National Workshop on Coding Theory and Cryptography

September 5-8, 2001

organised by

Centre for Interdisciplinary Studies
Cochin University of Science and Technology

Objective of the Workshop

Coding theory and cryptography are two inter-related branches of applied algebra that find increasing applications in communication theory, data security and many other areas of information technology. This workshop will discuss the basics and applications of algebraic coding theory and cryptography, public key cryptosystems, network security, e-commerce and other interdisciplinary aspects of the theme.

Participants

Research scholars/teachers from Academic Institutions and those from Software Development Centres, National Laboratories and other Research and Development Organisations.

Last Date: 30 July 2001.
