

Pramana – journal of physics

CONTENTS – VOLUME 67

(July–December 2006)

Number 1, July

Preface

Organic- and molecule-based magnets	<i>Joel S Miller</i>	1
Electronic properties of organic monolayers and molecular devices	<i>D Vuillaume, S Lenfant, D Guerin, C Delerue, C Petit and G Salace</i>	17
Order and chaos in soft condensed matter	<i>A K Sood and Rajesh Ganapathy</i>	33
Combined neutron and synchrotron studies of magnetic films	<i>Sunil K Sinha, S Roy, M R Fitzsimmons, S Park, M Dorn, O Petravic, I V Roshchin, Zhi-Pan Li, X Battle, R Morales, A Misra, X Zhang, K Chesnel, J B Kortright and Ivan K Schuller</i>	47
Proximity effect of electron beam lithography on single-electron transistors ...	<i>Shu-Fen Hu, Kuo-Dong Huang, Yue-Min Wan and Chin-Lung Sung</i>	57
Electro-optical characterization and analysis of CuPc-based solar cells with high photovoltage	<i>V P Singh, R S Singh and A M Hermann</i>	67
What is novel in quantum transport for mesoscopics?	<i>Mukunda P Das and Frederick Green</i>	73
Synthesis and magnetic properties of multilayer Ni/Cu and NiFe/Cu nanowires	<i>R S Liu, S C Chang, I Baginskiy, S F Hu and C Y Huang</i>	85
Current nanoscience and nanoengineering at the Center for Nanoscale Science and Engineering	<i>A M Hermann, R S Singh and V P Singh</i>	93
Bose–Einstein condensation: Where many become one and, therefore, there is plenty of room at the bottom	<i>N Kumar</i>	101
Studies on magnetic-field-induced first-order transitions	<i>P Chaddah</i>	113
Langmuir Blodgett multilayers and related nanostructures	<i>S S Major, S S Talwar and R S Srinivasa</i>	121
BF ₃ -doped polyaniline: A novel conducting polymer	<i>Debangshu Chaudhuri and D D Sarma</i>	135
Some recent investigations of materials under high pressures	<i>Surinder M Sharma</i>	141
Metal–insulator transition in Ni-doped Na _{0.75} CoO ₂ : Insights from infrared studies	<i>M Premila, A Bharathi, N Gayathri, P Yasodha, Y Hariharan and C S Sundar</i>	153
Recent neutron scattering research and development in India	<i>S L Chaplot</i>	163

Strain-induced modification of magnetic structure and new magnetic phases in rare-earth epitaxial films	<i>C Dufour, K Dumesnil and Ph Mangin</i>	173
Novel optical probe for quantum Hall system	<i>Biswajit Karmakar and Brij Mohan Arora</i>	191
Ballistic transport in semiconductor nanostructures: From quasi-classical oscillations to novel THz-emitters	<i>G H Döhler, M Eckardt, A Schwanhäußler, F Renner, S Malzer, S Trumm, M Betz, F Sotier, A Leitenstorfer, G Loata, T Löffler, H Roskos, T Müller, K Unterrainer, D Driscoll, M Hanson and A C Gossard</i>	199
Two-dimensional magnetic ordering in a multilayer structure	<i>M K Mukhopadhyay and M K Sanyal</i>	207
List of Invited Speakers		225

