## Indexes to Volume 70

### SUBJECT INDEX

### Quantum Mechanics
- Evaluation of eigenvalues of a smooth potential via Schroedinger transmission across multi-step potential
  - Basudeb Sahu, Bidhubhusan Sahu and Santosh K Agarwalla
  - Pages 27–39
- Spectral properties of supersymmetric shape invariant potentials
  - Barnali Chakrabarti
  - Pages 41–50
- Quantum mechanics of rapidly and periodically driven systems
  - Malay Bandyopadhyay and Sushanta Dattaagpta
  - Pages 381–398
- Berry phases in the three-level atoms driven by quantized light fields
  - Mai-Lin Liang, Zong-Cheng Xu and Bing Yuan
  - Pages 399–407
- An approach to one-dimensional elliptic quasi-exactly solvable models
  - M A Fasihi, M A Jafarizadeh and M Rezaei
  - Pages 575–585

### General Relativity and Gravitation
- Problems with tunneling of thin shells from black holes
  - Borun D Chowdhury
  - Pages 3–26
- Remarks on Hawking radiation as tunneling from a uniformly accelerating black hole
  - Xiao-Xiong Zeng, Jian-Song Hou and Shu-Zheng Yang
  - Pages 409–415
- K-causal structure of space-time in general relativity
  - Sujatha Janardhan and R V Saraykar
  - Pages 587–601

### Statistical Physics
- Generalized $N$-coupled maps with invariant measure in Bose–Mesner algebra perspective
  - M A Jafarizadeh, S Behnia, E Faizi and S Ahadpour
  - Pages 417–438

### Non-linear Dynamics
- On some exact solutions of slightly variant forms of Yang’s equations and their graphical representations
  - Rupesh Kumar Saha and Pranab Krishna Chanda
  - Pages 763–777
- Some comments on nonlinear dynamics
  - K R Sreenivasan
  - Pages 959–963
- Visual explorations of dynamics: The standard map
  - J D Meiss
  - Pages 965–988
- Numerical simulations in granular matter: The discharge of a 2D silo
  - Gabriel Pérez
  - Pages 989–1007
- Understanding the sub-critical transition to turbulence in wall flows
  - Paul Manneville
  - Pages 1009–1021
- Intrinsic localized modes and nonlinear impurity modes in curved Fermi–Pasta–Ulam chain
  - Ranja Sarkar and Bishwajyoti Dey
  - Pages 1023–1029

1203
Crisis and unstable dimension variability in the bailout embedding map
N Nirmal Thyagu and Neelima Gupte 1031–1037

Recurrences of strange attractors
E J Ngamga, A Nandi, R Ramaswamy, M C Romano, M Thiel and J Kurths 1039–1045

Assessing the quality of stochastic oscillations
Guillermo Abramson and Sebastián Risau-Gusman 1047–1053

Probabilistic signatures of spatiotemporal intermittency in the coupled sine circle map lattice
Zahera Jabeen and Neelima Gupte 1055–1061

Synchronization and information transmission in spatio-temporal networks of deformable units
F M Moukam Kakmeni and M S Baptista 1063–1076

The dynamical origin of physiological instructions used in birdsong production
Ezequiel M Arneodo, Leandro M Alonso, Jorge A Alliende and Gabriel B Mindlin 1077–1085

Complex brain networks: From topological communities to clustered dynamics
Lucia Zemanová, Gorka Zamora-López, Changsong Zhou and Jürgen Kurths 1087–1097

Robust dynamical effects in traffic and chaotic maps on trees
Bosiljka Tadić and Zoran Levnajić 1099–1108

Message transfer in a communication network
Satyam Mukherjee and Neelima Gupte 1109–1116

Dynamics of delayed-coupled chaotic logistic maps: Influence of network topology, connectivity and delay times
Arturo C Martí, Marcelo Ponce and Cristina Masoller 1117–1125

