

Subject Index

- Acoustic emission
 Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- Activation energy
 Size effect on strength and lifetime probability distributions of quasibrittle structures 17
- Active force control
 Reducing friction-induced vibration using intelligent active force control (AFC) with piezoelectric actuators 637
- Adhesive bond
 Fatigue de-bond growth in adhesively bonded single lap joints 79
- AFM techniques
 Investigation the Al–Fe–Cr–Ti nano composites structures with using XRD and AFM techniques 657
- Aluminum
 Investigation the Al–Fe–Cr–Ti nano composites structures with using XRD and AFM techniques 657
- Aluminum alloys
 Comparative evaluation of tungsten inert gas and laser beam welding of AA5083-H321 587
- Ammonium dichromate
 Stabilization of chromium salt in ordinary portland cement 731
- ANOVA
 Statistical investigation of hydraulic driven circular interpolation motions 557
- Authentication
 A robust and secure watermarking scheme based on singular values replacement 425
- Baffle block
 Enhancement of cell characteristics via baffle blocks in a proton exchange membrane fuel cell 207
- Ballistic impact
 Simulation of depth of penetration during ballistic impact on thick targets using a one-dimensional discrete element model 261
- Biometrics
 Face recognition using Krawtchouk moment 441
- Block mean intensity value
 Wavelet packet transform-based robust video watermarking technique 371
- Boundary lubrication
 Effect of solid lubricants on friction and wear behaviour of alloyed gray cast iron 569
- Brick
 A comparative study on the use of fly ash and phosphogypsum in the brick production 595
- Brittle failure
 Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- Buckling
 Buckling analysis and small scale effect of biaxially compressed graphene sheets using non-local elasticity theory 461
- Burnishing maps
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Capacity curves
 Seismic performance evaluation of existing RC buildings designed as per past codes of practice 281
- Carbon fibre, silicon carbide composites
 Synthesis of carbon fibre-reinforced, silicon carbide composites by soft-solution approach 493
- Carbothermal reduction
 Synthesis of carbon fibre-reinforced, silicon carbide composites by soft-solution approach 493
- CARDIFRC
 Influence of micro-structural parameters and thermal cycling on the properties of CARDIFRC 125
- Circular interpolation motion
 Statistical investigation of hydraulic driven circular interpolation motions 557

- Circularity error
 Statistical investigation of hydraulic driven circular interpolation motions 557
- Clay
 A comparative study on the use of fly ash and phosphogypsum in the brick production 595
- Clustering
 Fuzzy clustering of mechanisms 539
- CNC
 Statistical investigation of hydraulic driven circular interpolation motions 557
- Cohesive crack model
 Analysis of mixed-mode fracture in concrete using interface elements and a cohesive crack model 187
- Cohesive stress
 Effect of loading condition, specimen geometry, size-effect and softening function on double-*K* fracture parameters of concrete 3
- Compact tension test
 Effect of loading condition, specimen geometry, size-effect and softening function on double-*K* fracture parameters of concrete 3
- Compressive strength
 Effects of fly ash fineness on the mechanical properties of concrete 389
- Concrete
 Effects of fly ash fineness on the mechanical properties of concrete 389
 Degree of coupling in high-rise mixed shear walls structures 481
- Conductometry
 Stabilization of chromium salt in ordinary portland cement 731
- Contrast stretching
 Automated image enhancement using power law transformations 739
- Corroded steel plate
 Plastic collapse load of corroded steel plates 341
- Coupled shear walls
 Degree of coupling in high-rise mixed shear walls structures 481
- Covariance matrix
 An efficient similarity measure technique for medical image registration 709
- Crack tip constraint
 Quasi-static crack tip fields in rate-sensitive FCC single crystals 149
- Crystal plasticity
 Quasi-static crack tip fields in rate-sensitive FCC single crystals 149
- Damage tolerant evaluation
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- De-bond growth
 Fatigue de-bond growth in adhesively bonded single lap joints 79
- Decentralized controller
 A set of decentralized PID controllers for an *n* - link robot manipulator 405
- DeConverter
 Punjabi to UNL enconversion system 299
- Deep beams
 Evaluation of size effect on shear strength of reinforced concrete deep beams using refined strut-and-tie model 89
- Degree of coupling
 Degree of coupling in high-rise mixed shear walls structures 481
- Depth of penetration
 Simulation of depth of penetration during ballistic impact on thick targets using a one-dimensional discrete element model 261
- Differential microcalorimetry
 Stabilization of chromium salt in ordinary portland cement 731
- Dimensional analysis
 Fatigue crack growth due to overloads in plain concrete using scaling laws 107
- Discrete element method
 Simulation of depth of penetration during ballistic impact on thick targets using a one-dimensional discrete element model 261
- Double-*K* fracture parameters
 Effect of loading condition, specimen geometry, size-effect and softening function on double-*K* fracture parameters of concrete 3
- Dynamic continuous improvement
 A review of designing machine tool for leanness 241
- EEW
 Analysis of electrical explosion of wire systems for the production of nanopowder 629
- Eigenvalues
 An efficient similarity measure technique for medical image registration 709

