

Flowering Trees

Clausena anisata (Willd.) Hook.f. ex Benth. (Syn. *C.dentata* (Willd.) Roemer) – Black Currant Grape Lime of the family Rutaceae is a small aromatic evergreen tree. Leaves are odd-pinnate with elliptic-ovate and oblique leaflets. Inflorescence is a raceme and flowers are greenish-white, and 4-merous. Fruit is an ovoid small berry (2.0 cm across), white with age. The pulp is edible.