Number 2, August

Research Articles

Magnetized cosmological models in bimetric theory of gravitation	<i>S D Katore and R S Rane</i>	227
Møller's energy in the dyadosphere of a charged black hole	<i>Oktay Aydogdu and Mustafa Salti</i>	239
On the exact solutions of nonlinear diffusion-reaction equations with quadratic and cubic nonlinearities	<i>R S Kaushal, Ranjit Kumar and Awadhesh Prasad</i>	249
Elliptic flow in a hadron-string cascade model at 130 GeV energy	<i>P K Sahu, A Ohnishi, M Isse, N Otuka and S C Phatak</i>	257
Determination of thorium and uranium contents in soil samples using SSNTD's passive method	<i>T A Salama, U Seddik, T M Dsoky, A Ahmed Morsy and R El-Asser</i>	269
A comparative performance evaluation of micro-Raman spectrograph using holographic notch filter and dielectric filter	<i>R P Shukla, Sanjiva Kumar, A K Sinha, Manika Mallick, S Thakur and N K Sahoo</i>	277
Self-assembled fluids with order-parameter-dependent mobility: The large- N limit	<i>N P Rapapa and N B Maliehe</i>	291
Chaotic-to-ordered state transition of cathode-sheath instabilities in DC glow discharge plasmas	<i>Md Nurujjaman and A N Sekar Iyengar</i>	299
Phonon and thermal properties of achiral single wall carbon nanotubes	<i>Prapti Saxena and Sankar P Sanyal</i>	305
Thermodynamic and surface properties of Sb–Sn and In–Sn liquid alloys ...	<i>B C Anusionwu</i>	319
Electronic conductivity of mechanochemically synthesized nanocrystalline $\text{Ag}_{1-x}\text{Cu}_x\text{I}$ system using DC polarization technique	<i>D Bharathi Mohan and C S Sunandana</i>	331

Mechanical and magnetic properties of nanostructured CoNiP films	341
..... <i>R N Emerson, C Joseph Kennady and S Ganesan</i>	
Brief Reports	
Effect of various periodic forces on Duffing oscillator	351
..... <i>V Ravichandran, V Chinnathambi and S Rajasekar</i>	
On the integral representations of the Jost function and Coulomb off-shell Jost solution	357
..... <i>U Laha</i>	
Beta decay rates for nuclei with $115 < A < 140$ for r-process nucleosynthesis	363
..... <i>Kamales Kar, Soumya Chakravarti and V R Manfredi</i>	
Proton and alpha evaporation spectra in low energy ^{12}C and ^{16}O induced reactions	369
..... <i>E T Mirgule, D R Chakrabarty, V M Datar, Suresh Kumar, A Mitra and H H Oza</i>	
Chain length effect on dynamical structure of poly(vinyl pyrrolidone)–polar solvent mixtures in dilute solution of dioxane studied by microwave dielectric relaxation measurement	375
..... <i>R J Sengwa and Sonu Sankhla</i>	
Study of fiber optic sugar sensor	383
..... <i>A Jayanth Kumar, N M Gowri, R Venkateswara Raju, G Nirmala, B S Bellubbi and T Radha Krishna</i>	
Isotopic effects on non-linearity, molecular radius and intermolecular free length	389
..... <i>Ranjan Dey, Arvind K Singh, N K Soni, B S Bisht and J D Pandey</i>	
Metallic/semiconducting ratio of carbon nanotubes in a bundle prepared using CVD technique	395
..... <i>Khurshed Ahmad Shah, S S Islam, H S Mavi, A K Shukla and Harsh</i>	

Number 3, September

Research Articles

Resonance-like tunneling across a barrier with adjacent wells	401
..... <i>S Mahadevan, P Prema, S K Agarwalla, B Sahu and C S Shastry</i>	
Bianchi Type-V model with a perfect fluid and Λ -term	415
..... <i>T Singh and R Chaubey</i>	
Breathers in ferrimagnetic systems	429
..... <i>Tarashankar Nag, Swapan Kumar Das and Ajoy Chowdhury</i>	
Experimental observation of direct current voltage-induced phase synchronization	441
..... <i>Haihong Li, Weiqing Liu, Qiongling Dai and Jinghua Xiao</i>	
On exact solutions of the Bogoyavlenskii equation	449
..... <i>Yan-ze Peng and Ming Shen</i>	
Fourier transformation methods in the field of gamma spectrometry	457
..... <i>A Abdel-Hafiez</i>	