Asynchronous updating of threshold coupled chaotic neurons
Manish Dev Shrimali, Sudeshna Sinha and Kazuyuki Aihara 1127–1134

Most probable degree distribution at fixed structural entropy
Ginestra Bianconi 1135–1142

Analytical calculation of the transition to complete phase synchronization in coupled oscillators
P Muruganandan, F F Ferreira, H F El-Nashar and H A Cerdeira 1143–1151

Emergent organization of oscillator clusters in coupled self-regulatory chaotic maps
Hiroyasu Ando, Sudeshna Sinha and Kazuyuki Aihara 1153–1164

Synchronization of coupled stochastic oscillators: The effect of topology
Amitabha Nandi and Ram Ramaswamy 1165–1174

Synchronization of oscillators in complex networks
Louis M Pecora 1175–1198

Thermodynamics

Parametric optimum analysis of an irreversible Ericsson cryogenic refrigeration cycle working with an ideal Fermi gas
Bihong Lin, Yingru Zhao and Jincan Chen 779–795
Subject Index

Particle Physics

The effect of instanton-induced interaction on P-wave meson spectra in constituent quark model
Bhavyashri, S Sarangi, Godfrey Saldanha and K B Vijaya Kumar
75–85

The dynamical mixing of light and pseudoscalar fields
Sudeep Das, Pankaj Jain, John P Ralston and Rajib Saha
439–456

Effects of charged Higgs bosons in the deep inelastic process $\nu\tau N \rightarrow \tau^- X$ and the possibility of detecting tau-neutrinos at cosmic neutrino detectors
M I Pedraza-Morales, A Rosado and H Salazar
603–615

Heavy flavor baryons in hypercentral model
Bhavin Patel, Ajay Kumar Rai and P C Vinodkumar
797–804

Nuclear Physics

Fission decay properties of ultra neutron-rich uranium isotopes
L Satpathy, S K Patra and R K Choudhury
87–99

Proton radioactivity with analytically solvable potential
I Mehrotra and S Prakash
101–111

$\pi^-\,^{12}\,C$ elastic scattering above the $\Delta$ resonance using diffraction model
M R Arafah
113–120

Cold valleys in the radioactive decay of $^{248\sim254}\,Cf$ isotopes
R K Biju, Sabina Sahadevan, K P Santhosh and Antony Joseph
617–632

Low-spin states of odd-mass xenon isotopes
Harun R Yazar
805–815

Microscopic insight in the study of yrast bands in selenium isotopes
Parvaiz Ahmad Dar, Sonia Verma, Rani Devi and S K Khosa
817–833

A perturbed angular correlation spectrometer for material science studies
C C Dey
835–846

Resonance states in $^{16}\,O+^{16}\,O$, $^{12}\,C+^{16}\,O$, $\alpha+^{16}\,O$ and $\alpha+^{12}\,C$ with modified Morse potentials
B Sahu and L Satpathy
847–862

Dependence of NaI(Tl) detector intrinsic efficiency on source–detector distance, energy and off-axis distance: Their implications for radioactivity measurements
F O Ogundare, E O Oniya and F A Balogun
863–874

Dissociation of deuteron, $^6\,He$ and $^{11}\,Be$ from Coulomb dissociation reaction cross-section
Ranendra Nath Majumdar
949–953

Atomic and Molecular Physics

Energy and intensity distributions of 279 keV multiply scattered photons in bronze – an inverse response matrix approach
Manspreet Singh, Bhajan Singh and B S Sandhu
61–73

Numerical calculations of potential distribution in non-ideal quadrupole trap and simulations of anharmonic oscillations
Anita Gupta and Pushpa M Rao
457–470
Determination of experimental K-shell fluorescence yield for potassium and calcium compounds

E Tiraçoğlu and Ö Söğüt

Laser Raman and infra-red spectra of biomolecule: 5-aminouracil

J S Singh

Attenuation studies near K-absorption edges using Compton scattered $^{241}$Am gamma rays

