

Subject Index

- Abutments
Velocity and turbulence at a wing-wall abutment 35
- Acoustic noise
Application of holography in jet acoustic studies 389
- Air-fuel combustion
Numerical study of effect of oxygen fraction on local entropy generation in a methane-air burner 641
- All solid-state exciter
A compact spark pre-ionized pulser sustainer TE-CO₂ laser 297
- Aluminium ore
Study of the dielectric parameters of aluminium ore bauxite of Mainpat area of Chhattisgarh at X-band frequency 349
- Amplitude ratios
Plane waves in a thermally conducting viscous liquid 27
- Anisotropic medium
Reflection of plane waves at the free surface of a fibre-reinforced elastic half-space 249
- Ascorbic acid
Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Attitude control
Precision pointing of imaging spacecraft using gyro-based attitude reference with horizon sensor updates 189
- Austempered ductile iron
The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Axial compression
Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Back-propagation neural network
Damage assesment in structure from changes in static parameter using neural networks 315
- Bayesian fusion
Bayesian and Dempster–Shafer fusion 145
- Brinkman equation
Stokes flow past a swarm of porous circular cylinders with Happel and Kuwabara boundary conditions 381
- Buckling loads
Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Candying
Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Cantilevered pipe
Vibrations of a pipe on elastic foundations 259
- Chapman-Kolmogorov prediction integral
Bayesian and Dempster–Shafer fusion 145
- Chhattisgarh region
Study of the characteristics of the soil of Chhattisgarh at the X-band frequency 343
- Closed die
An upper bound solution for closed die sinter forging of hexagonal shapes 263
- Cluster-based parallel processing solution
Cluster-based centralized data fusion for tracking maneuvering targets using interacting multiple model algorithm 205
- Colour
Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Compacted/vermicular graphite iron
The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Complex dielectric constant
Study of the characteristics of the soil of Chhattisgarh at the X-band frequency 343
- Computational fluid dynamics
Numerical study of effect of oxygen fraction on local entropy generation in a methane-air burner 641

- Convolution
A combination of differential equations and coevolution in understanding the spread of an epidemic 305
- Critical CTOD
The effect of specimen thickness on the experimental and finite element characterization of CTOD in extra deep drawn steel sheets 365
- Cylindrical shell models
Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Damage assessment
Damage assesment in structure from changes in static parameter using neural networks 315
- Data fusion
Cluster-based centralized data fusion for tracking maneuvering targets using interacting multiple model algorithm 205
- Dempster–Shafer fusion
Bayesian and Dempster–Shafer fusion 145
- Dielectric parameters
Study of the dielectric parameters of aluminium ore bauxite of Mainpat area of Chhattisgarh at X-band frequency 349
- Diesel engine
Effect of EGR on the exhaust gas temperature and exhaust opacity in compression ignition engines 275
- Diffraction
Hydrodynamic coefficients for water wave diffraction by spherical structures 617
- Document image mosaicing
Document image mosaicing: A novel approach 329
- Domain decomposition
Comparative effeciencies of three parallel algorithms for nonlinear implicit transient dynamic analysis 57
- Dynamical model
A combination of differential equations and coevolution in understanding the spread of an epidemic 305
- EGR
Effect of EGR on the exhaust gas temperature and exhaust opacity in compression ignition engines 275
- Eigen value approach
Effects of fluid layer at micropolar orthotropic boundary surface 605
- Eigenvalue
Response of orthotropic micropolar elastic medium due to time harmonic source 83
- Elastic foundations
Vibrations of a pipe on elastic foundations 259
- Elastic matrix
Propagation of Love waves in an elastic layer with void pores 355
- Element-free Galerkin method
Application of meshless EFG method in fluid flow problems 285
- Entropy generation
Entropy generation in non-Newtonian fluid flow in a slider bearing 629
- Equilibrated inertia
Propagation of Love waves in an elastic layer with void pores 355
- Estimation of attitudes
Estimation of attitudes from low-cost miniaturized inertial platform using Kalman filter-based sensor fusion algorithm 217
- Exciting force
Hydrodynamic coefficients for water wave diffraction by spherical structures 617
- Exergy
Numerical study of effect of oxygen fraction on local entropy generation in a methane-air burner 641
- External transverse force
Vibrations of a pipe on elastic foundations 259
- Extra deep drawn sheets
The effect of specimen thickness on the experimental and finite element characterization of CTOD in extra deep drawn steel sheets 365
- Fibre-reinforced medium
Reflection of plane waves at the free surface of a fibre-reinforced elastic half-space 249
- Finite element method
Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Finite element method
Damage assesment in structure from changes in static parameter using neural networks 315

