

Flowering Trees

Haldina cordifolia (Roxb.) Ridsd. Syn. *Adina cordifolia* (Roxb.) Hook.f. ex Brandis (Yellow Cadamba) of Rubiaceae is a large and handsome deciduous tree. Leaves are simple, large, orbicular, and drawn abruptly at the apex. Flowers are small, yellowish and aggregate into small spherical heads. The corolla is funnel-shaped with five stamens inserted at its mouth. Fruit is a capsule.