K K Abdullah, N Ramachandran, Karunakaran Nair, B R S Baba, Antony Joseph, Rajive Thomas and K M Varier

Kα X-ray satellite spectra of Ti, V, Cr and Mn induced by photons

Formation of H-atom in 2s excited state of proton-lithium and proton-sodium scattering

Y N Tiwari

**Laser and Optics**

Comparative study of different Schlieren diffracting elements

Raj Kumar, Sushil K Kaura, D P Chhachhia, D Mohan and A K Aggarwal

Dual beam encoded extended fractional Fourier transform security hologram with in-built repositioning

Amit K Sharma, D P Chhachhia, C G Mahajan and A K Aggarwal

Effect of field quantization on Rabi oscillation of equidistant cascade four-level system

Mihir Ranjan Nath, Tushar Kanti Dey, Surajit Sen and Gautam Gangopadhyay

Modeling of the fringe shift in multiple beam interference for glass fibers

A M Hamed

The analytical investigation of temperature distribution in off-central diode-pumped lasers

P Elahi, A Taghavi and A Gharavi

Scattering of light by a periodic structure in the presence of randomness VII: Application of statistical detection test

V C Vani and S Chatterjee

Solutions of two-mode Jaynes–Cummings models

Sudha Singh and Ashalata Sinha

**Classical Mechanics**

Symmetries and conservation laws of the damped harmonic oscillator

Amitava Choudhuri, Subrata Ghosh and B Talukdar

**Fluid Dynamics**

Importance of packing in spiral defect chaos

Kapilanan Krishan

Variability of permeability with diameter of conduit

J A Adegoke and J A Olowofela
### Plasma Physics

Electron cyclotron resonance breakdown studies in a linear plasma system
*Vipin K Yadav, K Sathyarayana and D Bora*
487–501

Characteristics of electron cyclotron resonance plasma formed by lower hybrid current drive grill antenna
*P K Sharma, S L Rao, K Mishra, R G Trivedi and D Bora*
503–516

Generation of whistler mode in a relativistic plasma
*N K Deka, B J Saikia and K S Goswami*
517–525

Effects of ion-fluid temperature on dust-ion-acoustic solitons
*Fatema Sayed and A A Mamun*
527–533

### Condensed Matter Physics

Modelling and design of complete photonic band gaps in two-dimensional photonic crystals
*Yogita Kalra and R K Sinha*
153–161

Anisotropic Hubbard model on a triangular lattice – spin dynamics in HoMnO$_3$
*Saptarshi Ghosh and Avinash Singh*
163–171

Structural and magnetic properties of zinc- and aluminum-substituted cobalt ferrite prepared by co-precipitation method
*S T Alone and K M Jadhav*
173–181

Tunable two-phase coexistence in half-doped manganites
*P Chaddah and A Banerjee*
193–199

Fluctuation theorems and orbital magnetism in nonequilibrium state
*A M Jayannavar and Mamata Sahoo*
201–210

Localization in disordered systems with interactions
*Angus MacKinnon*
211–220

Short-range order and its effect on the electronic structure of binary alloys: CuZn – a case study
*Abhijit Mookerjee, Kartick Tarafder, Atisdipankar Chakrabarti and Kamal Krishna Saha*
221–235

Direct angle resolved photoemission spectroscopy and superconductivity of strained high-$T_c$ films
*Davor Pavuna, Daniel Ariosa, Dominique Cloetta, Claudia Cancellieri and Mike Abrecht*
237–243

Bond constraint theory and the quest for the glass computer
*S C Agarwal, M A Paesler, D A Baker, P C Taylor, G Lucovsky and A Edwards*
245–254

Defects in semiconductor nanostructures
*Vijay A Singh, Manoj K Harbola and Praveen Pathak*
255–261

A first-principles study of phase transitions in ultrathin films of BaTiO$_3$
*J Paul, T Nishimatsu, Y Kawazoe and U V Waghmare*
263–270