- Flibe coolant
 Investigations of neutronic performance of a peaceful nuclear reactor (PACER) evaluating UF₄ and THF₄ nuclides 401
- Flight safety
 Performance evaluation of multi-sensor data fusion technique for test range application 237
- Fluid layer
 Effects of fluid layer at micropolar orthotropic boundary surface 605
- Fourier transform
 Effects of fluid layer at micropolar orthotropic boundary surface 605
- Fracture criterion
 The effect of specimen thickness on the experimental and finite element characterization of CTOD in extra deep drawn steel sheets 365
- Function space
 Examining the best-fit paradigm for FEM at element level 573
- Function subspaces
 Examining the best-fit paradigm for FEM at element level 573
- Fusion explosions
 Investigations of neutronic performance of a peaceful nuclear reactor (PACER) evaluating UF₄ and THF₄ nuclides 401
- General yielding fracture mechanics
 The effect of specimen thickness on the experimental and finite element characterization of CTOD in extra deep drawn steel sheets 365
- Genetic algorithms
 Techniques based on genetic algorithms for large deflection analysis of beams 589
- Graphite morphology
 The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Grey cast irons
 The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Group implicit algorithm
 Comparative efficiencies of three parallel algorithms for nonlinear implicit transient dynamic analysis 57
- Half-space
 Reflection of plane waves at the free surface of a fibre-reinforced elastic half-space 249
- Hexagonal powder perform
 An upper bound solution for closed die sinter forging of hexagonal shapes 263
- HIV
 A combination of differential equations and coevolution in understanding the spread of an epidemic 305
- Hydraulics
 Velocity and turbulence at a wing-wall abutment 35
- Hydroxymethylfurfural
 Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Imaging spacecraft
 Precision pointing of imaging spacecraft using gyro-based attitude reference with horizon sensor updates 189
- Inertial navigation systems
 Estimation of attitudes from low-cost miniaturized inertial platform using Kalman filter-based sensor fusion algorithm 217
- Initial geometric imperfections
 Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Interacting multiple model algorithm
 Cluster-based centralized data fusion for tracking maneuvering targets using interacting multiple model algorithm 205
- Jet noise
 Application of holography in jet acoustic studies 389
- J-integral
 The effect of specimen thickness on the experimental and finite element characterization of CTOD in extra deep drawn steel sheets 365
- Kalman Filter
 Bayesian and Dempster–Shafer fusion 145
- Kalman filter
 Precision pointing of imaging spacecraft using gyro-based attitude reference with horizon sensor updates 189
- Kalman filters low-cost sensors
 Estimation of attitudes from low-cost miniaturized inertial platform using Kalman filter-based sensor fusion algorithm 217

- Launch vehicles
 Performance evaluation of multi-sensor data-fusion systems in launch vehicles 175
- Legendre polynomial
 Hydrodynamic coefficients for water wave diffraction by spherical structures 617
- Likelihood
 A combination of differential equations and coevolution in understanding the spread of an epidemic 305
- Local entropy generation
 Numerical study of effect of oxygen fraction on local entropy generation in a methane-air burner 641
- Love waves
 Propagation of Love waves in an elastic layer with void pores 355
- Lyapunov theory
 Guaranteed performance in reaching mode of sliding mode controlled systems 129
- Matrix decomposition
 The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Mean square error
 Damage assesment in structure from changes in static parameter using neural networks 315
- Meshless method
 Application of meshless EFG method in fluid flow problems 285
- Micropolar
 Effects of fluid layer at micropolar orthotropic boundary surface 605
- Micropolar
 Response of orthotropic micropolar elastic medium due to time harmonic source 83
- Minability of the ore
 Study of the dielectric parameters of aluminium ore bauxite of Mainpat area of Chhattisgarh at X-band frequency 349
- Miniatured inertial platform
 Estimation of attitudes from low-cost miniaturized inertial platform using Kalman filter-based sensor fusion algorithm 217
- Modified Bessel functions
 Stokes flow past a swarm of porous circular cylinders with Happel and Kuwabara boundary conditions 381
- Multi-sensor data fusion
 Performance evaluation of multi-sensor data fusion technique for test range application 237
- Multi-sensor data fusion systems
 Performance evaluation of multi-sensor data-fusion systems in launch vehicles 175
- Neutronic performance
 Investigations of neutronic performance of a peaceful nuclear reactor (PACER) evaluating UF₄ and THF₄ nuclides 401
- Newmark algorithm
 Comparative effeciences of three parallel algorithms for nonlinear implicit transient dynamic analysis 57
- Non-Newtonian fluid
 Entropy generation in non-newtonian fluid flow in a slider bearing 629
- NO_x
 Effect of EGR on the exhaust gas temperature and exhaust opacity in compression ignition engines 275
- Open channel flow
 Velocity and turbulence at a wing-wall abutment 35
- Orthogonal projection
 Examining the best-fit paradigm for FEM at element level 573
- Orthotropic
 Effects of fluid layer at micropolar orthotropic boundary surface 605
- Orthotropic
 Response of orthotropic micropolar elastic medium due to time harmonic source 83
- Output tracking error
 Guaranteed performance in reaching mode of sliding mode controlled systems 129
- Overlapping region
 Document image mosaicing: A novel approach 329
- PACER
 Investigations of neutronic performance of a peaceful nuclear reactor (PACER) evaluating UF₄ and THF₄ nuclides 401
- Packing density
 Study of the dielectric parameters of aluminium ore bauxite of Mainpat area of Chhattisgarh at X-band frequency 349