- Electromagnetic emission
 Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- Element evolution
 Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- Embedding
 Watermarking patient data in encrypted medical images 723
- EnConverter
 Punjabi to UNL enconversion system 299
- Encryption
 Watermarking patient data in encrypted medical images 723
- Entropy-based algorithm
 Fuzzy clustering of mechanisms 539
- Error analysis
 Error analysis to improve the speech recognition accuracy on Telugu language 747
- Experimental and analytical solutions
 Modified Adomian decomposition method for fracture of laminated uni-directional composites 33
- F-measure
 Error analysis to improve the speech recognition accuracy on Telugu language 747
- Face recognition
 Face recognition using Krawtchouk moment 441
- Fatigue
 Fatigue de-bond growth in adhesively bonded single lap joints 79
 Fatigue crack growth due to overloads in plain concrete using scaling laws 107
- Fatigue and fracture
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- Fatigue loading
 Residual strength evaluation of concrete structural components under fatigue loading 133
- FEA
 Fatigue de-bond growth in adhesively bonded single lap joints 79
- Feature extraction
 Face recognition using Krawtchouk moment 441
- FEM
 Plastic collapse load of corroded steel plates 341
- Fineness
 Effects of fly ash fineness on the mechanical properties of concrete 389
- Finite elements
 Quasi-static crack tip fields in rate-sensitive FCC single crystals 149
- Flowshop
 Minimizing makespan for a no-wait flowshop using genetic algorithm 695
- Fly ash
 Effects of fly ash fineness on the mechanical properties of concrete 389
 A comparative study on the use of fly ash and phosphogypsum in the brick production 595
- Four-point bend test
 Effect of loading condition, specimen geometry, size-effect and softening function on double- K fracture parameters of concrete 3
- Fourier transform infrared spectroscopy
 Stabilization of chromium salt in ordinary portland cement 731
- Fracture mechanics
 Residual strength evaluation of concrete structural components under fatigue loading 133
- Fracture of laminated uni-directional composites
 Modified Adomian decomposition method for fracture of laminated uni-directional composites 33
- Friction
 Effect of solid lubricants on friction and wear behaviour of alloyed gray cast iron 569
- Friction-induced vibration
 Reducing friction-induced vibration using intelligent active force control (AFC) with piezoelectric actuators 637
- Friction stir processing
 Microstructure and microhardness of AA1050/TiC surface composite fabricated using friction stir processing 579
- Fuel cell
 Enhancement of cell characteristics via baffle blocks in a proton exchange membrane fuel cell 207
- Fully equivalent operational model
 Cut-HDMR-based fully equivalent operational model for analysis of unreinforced masonry structures 609