Bound values for Hall conductivity of heterogeneous medium under quantum Hall effect conditions
*V E Arkhincheev*
271–277
A mean field approach to Coulomb blockade for a disordered assembly
of quantum dots  
Akashdeep Kamra, Praveen Pathak and Vijay A Singh  
279–284

Quasi-particle properties in a quasi-two-dimensional electron liquid  
R Asgari and B Tanatar  
285–293

Charge density of Ga_{x}Al_{1-x}Sb  
K B Joshi and Nishant N Patel  
295–305

Structural study of Novel (superhard) material: NiO  
Raja Chauhan and Sadhna Singh  
307–311

Re-dispersible Li^{+} and Eu^{3+} co-doped CdS nanoparticles: Luminescence studies  
N S Gajbhiye, Raghumani Singh Ningthoujam, Asar Ahmed, D K Panda, S S Umare and S J Sharma  
313–321

Compton profile study of V_{3}Ge and Cr_{3}Ge  
V Vyas, V Pareia, K B Joshi and B K Sharma  
323–337

Some unusual electronic patterns on graphite surface  
Shyam K Choudhary and Anjan K Gupta  
339–350

Transport and stability studies on high band gap a-Si:H films prepared by argon dilution  
Purabi Gogoi, P N Dixit and Pratima Agarwal  
351–358

Doping and bond length contributions to Mn K-edge shift in La_{1-x}Sr_{x}MnO_{3} (x = 0–0.7) and their correlation with electrical transport properties  
S K Pandey, R Bindu, Ashwani Kumar, S Khalid and A V Pimpale  
359–366

Observation of exchange bias and spin-glass-like ordering in ε-Fe_{2.8}Cr_{0.2}N nanoparticles  
N S Gajbhiye, Sayan Bhattacharyya and Sachil Sharma  
367–373

Gd-substituted Bi-2223 superconductor  
D R Mishra  
535–541

Dielectric relaxation of binary polar liquid mixture measured in benzene at 10 GHz frequency  
S Sahoo, K Dutta, S Acharyya and S K Sit  
543–552

Electron density distribution in Si and Ge using multipole, maximum entropy method and pair distribution function analysis  
R Saravanan, K S Syed Ali and S Israel  
679–696

Structural and electrical transport properties of nanosized La_{0.67}Ca_{0.33}MnO_{3} sample synthesized by a simple low-cost novel route  
S Keshri and V Dayal  
697–704

Theoretical studies of the spin-Hamiltonian parameters for the orthorhombic Pr^{4+} centers in Sr_{2}CeO_{4} crystals  
Wen-Lin Feng  
705–709

Superconducting gap anomaly in heavy fermion systems  
G C Rout, M S Ojha and S N Behera  
711–730

Analytical solutions for some defect problems in 1D hexagonal and 2D octagonal quasicrystals  
X Wang and E Pan  
911–933
Experimental Techniques and Instrumentation

Laser-induced breakdown spectroscopy: A versatile tool for monitoring traces in materials  
Shiwani Pandhija and A K Rai  
553–563

Speeds of sound and isothermal compressibility of ternary liquid systems: Application of Flory’s statistical theory and hard sphere models  
Vimla Vyas  
731–738

Microstrip microwave band gap structures  
V Subramanian  
739–746

Medical Physics

Thermal impact on spiking properties in Hodgkin–Huxley neuron with synaptic stimulus  
Shenbing Kuang, Jiafu Wang, Ting Zeng and Aiyin Cao  
183–190

Spectroscopic and antimicrobial studies of polystyrene films under air plasma and He–Ne laser treatment  
S M Pawde and Sanmesh S Parab  
935–948

Astrophysics

Probing pseudo-Dirac neutrino through detection of neutrino-induced muons from gamma ray burst neutrinos  
Debasish Majumdar  
51–60

Cosmology

Perfect fluid Bianchi Type-I cosmological models with time varying $G$ and $\Lambda$  
J P Singh and R K Tiwari  
565–574
