* 195–206

CP violation: the past, the present and the future	<i>A I Sanda</i>	207–218
New physics with beauty	<i>Rahul Sinha</i>	219–228
How neutrinos get mass and what other things may happen besides oscillations?	<i>Ernest Ma</i>	229–234
Constraints on m_s and ε'/ε from lattice quantum chromodynamics	<i>Apoorva Patel</i>	235–240
Light front quantum chromodynamics: Towards phenomenology	<i>A Harindranath</i>	241–246
Analysis of two recent tests of T -invariance	<i>P K Kabir</i>	247–252
Infra-red fixed points in supersymmetry	<i>B Ananthanarayan</i>	253–258
Measuring the chargino parameters	<i>J Kalinowski</i>	259–264
New physics effects from B meson decays	<i>Anirban Kundu</i>	265–270
Some aspects of R -parity violating supersymmetry	<i>Sourov Roy</i>	271–276
Neutrino masses and mixing in supersymmetric theories	<i>Sudhir K Vempati</i>	277–282
B_c meson properties and its leptonic radiative decays	<i>Chao-Hsi Chang (Zhao-Xi Zhang)</i>	283–288
High scale parity invariance as a solution to the SUSY CP problem and an explanation of small $\varepsilon'/\varepsilon^*$	<i>R N Mohapatra</i>	289–296
Ultra high energy cosmic rays above 10^{11} GeV: Hints to new physics beyond Standard Model	<i>Pijushpani Bhattacharjee</i>	297–306
Beyond the Standard Model: Working group report	<i>Gautam Bhattacharyya and Amitava Raychaudhuri</i>	307–314
Neutrino and astroparticle physics: Working group report	<i>S Mohanty and U A Yajnik</i>	315–326
Quantum chromodynamics: Working group report	<i>Sourendu Gupta and D Indumathi</i>	327–334
B and collider physics: Working group report	<i>Debajyoti Choudhury and Rahul Sinha</i>	335–346
Discussion on a possible neutrino detector located in India	<i>M V N Murthy and Urjit A Yajnik</i>	347–356

Relativity, Gravitation and Cosmology

- Rotating cylindrically symmetric Kaluza-Klein fluid model
Ramesh Tikekar and L K Patel 361–368
- Non-static local string in Brans–Dicke theory *A A Sen* 369–374
- Black holes under external influence *Jiří Bičák* 481–496
- Black hole critical phenomena without black holes *Steven L Liebling* 497–510
- Quantum aspects of black hole entropy *Parthasarathi Majumdar* 511–528
- Gravitational collapse: The story so far *Pankaj S Joshi* 529–544
- Searching for gravitational waves from rotating neutron stars
S V Dhurandhar 545–558
- Living with lambda *Varun Sahni* 559–574
- Cosmological magnetic fields *Roy Maartens* 575–584
- Workshop I – Black holes and compact objects: Classical aspects
B S Ramachandra and C V Vishveshwara 585–590
- Workshop II – Black holes and compact objects: Quantum aspects
Parthasarathi Majumdar 591–598
- Workshop III – Cosmology: Observations versus theories *T R Seshadri* 599–602
- Workshop IV – Cosmology-theoretical models/alternative scenarios: A report
Asit Banerjee and Reza Tavakol 603–608
- Singularity free non-rotating cosmological solutions for perfect fluids with
 $p = k\rho$ *A K Raychaudhuri* 609–616
- Density contrast indicators in cosmological dust models
Filipe C Mena and Reza Tavakol 617–622
- On spherically symmetric singularity-free models in relativistic cosmology
Ramesh Tikekar 623–628
- The lighter side of gravity (How Swami Gurutvananda received enlightenment?)
Jayant V Narlikar 629–636
- Nuclear Physics**
- Exotic decay in Ba isotopes via ^{12}C emission
K P Santhosh and Antony Joseph 375–382

Quantum Chemistry

Variable operator technique and the min-max theorem *Sambhu Nath Datta* 383–392

Fluid Dynamics

Comparison between Weber's electrodynamics and classical electrody-
namics *A K T Assis and H Torres Silva* 393–404

Lasers, Optics and Spectroscopy

Third harmonic generation of CO₂ laser radiation in AgGaSe₂ crystal
*Gopal C Bhar, Pathik Kumbhakar, D V Satyanarayana,
N S N Banerjee, U Nundy and C G Chao* 405–412