Projected shell model study of neutron-deficient ^{122}Ce	467
..... <i>Rani Devi, B D Sehgal and S K Khosa</i>	
Experimental study of the dependence of beam current on injection magnetic field in 6.4 GHz ECR ion source	477
..... <i>G S Taki, P R Sarma, D K Chakraborty, R K Bhandari and P K Ray</i>	
Quantum chemical study of mechanisms of dissociation and isomerization reactions in some molecules and radicals of astrophysical significance: Cyanides and related molecules	487
..... <i>V P Gupta and Archana Sharma</i>	
Simulated mixed absorbers and effective atomic numbers for γ attenuation	501
..... <i>K Karunakaran Nair, N Ramachandran, K K Abdullah and K M Varier</i>	
Photon interaction studies using ^{241}Am γ -rays	507
..... <i>N Ramachandran, K Karunakaran Nair, K K Abdullah and K M Varier</i>	
Laser-induced breakdown spectra of Zn_2 molecule in the violet region	519
..... <i>Subhash C Singh, K S Ojha and R Gopal</i>	
Brief Reports	
Direct determination of bulk etching rate for LR-115-II solid state nuclear track detectors ...	529
..... <i>T A Salama, U Seddik, T M Hegazy and A Ahmed Morsy</i>	
Generalized Grüneisen parameters and low temperature limit of lattice thermal expansion of cadmium and zirconium	535
..... <i>S Sindhu and C S Menon</i>	
A model for the pressure dependence of diffusion in condensed matter	541
..... <i>Kamal Kapoor, Rashmi Kumari, Narsingh Dass and Rajendra Kumar</i>	
Dielectric properties of KDP-type ferroelectric crystals in the presence of external electric field	547
..... <i>Trilok Chandra Upadhyay, Ramendra Singh Bhandari and Birendra Singh Semwal</i>	
Comment	
Electron impact excitation collision strengths for neon-like Ni XIX calculated using the relativistic R -matrix method	C553
..... <i>K M Aggarwal and F P Keenan</i>	

Number 4, October

Proceedings of the DAE–BRNS Ninth Workshop on High Energy Physics Phenomenology (WHEPP-9) – Part-I

Preface	559
2006: Particle Physics in the Standard Model and beyond ...	561
..... <i>Guido Altarelli</i>	
Working Group 1: Collider Physics	
Physics prospects at a linear e^+e^- collider	579
..... <i>Saurabh D Rindani</i>	
LHC/ILC/cosmology interplay	597
..... <i>Sabine Kraml</i>	

Physics of extra dimensions at colliders	<i>K Sridhar</i>	607
Working group report: Collider Physics	<i>Sunanda Banerjee, Rohini M Godbole and Sreerup Raychaudhuri</i>	617
Working Group 2: Neutrino and Astroparticle Physics		
Results from solar, atmospheric and K2K experiments and future possibilities with T2K	<i>Takaaki Kajita</i>	639
Physics possibilities at India-based Neutrino Observatory	<i>S Uma Sankar</i>	655
Neutrinos as a probe of CP-violation and leptogenesis	<i>Silvia Pascoli</i>	665
Neutrino astronomy: Present and future	<i>Thomas McCauley</i>	681
New ideas in neutrino detection	<i>M R Vagins</i>	691
Cosmology with cosmic microwave background anisotropy	<i>Tarun Souradeep</i>	699
Is dark matter visible by galactic gamma rays?	<i>W de Boer</i>	711
Leptogenesis models and neutrino mass constraints	<i>T Hambye</i>	723
Working group report: Astroparticle and neutrino physics	<i>Raj Gandhi, Subhendra Mohanty and Tarun Souradeep</i>	735
List of Participants		743

Number 5, November

Proceedings of the DAE–BRNS Ninth Workshop on High Energy Physics Phenomenology (WHEPP-9) – Part-II

