## SUBJECT INDEX

### Mathematical Methods in Physics

- Generalized Freud's equation and level densities with polynomial potential  
*Akshat Boobna and Saugata Ghosh* 189–202
- Bright and dark soliton solutions of the  $(3 + 1)$ -dimensional generalized Kadomtsev–Petviashvili equation and generalized Benjamin equation  
*Ahmet Bekir and Özkan Güner* 203–214
- Stability analysis of a class of fractional delay differential equations  
*Sachin B Bhalekar* 215–224
- Exact solutions of some nonlinear partial differential equations using functional variable method  
*A Nazarzadeh, M Eslami and M Mirzazadeh* 225–236
- Localized structures for  $(2 + 1)$ -dimensional Boiti–Leon–Pempinelli equation  
*Gui Mu, Zhengde Dai and Zhanhui Zhao* 367–376
- The functional variable method for finding exact solutions of some nonlinear time-fractional differential equations  
*Wenjun Liu and Kewang Chen* 377–384
- Numerical solution of the one-dimensional Burgers' equation: Implicit and fully implicit exponential finite difference methods  
*Bilge Inan and Ahmet Refik Bahadir* 547–556
- Direct approach for solving nonlinear evolution and two-point boundary value problems  
*Jonu Lee and Rathinasamy Sakthivel* 893–909
- Exact solutions for nonlinear variants of Kadomtsev–Petviashvili  $(n, n)$  equation using functional variable method  
*M Mirzazadeh and M Eslami* 911–924
- The classification of the single travelling wave solutions to the generalized Pochhammer–Chree equation  
*Hui-Ling Fan and Xin Li* 925–941

### Quantum Mechanics, Field Theories, and Special Relativity

- A quantum Hamilton–Jacobi proof of the nodal structure of the wave functions of supersymmetric partner potentials  
*S Sree Ranjani, A K Kapoor, Avinash Khare and P K Panigrahi* 237–246
- Coxeter groups  $A_4$ ,  $B_4$  and  $D_4$  for two-qubit systems  
*Ramazan Koç, M Yakup Hacıbrahimoğlu and Mehmet Koca* 247–260
- Matter-wave bright solitons in effective bichromatic lattice potentials  
*Golam Ali Sekh* 261–274
- Three-body interactions and the Landau levels using Nikiforov–Uvarov method  
*P K Bera* 359–363

Spin–momenta entanglement in moving frames: Properties of von Neumann entropy  
*S Rastgoo and M M Golshan* 385–393

### **General Relativity and Gravitation**

Anisotropic cosmological models in  $f(R, T)$  theory of gravitation  
*Shri Ram, Priyanka and Manish Kumar Singh* 67–74

A class of exact strange quark star model *S Thirukkanesh and F C Ragel* 275–286

Incompressible Einstein–Maxwell fluids with specified electric fields  
*S Hansraj, S D Maharaj and T Mthethwa* 557–567

### **Statistical Physics**

Projective synchronization of chaotic systems with bidirectional nonlinear coupling  
*Mohammad Ali Khan and Swarup Poria* 395–406

Time-varying interaction leads to amplitude death in coupled nonlinear oscillators  
*Awadhesh Prasad* 407–415

Adaptive projective synchronization between different chaotic systems with  
parametric uncertainties and external disturbances *Mayank Srivastava,*  
*Saurabh K Agrawal and Subir Das* 417–437

Lag synchronization of chaotic systems with time-delayed linear terms via impulsive  
control *Ranchao Wu and Dongxu Cao* 727–735

The integrability of an extended fifth-order KdV equation with Riccati-type  
pseudopotential *Yun-Hu Wang and Yong Chen* 737–746

Analytical travelling wave solutions and parameter analysis for the  $(2 + 1)$ -  
dimensional Davey–Stewartson-type equations *Jianping Shi,*  
*Jibin Li and Shumin Li* 747–762

A generalized exp-function method for multiwave solutions of sine-Gordon equation  
*Sheng Zhang, Jian Wang, Au-Xue Peng and Bin Cai* 763–773

Pitchfork bifurcation and vibrational resonance in a fractional-order Duffing  
oscillator *J H Yang, M A F Sanjuán, W Xiang and H Zhu* 943–957

Shape transition of state density for bosonic systems *Harshal N Deota,*  
*N D Chavda and V Potbhare* 1045–1049

Erratum to “Antisynchronization of a novel hyperchaotic system with parameter  
mismatch and external disturbances” *Fei Yu, Chunhua Wang,*  
*Yan Hu and Jinwen Yin* 1051–1053

### **Instrumentation and Techniques**

On acceleration dependence of Doppler effect in light *Sanjay M Wagh* 439–448

### **Particle Physics**

Charge radii of octet and decuplet baryons in chiral constituent quark model  
*Neetika Sharma and Harleen Dahiya* 449–465

