

Flowering Trees

Toona ciliata M. Roem. subsp. *ciliata* Bahadur var. *ciliata* Bahadur Syn. *Cedrela toona* (Indian Toon or Indian Mahogany) of Meliaceae is a large handsome evergreen tree with a dense spreading crown. Leaves are compound, alternate with large leaflets. Flowers are a cm long, fragrant and borne on large drooping terminal clusters. They are unisexual, both male and female flowers appearing on the same tree. Fruit is 2-3 cm long and five lobed and star-like on dehiscence. Seeds are winged.