- Fuzzy C-means algorithm
 Fuzzy clustering of mechanisms 539
- Fuzzy logic estimator
 Reducing friction-induced vibration using intelligent active force control (AFC) with piezoelectric actuators 637
- Genetic algorithm
 Fuzzy clustering of mechanisms 539
- Genetic algorithm (GA)
 Minimizing makespan for a no-wait flowshop using genetic algorithm 695
- Genetic algorithms
 Comparison of multi-objective evolutionary approaches for task scheduling in distributed computing systems 675
- Gerschgorin bound
 An efficient similarity measure technique for medical image registration 709
- Gerschgorin circle
 An efficient similarity measure technique for medical image registration 709
- Graphene sheet
 Buckling analysis and small scale effect of biaxially compressed graphene sheets using non-local elasticity theory 461
- Groundwater contamination
 Simulation–optimization model for groundwater contamination remediation using mesh-free point collocation method and particle swarm optimization 351
- High dimensional model representation
 Cut-HDMR-based fully equivalent operational model for analysis of unreinforced masonry structures 609
- Histogram testing
 Size effect on strength and lifetime probability distributions of quasibrittle structures 17
- Hydraulic positioning
 Statistical investigation of hydraulic driven circular interpolation motions 557
- Image enhancement
 Automated image enhancement using power law transformations 739
- Initial value problems
 Modified Adomian decomposition method for fracture of laminated uni-directional composites 33
- Interconnected system
 A set of decentralized PID controllers for an n - link robot manipulator 405
- Interface elements
 Analysis of mixed-mode fracture in concrete using interface elements and a cohesive crack model 187
- Interfaces
 Synthesis of carbon fibre-reinforced, silicon carbide composites by soft-solution approach 493
- Interval data
 Solving the minimum flow problem with interval bounds and flows 665
- Kharitnov theorem
 A set of decentralized PID controllers for an n - link robot manipulator 405
- Krawtchouk moment
 Face recognition using Krawtchouk moment 441
- Lap joint
 Fatigue de-bond growth in adhesively bonded single lap joints 79
- Laser beam welding
 Comparative evaluation of tungsten inert gas and laser beam welding of AA5083-H321 587
- Lean assessment
 A review of designing machine tool for leanness 241
- Lean machine tool
 A review of designing machine tool for leanness 241
- Leanness
 A review of designing machine tool for leanness 241
- Levy's solution
 Buckling analysis and small scale effect of biaxially compressed graphene sheets using non-local elasticity theory 461
- Linear matrix inequality
 A set of decentralized PID controllers for an n - link robot manipulator 405
- Linear quadratic regulator
 Decentralized linear quadratic power system stabilizers for multi-machine power systems 521
- Machine translation
 Punjabi to UNL enconversion system 299

- Magnetic resonance images (MRI)
 An efficient similarity measure technique for medical image registration 709
- Material removal rate
 Multi-objective parametric optimization of powder mixed electro-discharge machining using response surface methodology and non-dominated sorting genetic algorithm 223
- Mechanical and fracture properties
 Influence of micro-structural parameters and thermal cycling on the properties of CARDIFRC 125
- Mechanical properties
 Comparative evaluation of tungsten inert gas and laser beam welding of AA5083-H321 587
- Mechanisms
 Fuzzy clustering of mechanisms 539
- Medical images
 Watermarking patient data in encrypted medical images 723
- Meshfree method
 Simulation–optimization model for ground-water contamination remediation using mesh-free point collocation method and particle swarm optimization 351
- Mesoscale modelling
 Cut-HDMR-based fully equivalent operational model for analysis of unreinforced masonry structures 609
- Micro hardness
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Microstructure
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Micro-structure
 Influence of micro-structural parameters and thermal cycling on the properties of CARDIFRC 125
- Minimum flow problem
 Solving the minimum flow problem with interval bounds and flows 665
- Mixed-mode fracture
 Analysis of mixed-mode fracture in concrete using interface elements and a cohesive crack model 187
- Mode coupling
 Reducing friction-induced vibration using intelligent active force control (AFC) with piezoelectric actuators 637
- Modified Adomian decomposition method
 Modified Adomian decomposition method for fracture of laminated uni-directional composites 33
- Moving least squares approximation
 Cut-HDMR-based fully equivalent operational model for analysis of unreinforced masonry structures 609
- Multi-objective
 Comparison of multi-objective evolutionary approaches for task scheduling in distributed computing systems 675
- Multiresolution analysis
 Wavelet packet transform-based robust video watermarking technique 371
- MVCCI
 Fatigue de-bond growth in adhesively bonded single lap joints 79
- Nano composite
 Investigation the Al–Fe–Cr–Ti nano composites structures with using XRD and AFM techniques 657
- Nanopowder
 Analysis of electrical explosion of wire systems for the production of nanopowder 629
- Nearest neighbour classifier
 Face recognition using Krawtchouk moment 441
- Network flows
 Solving the minimum flow problem with interval bounds and flows 665
- Neutron measurements
 Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- No-wait
 Minimizing makespan for a no-wait flowshop using genetic algorithm 695
- Non-dominated sorting
 Comparison of multi-objective evolutionary approaches for task scheduling in distributed computing systems 675
- Non-local elasticity theory
 Buckling analysis and small scale effect of biaxially compressed graphene sheets using non-local elasticity theory 461