Higgs interchange and bound states of superheavy fermions	<i>M De Sanctis</i>	467–483
Causality in 1 + 1-dimensional Yukawa model-II	<i>Asrarul Haque and Satish D Joglekar</i>	569–578
Coupling constant in dispersive model	<i>R Saleh-Moghaddam and M E Zomorrodian</i>	775–790
Next-to-next-to-leading order calculation of the strong coupling constant $\alpha_s$ by using moments of event-shape variables	<i>Samira Shoeibi Mohsenabadi and Mohammad Ebrahim Zomorrodian</i>	791–798
On the nucleon–nucleon scattering phase shifts through supersymmetry and factorization	<i>U Laha and J Bhoi</i>	959–973
A clean signal for a top-like isosinglet fermion at the Large Hadron Collider	<i>Aarti Girdhar</i>	975–986
<b>Nuclear Physics</b>		
New perspective in the use of soft rotor formula for $K = 2 \gamma$ -band	<i>J B Gupta, Satendra Sharma and Vikas Katoch</i>	75–86
A benchmark study on uncertainty of ALICE ASH 1.0, TALYS 1.0 and MCNPX 2.6 codes to estimate production yield of accelerator-based radioisotopes	<i>Seyed Amirhossein Fegghi, Zohreh Gholamzadeh, Zahra Alipoor, Akram Zali, Mahdi Joharifard, Morteza Aref and Claudio Tenreiro</i>	87–101
Systematic study of multiparticle production in nucleus–nucleus interactions at 14.6 A GeV	<i>Ashwini Kumar, G Singh and B K Singh</i>	103–115
Multiplicity distributions of shower particles and target fragments in ${}^7\text{Li}$ -Em collisions at 3 A GeV/c	<i>N N Abd Allah, Fu-Hu Liu, E A Sultan and M Hassan</i>	287–293
The steady state of a particle in a vibrating box and possible application in short pulse generation of charged particles	<i>Nandan Jha and Sudhir R Jain</i>	485–490
Low-lying ( $K^\pi = 0^+$ ) states of gadolinium isotopes	<i>Harun Reşit Yazar</i>	579–585
Elastic scattering and fusion cross-sections in ${}^7\text{Li} + {}^{27}\text{Al}$ reaction	<i>D Patel, S Santra, S Mukherjee, B K Nayak, P K Rath, V V Parkar and R K Choudhury</i>	587–602
Cryogen-free dilution refrigerator for bolometric search of neutrinoless double beta decay ( $0\nu\beta\beta$ ) in ${}^{124}\text{Sn}$	<i>V Singh, S Mathimalar, N Dokania, V Nanal, R G Pillay and S Ramakrishnan</i>	719–725
The asymptotic D-state to S-state ratio of triton	<i>Hossein Sadeghi, Reza Pourimani and Hassan Khalili</i>	799–806
Fission characteristics of ${}^{216}\text{Ra}$ formed in heavy-ion induced reactions	<i>Hadi Eslamizadeh</i>	807–817

**Atomic and Molecular Physics**

- Investigation of invisible oscillation on the photodetachment cross-section of  $H_2^-$  near a hard surface  
*Muhammad Haneef, Suneela Arif, Jehan Akbar,  
 Muhammad Zahir, Nasrullah Shah and Kamran Abid* 117–126

**Electromagnetism, Optics, Acoustics, Heat Transfer, Classical Mechanics and Fluid Dynamics**

- Vibrational resonance in the Morse oscillator  
*K Abirami, S Rajasekar and M A F Sanjuan* 127–141
- A simplistic pedagogical formulation of a thermal speed distribution using a relativistic framework  
*Ashmeet Singh* 143–156
- Erratum to: A simplistic pedagogical formulation of a thermal speed distribution using a relativistic framework  
*Ashmeet Singh* 365
- Temporal dynamics of high repetition rate pulsed single longitudinal mode dye laser  
*G Sridhar, V S Rawat, S Singh and L M Gantayet* 295–308
- Analytical model of transient thermal effect on convectional cooled end-pumped laser rod  
*Khalid S Shibib,  
 Mohammad A Munshid and Kadim A Hubiter* 603–615
- Benchmarking and scaling studies of pseudospectral code Tarang for turbulence simulations  
*Mahendra K Verma, Anando Chatterjee,  
 K Sandeep Reddy, Rakesh K Yadav, Supriyo Paul,  
 Mani Chandra and Ravi Samtaney* 617–629
- Monitoring foam coarsening using a computer optical mouse as a dynamic laser speckle measurement sensor  
*Jáder Guerrero,  
 Enrique Mejia-Ospino and Rafael Cabanzo* 987–994
- High harmonic generation in  $H_2^+$  and  $HD^+$  by two-colour femtosecond laser pulses  
*Farzana Sharmin, Samir Saha and S S Bhattacharyya* 995–1007