- Parallel processes
 Comparative efficiencies of three parallel algorithms for nonlinear implicit transient dynamic analysis 57
- Particle-in-cell model
 Stokes flow past a swarm of porous circular cylinders with Happel and Kuwabara boundary conditions 381
- Peaceful nuclear explosive reactor
 Investigations of neutronic performance of a peaceful nuclear reactor (PACER) evaluating UF_4 and THF_4 nuclides 401
- Phase velocity
 Reflection of plane waves at the free surface of a fibre-reinforced elastic half-space 249
- Pixel matching
 Document image mosaicing: A novel approach 329
- Plane waves
 Plane waves in a thermally conducting viscous liquid 27
- Pollution
 Effect of EGR on the exhaust gas temperature and exhaust opacity in compression ignition engines 275
- Projection theorem
 Examining the best-fit paradigm for FEM at element level 573
- Pulsar sustainer
 A compact spark pre-ionized pulsar sustainer
 TE-CO₂ laser 297
- Reaching mode
 Guaranteed performance in reaching mode of sliding mode controlled systems 129
- Redundancy management
 Performance evaluation of multi-sensor data-fusion systems in launch vehicles 175
- Reflection
 Plane waves in a thermally conducting viscous liquid 27
- Reflection
 Reflection of plane waves at the free surface of a fibre-reinforced elastic half-space 249
- Resonant overshoot mode
 A compact spark pre-ionized pulsar sustainer
 TE-CO₂ laser 297
- Satellite injection
 Performance evaluation of multi-sensor data-fusion systems in launch vehicles 175
- Saturable inductor
 A compact spark pre-ionized pulsar sustainer
 TE-CO₂ laser 297
- Sensor fusion algorithm
 Estimation of attitudes from low-cost miniaturized inertial platform using Kalman filter-based sensor fusion algorithm 217
- Sensory evaluation
 Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Sintering
 An upper bound solution for closed die sinter forging of hexagonal shapes 263
- Slider bearing
 Entropy generation in non-Newtonian fluid flow in a slider bearing 629
- Sliding mode controlled systems
 Guaranteed performance in reaching mode of sliding mode controlled systems 129
- Soil characteristics
 Study of the characteristics of the soil of Chhattisgarh at the X-band frequency 343
- Source strength distribution
 Application of holography in jet acoustic studies 389
- Steady state analysis
 Application of meshless EFG method in fluid flow problems 285
- Strain projections
 Examining the best-fit paradigm for FEM at element level 573
- Stress
 Stokes flow past a swarm of porous circular cylinders with Happel and Kuwabara boundary conditions 381
- Sugar syrup
 Effects of processing on nutritional composition and quality evaluation of candied celeriac 1
- Surge and heave motions
 Hydrodynamic coefficients for water wave diffraction by spherical structures 617
- Target tracking
 Cluster-based centralized data fusion for tracking maneuvering targets using interacting multiple model algorithm 205
- TE-CO₂ laser
 A compact spark pre-ionized pulsar sustainer
 TE-CO₂ laser 297

- Test-Range applications
 Performance evaluation of multi-sensor data fusion technique for test range application 237
- Thermal cycling resistance
 The role of graphite morphology and matrix structure on low frequency thermal cycling of cast irons 117
- Thermal relaxation times
 Plane waves in a thermally conducting viscous liquid 27
- Thermally conducting
 Plane waves in a thermally conducting viscous liquid 27
- Three-dimensional flow
 Velocity and turbulence at a wing-wall abutment 35
- Time harmonic source
 Response of orthotropic micropolar elastic medium due to time harmonic source 83
- Trajectory information
 Performance evaluation of multi-sensor data fusion technique for test range application 237
- Transient analysis
 Application of meshless EFG method in fluid flow problems 285
- Transient dynamic analysis
 Comparative efficiencies of three parallel algorithms for nonlinear implicit transient dynamic analysis 57
- Transverse shear
 Experimental investigations on buckling of cylindrical shells under axial compression and transverse shear 93
- Tribomechanical micronization
 Tribomechanical micronization and activation of whey protein concentrate and zeolite 13
- Turbulent flow
 Velocity and turbulence at a wing-wall abutment 35
- Two-dimensional fluid flow
 Application of meshless EFG method in fluid flow problems 285
- Ultrasonic treatment
 Tribomechanical micronization and activation of whey protein concentrate and zeolite 13
- Vibrations of pipes
 Vibrations of a pipe on elastic foundations 259
- Viscous liquid
 Plane waves in a thermally conducting viscous liquid 27
- Void pores
 Propagation of Love waves in an elastic layer with void pores 355
- Volume fraction of pores
 Propagation of Love waves in an elastic layer with void pores 355
- Vorticity
 Stokes flow past a swarm of porous circular cylinders with Happel and Kuwabara boundary conditions 381
- Wave fronts
 Propagation of Love waves in an elastic layer with void pores 355
- Whey protein
 Tribomechanical micronization and activation of whey protein concentrate and zeolite 13
- X-band frequency
 Study of the characteristics of the soil of Chhattisgarh at the X-band frequency 343
- Zeolite
 Tribomechanical micronization and activation of whey protein concentrate and zeolite 13