Preface

Working Group 3: Flavor Physics and Model Building

Super B Factories	<i>D G Hitlin</i>	743
Puzzles in B physics	<i>Hsiang-nan Li</i>	755
CP-violations in B decays	<i>Y Sakai</i>	763
New physics hints in B decays and collider outlook	<i>George W S Hou</i>	773
Observable $N-\bar{N}$ oscillation, high-scale see-saw and origin of matter	<i>R N Mohapatra</i>	783
Split supersymmetry in brane models	<i>Ignatios Antoniadis</i>	793
Lepton family symmetries for neutrino masses and mixing	<i>Ernest Ma</i>	803
Little Higgs models and T parity	<i>Maxim Perelstein</i>	813
Beyond the New Standard Model in neutrino oscillations	<i>M Zralek</i>	821
CP violation in supersymmetry, Higgs sector and the large hadron collider	<i>Rohini M Godbole</i>	835

Working group report: Flavor physics and model building	849
..... <i>M K Parida and Nita Sinha</i>	
Working Group 4: Quantum Chromodynamics and Quark Gluon Plasma	
Quantum chromodynamics at hadron colliders	861
..... <i>Vittorio Del Duca</i>	
Standard and SUSY Higgs production at the LHC	875
..... <i>Robert Harlander</i>	
Present status of lattice QCD at nonzero T and μ	885
..... <i>Rajiv V Gai</i>	
Nucleus–nucleus collisions at RHIC: A review	899
..... <i>Jean-Yves Ollitrault</i>	
Status of the quark gluon plasma search	915
..... <i>Terry C Awes</i>	
Results from STAR experiment at RHIC	927
..... <i>Bedangadas Mohanty</i>	
Surface structure of quark stars with magnetic fields ...	937
..... <i>Prashanth Jaikumar</i>	
The main injector particle production experiment at Fermilab	951
..... <i>Rajendran Raja</i>	
Working group report: Heavy-ion physics and quark-gluon plasma	961
..... <i>Munshi G Mustafa and Sudhir Raniwala</i>	
Working group report: Quantum chromodynamics	983
..... <i>V Ravindran</i>	
List of Participants	993

Number 6, December

Research Articles

Construction of exact complex dynamical invariant of a two-dimensional classical system	999
..... <i>Fakir Chand and S C Mishra</i>	
Exact solutions to a class of nonlinear Schrödinger-type equations	1011
..... <i>Jin-Liang Zhang and Ming-Liang Wang</i>	
Spectral inverse problem for q -deformed harmonic oscillator	1023
..... <i>P K Bera and J Datta</i>	
Cosmic no-hair conjecture in scalar–tensor theories	1037
..... <i>T Singh and R Chaubey</i>	
Dirac constraint analysis and symplectic structure of anti-self-dual Yang–Mills equations	1043
..... <i>U Camci, Z Can, Y Nutku, Y Sucu and D Yazici</i>	
Does the classically chaotic Henon–Heiles oscillator exhibit quantum chaos under intense laser fields?.....	1055
..... <i>Neetu Gupta and B M Deb</i>	
Hierarchy of rational order families of chaotic maps with an invariant measure	1073
..... <i>M A Jafarizadeh, M Foroutan and S Ahadpour</i>	
Measurement of storage time, estimation of ion number and study of absorption line profile in a Paul trap	1087
..... <i>Soumen Bhattacharyya, Anita Gupta, S G Nakhate and Pushpa M Rao</i>	

Control of amplification without inversion in H ₂ and LiH molecules: Dependence on relative magnitude of probe and coherent field Rabi frequencies in three-level Λ system	<i>Sulagna Dutta and Krishna Rai Dastidar</i>	1099
Pulsed pump: Thermal effects in solid state lasers under super-Gaussian pulses	<i>H Nadgaran and M Sabaian</i>	1119
Mode-to-mode energy transfers in convective patterns	<i>Mahendra K Verma, Krishna Kumar and Bhaskar Kamble</i>	1129
Vapour-liquid equilibria of the two- and three-dimensional monoatomic classical fluids interacting via double Yukawa potential	<i>Y Pathania and P K Ahluwalia</i>	1141
Photonic band gap engineering in 2D photonic crystals	<i>Yogita Kalra and R K Sinha</i>	1155
Modelling of the magnetic and magnetostrictive properties of high permeability Mn-Zn ferrites	<i>R Szweczyk</i>	1165
Subject Index of Volume 67		1173