- Non-region of interest
 - Watermarking patient data in encrypted medical images 723
- Non-sorted genetic algorithm
 - Multi-objective parametric optimization of powder mixed electro-discharge machining using response surface methodology and non-dominated sorting genetic algorithm 223
- Nonlinear fracture mechanics
 - Analysis of mixed-mode fracture in concrete using interface elements and a cohesive crack model 187
- Nonlinear static analysis
 - Seismic performance evaluation of existing RC buildings designed as per past codes of practice 281
- Normalized cross-correlation
 - An efficient similarity measure technique for medical image registration 709
- Numerical methods
 - A reduced polynomial chaos expansion method for the stochastic finite element analysis 319
- One-dimensional models
 - Simulation of depth of penetration during ballistic impact on thick targets using a one-dimensional discrete element model 261
- Ordinary portland cement
 - Stabilization of chromium salt in ordinary portland cement 731
- Parametric study
 - Enhancement of cell characteristics via baffle blocks in a proton exchange membrane fuel cell 207
- Particle swarm optimization
 - Simulation–optimization model for ground-water contamination remediation using mesh-free point collocation method and particle swarm optimization 351
 - Comparison of multi-objective evolutionary approaches for task scheduling in distributed computing systems 675
- Peak shear demand
 - Degree of coupling in high-rise mixed shear walls structures 481
- Performance based evaluation
 - Seismic performance evaluation of existing RC buildings designed as per past codes of practice 281
- Phosphogypsum
 - A comparative study on the use of fly ash and phosphogypsum in the brick production 595
- Physical and mechanical properties
 - A comparative study on the use of fly ash and phosphogypsum in the brick production 595
- Piezoelectric actuators
 - Reducing friction-induced vibration using intelligent active force control (AFC) with piezoelectric actuators 637
- Piezonuclear reactions
 - Electromagnetic and neutron emissions from brittle rocks failure: Experimental evidence and geological implications 59
- Plain concrete
 - Fatigue crack growth due to overloads in plain concrete using scaling laws 107
 - Residual strength evaluation of concrete structural components under fatigue loading 133
- Plastic collapse
 - Plastic collapse load of corroded steel plates 341
- Point collocation method
 - Simulation–optimization model for ground-water contamination remediation using mesh-free point collocation method and particle swarm optimization 351
- Polarization curves
 - Enhancement of cell characteristics via baffle blocks in a proton exchange membrane fuel cell 207
- Polynomial chaos
 - A reduced polynomial chaos expansion method for the stochastic finite element analysis 319
- Powder mixed EDM
 - Multi-objective parametric optimization of powder mixed electro-discharge machining using response surface methodology and non-dominated sorting genetic algorithm 223
- Power law transformations
 - Automated image enhancement using power law transformations 739
- Power system stabilizer
 - Decentralized linear quadratic power system stabilizers for multi-machine power systems 521
- Probabilistic mechanics
 - Size effect on strength and lifetime probability distributions of quasibrittle structures 17

- Pronunciation dictionary modification method
 Error analysis to improve the speech recognition accuracy on Telugu language 747
- Quasi-brittle materials
 Analysis of mixed-mode fracture in concrete using interface elements and a cohesive crack model 187
- Quasi-static fields
 Quasi-static crack tip fields in rate-sensitive FCC single crystals 149
- Rate sensitivity
 Quasi-static crack tip fields in rate-sensitive FCC single crystals 149
- Reduced methods
 A reduced polynomial chaos expansion method for the stochastic finite element analysis 319
- Reinforced concrete
 Evaluation of size effect on shear strength of reinforced concrete deep beams using refined strut-and-tie model 89
- Remaining life
 Residual strength evaluation of concrete structural components under fatigue loading 133
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- Remediation, pump and treat
 Simulation–optimization model for groundwater contamination remediation using mesh-free point collocation method and particle swarm optimization 351
- Residual strength
 Residual strength evaluation of concrete structural components under fatigue loading 133
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- Residual stresses
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Response surface methodology
 Multi-objective parametric optimization of powder mixed electro-discharge machining using response surface methodology and non-dominated sorting genetic algorithm 223
- Robot manipulator
 A set of decentralized PID controllers for an n - link robot manipulator 405
- Roller burnishing
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Rough surface
 Plastic collapse load of corroded steel plates 341
- Scaling
 Size effect on strength and lifetime probability distributions of quasibrittle structures 17
- Scheduling
 Minimizing makespan for a no-wait flowshop using genetic algorithm 695
- Security
 A robust and secure watermarking scheme based on singular values replacement 425
- Self-organizing maps
 Fuzzy clustering of mechanisms 539
- Self-similarity
 Fatigue crack growth due to overloads in plain concrete using scaling laws 107
- Shallow parser
 Punjabi to UNL enconversion system 299
- Shear span-to-depth ratio
 Evaluation of size effect on shear strength of reinforced concrete deep beams using refined strut-and-tie model 89
- Simulation–optimization
 Simulation–optimization model for groundwater contamination remediation using mesh-free point collocation method and particle swarm optimization 351
- Size effect
 Effect of loading condition, specimen geometry, size-effect and softening function on double- K fracture parameters of concrete 3
 Evaluation of size effect on shear strength of reinforced concrete deep beams using refined strut-and-tie model 89
 Fatigue crack growth due to overloads in plain concrete using scaling laws 107
- Small-signal stability
 Decentralized linear quadratic power system stabilizers for multi-machine power systems 521