Generation of ultraviolet radiation with wide angular tolerance in cesium
lithium borate crystal
Gopal C Bhar, Pathik Kumbhakar and Anil K Chaudhary 413–422

Dynamics of self-focusing and self-phase modulation of elliptic Gaussian
laser beam in a Kerr-medium
Tarsem Singh, Nareshpal Singh Saini and Shyam Sunder Kaul 423–432

Plasma Physics

Space and astrophysical plasmas: Pervasive problems *Chanchal Uberoi* 645–654

High energy universe – Satellite missions *Vinod Krishan* 655–664

Sun–Earth connection: Boundary layer waves and auroras
G S Lakhina, B T Tsurutani, J K Arballo and C Galvan 665–684

Matched filtering-parameter estimation method and analysis of whistlers
recorded at Varanasi *R P Singh, R P Patel, Ashok K Singh,
D Hamar and J Lichtenberger* 685–692

Dromion solutions for an electron acoustic wave and its application to space
observations *S S Ghosh, A Sen and G S Lakhina* 693–698

Ionospheric plasma by VHF waves
R P Patel, Abhay Kumar Singh and R P Singh 699–706

Observation of floating potential asymmetry in the edge plasma of the SINP
tokamak *Krishnendu Bhattacharyya and N R Ray* 707–712

Measurement of temperature fluctuations and anomalous transport in the
SINP tokamak *R Kumar and S K Saha* 713–718

- Runaway electrons in the SINP tokamak
Ramesh Narayanan, A N Sekar Iyengar and R Pal 719–726
- Mirnov coil data analysis for tokamak ADITYA
D Raju, R Jha, P K Kaw, S K Mattoo, Y C Saxena and Aditya Team 727–732
- Electron temperature (T_e) measurement by Thomson scattering system
*R Rajesh, B Ramesh Kumar, S K Varshney, Manoj Kumar,
 Chhaya Chavda, Aruna Thakkar, N C Patel,
 Ajai Kumar and Aditya Team* 733–740
- Plasma position control in SST1 tokamak
I Bandyopadhyay and S P Deshpande 741–750
- Internal magnetic field measurement in tokamak plasmas using a Zeeman polarimeter
M Jagadeeshwari and J Govindarajan 751–756
- Lie optics, geometrical phase and nonlinear dynamics of self-focusing and soliton evolution in a plasma
*D Subbarao, R Uma, H Singh,
 Kamal Goyal, Sanjeev Goyal and Ravinder Kumar* 757–771
- Density oscillations in laser produced plasma decelerated by external magnetic field
V N Rai, M Shukla and H C Pant 773–779
- Multiple charge states of titanium ions in laser produced plasma
M Shukla, S Bandyopadhyay, V N Rai, A V Kilpio and H C Pant 781–788
- Volume effect of laser produced plasma on X-ray emissions
*V K Senecha, Y B S R Prasad, M P Kamath, A S Joshi, G S Solanki,
 A P Kulkarni, S Gupta, R Pareek and H C Pant* 789–796
- Scaling of x-ray emission and ion velocity in laser produced Cu plasmas
*Y B S R Prasad, V K Senecha, H C Pant, M P Kamath, G S Solanki,
 P K Tripathi, A P Kulkarni, S Gupta, R Pareek, A S Joshi,
 N Sreedhar, Sameer Nigam and C P Navathe* 797–802
- Effect of rippled laser beam on excitation of ion acoustic wave
Nareshpal Singh Saini and Tarsem Singh Gill 803–812
- Lie-optic matrix algorithm for computer simulation of paraxial self-focusing in a plasma
*D Subbarao, R Uma, Kamal Goyal, Sanjeev Goyal and
 Karuna Batra* 813–822
- Plasma dynamics from laser ablated solid lithium *Debarati Bhattacharya* 823–834

- Crystal and molecular structure of N-(*p*-nitrobenzylidene)-3-chloro-4-fluoro-aniline
K V Arjuna Gowda, M K Kokila, Puttaraja, M V Kulkarni and N C Shivaprakash 441–446
- Electron impact single ionization of copper *L K Jha, O P Roy and B N Roy* 447–454
- Annealing effect on transport properties of Nd_{0.67}Sr_{0.33}MnO₃ thin films
M Pattabiraman, P Murugaraj, G Rangarajan, V Prasad, S V Subramanyam, V S Sastry, Sang-Mo Koo and K V Rao 455–470