**Plasma Physics**

- Plasma response to transient high voltage pulses  
*S Kar and S Mukherjee* 35–66
- Microwave power coupling with electron cyclotron resonance plasma using Langmuir probe  
*S K Jain, V K Senecha, P A Naik,  
 P R Hannurkar and S C Joshi* 157–167
- Nonlinear propagation of ion-acoustic waves in a degenerate dense plasma  
*M M Masud and A A Mamun* 169–176
- Nonplanar ion-acoustic shocks in electron–positron–ion plasmas: Effect of superthermal electrons  
*Deb Kumar Ghosh, Prasanta Chatterjee,  
 Pankaj Kumar Mandal and Biswajit Sahu* 491–501

- Effect of nonthermal distributed electrons and temperature on phase shifts during the collision of inward and outward ion-acoustic solitary waves in nonplanar geometry  
*Uday Narayan Ghosh, Prasanta Chatterjee and Deb Kumar Ghosh* 631–640
- Fundamental modes of new dispersive SH-waves in piezoelectromagnetic plate  
*A A Zakharenko* 819–827
- Development of online quasimonochromatic X-ray backlighter for high energy density physics studies  
*S Chaurasia, P Leshma and D S Munda* 829–838
- Condensed Matter Physics**
- Characterization of pure and copper-doped iron tartrate crystals grown in silica gel  
*V Mathivanan and M Haris* 177–187
- Quantum capacitance of the armchair-edge graphene nanoribbon  
*Ling-Feng Mao* 309–317
- Effect of doping and annealing on the physical properties of ZnO:Mg nanoparticles  
*Saber Farjami Shayesteh and Armin Ahmadi Dizgah* 319–330
- On the determination of the mutual exclusion statistics parameter  
*Saptarshi Mandal* 503–509
- Performance assessment of nanoscale Schottky MOSFET as resonant tunnelling device: Non-equilibrium Green's function formalism  
*Zahra Ahangari and Morteza Fathipour* 511–520
- Thermoluminescence glow curve involving any extent of retrapping or any order of kinetics  
*Jai Prakash* 521–533
- Low-limit detection of NO<sub>2</sub> by longitudinal mode selection in a photoacoustic resonant system  
*F Yehya and A K Chaudhary* 535–545
- Convectively driven flow past an infinite moving vertical cylinder with thermal and mass stratification  
*Rudra Kanta Deka and Ashish Paul* 641–665
- Experimental study of yttrium barium copper oxide superconducting tape's critical current under twisting moment  
*Ziauddin Khan, Ananya Kundu and Subrata Pradhan* 667–676
- Boson bound states in the  $\beta$ -Fermi–Pasta–Ulam model  
*Xin-Guang Hu, Ju Xiang, Zheng Jiao, Yang Liu, Guo-Qiu Xie and Ke Hu* 839–848
- Effective thermal conductivity of condensed polymeric nanofluids (nanosolids) controlled by diffusion and interfacial scattering  
*M R Nisha, M S Jayalakshmy and J Philip* 849–864
- Magnetic field effect on state energies and transition frequency of a strong-coupling polaron in an anisotropic quantum dot  
*Wei Xiao and Jing-Lin Xiao* 865–871
- Phase transition properties of a cylindrical ferroelectric nanowire  
*Wang Ying and Yang Xiong* 873–883

- Elastic and piezoelectric properties, sound velocity and Debye temperature of (B3) boron-bismuth compound under pressure *S Daoud, N Bioud and N Lebgaa* 885–892
- Statistical model of stress corrosion cracking based on extended form of Dirichlet energy *Harry Yosh* 1009–1019
- Phonon dispersions in graphene sheet and single-walled carbon nanotubes  
*Dinesh Kumar, Veena Verma,  
H S Bhatti and Keya Dharamvir* 1021–1035

### **Interdisciplinary Physics and Materials Science**

- Novel experimentally observed phenomena in soft matter *Ranjini Bandyopadhyay* 3–34
- Preparation and investigation of optical, structural, and morphological properties of nanostructured ZnO:Mn thin films  
*E Amoupour, F E Ghodsi, H Andarva  
and A Abdolazadeh Ziabari* 331–341
- Oscillation death in a coupled van der Pol–Mathieu system  
*Madhurjya P Bora and Dipak Sarmah* 677–690

### **Astronomy and Astrophysics**

- Solar diurnal anisotropy measured using muons in GRAPES-3 experiment in 2006  
*P K Mohanty, D Atri, S R Dugad, S K Gupta,  
B Hariharan, Y Hayashi, A Jain, S Kawakami,  
S D Morris, P K Nayak, A Oshima and B S Rao* 343–357
- Observational constraints on modified Chaplygin gas in Horava–Lifshitz gravity with dark radiation  
*B C Paul, P Thakur and M M Verma* 691–718
- Dynamo in protostars  
*Mahendra K Verma,  
Bidya Binay Karak and Rohit Kumar* 1037–1043