- Soft-solution approach
 Synthesis of carbon fibre-reinforced, silicon carbide composites by soft-solution approach 493
- Sol-gel method and XRD
 Investigation the Al-Fe-Cr-Ti nano composites structures with using XRD and AFM techniques 657
- Solid lubricants
 Effect of solid lubricants on friction and wear behaviour of alloyed gray cast iron 569
- Spectral decomposition
 A reduced polynomial chaos expansion method for the stochastic finite element analysis 319
- Speech recognition
 Error analysis to improve the speech recognition accuracy on Telugu language 747
- Splitting tensile strength
 Effects of fly ash fineness on the mechanical properties of concrete 389
- Stabilization/solidification
 Stabilization of chromium salt in ordinary portland cement 731
- Stiffened panels
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- Stochastic differential equations
 A reduced polynomial chaos expansion method for the stochastic finite element analysis 319
- Stress intensity factor
 Damage tolerant evaluation of cracked stiffened panels under fatigue loading 171
- Strut-and-tie models
 Evaluation of size effect on shear strength of reinforced concrete deep beams using refined strut-and-tie model 89
- Surface composite
 Microstructure and microhardness of AA1050/TiC surface composite fabricated using friction stir processing 579
- Surface roughness
 Multi-objective parametric optimization of powder mixed electro-discharge machining using response surface methodology and non-dominated sorting genetic algorithm 223
 Optimization of burnishing parameters and determination of select surface characteristics in engineering materials 503
- Tensile strength
 Synthesis of carbon fibre-reinforced, silicon carbide composites by soft-solution approach 493
- Tension softening
 Residual strength evaluation of concrete structural components under fatigue loading 133
- Thermal cycling
 Influence of micro-structural parameters and thermal cycling on the properties of CARDIFRC 125
- Thick target
 Simulation of depth of penetration during ballistic impact on thick targets using a one-dimensional discrete element model 261
- Three-point bend test
 Effect of loading condition, specimen geometry, size-effect and softening function on double-*K* fracture parameters of concrete 3
- TiC
 Microstructure and microhardness of AA1050/TiC surface composite fabricated using friction stir processing 579
- Tracking error
 A set of decentralized PID controllers for an *n* - link robot manipulator 405
- Transient stability
 Decentralized linear quadratic power system stabilizers for multi-machine power systems 521
- Ultra high performance fibre reinforced cement-based composite
 Influence of micro-structural parameters and thermal cycling on the properties of CARDIFRC 125
- Universal Networking Language
 Punjabi to UNL enconversion system 299
- Unreinforced masonry
 Cut-HDMR-based fully equivalent operational model for analysis of unreinforced masonry structures 609
- User-defined hinge
 Seismic performance evaluation of existing RC buildings designed as per past codes of practice 281
- Vapourization
 Comparative evaluation of tungsten inert gas and laser beam welding of AA5083-H321 587

- Variable amplitude
 Fatigue crack growth due to overloads in plain
 concrete using scaling laws 107
- Video watermarking
 Wavelet packet transform-based robust video
 watermarking technique 371
- Waste elimination
 A review of designing machine tool for
 leanness 241
- Watermarking
 A robust and secure watermarking scheme
 based on singular values replacement 425
 Watermarking patient data in encrypted
 medical images 723
- Wavelet packet transform
 Wavelet packet transform-based robust video
 watermarking technique 371
- Wear
 Effect of solid lubricants on friction and wear
 behaviour of alloyed gray cast iron 569
- Weight function
 Effect of loading condition, specimen geo-
 metry, size-effect and softening function on
 double-*K* fracture parameters of concrete 3
- XRD
 Analysis of electrical explosion of wire sys-
 tems for the production of nanopowder 629
