

Refresher Course on Lasers and Applications in Chemical Processes

sponsored by Indian Academy of Sciences, Bangalore
at National Centre for Ultrafast Processes, University of Madras, Chennai
January 19–31, 2004

A Refresher Course on Lasers and Applications in Chemical Processes for postgraduate college and university teachers will be held at the National Centre for Ultrafast Processes, University of Madras, Taramani Campus, Chennai 600 113 during January 19-31, 2004.

The aim of the Refresher Course is to motivate the chemistry and physics teachers to introduce the application of lasers in the chemistry and physics teaching and research.

The two-week course will introduce the basics of lasers, including principles of laser action, laser-active materials, solid state lasers, dye lasers and gas lasers, CW and pulsed lasers, modes of laser, mode locking, Q-switching, nonlinear optical materials, electro-optic and magneto-optic materials. It will also include laboratory demonstration experiments in selected areas of fluorescence and pump-probe methods.

Teachers who wish to participate in the Refresher Course should submit their brief curriculum vitae (including name, date of birth, email and postal address, educational qualifications, teaching experience, courses taught, positions held, etc.) along with a brief write-up as to why they would like to participate in this course and their expectations from the Course. The applications may be sent to:

Dr P Ramamurthy, Course Coordinator
Refresher Course on Lasers and Applications in Chemical Processes
National Centre for Ultrafast Processes, University of Madras
Taramani Campus, Chennai 600 113, India.

Tel.: 044-2448 0962, 044-2492 5006, Fax: 044-2492 6709; Email: prm60@hotmail.com

Preference will be given to teachers below 45 years of age. Selected teachers will be provided local hospitality and round trip train fare (I Class or III AC).

Last date for receipt of applications : 15 October 2003
